Toys made by the *Tiny Arcadians* last a long, long time

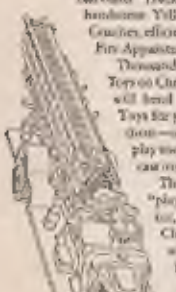
Clang! Clang! Clang!

TINY HAMMERS here merrily, tirelessly, gleefully pounding woe to the great unsuspecting soon. The Tiny Arcadians are racing madly with Father Time that Santa Claus pack may be brimming with Arcade Toys when the reindeer chargers start their journey.

Into the shipping room pour the finished toys. There they stand, ready for Santa—thousands of Chevrolet Coupes, snappy Red Baby Interurbans, Harvester Trucks, massive Mack Dump Trucks, handsome Yellow Cabs, gleaming Pagoda Safety Coaches, efficient Interurban Trailers, wonderful Mack Fire Apparatus, and many others.

Thousands of stockings will bulge with Arcade Toys on Christmas morning—because Christmas users will bend beneath their weight. There are Arcade Toys for your home, too; a letter to Santa will bring them—and endless hours of pleasure in your love or play room. Mothers heartily approve these long life, cast iron toys. Equipped with or without rubber tires.

Then, too, there is the Arcade Kitchen Set for "playing house"—a Regal Stove, Cutney Refrigerator, China Safe, Bonne Kitchen Cabinet, Table and Chairs, and a Cozia Breakfast Nook—all in spotless white lacquer, with a background that makes a real kitchen. It's better up furniture, made of cast metal, strong and sturdy.



These and many more toys will be found at all better toy stores, or write us—we'll tell you the one supplied.

ARCADE MANUFACTURING CO., Freeport, Ill.

ARCADE TOYS

"They Look Real"

(Continued from Page 743)

are, perhaps the handsomest pair of a good new school"; and Cole, now small by his success, failed to see that the estimated "perhaps" was an emphasis as Oliver Trainor's maybe." But The Pastoral Scene, besides being a triumph with the few, had become valuable as institutions with the many, a severe recently periodical had called it "one of those great creative successes that adorn not only the art of a country, but the land a century." It was his first ephemeral achievement, and he thought of the play, since it was meant, as his magazine quoting had that impression to himself without a blush. And here was a little Midland girl telling him that what she got from it was an idea that he could do better—maybe! Suffering from wounded love and from betrayal as he was, the young playwright found time to add to his other emotions a sense of outrage, to resent the sympathetic indifference that had led Cole to drive Cole and to withdraw from privacy.

"You're very kind," he said.

An unintentional bit of what he had was he pressed to her in his voice, until she wished to be excused under cover. "I haven't seen mother [illegible] to my father or mother that you were in," she said. "You see, I went to school in New York until last year, and besides our going to the theaters, some of the girls whose been abroad in the summer would bring home copies of French plays, and we'd read them, but of course my father and mother don't know what's going on, and they'd never understand that the only reason you wrote that way is because so many other people are doing the same thing too. But you couldn't. Dear, I was really serious. I thought it was—and, honestly, I was interested in parts of it."

SHE was indeed too kind, and he told her so.

"You know Mr. Cole?" she said, and she looked troubled, understanding that if she had ever seen him at all she had only seen him once, when she feared he meant to be friendly. "I'm afraid you don't say that as if you mean it. I don't know a great deal about plays, of course; I only know——"

"Don't!" He interrupted her. "You're going to say you only know what you like yourself."

"I was going to say I only know what I feel about them. The only other thing you can know about plays, when they're all pretty well done, is what somebody else feels about them, isn't it?"

For a moment he stared at her, then he said with, "I suppose so."

"And what I felt about your play——"

"Never mind," he said. "Let's not talk of that any more. I'm a little curious upon one point. Something I overheard you say on the steamer to your mother gave me the impression that you didn't know I——" He checked himself, and re-framed his sentence. "On the Olympic I think you weren't aware that I am a playwright. Were you?"

"No. I didn't know until yesterday that you were the author of that play."

"Until yesterday? How could you have learned it here, in Paris?"

SHE laughed. "That's simple. My father——" she leaned forward slightly from the waist. "Why, how queer! There he is now."

Mrs. Trainor spoke from a little distance behind her. She was approaching over the rose with Mr. and Mrs. Shuler. "Your father, Libby? Where on you see him?"

Gloria answered quickly. "I don't. I was mistaken. It's someone else." She had been looking down into the street of the Ogled Veils, but immediately she pointed in another direction. "Look at that funny woman, with those parrots. Mother, wouldn't you like——"

But Mrs. Trainor leaned over the parapet. "Where did you think you saw your father, Libby?"

"Nowhere. Look at that——"

Mrs. Trainor uttered a sharp exclamation. "It is your father," she said and pointed downward to the left. "Certainly it is he. Who in the world is that he's got with him?"

Trainor, temporarily overwhelmed at the splendid view of life afforded by the roof of the hotel, was preserving through the street of the dancing girls with Madame Montero's

XXIII

MR. SHULER immediately realized with delight in an honest confirmation of his fear. "Didn't I tell you to keep your eye on him, Alice Trainor?"

Mrs. Trainor said nothing. The low looking of the hotel was but two stories in height, and the five people now in a row close to the parapet of the roof looked down at Oriel, a theater's the famed Parisian entertainment, a fashionable night dancing-revue. Arab representations moving in many colors upon this stage, the two people in European dress were so conspicuous as any division here and tolerant in a day. Madame Montero, always dressed for the evening, as and the Honorable Andrews were recognized of her by a pearl, in every sense, with her mantle of Venetian green brocade thrown back from her long and slender figure, and her head bare except for a veil of shelled transparent enough to show the pale bronze gleam of her hair; it, she was unfortunately unaware Parisian in fabric.

No woman would have doubted that hers was a tall lady—she was understood here to be at her best and had decided to be at her best tonight. Almost affectionately she bent in now with her companions, she was talking rapidly, talking gayly, too, and smiling to the excited—and from her brilliant eyes, conspicuously seven here, somewhat—she was evidently friendly for most distinguished to them. Of the attendants of the vessel there could be no question whatever.

NEAR the corner of the two streets and only a little way from the intersection, she faced, balcony above, they passed before the bar room of the Ogled Veils; she drew her arm from his and stood facing him, still smiling upon him, but speaking in a low voice and apparently with some seriousness. The painted girl, leaning upon the doorway close by, cast a figure thrown to a few yards of narrow and splendid over with red, waited forward in a gratifying excitement; they recognized, she watched them eagerly, though not with an attention that overcame that that bestowed upon them from on high.

Mr. Shuler, however, interested himself, he supposed the encounter of an admired companion and the tall lady but a curious one of friendly parties, and he made no doubt that the lady was some worthy acquaintance of Mrs. Trainor's to whom she had introduced her husband. Trainor had probably just happened upon her in a street near the neighborhood, and they were about to continue on to the hotel, being in fact, but a few yards distant from a corner of the building now. Therefore, Mr. Shuler, understanding the better, pushed his humor to go as it would go and had no more thought of preventing a catastrophe than when he was sufficiently merry, at the church lemon at home, upon the subject of the aged pastor's proclivities.

He made his circle broader, rather than loudly vocal, and often lowered the

FINE GRADUATE COURSES: Music, Arts, Home Making, English, Drama, Secretarial. Pre-Debutante and Normal emphasizing French, Arts, Languages. Address Registrar 52 East 77th Street, New York City

"No! not that sweet, young girl!"

exclaimed a famous dressage of the 'Nineties when told of Miss Alice Doer's plan to enter college.

We no longer think of a girls' college as a prison house, yet some mothers are distressed by their daughter's ambition for a degree, or a career in business or one of the arts, believing that these things can be obtained only at the expense of her graciousness and charm.

That is not true.

We know of many good schools that will train your daughter for whatever career she elects without sacrificing in the least her charm of manner . . . schools where she will receive thorough training to fit her for college, supervised athletics to fit her for life, and at the same time, excellent experience in social contacts.

Write to us, or if you are in the neighborhood, drop in. We'd be glad to advise you—without charge, of course.

SHORT-TERM BONDS *at* 6%

Maturities: 9 Months to 3 Years
Denominations: $500 and $1,000

Secured by Guaranteed First Mortgages

THESE are early maturities of several issues of real estate bonds underwritten and recommended by THE BALTIMORE TRUST COMPANY. They are particularly suitable to banks and corporations, and also to individuals who have a preference or special use for short-term investments.

Principal and interest of the first mortgages are guaranteed by the United States Fidelity and Guaranty Company, with resources of Forty-Eight Million Dollars. Titles are guaranteed by the New York Title and Mortgage Company, with resources of Thirty-Six Million Dollars.

THE BALTIMORE TRUST COMPANY'S standards for its real estate bond underwritings have been endorsed by more than 300 National Banks, State Banks and Savings Banks, which have purchased the bonds for deposit, trust and investment funds.

The bonds are offered at par and accrued interest to yield 6%. Write to the Main Office of THE BALTIMORE TRUST COMPANY, 25 East Baltimore Street, Baltimore, Md., for booklet No. 18.

Orders may be sent to any of the following banks or banking houses:

Baltimore Company, Inc.....New York, N.Y.	Elliott Magraw & Co.....St. Paul, Minn.

More Than 300 Banks

Now Own These 6% Bonds

SINCE we last published the reasons why so many banks invest their own funds in the 6% Real Estate Bonds underwritten by THE BALTIMORE TRUST COMPANY, the number of National Banks, State Banks and Savings Banks purchasing the bonds has increased to more than 300. Their purchases range from a few thousand dollars to blocks of $100,000.

We emphasize the extent to which Real Estate Bonds underwritten by THE BALTIMORE TRUST COMPANY are favored by banks, because we believe that investors in general recognize that banks are conservative, discriminating and experienced in selecting investments.

Of course, principal, interest and titles of the first mortgages which secure our Real Estate Bond offerings are guaranteed. The United States Fidelity & Guaranty Company, with resources of Forty-Eight Millions, guarantees principal and interest; the New York Title & Mortgage Company, with resources of Thirty-Six Millions, guarantees the titles.

THE BALTIMORE TRUST COMPANY, with resources of Sixty-Five Millions, recommends the bonds as conforming strictly to the standards of *bank safety*, and as being particularly desirable for the investment of your individual funds.

Denominations $500 and $1,000; maturities 1 to 10 years; price par and accrued interest to yield 6%; State taxes up to 4½ mills refunded. Write to the Main Office of THE BALTIMORE TRUST COMPANY, 25 East Baltimore Street, Baltimore, Maryland, for booklet No. 18.

To Banks and Investment Dealers

A number of banks and investment dealers throughout the country participate with us in the sale of these bonds. Inquiries from other banks and investment dealers are invited.

Any road is a better road under Budd-Michelin Dual Wheels

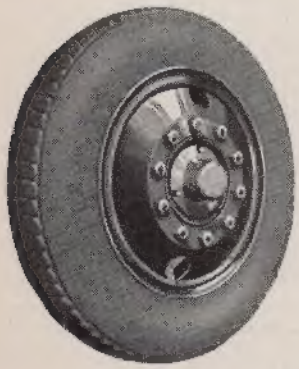
ROUGH ROADS and heavy trucks battle it out every time they meet, and both lose. There is no way to cushion the roads. But there is a way to cushion the truck and save it from damaging road-shocks . . . put it on a cushion of air!

Budd-Michelin Dual Wheels solve the problem. They have made it possible for heavy trucks to ride on *regular size* pneumatics and get tire mileage equal to that of passenger cars!

Budd-Michelin Dual Wheels started with the bus industry. They put the heavy-bus industry on air. Over 30,000 heavy buses are on Budd-Michelin Dual Wheels and they get 15,000 to 20,000 miles and more from a set of tires. Heavy trucks on Duals are getting equally high tire mileage.

Budd-Michelin Dual Wheels take the fight out of unfriendly roads. They have given the heavy truck a greater usefulness, a greater efficiency and a wider approval than it ever had before.

They permit speed with safety to the truck and the load. They mean fewer repairs. They add years to a truck's life. They cut maintenance costs. Any make of truck can be had on Budd-Michelin Dual Wheels and any truck can be converted. Write us.



BUDD

WHEEL COMPANY

Detroit

The Budd-Michelin equipment—two Budd-Michelin single wheels in front, two Budd-Michelin Dual Wheels in the rear (pairs of single wheels acting together as units). All Wheels completely interchangeable either as units or as halves of Duals. One spare.

CARLTON HOTEL

IN WASHINGTON

In the center of the exclusive residential district that lies close to the White House at the north is a new hotel that registers a protest against mere size, and against the serving of guests principally through mechanical conveniences. These alone do not make an hotel, for de luxe establishments abroad that are chosen by nobility *en voyage* usually are small, and often possess but a few of the equipments that in the States are considered essential. Regardless of modern facilities, hotels abroad make you truly a guest—not just a customer.

Such an hotel now awaits you in Washington. An hotel in the Continental manner—yet provided with all American facilities: Lift, central heat, electricity, telephone, bath attached to each chamber, running ice water; and even such ultra-modern apparatus as an air-conditioning installation to control air temperature and humidity in the public rooms.

An hotel in which those who are accustomed to the finest in Europe *will feel at home*

Opened October First

But back of, and beyond, these mechanisms is a staff composed largely of Europeans, speaking all the modern languages, serving the guest as he is accustomed to be served abroad.

The architecture, fittings, furnishings and designs of the Carlton Hotel have come largely from the Continent. All rooms have French windows. All hardware is French. In the stately entrance hall, the drawing-room and the library that replace the more usual lobby, are Austrian hand-tufted rugs, Italian renaissance and Louis XVI furniture.

There are only 257 rooms, a few available singly. Accommodations principally are in family, diplomatic and royal suites. It is recommended that you make reservations in advance, by courier or by mail. You thereby will be spared all doubt as to your comfort in Washington, and on arrival will be taken directly to your rooms, where a clerk will register you individually.

Here an hotel becomes the American ideal of luxury

An end has been put to the question as to whether the ultimate in luxury and in comfort are really found outside the homes of the tremendously wealthy. Today they are at the command of the average person—in the Carlton Hotel in Washington. Here you will find the most modern furnishings and fittings. Here you experience the delight of discovering an environment such that you can say: "This is where I belong; this is where I am at home."

Such is the Carlton Hotel in Washington. Its architecture, fittings, furnishings and designs have been inspired by both American and Continental practice. Such products as have not been available at their very best in America have been purchased abroad; thus came tiles from Holland, hardware from France, hand-tufted rugs from Austria, renaissance furniture from Italy, which also supplies the Tuscan setting of the unique and lovely Giardino, or Patio as our Spanish friends call it.

This hotel of international character shares its ownership and basic management with the famous Wardman Park Hotel, itself unique as offering all the facilities of a great American resort in a beautiful natural setting on the outskirts of the city. Erected in the center of the residential district, the new Carlton Hotel expands the Wardman service in Washington.

There are only 257 rooms, a few available singly. Accommodations principally are in family, diplomatic and royal suites. It is recommended that you make reservations in advance. You thereby will be spared all doubt as to your comfort in Washington, and on arrival will be taken directly to your rooms, where a clerk will be sent to register you individually.

THE TRADE MERREMAKER MARK

Combines the Three Greatest Health-Building Plays
Slide—Teeter-Totter—Merry-Go-Round

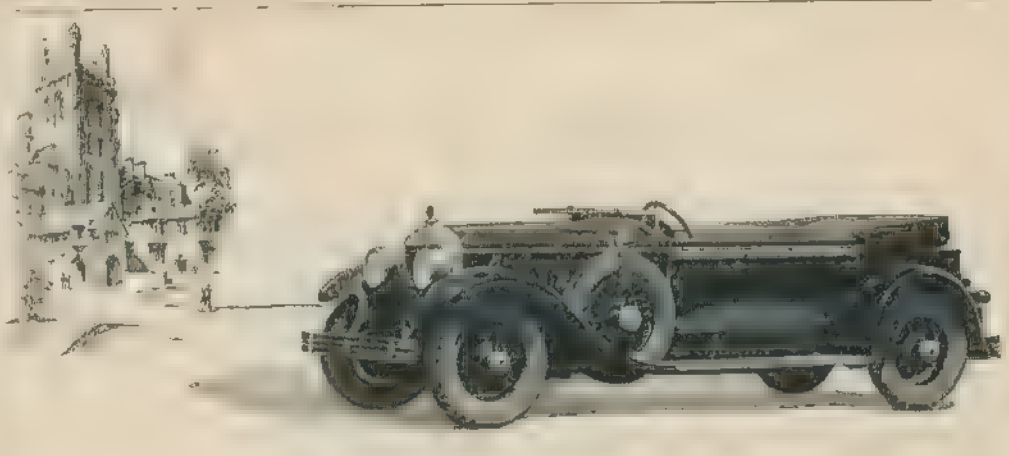
Book-Cadillac

DETROIT [illegible]

Where there's Rest at Journey's End

They say that there's a kind of restfulness to be found in the Book-Cadillac Hotel like to that of a pleasant home. You probably have found that true, you probably have found that from the west doorway up the great staircase, down the long lobby, into the elevators and up to your room there's a something, an *atmosphere* of restfulness. You've felt that this was home . . . If *you* haven't stayed here yet, we welcome you. You will find a colorful, cheerful hotel with five dining rooms, some with and some without music. There are 1200 rooms all above the seventh floor, quiet, all are outside, light and airy, all have bath. 560 of them are priced at $4 and $5 a day. The beds are the softest, the sleepiest that we could find. When you come, we'll do our utmost to make your stay with us memorable, unforgettable. They say that it is like a pleasant home



50 Body Styles and Types
500 Color Combinations
Standard—Fisher Custom Built—Fleetwood Custom Built

Cadillac's genius for leadership was never so manifest as today, when, following on the heels of the most successful year in its history, when sales increased 87.5 per cent, Cadillac inaugurates the unprecedented plan of providing 500 color and upholstery combinations, and 50 body styles and types.

Simultaneously Cadillac has added new improvements and refinements—notably in an exclusive cushion spring design that is incomparably luxurious and easeful; in added niceties of trim and fitments; in the development of new lines with larger and more curving fenders; a new radiator shell design; new and larger lamps—refinements which, in combination with an unapproached range of body styles and color selections, place the new Cadillac on a commanding pinnacle of individualized luxury and distinction.

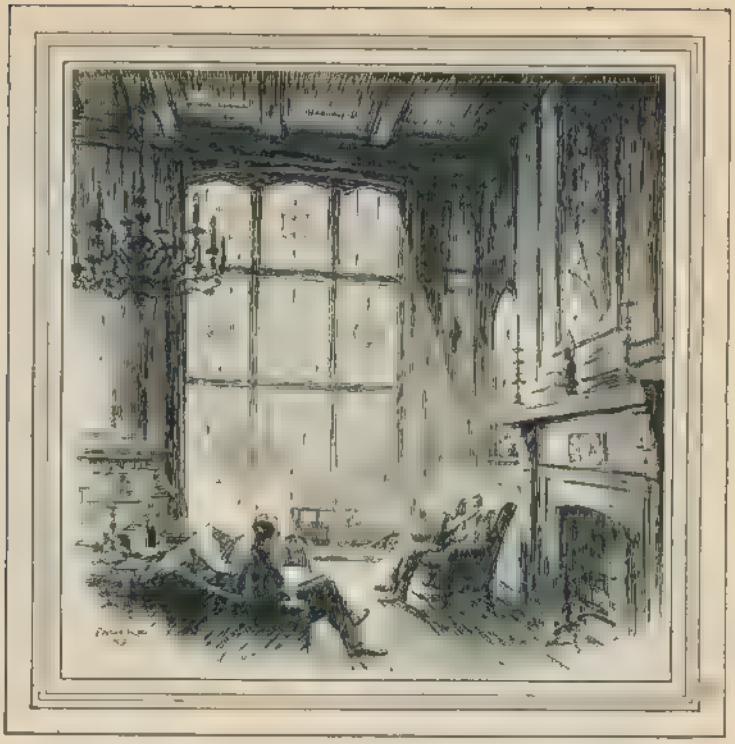
NEW 90 DEGREE

CADILLAC

DIVISION OF GENERAL MOTORS CORPORATION

Mention of Harper's Magazine is the best introduction to our advertisers

New Cadillac surpassing all previous conception



IN so far as the new, 90-degree, eight-cylinder Cadillac is concerned, discussion of mechanical supremacy is unnecessary and almost useless.

That supremacy proclaims itself unmistakably in performance as it has in every Cadillac which preceded the present splendidly successful car.

Once again in the unprecedented sales of the new, 90-degree, eight-cylinder Cadillac we are witnessing that silent turning away —that return to something solid and assured and unmistakably superior which Cadillac has always provided.

In this case, however, Cadillac finds itself almost the only occupant of its own fine car field—and the old Cadillac clientele is being so enormously augmented by new accessions that the careful, painstaking capacities of this great plant are being taxed to the utmost.

The Cadillac market is growing—it will surpass all previous conception in the immediate future.

for Economical Transportation

CHEVROLET

Easy to Load

THIS sturdy One-Ton Chevrolet Truck is easy to load or unload because its floor is level with or lower than practically all loading platforms.

Also, its turning radius is extremely short, enabling the truck to swing quickly into position.

Time saved in loading—speed between stops—the big, powerful, economical Chevrolet valve-in-head motor—the extra strong rear axle—and the most rugged truck - type construction throughout — these are some of the many advantages that Chevrolet engineers have built into the Chevrolet One-Ton Truck—this is why your most economical investment in a one-ton truck is to be found in a Chevrolet.

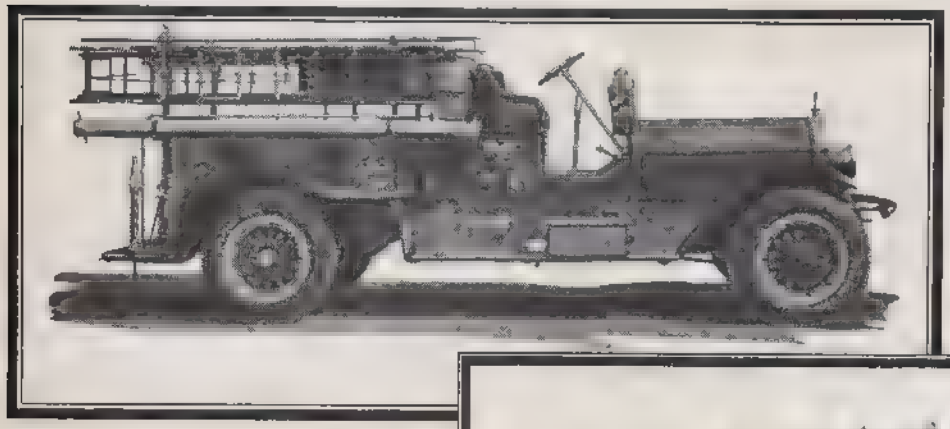
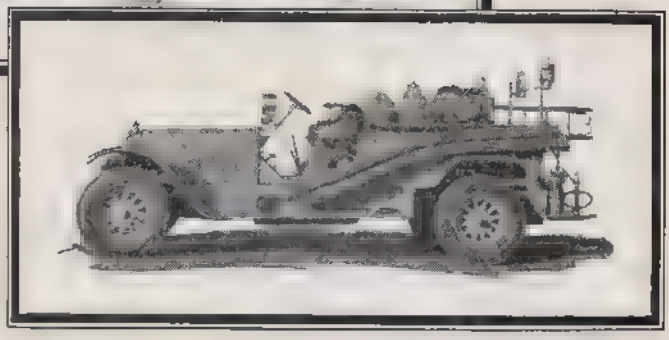
AMERICANS SHOULD PRODUCE THEIR OWN RUBBER - - - Harvey Firestone





New Fire Equipment of the Hagerstown, Md., Department. Firestone Heavy Duty Pneumatics were specified

Where Dependability Is VITAL

Rugged strength to bear the strains of emergency driving—to hold the road on sharp turns—to reduce side sway and insure greater safety and endurance. These are the qualities which cause leading fire departments to standardize on Firestone.

The Firestone non-skid tread insures firm grip with positive traction under all weather conditions. The instant response to braking or acceleration adds security in traffic.

Gum-dipping, the exclusive Firestone process, insulates every strand of every cord with live rubber, minimizing friction and destructive heat. The result is a tire of greater strength and capacity for rugged service.

Your Firestone dealer can give you many interesting tire facts. See him and understand Firestone economy.

HEAVY DUTY PNEUMATICS FOR FIRE APPARATUS

AMERICANS SHOULD PRODUCE THEIR OWN RUBBER - - - Harvey Firestone

Alhambra, California, Fire Department Apparatus equipped with Firestone Gum Dipped Heavy Duty Pneumatics.

Firestone Pneumatics Engineered for Fire Apparatus

The exclusive Firestone non-skid tread grips on slippery streets, insures easier steering, reduces side sway, holds the road on the turns, responds quickly to brake or accelerator in traffic.

Gum-Dipping—the exclusive Firestone process, by impregnating every fiber of every cord with rubber—preserves the fabric against deterioration—minimizes friction and heat within the cords—builds extra strength and endurance throughout the cord fabric.

Longer mileage from Firestone Pneumatics brings fire apparatus operating costs down—one of the reasons why leading fire departments in all parts of the country are standardizing on Firestone.

Big Returns From a Small Investment

The steadily increasing use of the Fordson tractor for a wide variety of municipal work is a good indication of the splendid satisfaction which these machines are giving.

Winter and summer, Fordson tractors provide power for such city jobs as *excavating, sewer work, back filling, road and street construction and maintenance, garbage disposal, pumping or general hauling.*

A typical instance is cited in the experience of the village of Hinsdale, Ill. Four years ago a Fordson was purchased primarily to operate a mud pump in an open drainage ditch. When this job was completed the Fordson was attached to a 5-yard dump wagon. It has replaced three horses and an extra man, hauling cinders besides being much faster on the road.

In countless cities, large and small, all over the United States the Fordson Tractor is being used to cut costs and speed up municipal work.

Power and Speed insure greater Work Capacity

GMC TRUCKS
PRODUCT OF GENERAL MOTORS

In the purchase of a motor-truck, *Work Capacity* will be considered first. Your truck must be powerful enough to handle its loads on the steep hills and in heavy going, without sacrificing the speed that governs its earnings.

Every GMC model; from the 1 ton to the 15 ton Big Brute Tractor-Truck; is powered with an engine of greater than average capacity. Yet GMC full pressure lubrication and the dual cooling system make speed possible and safe.

In the Big Brute heavy duty models, tremendous reserve power is provided through the GMC 53 horse power Engine and the famous GMC Two-Range Transmission, without uneconomical "over-powering" or sacrificing one iota of speed.

The engineering and manufacturing standards attained by General Motors make this exceptional GMC work capacity possible—*with economy.*

The Superintendent of Machinery of the Paving Department of Minneapolis, has the following to say: "Have 4 GMCs, one ran three years before the first overhaul, being out of service only three days in the four years. Total repairs on the four trucks during four years has not exceeded $400."

How

Locomotives—
To Haul Mountains

Where tons of unproductive material must be handled to produce a few pounds of the refined metal, erratic, uncertain tramming necessitates unwarranted large outlays for equipment to take care of peak conditions.

The reliability with which G-E electric locomotives operate, speeds up tramming and is the reason why so many companies select them.

The combination of leaf springs and equalizers allows greater vertical movement of axles and journals and consequent reduction in derailments. Sturdy contactor control stands up under the most exacting service. These features keep the locomotives on the track ready to go.

Such reliability reduces the time that mine cars are in transit between loading and dumping points with the consequent employment of the minimum equipment, which means minimum investment.

Two G-E 8-ton locomotives in tandem

General Electric locomotives are designed by G-E, built by G-E, tested by G-E and possess the absolute reliability typical of all G-E products. If renewal parts are desired, they, too, should be secured from G-E.

G-E locomotive at the operation, Wellington Mine of Hibbing Ore Mining Co. on the Mesabi Range in northern Minnesota. Here electric locomotives, support of steam switchers of the same weight, cut costs more than half.

G-E storage battery locomotive being charged from a G-E motor-generator set through a G-E mine-type safety charging panel. Anaconda Copper Mining Co. Butte, Montana.

COMPLETE tramming equipment with every accessory for charging and repairing is only one phase of General Electric service to the metal mining industry. Thorough electrification and G-E equipment combine to obtain high unit production and low unit costs also in

Hoisting Pumping Stripping—Mechanical Loading—Ventilation Air Compressing Milling Smelting and Refining Conveying Power Generation Power Distribution and Conversion etc.

Whatever the need, G-E meets it so dependably and economically that each General Electric installation recommends another.

GENERAL ELECTRIC

GENERAL ELECTRIC COMPANY, SCHENECTADY, N. Y.

SALES OFFICES IN PRINCIPAL CITIES

GOOD ROADS—FARM BUILDINGS—WAREHOUSES SKYSCRAPERS

All out of the Magic Sack of Cement!

The completely electrified cement industry has given us not only farm buildings, factories, warehouses, and skyscrapers, but 30,000 miles of permanent hard roads.

With only five times the labor, but with fifteen times as much electricity, cement production has increased thirty-fold in 25 years.

A magnificent example to other American industries that, by electrifying, they could do a great deal more work with only a few more workers.

Housewives are learning—as business men have already learned—that electricity is the cheapest servant; and that where it is used most freely, more work and better work is done at the lowest cost in money and in human strength as well.

GENERAL ELECTRIC

"Your house invested my first $100 for me in 1891"

One of the oldest customers of the House of Forman recently wrote:

"I remember my first $100 investment, back in 1891. Your Mr. George M. Forman selected the investment for me personally. It marked the beginning of a relationship with your house that has been increasingly profitable for me. I shall have $10,000 to reinvest the first of the month, and wish you would be good enough to select the right bonds for me. You have a list of my holdings."

To *earn* and to *hold* the implicit confidence of its large and valued clientele, this institution has held fast to one dominating policy for 41 years—the absolute protection of the funds of its customers.

May we send you, free, a booklet which shows how the House of Forman *turns the irresistible growth of great cities into sound bonds?*

How forty one years of experience is utilized for the protection of bond buyers is shown in this interesting booklet. It explains how Forman First Mortgage Bonds, yielding 6½ and 6%, are strongly safeguarded —how each issue is backed by money-earning land and buildings located in the *favored, established and concentrated* districts of New York, Chicago and other great key cities. Beauty that uplifts the heart

SYMBOLIC of Man's fairest hope and noblest faith, wrought in exquisite beauty, in a material that will last forever, a Memorial appropriately designed uplifts the heart and gives to all who see it an impression of dignity, of calm strength, of peace and rest.

Everlasting Barre Granite

GUARDIAN Memorials are made of one of the most beautiful granites found anywhere in the world — Barre Granite from Barre, Vermont, where we own extensive quarries and where we have our Manufacturing Plant, one of the largest of its kind in the world.

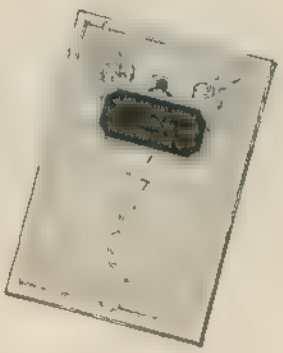
Barre Granite is a handsome gray in color, either light or dark; of an almost diamond hardness; even in texture, finely grained; pleasing in appearance whether given a hammered or polished finish. Its ability to keep its surface clean and to weather widely varied climatic conditions is unsurpassed.

Certificate of Security

WITH each Guardian Memorial, we give an engraved Certificate of Security, signed by an officer of our Company as well as by your Memorial Dealer, which guarantees that it will not fade, check, crack or disintegrate; and that any parts found defective in material or workmanship executed by us will be replaced without expense.

Guardian Memorials are distributed exclusively by retail Memorial Dealers.

THE JONES BROTHERS CO., Inc.
Dept. F5, 10 High St., Boston, Mass.



Book of Designs

WE WILL gladly send you, without expense or obligation, a copy of our book, "To Mark the Place with Beauty Forever," that will give you complete information concerning Guardian Memorials, together with names of Guardian Memorial Dealers near you. A post card will bring it free.

THE H-P "One-Man" Grader removes snow quickly and economically. We equip it with a comfortable cab for bad weather. One man handles the machine with ease.

Grading, ditching, road patrol, snow removal and other road work . . . are just what the Grader was built for. Users keep it busy all the year round. That's the reason it is such a profitable investment — it pays dividends every month in the year. Write for Bulletin.

The Hadfield-Penfield Steel Co.
Bucyrus, Ohio

This essential utility offers investors 7% — *safety quarterly dividends*

THE 7% Cumulative Preferred Stock of the Southern Gas and Power Corporation is a desirable investment opportunity in the public utility field—an investment that combines safety for capital with reliable returns in dividends.

In the consideration of this investment, a point of primary significance is the essential nature of the service rendered. The Southern Gas & Power Corporation owns and operates strongly established gas companies serving some 65 cities and towns in diverse sections of the country. Located in widely separated territories, the purely local conditions surrounding individual gas properties cannot materially affect the earnings of the system as a whole.

The dependability of returns is reflected in uninterrupted dividend payments, while present earnings are many times Preferred Stock dividend requirements.

The 7% Cumulative Preferred Stock of the Southern Gas & Power Corporation merits the serious consideration of everyone who has funds for safe employment. We shall be glad to give you, without obligation, information regarding organization and growth, and the details of this offering, including price.

Let us send you this booklet of facts about the gas industry. It will tell you why securities of gas companies are selected for investments by many discriminating investors.

Athletics for every boy. 15 modern buildings. Midway between New York and Philadelphia. Nine miles from Princeton. 61st year. Catalog.

Roger W. Swetland, LL.D., *Headmaster*
Box 8B Hightstown, N. J.

Rider COLLEGE *of FINANCE & BUSINESS*

Four Year College Degree in two years
The reason is: — RIDER in 2 years gives more credit hours in major subjects of Business Administration than average University gives in 4 years. The Result is: —
Two years' expenses saved,
Two years' salary earned.
Also shorter courses: Accounting (C. P. A.), Managerial, Banking, Court Reporting
FOR WOMEN: — Private Secretarial, or Commercial Teacher Training (Degree assures choice positions). Proper Cultural Environment
Understudy Industrial Leaders
For catalog address the Principal.

Products: Vertical and Underbody Hydraulic Hoists for Motor Trucks.

St. Paul — Vertical and Underbody Hydraulic Hoists

General: St. Paul Hydraulic Hoists are designed for difficult, exacting work. The first hoist has worked continuously, dumping gravel and coal, summer and winter through temperatures from 100 above to 30 below.

Experience: The Hydraulic Hoist Manufacturing Co., Inc., was a pioneer in the building of hydraulic hoists for motor trucks. The first hoist, installed in 1912 on a Northwestern Fuel Co.'s truck (St. Paul, Minn.), is still in operation. This 14 years' specialized experience with high-grade hoists is at the disposal of all users of dumping trucks

Types and Sizes: The hoists are made in two types, vertical and underbody. Vertical hoists are made in two sizes: The Light Duty size for trucks with a rated capacity of 3 tons or less, and the Heavy Duty size for rated capacities of 3½ tons or more. Underbody hoists, which have a horizontal cylinder with tilting arms connected to the body, are made in three sizes: The Light Duty, for trucks with a rated capacity of ¾ to 1½ tons; the Medium Duty for 3 tons or less, and the Heavy Duty for 3½ tons or more

TYPE	VERTICAL		UNDERBODY		
SIZE	Light Duty	Heavy Duty	Light Duty	Med. Duty	Heavy Duty
CYLINDER DIAMETER	5 inches	6 inches	inches	6 inches	8 inches
ADAPTED TO TRUCKS HAVING A RATED CAPACITY OF	3 tons or less	3½ tons or more	¾ to 1½ tons	3 tons or less	3½ tons or more
MAXIMUM LIFTING STRENGTH	6 tons	12 tons	4 tons	6 tons	8 tons
HORSE POWER REQUIRED	2 to 3	3 to 4	¾ to 2	2 to 3	3 to 4
PISTON TRAVEL	36 inches	36 inches	20 inches	22 inches	24 inches
CHASSIS SPACE REQUIRED, CAB TO BODY	9 to 12 inches	9 to 12 in.			
APPROXIMATE FRAME SPACE REQUIRED			55 inches	62 inches	100 inches
SPACE REQUIRED BETWEEN FRAMES AND BODY (NO BODY)			9½ inches	13 inches	12 inches

CITY OF
ROCK ISLAND
ILLINOIS

IN THE HEART OF EVERYTHING

W. A. ROSENFIELD
MAYOR

Sept. 26, 1925.

The King Company,
Chicago, Illinois.

Gentlemen:-

Rock Island in the new "Whiteway" system have given us wonderful satisfaction and the type selected has met with the approval of not only our own citizens, but visitors. The posts were selected by a committee of property owners and the Board of Local Improvements adopted them by unanimous vote.

Rock Island, as you may know, is the first city in this part of the country to adopt a new Whiteway Lighting System and our sister cities are now following our example. Rock Island's business district is the best lighted in the country.

I am writing this letter to let you know how pleased we are with the new system, which includes the King Posts.

Yours very truly,
W. A. Rosenfield, Mayor

WAR M

FOR SUPER STRENGTH
KING

In
Rock Island

the action of the Committee of Property Owners and Board of Local Improvements in selecting King Standards was in recognition of their qualities of beautiful design, long-life usefulness and low-cost maintenance

SCHOOLS AND COLLEGES

will find by comparison that Harper's Magazine, because of its high character and universal circulation among people of refinement, intelligence, and wealth, is the avenue of surest appeal to a most desirable clientele. Since the beginning, private schools have sought the columns of Harper's Magazine. No other periodical has been used so extensively and probably no one factor has been so helpful in furthering the interests of the private schools. For advertising rates and further information, address

Harper's Magazine, 49 E. 33rd St., New York, N. Y.

McK

For use on summer's sandy, muddy, slippery roads, always carry a set of McKay Tire Chains.

This cheerful, sanitary floor is Gold Seal Inlaid *Belfor* Pattern No. 7103-I

The right atmosphere for the children's playroom

You thoughtful mothers know that of all rooms the nursery should be alive with color. Bright walls, painted furniture, *and* colorful floor —a floor of quaint, bright-hued pattern to banish the last trace of the drab and monotonous. And how sensible to have a floor that is absolutely sanitary, that offers no lurking place for germs

Gold Seal Inlands are genuine inlaid linoleum, waterproof and without cracks. A damp mop keeps the smooth surface spotless. Extremely durable. And moderate in price

In the picture is one of the many charming *Belfor* patterns whose delicately mottled color effects are so popular for all parts of the house If you want tile designs in clear, solid colors, ask to see the *Universal* patterns, always in demand for kitchen, pantry and bath

Gold Seal Inlands carry a guarantee of satisfaction or your money back When you buy inlaid linoleum, to assure yourself of getting exceptional value, look for the Gold Seal on the face of the goods or the Nairn name stamped on the back

Write for booklet showing patterns and charming interiors in color

PALM BEACH

THIS rather remarkable thing is noticeable in Palm Beach: all the smart women dress very much alike. The unusual ensembles and startling effects are worn by the great mass of women who merely have good clothes but are not well dressed.

The daytime silhouette of the chic woman follows closely the outline of the body. The smartest costume includes a small hat with a rather high crown and a narrow brim turned sharply up in back or front, a simple jumper frock or plain tailored dress, very short in the [illegible] shoes, trim and perfectly fitted, and a [illegible]. The bag may be large or small. Small scarfs [illegible], but they are not universally worn. Japanese glazed umbrellas are used on the beaches. The fact that life at Palm Beach is frankly active and lived out-of-doors makes washable frocks and practical accessories the best. The very smart woman is dressed with daring simplicity.

The chic colours are subtle, new, and delightful. They are usually soft in tone, but many costumes still include white, and some bright shades are worn.

GLOVES AT PALM BEACH

When active sports, such as golf, demand it, women wear sports gloves; otherwise, the young women are gloveless. The older women wear beige or cream coloured, [illegible] pull-on gloves or suède gloves with their afternoon [illegible]. Gloves are never worn at night.

The majority of women allow themselves to sunburn. Those that do not, avoid it by subtle treatment of the skin and not by obvious means. Veils have been laid aside with the ruffled petticoat.

The smartest coats come to the edge of the skirt or a few inches above it. The fact that the skirts are only just below the knees automatically abbreviates the so-called long wrap. The straight coats or the loose-swinging coats are far smarter than the ones cut on flaring lines. In fact, the neat trim, slim coat is the best. There is much less fur trimming than last year, and, when it is used, it is in some big soft fur and in small quantities. Coats are of light-weight [illegible] knitted fabrics, some of printed linen and a few very lovely ones of quilted duvetine that looks like [illegible].

[illegible]

The soft, simple evening frocks are most chic, particularly when they are of chiffon or marocain. Lace and supple satin frocks are also lovely. But the heavily beaded dresses, so beautiful in town, look in Palm Beach merely as if the wearer were trying to wear out a gown bought for another occasion. However, during the winter there are a few big dances, and then gowns in white or pale shades delicately embroidered are very charming.

On cool nights, one sees light-weight fur coats. Real evening wraps are also worn. However, since by day and night both men and women dash about in open cars, practical clothes are essential, even for the evening, and therefore a coat is better than a cape or shawl. Sometimes, women wear a handsome scarf and a coat over it as Vogue has already said.

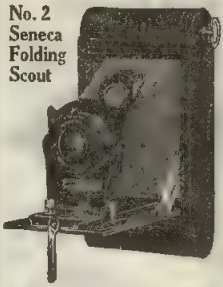
No. 99J42. Each..... 7.80

Seneca Folding Cameras



No. 2 Seneca Folding Scout

No. 2 Seneca Folding Scout.

This camera was made especially for premium purposes and you'll find it a better camera at a better price than you can get anywhere on the market today.

Among its exclusive features are its ease of loading, the automatic five-speed shutter, collapsible reversible finder, lightness of weight due to body being made of aluminum, and its crystal enamel finish.

No. 99J20. No. 2 Folding Scout Camera. Pictures 2¼x3¼ inch with Achromatic Lens.
Each 4.70

No. 99J21. No. 2 Folding Scout Camera. Pictures 2¼x3¼ inches with rectilinear lens.
Each 5.95

No. 2 Seneca Sagamore Camera

This camera is only 6½ inches in length—its width is less than 3 inches—its thickness 1¼ inches, still it takes pictures 2¼x3¼ inches.

The No. 2 Seneca Sagamore is very substantially made. The body is entirely of special metal, selected for lightness and strength. A covering of seal grain leather assures long wear.

Either the Seneca Deltax or Marvel Shutter is standard equipment with the Single Achromatic and Rapid Rectilinear Lenses. Both have fractional exposures 1/25, 1/50 and 1/100 second, besides the usual Time and Bulb exposures.

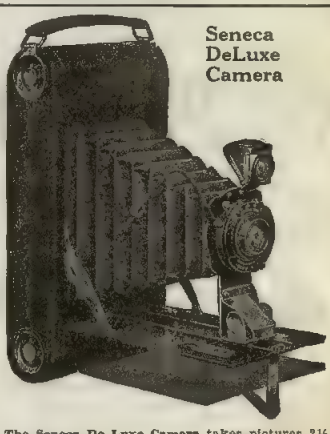
No. 99J34. With Rapid Rectilinear Lens, Deltax or Marvel Shutter. Each 8.50
No. 99J35. With f:7.5 Anastigmat Lens, Gammax or Marvel Shutter. Each 11.50

Folding Scout Seneca Camera

The splendid value of the Folding Scout Models is unequalled at their price.

The Folding Scouts are furnished in either the Meniscus Achromatic (single) or the Rapid Rectilinear (double) lens equipment. We feature the two most popular sizes, the No. 2A for pictures 2½x4¼ and the No. 3A for pictures 3¼x5½ (postcard size.)

No. 99J17. Seneca Folding Scout No. 2A Camera. Pictures 2½x4¼ in. Each 8.25
No. 99J18. Seneca Folding Scout No. 3A Camera. Pictures 3¼x5½ in. Each 11.25
No. 99J19. Folding Scout Rapid Rectilinear Lens No. 2A Camera. Pictures 2½x4¼ in. Each ... 9.00



Seneca DeLuxe Camera

The Seneca De Luxe Camera takes pictures 2½x4½ inches. Made of the best for the best, proves that when better cameras are made Seneca will still be in the lead.

The secret of the great ability of the De Luxe lies in its excellent lens equipment. Fitted with a genuine, full corrected f:7.5 Anastigmat; it has speed and power of rendering detail that is amazing. Enlargements from its negatives to any size is possible. And the shutters used on it are such as to take full advantage of the possibilities of the lens.

No. 99J30. Each 18.75

MARBLE'S HUNTING KNIVES

Marble's Hunting Knives are forged from Razor Steel, are hand tempered, tested and honed to a Keen edge. Each Knife is fully Guaranteed.

IDEAL HILT KNIVES

A combination of quality and excellent features of design and finish, that has won a world wide reputation.

The blade is adapted to sticking and skinning. It is oval ground at back of point for chopping bones and other hard substances.

HALF DOZEN IN A BOX

WOODCRAFT KNIVES

The desirable features of several knives embodied in one. Is adapted for Sticking, Skinning, Cleaning, Slicing, Breaking bones etc.

The thick tapering bevel blade carries the strength from handle to point. Back of blade close to handle is checkered to give a firm grip with thumb and finger. The back of point is beveled for chopping, breaking bones, etc.

AN ALL PURPOSE WOODMANS KNIFE.

Laminated Leather Handle, with colored hard fibre and brass washers. Has flush Aluminum tip. Complete in leather sheath.

No. C49—4¼ in. blade, weight per doz. 5 lbs., per dozen $36.00

HALF DOZEN IN A BOX

DALL DE WEESE PATTERN

Designed by Dall DeWeese, for use on expedition after big game, where every item of the outfit has to be figured down to the lightest and most compact form. It has a dull saw back on which the thumb is placed when skinning or cutting hard substances. When sticking the little finger should be doubled up, letting the end of handle rest against it. This takes the place of a hilt.

Stag Horn Handle, with groove to fit finger. Complete in leather sheath with point protector.

No. C62—4 in. blade, weight per dozen 4 lbs., per dozen $32.00

HALF DOZEN IN A BOX

EXPERT KNIVES

Particularly designed to meet the requirements of the professional hunter, trapper and guide, who requires a thin, keen edge for dressing skins and furs.

The back of the blade is designed for scraping skins while on the forms.

Laminated Leather Handle, with colored hard fibre and brass washers. Has flush Aluminum tip. Complete in leather sheath with point protector.

No. C545—5 in. blade, weight per dozen 5 lbs., per dozen $40.00

RADIO PARTS: As in the Six Tube Sets all parts are made and designed especially for use together

Prices on Application

X-RAY REFLECTORS

Must be Shipped by Express. Too Fragile for Parcel Post Shipment.

X-Ray Reflectors are the most powerful reflectors made. They are a high grade glass, heavily plated with pure silver which is protected by a special green backing which will not peel, crack or blister. It is because of this powerful reflecting quality that they are standard for show window lighting all over the world.

JUPITER

For 100 watt Mazda Type "C" gas-filled lamp.

The JUPITER is a powerful concentrating reflector which will perfectly illuminate windows whose height equals about twice their depth. It has similar dimensions to the JOVE reflector and uses the same shade holder. Hence, when used together alternated they make a neat appearance in the window. They are made as small as possible to secure proper results.

Install in windows 10 to 15 ft. high and one-half to two-thirds as deep.

No. D610E—Width 10 in., depth 10½ in., height including neck 7⅞ in., holder 3½ in., form "A," each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 75 watt Mazda "C" lamp.

(Also may be used with 25, 40, 50 and 60 watt Mazda "B" lamps by using 2½ in. form "O" holder).

A small distributing X-Ray reflector of pleasing lines, principally adapted for localized lighting, such as drop cord and bench lighting in shops, over counters and work tables, and for general illumination from comparatively low ceilings, as, for instance, bowling alleys, basements, store rooms and corridors.

No. D535E—Diam. 5¾ in., 2¼ in. holder, form "H," height 5½ in., each $2.00

TWENTY-FOUR IN A STANDARD PACKAGE W'T 18 LBS

BEEHIVE

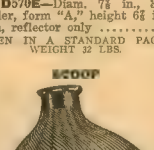
For 100 watt Mazda "C" lamp.

A popular reflector for the 100 watt Mazda "C" lamp. It effectively conceals the lamp and gives a broad light distribution. A special system of spiral and vertical corrugations produces a practically even and well distributed light, eliminating all streaky effects.

No. D570E—Diam. 7⅛ in., 3¼ in. holder, form "A," height 6¾ in., each, reflector only $3.50

SIXTEEN IN A STANDARD PACKAGE
WEIGHT 32 LBS.

SCOOP



For 75 watt Mazda Type "C" gas-filled lamp.

The SCOOP is a scientifically correct reflector, designed for use with the 75 watt Mazda "C" lamp. It is designed for small show windows, particularly those whose height is equal to the depth.

The reflector is small in size, requires little head-room and makes a very neat appearance. If very bright illumination is desired, install reflectors on 12-inch centers. For average conditions, reflectors on 18 to 24-inch centers give good results.

Install in windows 8 or 10 ft. high and 6 or 8 ft. deep.

No. D778E—Width 7⅞ in., depth from front to back 6⅛ in., height including neck 6⅝ in., holder 2¼ in., form "O," each, reflector only $4.00

TWENTY-FOUR IN A STANDARD PACKAGE W'T 30 LBS

JOVE

For 100 watt Mazda Type "C" gas-filled lamp.

The JOVE is a scientifically correct window lighting reflector with high temperature backing, designed especially for use with a 100 watt Mazda "C" lamp. This reflector and lamp gives the highest intensity of uniform store window illumination ever produced with 100 watts. Its shape completely hides the intensely bright filament and the special corrugations properly break up and distribute the light.

The JOVE has been designed for windows of average proportions, those whose height is one to one and one-half times their depth.

No. D600E—Width 10 in., depth from front to back 9⅛ in., height including neck 7⅞ in., holder 3¼ in., form "A," each, reflector only $6.00

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 200 watt Mazda "C" lamp.

This reflector should be used for efficient, direct lighting of average, large working spaces. The spread of light from this reflector with a 200-watt Mazda "C" lamp will give good, general lighting in a space of 20 feet square at average hanging height.

No. D575E—Diam. 9⅛ in., 3¼ in. holder, form "A," height 8 in., each, reflector only $4.25

EIGHT IN A STANDARD PACKAGE
WEIGHT 14 LBS.

1847 ROGERS BROS.

SILVERPLATE
AMBASSADOR PATTERN

Correct in outline and original in decoration, Ambassador pattern retains the durable qualities characteristic of all 1847 Rogers Bros. ware.

THE BOBBSEY TWINS
THE BOBBSEY TWINS KEEPING HOUSE
LAURA LEE HOPE
FOR CHILDREN OF 5 TO 10 YEARS
GROSSET & DUNLAP
LAURA LEE HOPE

Here you see an exact reproduction of one of the BOBBSEY TWINS books which stand today among boys and girls everywhere as the most famous juvenile stories in print. Millions of youngsters already know these books, and in their beautiful colored wrappers no child or parent can resist their appeal.

TOY BUYERS: *Let us tell you how these will increase your Toy Business!* BOOKS

Every parent and every boy and girl who comes into your Toy Department or Toy Store would also buy BOOKS if you had them displayed—fascinating books by the best-known authors for Boys and Girls. The famous Grosset & Dunlap Juveniles offer you a profitable line to make your merchandise chain complete. For every kind of toy in your stock there is a series of books to appeal to those same interests of the boy or girl. In other words, you will double your sales unit. These books retail for 50 cents. The turnover is quick and sales are made without effort. A Grosset & Dunlap display rack of these remarkable books takes up only 30 x 39 inches of your floor space and it will bring you substantial returns all the year round.

(See other side of this page for further particulars)

Here you see a reproduction of the Grosset & Dunlap "Silent Salesman" which requires only 39 inches of your floor space.

Here They Are

THE TOM SWIFT SERIES .....*for boys*

and others

These books are all substantially bound in cloth, well illustrated and wrapped in beautiful art wrappers printed in full colors.

It Will Pay You to Look into this Offer—

What we offer you is a *complete Boys' and Girls' Book Department for your store*, comprising an initial stock of 250 of the fastest-selling cloth-bound books in print for children of all ages—and a handsome display fixture holding and displaying the entire line and requiring only 39 inches of your floor space in which to do it!

Hundreds of toy dealers and toy departments already carry this famous line of books for boys and girls *and can testify that it is sound logic to stock children's toys and children's books side by side.*

The space problem we have taken care of for you in the ingenious "Silent Salesman" which fits into the most limited floor space.

The price problem we have also taken care of for you in the attractive introductory offer we are now making. Fill in the coupon and get full details at once.

Regular Model Watches

12 SIZE

THESE have been standard products for years and have upheld consistently the Dueber-Hampden reputation for time-keeping qualities.

Although the same high degree of time-keeping accuracy is assured as in the extremely thin models, nevertheless because of greater thickness these watches can be manufactured cheaper and sold at considerably lower prices.

The Aviator

19 JEWELS

This is a strikingly handsome watch, adjusted to four positions, with hand engraved 14K gold-filled case and solid silver hand-carved dial with raised figures.

	Catalogue Price	Sale Price
In 14K Gold-Filled Case, Green, Plain	$55.60	$47.50
In 14K Gold-Filled Case, White or Green, Engraved	58.50	50.00

Cash in on New Year's Resolutions

By William Bliss Stoddard

THE Eaton Co., Toronto, Ont., used the theme of New Year's Resolutions as the basis for a very interesting campaign that speeded up the January sales to a marked degree. Through the columns of their Eaton's Weekly they announced:

A HAPPY NEW YEAR TO YOU

Here Is a New Contest on New Year's Resolutions and Wishes

New Year's resolutions! We all make them more or less. Do you follow the quaint and ancient custom of writing your wishes and resolutions on New Year's Eve? These you lock safely away until the next New Year's Eve, when you open them—and find how far dreams have come true. After all, New Year's resolutions are rather entertaining and may add a bit of inspiration to one's daily affairs.

Accordingly we have inaugurated a

NEW YEAR'S RESOLUTIONS

Send in a list of 12 practical, possible, New Year's resolutions—six to apply to girls and six to boys. Three awards are offered.

Letters must be written on one side of the paper only, and must not exceed 200 words. Your address must be written on the back of the letter.

The selected letters will appear in the January issues of the *News*.

BLESS THE NEW YEAR

May it bring happiness and success to you whom we meet each week through these pages.

Another page of this issue gave the New Year's resolution of a boy and of a girl. At the top of the first column was the silhouette of a boy's head, and the paragraph:

Here's a New Year's resolution already made for boys—learn how to take pictures. Get a camera with some of your Christmas money. You can get a No. 2 Brownie for $2.50, or No. 2A Brownie for $3.50.

Then learn how to develop your own films. Here's how you do it.

If you can overcome the family prejudice, you establish yourself in the bathroom with a heavy shade on the window, and red tissue paper around the light. Otherwise, you screen off a corner of the cellar, with a good strong lock on the door, so the others can't get in.

Then followed descriptions of the paraphernalia required for developing and printing, together with the cost—which was very reasonable.

The second column bore the silhouette of a little girl, headed:

AND SMALL GIRLS ENJOY THEIR NEW YEAR'S RESOLUTIONS

Molly is only eight, but little girls of eight can make New Year's resolutions as well as any one else.

Molly has resolved to learn to skate!

Her brother, who is nine, has known how to skate—oh, for years now, and he declared she'd never do it.

"You'll fall," he told her, "and give your head a crack, and cry blue cat fits, and that'll be the end of it!"

But Molly isn't as silly as all that. Every day, since

Denver Dry Goods Co. Display

Christmas, when there's any ice, out she goes, and totters about on her bob skates, sometimes on the ice that Teddy made in the back yard, and sometimes at the rink. She's fallen twelve times already, but every time when she gets up she stays up longer. And Dad says next year he'll get her a pair of real hockey skates—the very best kind for little girls, at $1.35.

There are two children, Dick and Dorothy, created by the editor, who have something to say in almost every issue. In the "resolutions" number Dick says:

This was the best Christmas ever. We had a big Christmas tree at home and I got dozens of things I wanted There was a whopping big checque, too, and with it I'm going to buy a dandy scooter.

If there's anything left I'm going to get a new school bag. There's a fine collection of them in the Stationery Department. Priced at $1.00 and up.

Five or six of the boys in my class are going to put our money together and buy a tobaggon. There's a fine hill just behind the house. I saw a tobaggan the other day for $3.00, and I think we've got enough money to get it.

In keeping with the winter season all sorts of outdoor implements were suggested in the different pages - hockey sticks, skates, skis, toboggans, as well as moccasins, sweaters, and skating shoes.

But while appealing to the youngsters through the printed page the merchant should never overlook his show windows, for it was what they see in the windows that strike their fancy that the children tell their elders and leads to the purchase of the desired toys. There will be many days in blustering and mid-winter when the littlest ones must stay in the house, and at such times nothing pleases them more than to cook and wash, sweep and iron, as they see their parents doing. In order to bring these juvenile household utensils to mind the Denver Dry Goods Co., Denver, Colo., arranged a miniature dining room and kitchen. The floor was covered with linoleum. At one end was a doll in big kitchen apron cutting bread on the shelf of a small kitchen cabinet, while a curly-headed miss was stirring something in a pan on the small but practicable stove. At the other end was a table set with dishes, with two dolls in chairs drawn up to the table. Down front were boxes of children's dishes of different sizes and prices.

All red-blooded children like to play out of doors and in accordance with this theory Enright Winchell Co., Sacramento, Calif., featured out-door toys in an enticing manner. In the rear was a back drop showing lawns and residences. In front of this was a brick wall, with white gate. Seated on the curb was a school boy with books, putting on a pair of roller skates, and a number of pair of these were shown close to the glass. A second boy was running an express wagon on the walk, and a pair of children held books in one hand and skates in the other. Cards at each end said "Strength and speed with our skates," and "Fun for the kiddies with our skates."

Last Minute Counter

THREE or four days before Christmas, take a long counter and place on it Christmas gift articles (as many as the counter will hold, no two alike).

Advertise in your usual way the announcement

"IF YOU CANNOT MAKE UP YOUR MIND WHAT TO GIVE FOR CHRISTMAS, SEE OUR 'HELP YOU DECIDE' COUNTER OF 50 DIFFERENT HOLIDAY GIFTS"

To Get Them Started

IT is always a good point to bring before your public the attitude of your store toward the small customer. Many times a year it happens that a customer of another store may not be able to obtain from it certain small articles but hesitates to come to your store for a purchase of such small value.

Yet, this "odds and ends" trade should always be solicited by the retailer, for from it is developed future regular customers. The occasional ten cent buyer of today may be the regular ten dollar buyer of tomorrow.

An easily understandable manner of displaying your attitude toward the small purchase customer is the following simple window display—one which can be made by any retailer in a few minutes time.

Letter a large window card with the sentence

WHETHER YOU BUY MUCH OR LITTLE —WE SOLICIT YOUR TRADE

and then through contrasting a very small article or package of merchandise with a very large one emphasize the statement. For example—a drug store—could show a very small vial of perfume, contrasted with a 5 gallon demijohn filled with water or perfume.

We Offer Exclusive NEW STYLES in Polychrome Metal Lamps

NEW IMPROVED GILLETTE SAFETY RAZORS

Here is an invention of intense interest to every man who shaves, a unique principle in Razor—not merely a new style. As a result of the new patented features, the NEW IMPROVED Gillette Safety Razor is the finest shaving instrument ever produced. It uses the well known Standard Gillette Blades and greatly increases their effectiveness. The Fulcrum Shoulder and overhanging Cap provide straight edges acting on the blades to produce an Adjustable Short Fixure, which results in a straight and extremely rigid shaving edge in all positions of adjustment. The Channeled Guard underlying the adjustable blade edge enables the adjustment to be changed without sensibly altering the angle at which the razor is held in shaving, and also leaves the entire edge free to the beard while guarded from the face.

All parts are made with Micrometric Precision in strict conformity with measurements determined by Gillette technical experts after exhaustive research and thousands of shaving tests.

The distinctive Diamond Knurling is used exclusively on the New Improved Gillette Safety Razor.

NEW STANDARD

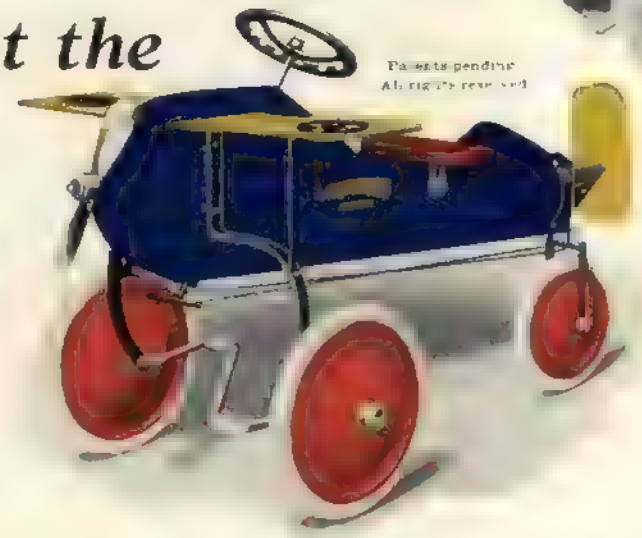
ONE ASSORTMENT IN A CASE

KIDS of Our Street

wild about the Air Mail



Patents pending
All rights reserved

The AIR MAIL

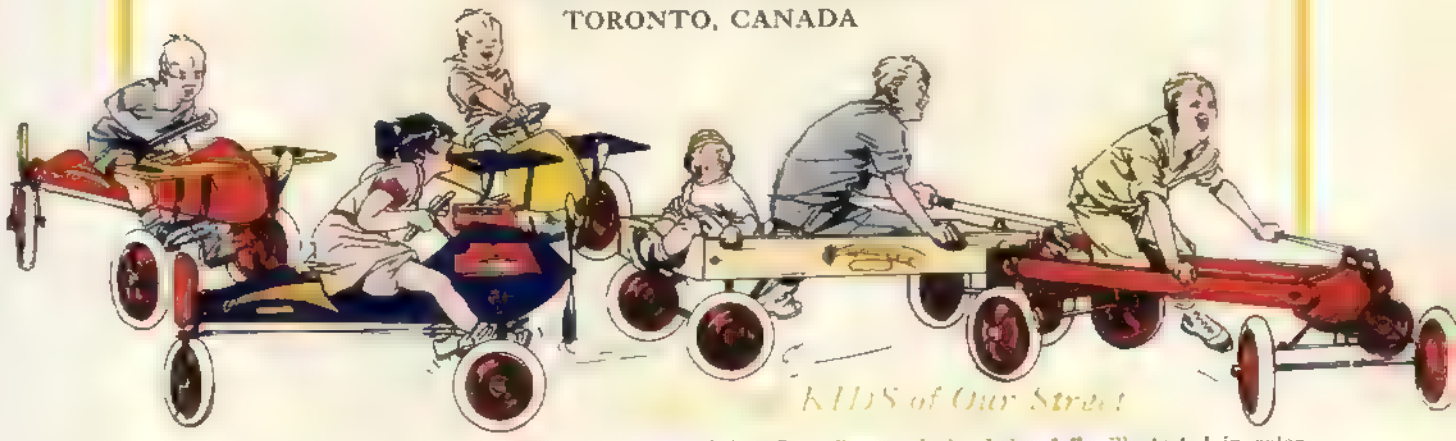
It's in the air—that's why! There's nothing to argue with Dad about. It's just a matter of who sees it first. Aviation is now uppermost in the public mind. That makes the Air Mail the timeliest—the most smashing thing on the market today. You can't have people stopping on the streets looking and exclaiming, "Oh, see the airplane that youngster has!" without getting advertising which money cannot buy. These things mean easiest sales, lowest selling costs, most profit.

Wire for samples. Get them on your floor, in your window—on the street. One sale makes many others. Dealers report that in many cases every family in the block has bought Air Mails, Circus Trikes, Sport Models or Heavy Duty Models.

LEWIS E. MYERS & COMPANY

VALPARAISO, INDIANA

TORONTO, CANADA



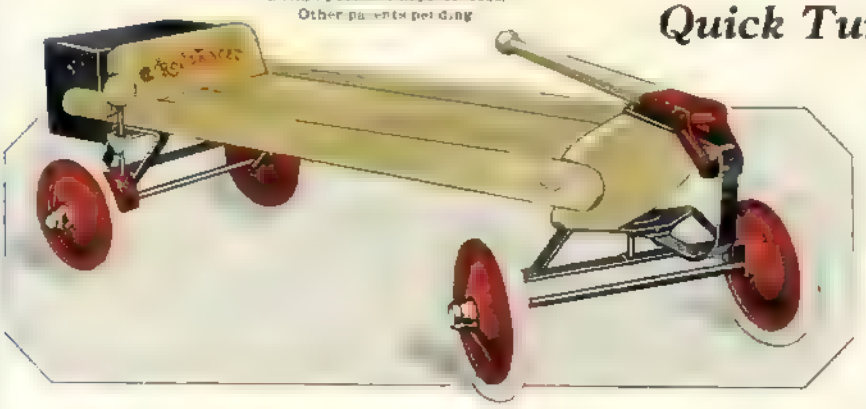
Ask for copies of "Further Adventures with the Kids of Our Street"—our dealer helps fully illustrated in color

The Lewis Racer Circus Trike

The Circus Trike furnished with the head of a Horse or a Running Rabbit is popular with the younger kids. Steers like a car. Rides like the wind. Built to stand hard use. Catches the fancy of old and young alike. Nothing like it ever before put on the market.

Patents pending
All rights reserved.

Design patented Sept. 29, 1925.
Other patents pending



Quick Turnover on Lewis Racer Sport Model

Low hung sport model with airplane joy stick control. Now three years old and sales rapidly growing — good profits. Unique design and splendid construction make the Sport Model give quick turnover.

Heavy Duty Appeals to Practical Parents

Lewis Racer

because it is a wagon that will stand the rough usage of the kids in the family and all the neighborhood kids. You've got to see it to appreciate it. Rapidly becoming the leader in wagon sales.

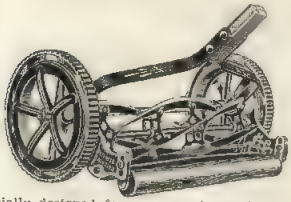
LAWN MOWERS

F. & N.

The reel bearings on all our ball-bearing mowers are equipped with a **New Patented Automatic Adjustment.** Consists of a case-hardened steel spring working against a self contracting sleeve around the shaft and inside the cone. At the instant all looseness is taken up by the spring, the sleeve grips the shaft, thus preventing any further pressure than is required for the most delicate adjustment, permitting the reel to revolve with perfect freedom.

Throughout the life of the mower this adjustment continues to accommodate itself to conditions, keeping the bearings always adjusted to a nicety, without the slightest attention from the operator, the sleeve instantly releasing when looseness occurs from any cause and again tightening over the shaft the moment all wear is taken up by the spring.

HOLTER SPECIAL
Ball Bearing



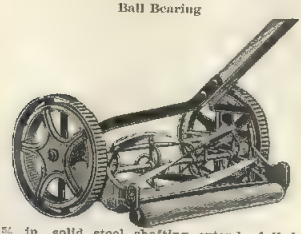
Especially designed for easy running and smooth cutting. Best grade materials throughout. All parts machined and fitted with precision. A solid steel shrub rod extends through center of mower the entire length, assuring the most rigid frame construction and providing steel wheel axles. Heavy malleable end spiders double riveted. Crucible tool steel knives tempered in oil and self-sharpening. Self-adjusting bearings, easily adjusted cutter bar. Hard maple handle and roller.

Finished in cream enamel and velvet black and gold bronzes.

Drive Wheels 10½ in. Diameter, Reel 6 in. Diameter, 5 Cutting Knives

Width of Cut, Inches	14	16	18	20
Weight Each, Lbs.	50	52	54	56
Each	$21 50	22 50	23 25	24 00

ADMIRAL
Ball Bearing



A ⅝ in. solid steel shafting extends full length of mower through the side plates and forms both shrub rod and steel axle for driving wheels. Reel shaft of best cold rolled steel shafting, ball bearing parts fully guaranteed, cones hardened. Accurately fitted and adjusted throughout. Screw adjusting.

Drive Wheels on Steel Bearings, Knives of Highest Crucible Steel, Oil Tempered and Self-Sharpening. All wood parts of carefully selected stock. Handsomely finished in attractive colors and bronzes.

Drive Wheels 10½ in. Diameter, Reel 6 in. Diameter, 4 Cutting Blades

Width of Cut, Inches	14	16	18	20
Weight Each, Lbs.	48	50	52	54
Each	$19.25	20.00	20.75	22 50

One In a Box.

TRIUMPH
Genuine Timken Roller Bearings

Unequalled in quality, design or construction. Particularly designed for park and cemetery work, fine lawns and gardens where an extremely close and velvety cut is desired.

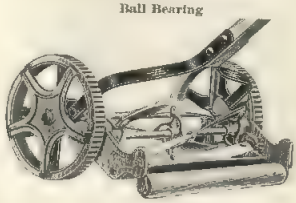
All parts are carefully and accurately machined. Has extra long wheel base for cutting over uneven ground. One set of finely cut triple gears on each side in a dustproof case. Hardened and tempered high carbon tool steel blades. Self-adjusting bearings. Chrome vanadium raised edge bottom knife, self-sharpening. Patented hardwood handle and roller.

Finished in beautiful enamels and decorated in brilliant bronzes.

Drive Wheels 10 in. Diameter Open Spoke, 5 Cutting Knives, Steel Shaft Extending Full Length

Width of Cut, Inches	14	16	18	20
Weight Each, Lbs.	57	60	6.	65
Each	$35.25	36.75	38.50	40.00

DIRECTOR
Ball Bearing



Perfectly machined and fitted and parts are interchangeable. Screw adjusting cutter bar, ball bearing cones of best quality tool steel and tempered, automatically adjusted. Cutting knives are attached to the reel shaft by means of malleable iron spiders, shaft is made of cold rolled machinery steel.

5½ in. diameter revolving reel with four knives of highest grade crucible steel, self-sharpening. Beautifully finished.

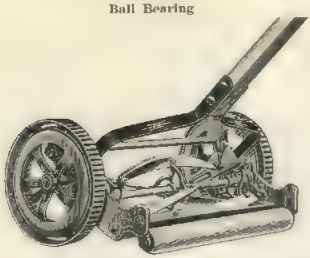
9 in. Diameter Drive Wheels Turning on Steel Bearings

Width of Cut, Inches	12	14	16	18
Weight Each, Lbs.	40	42	44	46
Each	$16.50	17.25	18.00	18.75

LAWN MOWERS

PARAGON

Ball Bearing



A light weight high grade mower of the semi-open type construction. Every bearing accurately machined and all material carefully selected

High grade ball bearing parts. Best knife steel oil tempered and water ground revolving blades. Self-adjusting ball bearings. Screw adjusting cutter bar. Attractively finished.

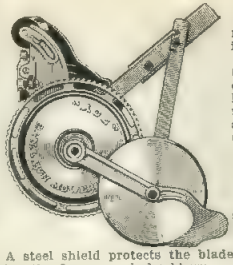
Best quality hard maple. Especially selected and treated to protect from weather.

	Each
Handles—For Lawn Mowers.	$2.50

LAWN TRIMMER AND EDGER

ACE



A combined lawn trimmer, lawn edger and finisher.

Cuts close to walk, fences, monuments and other obstructions. Neatly trims and cleans the uneven edges of the turf and overhanging blades of grass around the sidewalk, flower beds, etc

Eliminates the sickle, grass shear, sod cutter and spade.

A hardened tool steel sharp disc enables one to cut and trim the turf with speed and accuracy. A steel shield protects the blade from cutting and injuring the flowers and shrubbery.

Five Best Crucible Tool Steel Blades	Each
Ace—Lawn Trimmer and Edger, Attractively Finished, Hardwood Handle, Weight Each 30 Lbs	$13 50

One in a Box

GRASS CATCHERS

SIMPLEX

Made with Heavy Maroon and White Striped Canvas Sides and Galvanized Iron Bottom.

Can be attached and taken off instantly

Will last for years

Fits any mower made.

Two wire rods with bent hooks engage slot in casting which holds roller.

No. 335-16—16 gauge; 28 inch barrels; weight 6½ lbs	**48 60**

N. R. DAVIS & SONS PREMIER GRADE—HAMMERLESS

Barrels—Fine decarbonized steel; matted rib, right barrel modified, left barrel full choke; every gun fully tested with extra heavy proof loads.

Stock—High grade polished walnut with pistol grip, and finely checkered fore-end; hard rubber butt plate.

Frame—Case hardened; **water table breech,** close fitting; reinforced chamber, consists of sleeve fitted over breech of barrels the full length of chamber, gradually increasing strength where most needed; top lever action; spiral main spring

	Each
No. DP12—12 gauge; 30 inch barrels; weight 7½ lbs	**$42 00**
No. DP16—16 gauge; 28 inch barrels, weight 6¾ lbs	**42 00**
No. DP20—20 gauge; 26 inch barrels; weight 6 lbs	**42 00**

AMERICAN—QUAIL MODEL, 410 GAUGE—HAMMERLESS

Barrels—Armor steel; tapered convex bell shaped breech; matted extension rib

Stock—Walnut; nicely finished, checkered; full pistol grip with rubber cap and butt plate.

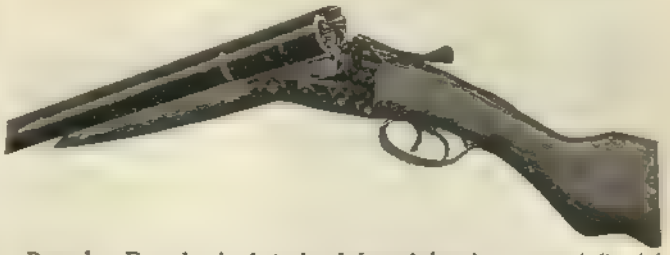
Frame—Case hardened, with bar locks; automatic safety slide.

	Each
No. 66-410—410 gauge, 26 inch barrels; weight 5¾ lbs	**$36 90**

All above, one in a cardboard box

DOUBLE BARREL SHOT GUNS

N. R. DAVIS & SONS AJAX GRADE—HAMMERLESS



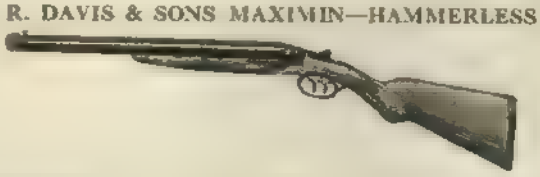
Barrels—Decarbonized steel; reinforced chamber; matted rib; right barrel modified, left barrel full choke.

Stock—High grade walnut, oil finished, pistol grip; nicely checkered fore-end; steel butt plate.

Frame—Case hardened; **water table breech,** top lever action; spiral main spring

	Each
No. DA12—12 gauge; 30 inch barrels; weight 7¼ lbs	**$37 80**
No. DA16—16 gauge; 28 inch barrels; weight 6½ lbs....	**37 80**
No. DA20—20 gauge; 26 inch barrels; weight 6 lbs	**37 80**

N. R. DAVIS & SONS MAXIMIN—HAMMERLESS



Especially adapted for brush shooting, not simply a cut-off shotgun, but built from the start upon correct Ballistic principles to get results. An ideal gun around the farm or for home and bank protection, etc.

Barrels—Both barrels bored with a special bore to make a 70% pattern in a 30 inch circle at 30 yards, enabling a shooter to kill birds at 20 to 30 yards without mutilating and at the same time have a reasonable chance of killing at 40 to 50 yards.

Stock—High grade polished walnut with pistol grip; checkered fore-end; hard rubber butt plate.

Frame—Water table breech; reinforced barrel chamber; top lever action; spiral main spring.

	Each
No. MX12—12 gauge; 24 inch barrels; weight 6¾ lbs..	**$42 00**
No. MX16—16 gauge; 22 inch barrels, weight 6¼ lbs	**42 00**
No. MX20—20 gauge, 20 inch barrels, weight 5½ lbs	**42 00**

AMERICAN GUN CO.—HAMMERLESS

Barrels—Armor steel, especially bored for smokeless or black powder; matted extension rib with cross bite; right barrel modified, left barrel full choke.

Stock—Walnut finish, full pistol grip, checkered; rubber cap and butt plate; Deeley & Edge patent fore-end.

Frame—Drop forged, case hardened; bar locks with patent indicators, showing whether gun is cocked or not; all parts interchangeable; side plate locks with V-shaped main springs.

	Each
No. 6-12—12 gauge; 30 inch barrels; weight 7½ lbs. ..	**$36 90**
No. 6-16—16 gauge; 28 inch barrels; weight 6½ lbs	**36 90**
No. 6-20—20 gauge; 28 inch barrels; weight 6¼ lbs.	**36 90**

All above, one in a cardboard box.

AC SPARK PLUGS

For Fords

The Big Selling Types

For Chevrolets

PRICE 50c
Extra Porcelains
For Type U 30c

By tying up with the AC line, dealers are affiliating themselves not only with the most powerful organization in the industry, but with a line which insures them enormous sales possibilities now and for the years to come.

AC Carbon-Proof Spark Plugs Are Made in All Sizes

AC SPARK PLUGS

Price 90c each

AC Long Life Spark Plugs for Bus, Truck, Tractors and Marine Use.

The AC Long Life Spark Plugs were designed especially for Busses, Trucks, Tractors and Marine Engines, and contain many improved special features.

Its Special Features

Electrically Fused Kyanite Insulator Core: Insures greater strength and delivery of a full spark to the sparking points.

Better Design: One piece design under hot assembly—an exclusive, patented AC feature.

A New Glaze: So hard and smooth that it effectively minimizes the accumulation of soot.

Recessed Insulator: Knife edge ring attains sufficient heat to burn away oil deposits thus minimizing carbon troubles.

Extra Large Center Electrode: Has very long life due to substantial size and improved nature of alloy.

Baffle at Firing End: Shields insulator and center electrode from full heat of explosion, insuring cool running and greater life to electrodes and insulator.

Extra Large Side Electrodes: Same substantial diameter and improved alloy as center electrode, insuring permanent width spark gap. Electrically welded to shell thus giving perfect thermal contact. So shaped as to form a natural drain for oil deposits.

TYPE "I"
⅞" Long Body

for
American LaFrance
Brockway
*Diamond "T"
Fageol *Federal Mack
Pierce-Arrow (ex. R-9)

Also recommended for trucks, tractors, etc., where type A, J and K plugs are specified on our proper plug to use charts.

*Use AC Spark Plugs as original factory equipment

AC Sales Helps

Special Terminals

A quantity of any or all of the special terminals illustrated above will be furnished gratis to dealers.
Send order to distributor—specifying quantity and part number. Shipment will be made from distributor's stock or direct from factory.

AC Quick Seller

The AC Quick Seller is an added salesman.
It occupies but little counter space and it enables the dealer to place a handy and adequate stock on the counter convenient to the point of purchase.

Made only in one type-LARGE-holding 140 plugs, size 14 x 18 shipping weight, 20 lbs.

May be had by bringing stock of AC Spark Plugs to the capacity of the cabinet. Shipped no charge direct from the factory.

Dealer Helps

The following dealer helps will be forwarded from the AC factory on receipt of orders from dealers or jobbers salesmen

Form No.	Description of Material
A-1	Envelope stuffers
A-2	Window Trim
A-3	Proper Plug to Use Chart
A 5	Fibre Sign.
A 139	Illustrated Plug Chart.

If A-1 envelope stuffers with imprint are desired, send a sample letterhead with order

1893 Wrench	.10

NOTE In ordering parts always give the number and name of the part wanted, the width of cut of machine and the year in which it was made, or the style number. The width is cast in raised figures on the knife bar; on mowers made prior to 1898 the year and date of manufacture is cast on the side plate, on those made in 1898 and later the style number which takes the place of the year date is cast on the drive wheel. Do not give patent dates, these will not identify the mower. Most of these parts weigh less than 4 lbs. and can be sent by mail or express at slight cost. Mower is right or left as you push.

APOLLO BICYCLES

The King of the Road

Bicycles look pretty much alike to the average buyer, even the expert must depend upon the reputation of the producer for assurance of quality material and workmanship.

Apollo brand bicycles have a reputation of being the best all around bicycles on the market. Materials used in the making and assembling of these bicycles are thoroughly inspected before used. Built by expert mechanics of long experience. Apollo bicycles are made to give perfect satisfaction to the user. Popular and well known tires that will give long wear are used. By what we say above we can safely guarantee our bicycles.

GUARANTEE

APOLLO bicycles are fully guaranteed against any imperfections in material or workmanship, and repairs or replacements will be made free of charge, provided parts claimed to be defective are delivered to us transportation charges prepaid, and found by us to be defective.

A separate letter should be mailed in order to help us identify the parts.

This guarantee expires December 31st of the year during which purchase was made.

As we do not manufacture Coaster Brakes, Saddles, Pedals, Handle Bars, Tires, etc., these various accessories are guaranteed by their respective manufacturers, as is the usual trade custom and all claims should be taken up directly with them.

We have exercised the greatest care in the selection of tires for the various grades and all tires are guaranteed by the maker, to whom all claims for adjustment must be made.

N. SHURE CO.

SPECIAL NOTICE

We require a week to ten days time to make shipment of any of our bicycles as we do not carry them in stock completed. Before making shipment we equip them with fresh tires and enamel. By doing this we deliver them with all their brilliancy and also gives the user longer wear.

No. 3C133. Per dozen..... 9.00

New Cars and Models

Single-Sleeve Valve Engines Will Try Their Stuff at Indianapolis

91 inch engines this year will be 100 per cent supercharger equipped

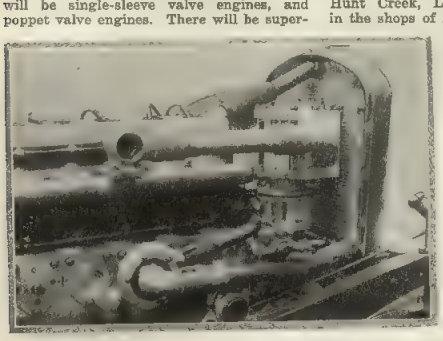
IF all entries listed materialize into actual starters the Indianapolis 500-mile race to be held May 31st this year will be more international in aspect than any time since 1915. For the first time in several years there is a real diversification in constructional and design features of the entries. Heretofore the real competition has been largely confined to the cars built by Fred Duesenberg and Harry Miller. This year the Guyot-Schmidt Specials from France, and the Eldridge Specials from Great Britain are scheduled to come over and provide a thorn in the side of the Dusenberg-Miller jobs which have shared Indianapolis honors between them during the past four years.

There will be fours, sixes, and eights with the latter type predominating. There will be single-sleeve valve engines, and poppet valve engines. There will be superchargers on all of them as becomes good racing cars nowadays and more than one front drive job will be present to demonstrate its turn holding ability at high speed.

With the retirement of Tommy Milton, twice winner of the classic, interest centers on the young champion Peter de Paolo; on Bennie Hill, of the heavy foot; Bob McDonogh, famous graduate of a famous teacher; Dave Lewis, of front wheel drive renown; Earl Cooper, masterful but unlucky, Leon Duray, who drives them till they break up; Frank Elliott, who is always good for a big surprise, and the always in the money, Harry Hartz.

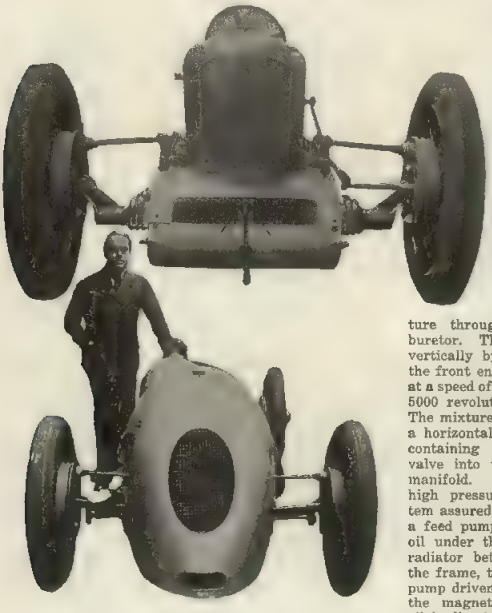
The summary specifications of the two foreign entries are shown in the following paragraphs.

Owned by Mr. H. Albert Schmidt, of Hunt Creek, Lewiston, Mich., and built in the shops of Albert Guyot, at Paris, the three Guyot specials for the Indianapolis race are distinctive in having a six-cylinder single-sleeve valve engine of the Burt-McCollum type world rights for which recently were obtained by Continental Motors Corp.



Inlet side of single sleeve racer showing Rootes blower, auxiliary sleeve drive mechanism, oil manifold, and water pump

Track conditions have been kept prominently in view in laying out the design of these cars, and Guyot has preferred to meet American rather than European requirements. Thus the frame is narrow, the steering is centrally placed, and the driver is in the middle, in contrast to the European practice of placing



Front view Schmidt - Guyot single sleeve racer. Note kick-up forgings at end of tubular front axle and oil cooling radiator below water radiator. The four-wheel Perrot brakes operate simultaneously. The lower car is the Eldridge four-cylinder job featured by its extreme lowness and chain drive to the overhead camshafts.

him to one side of a 31-inch body.

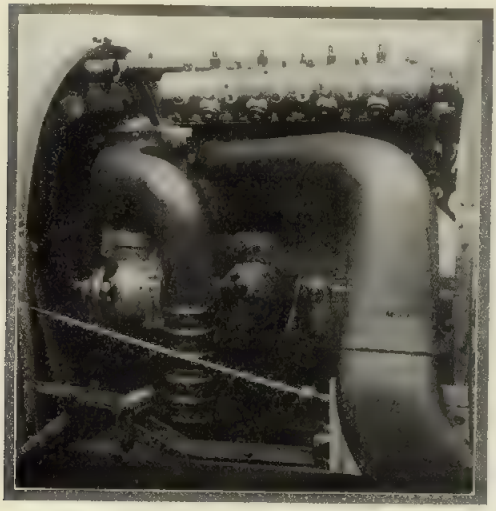
Two perfectly straight frame members, with a kick-up over the front axle, are made use of. The engine, which is a unit with the clutch and gearbox, has two trunnion attachments to the top of the frame members at the front and a third trunnion attachment under the gearbox to a central cross frame member.

The Guyot engine has six cylinders of 60.6 by 86 m. m. (2.38 x 3.38 ins.) bore and stroke, the cylinders being an iron casting mounted on an aluminum crankcase. A one-piece crankshaft with circular webs is made use of and there is a Hoffman roller bearing between each cylinder. The connecting rods, which are of tubular section, with split ends, also are mounted with Hoffman roller bearings. A horizontal shaft on the right-hand side of the crankcase, and driven off the crankshaft by spur gearing, provides independent drive for the eccentrics operating the six sleeves.

The engines are supercharged by means of a Rootes blower drawing a mixture through a Cozette carburetor. The blower is driven vertically by bevel gearing off the front end of the crankshaft, at a speed of 6000 revolutions for 5000 revolutions of the engine. The mixture is delivered through a horizontal pipe and an elbow containing a pressure relief valve into the straight intake manifold. In addition to the high pressure lubrication system assured by a scavenger and a feed pump, with a supply of oil under the cowl and an oil radiator between the horns of the frame, there is an auxiliary pump driven off an extension of the magneto shaft, by which oil is directed to the sleeve operating mechanism and to the supercharger. The sleeves do not require any special treatment as regards lubrication and to avoid oil reaching the combustion chambers it is found necessary to shut off the supply to the operating mechanism when idling. Ignition is by high tension magneto, at the front of the engine, driven from a cross-shaft, with a single plug in the center of the cylinder.

Two special racing cars have been built for Mr. E. A. D. Eldridge, the amateur British enthusiast whose side valve engined racers put up some remarkable performances at Montlhery track last year. These new Eldridge specials have been constructed primarily for the Indianapolis race and built in Paris; one being a two-seater and the other a single-seater with central steering, but beyond that and the fact of the single-seater having cantilever rear springs against half-elliptics on the other, the two chassis are almost identical.

The 1½ litre engine has four cylinders with a bore and stroke of 69 x 100 m. m. 2.71 x 3.93 in. and inclined overhead valves



Exhaust side of the four-cylinder Eldridge racer. Note the Marelli double spark magneto and spring mounting on top of frame. A special cooling arrangement provides for the circulation of water under pressure to the exhaust valve seats. The Rootes blower is vertically mounted on the opposite side of the engine at front being driven from front end of crankshaft. On both the Eldridge and Guyot engines the carburetor is placed on the inlet side of the supercharger as done by Duesenberg and Miller. A Solex carburetor is used on the Eldridge engine.

operated by two overhead camshafts driven by a single roller chain at the rear end of the engine, with an idle sprocket for adjustment. The valves, set at an angle of 90 deg. are operated through the agency of disks attached to the stems but with a roller making contact with the cam. Dual concentric springs are used with a total pressure of 110 lb.

Eldridge is using a special type of shrouded valve invented by the well known engineer Ricardo. By means of this the port is not uncovered during the first movement of the valve, but practically maximum opening is obtained at a given point and the shut-off is almost instantaneous.

The three-bearing crankshaft is built up of five units and runs on roller bearings, while the connecting rods have two-row roller bearing big-ends. Five Imperial gallons of oil are carried in a tank under the radiator, the lubrication being on the dry sump system. The supercharger is of the Rootes blower type, with a vertical axis and driven by skew gearing from the front end of the crankshaft. Marelli dual ignition with two plugs per cylinder and a Solex carburetor are used. Cooling is by both pump and thermo syphon.

The main piping is sufficiently large to allow a thermo syphon flow, but within this are set copper water pipes of about ⅝ inch diameter by means of which the water is directed under pressure to the exhaust valve seatings.

Entirely underslung from the springs, the frame is boat-shaped in plan and consists of light channel section side members united at front and rear by steel rods and at the centre by a girder form cross-member. A flat aluminum undershield runs the whole length of the chassis, riveted to the side members, and affords considerable stiffening effect. Engine, gearset and propeller shaft are offset 30 m. m. about 1 1/6 inches from the center line of the chassis. Perrot type four-wheel brakes are used, with equalizers.

The car is unusually low in overall height, which is only 29 in., though a full 5½ inch minimum ground clearance is secured. The seats are actually below the top of the side members of the frame, the latter having upstanding brackets for the spring ends. These cars are said to be capable of a sustained speed of 115 m. p. h.

Johnson Wheel Company, 1408 Mt. Vernon St., Phila., will continue as the authorized distributor of the Kelsey Wheel Co. The statement in the February issue was in error. The company is factory distributors for Olson frame extensions and special transmissions for Ford cars and trucks.

Thousands Thronged the Line of March

Wilkes-Barre's Toy City Circus

The People's Outfitting Co. Circus Parade Is a County-Wide Sensation

By H. B. Woodward

M. A. OPPENHEIM again scored with his fourth annual "Toy City Circus Parade," which heralded the opening of the toy department of the People's Outfitting Company of Wilkesbarre, Pa. Each year the youngsters and grown-ups of the Wyoming Valley eagerly look forward to this big event and each year it is bigger and more colorful than its predecessor.

This year's spectacle which took place on Saturday, October 16th, and required months of preparation on the part of Mr. Oppenheim, Leo Armbruster, Assistant Manager of the company and Harry Royer, store decorator, was by far the most impressive of all these events and drew forth continuous applause from the delighted thousands along the line of march.

The climax of the parade came on Tuesday, October 19th, at 9 A. M., when "Toy City" was formally opened at the Peoples Outfitting Company. Jean Acker, former wife of the late Rudolph Valentino, was present at the store.

Toys were given away on the opening day to each child accompanied by an adult who visited Toy City.

But let us pass on to a detailed description of the big parade. Circus posters and advertisements in the local papers announced that two o'clock was the hour when the big procession would start moving over the city streets.

At noon the crowds lined the sidewalks. By two o'clock, when the first of the spectacle appeared on South Main Street, the crowds along the line of

Auto & Pushmobile Division

A Pretty Entrant in the Decorated Doll Carriage Division

Right:
From the National Costumes Group

march had proven too much for the sidewalks and half of the street was filled with spectators. Around Public Square nothing could be seen but the throngs of people who were jammed close to the line of march.

Members of the police force estimated the crowd at between 40,000 and 50,000 and insisted that it was as large as any they have ever had to handle. Every available policeman was pressed into service, and the streets were not cleared until two hours after the Toy City parade had made its bow to Wyoming Valley, and then continued on, to remain only a memory until next October

2500 Children in Line

More than 2500 children participated in the display, showing their gorgeous costumes, their old clothing, their unique ideas in circus dress. It is difficult to state which enjoyed the Toy City parade more, the children, or the sponsor, Mr. Oppenheim.

The line of march was from West River and Ross Streets, to South Main Street, to Public Square, to South Franklin Street, to Northampton Street, to River Street and to South Street, where the parade disbanded.

The first section, mounted officers of the Wilkes-Barre police force, appeared shortly after 2 o'clock at South Main and Ross Streets, from the starting point on West River Street. They were followed by two Toy City pages and the Toy City flag.

The pageant was impressive from the beginning, for at the head of the line was a beautiful float. The float depicted a housetop on which was seated Santa Clause. It was drawn by three reindeer. Wyoming Valley Boys' Band followed and directly back of them came the official car carrying Mr. Oppenheim, Mayor Daniel L. Hart, Sam Frank, vice-president of the Household Outfitting Co., Scranton, and John C. Sweeney, advisory director of International Correspondence schools.

The National Division followed. It was made up of hundreds of cute children in all sorts of fantastic costumes, many of them representing the natives in the lands of their forefathers. A cage of of white bears with a Colonial band atop it gave the first circusy touch to the parade. Then came girls on a Colonial float.

Circus in Miniature

Dainty Miss Florence Sordoni, atop "Speeds Ben," a famous horse, headed a group of eleven riders on fiery steeds. There followed the Pet Animal Division, consisting of boys and girls toting, leading or driving their animal pets. Six small circus wagons with all sorts of toys and animals and an ostrich and a giraffe, appearing real but not quite, marched between the Pet Animal and Health Division which included a Parochial Schools Float, a Nanticoke Visiting Nurse Float, a Tuberculosis Society of Wilkes-Barre Float. The first was an artistic affair sponsored by 57 pa-

Right:
The Elephant Takes a Ride

rochial schools of the valley. The last named carried an A-1 American boy representing a vegetable and an A-1 American girl representing pure foods and sunshine.

St. Mary's Boys' Band led the health division.

Kirby Park's zoo, a North American bear cub that has held forth there the past several months, rode in a cage following the Health Division after which came a band wagon. The Decorated Doll Carriage Dilowed by the Boys' Band. The next feature was a Whippet sedan. Riding atop the car was Donald Mackey, the Jolly Jester.

Four Hottentots rode on a Chinese float that carried a Chinese idol and a float of acrobats followed

The fourth cage of the procession presented three tigers and carried a Spanish group that was made up of Miss Mae Steele, a charming senorita, five girls and two small children with an impersonator of the late Rudolph Valentino. Miss Steele is a saleswoman at the People's Outfitting Co. The original costumes division was next in line, then came the clown division, the ogres and another cage with two brown bears and a clown band. Decorated pushmobiles, decorated bicycles and decorated express wagons commanded their share of attention, after which came a small camel, a large camel and an elephant. Three caged leopards immediately preceded the steam calliope which sounded the peppy, withal doleful, strains that indicated the end of a perfect street pageant.

The judges for the parade were local newspaper men and civic workers. They were: James Crawley, Thomas Gavin, Ham Fisher, George Heffernan, John MacSweeney and Joseph Mihalko and Mrs. E. U. Buckman, Attorney S. M. R. O'Hara, Miss Edith Brower, Miss Pearl Wardin and Miss Jessie Cunningham.

Among those who journeyed to Wilkes-Barre to witness the parade were Edwin S. Greer, secretary of the Altoona Boosters' Association, Altoona, and H. B. Woodward of PLAYTHINGS.

Dancing and acrobatic stunts by pupils of Tracey's Dancing School were presented in the windows of the People's Outfitting Co. on Saturday night, as the final event of the day.

Awards were made to the winners in the various divisions by Mayor Daniel L. Hart of Scranton.

Kresge to Feature Veteran Clown

CHILDREN and grown-ups who visit Toyland in the Kresge Store, Newark, N. J., between now and Christmas will enjoy the distinction of being entertained by one of the amusement world's oldest active clowns.

Harry Inman, a veteran of the old time "show boats" on the Erie Canal, will be there with three-foot feet and all the "props" that have made him the success he is under the big tops of the circuses. Inman who claims the distinction of being the "oldest contortionist in activity," started in the show business in 1888 with Sautelle's Water Circus on the Erie Canal. He traveled all over the country on show boats, in wagon shows and with railroad circuses. His latest work was with the Barnum and Bailey, Ringling Brothers show. Following his appearance in Toyland Inman will take a short rest after which he will take up his clowning with the John Robinson shows on a road tour.

Omaha Toyland

J. C. VAN AVERY of the Nebraska Bicycle company has opened his Toyland at 1512 Howard street, Omaha, Neb., with the largest and finest display of toys his firm has yet offered.

To make his display more attractive, Mr. Van Avery has remodeled and enlarged his store. New fixtures have been added and the entire store has a holiday aspect.

Many new and interesting toys are offered this season.

Mr. Van Avery's store is well known for its high quality of goods and reasonable prices.

BENJAMIN PUMP AIR RIFLE

TAKE-DOWN, SINGLE SHOT

Nickel plated barrels, walnut stock, single shot take-down, larger barrel is the pump and air chamber, smaller one is the shooting barrel, length 36 in., w't per dozen 17 lbs.

SIX DOZEN IN A CASE

KING AIR RIFLES

MODEL 10, JUNIOR SINGLE SHOT

Blued finish steel barrel and frame, walnut finished stock, good sights, perfect action, shoots BB shot,, length 29 in., w't per doz. 15 lbs.

No. C5010—Per dozen $14.40

ONE DOZEN IN A CASE

MODEL 17, SINGLE SHOT

The new "King Breech Loading Air Rifle", is the first really good air rifle, at a moderate price, that will shoot darts as well as steel and lead shot with accuracy. It "breaks" about the center of the rifle for loading purposes, has an automatic locking device and is built very substantially.

Equipped with a very practical safety trigger. A deep notch in the trigger permits it to "bite" on the lower part of the frame and it is impossibe for the plunger to slip off the trigger when gun is cocked. This, however, does not at all interfere with the pull of trigger, which is very smooth.

No. C5011—Barrel and all metal parts blued, walnut finished stock, length over all 32 in., w't per doz. 27 lbs., per dozen $40.00

ONE DOZEN IN A CASE

MODEL 22, 500 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 500 times without reloading, made of best grade highly polished blued steel, with barrel and frame of one piece, walnut finished stock, open rear sight. Shoots BB Air Rifle shot with accuracy. Length 31 in., all parts interchangeable. W't per doz. 25 lbs.

No. C5022—Per dozen.....$28.00

ONE DOZEN IN A CASE

KING AIR RIFLES

MODEL 55
KING 1,000 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 1,000 BB shots without reloading, made of best grade, highly polished blued steel with barrel and frame of one piece, selected black walnut finish stock, carefully adjusted sights. Length 35 inches. This model is identical in appearance to No. 5022 excepting that it is about 4 in. longer and has a heavier stock. Weight per dozen about 29 lbs.

No. C5055—Per dozen $32.00

KING POP GUNS

MODEL 25, KING RAPID FIRE

Blued finish on all metal parts, stock and hand piece of polished black walnut loads automatically, makes a loud report with both forward and backward movement of hand piece, no flying cork, safe, sane and substantial, length over all 27 in., w't per case of 3 dozen 45 lbs.

No. C5015—Per dozen.....$16.00

ONE IN A BOX. THREE DOZEN IN A CASE

MODEL 15
SINGLE SHOT KING SAFETY LEVER

Lever action, one piece, blued steel barrel and frame, walnut finished stock, shoots a cork, which is attached to a string and makes a loud report, length 17 in., per case of 6 dozen 39 lbs.

No. C5014—Per dozen $4.00

SIXTH DOZEN IN A CASE

MODEL 14, KING LONG DISTANCE

Blued finish steel barrel walnut finished stock, shoots a cork at end of string and makes a loud report, length 21 in., w't per case of 6 dozen 70 lbs.

No. C5019—Per dozen $12.00

SIXTH DOZEN IN A CASE

DAISY AIR RIFLES

MODEL 12, SINGLE SHOT

Lever action, single piece steel barrel, blued finish, walnut stock, shoots BB air rifle shot and 17-100 darts, length 31½ in., w't per doz. 28 lbs.

No. C5005—Per dozen $24.00

ONE DOZEN IN A CASE

No. C5002—Per dozen $8.00

SIX DOZEN IN A CASE

KING AIR RIFLES

MODEL 10, JUNIOR SINGLE SHOT

Blued finish steel barrel and frame, walnut finished stock, good sights, perfect action, shoots BB shot,, length 29 in., w't per doz. 15 lbs.

No. C5010—Per dozen $14.40

ONE DOZEN IN A CASE

MODEL 17, SINGLE SHOT

The new "King Breech Loading Air Rifle", is the first really good air rifle, at a moderate price, that will shoot darts as well as steel and lead shot with accuracy. It "breaks" about the center of the rifle for loading purposes, has an automatic locking device and is built very substantially.

Equipped with a very practical safety trigger. A deep notch in the trigger permits it to "bite" on the lower part of the frame and it is impossibe for the plunger to slip off the trigger when gun is cocked. This, however, does not at all interfere with the pull of trigger, which is very smooth.

No. C5011—Barrel and all metal parts blued, walnut finished stock, length over all 32 in., w't per doz. 27 lbs., per dozen $40.00

ONE DOZEN IN A CASE

MODEL 22, 500 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 500 times without reloading, made of best grade highly polished blued steel, with barrel and frame of one piece, walnut finished stock, open rear sight. Shoots BB Air Rifle shot with accuracy. Length 31 in., all parts interchangeable. W't per doz. 25 lbs.

No. C5022—Per dozen.....$28.00

ONE DOZEN IN A CASE

KING AIR RIFLES

MODEL 55
KING 1,000 SHOT AUTOMATIC REPEATER

Lever action, automatic repeater, shoots 1,000 BB shots without reloading, made of best grade, highly polished blued steel with barrel and frame of one piece, selected black walnut finish stock, carefully adjusted sights. Length 35 inches. This model is identical in appearance to No. 5022 excepting that it is about 4 in. longer and has a heavier stock. Weight per dozen about 29 lbs.

No. C5055—Per dozen $32.00

KING POP GUNS

MODEL 25, KING RAPID FIRE

Blued finish on all metal parts, stock and hand piece of polished black walnut loads automatically, makes a loud report with both forward and backward movement of hand piece, no flying cork, safe, sane and substantial, length over all 27 in., w't per case of 3 dozen 45 lbs.

No. C5015—Per dozen.....$16.00

ONE IN A BOX. THREE DOZEN IN A CASE

MODEL 15
SINGLE SHOT KING SAFETY LEVER

Lever action, one piece, blued steel barrel and frame, walnut finished stock, shoots a cork, which is attached to a string and makes a loud report, length 17 in., per case of 6 dozen 39 lbs.

No. C5014—Per dozen $4.00

SIXTH DOZEN IN A CASE

MODEL 14, KING LONG DISTANCE

Blued finish steel barrel walnut finished stock, shoots a cork at end of string and makes a loud report, length 21 in., w't per case of 6 dozen 70 lbs.

No. C5019—Per dozen $12.00

SIXTH DOZEN IN A CASE

BENJAMIN PUMP AIR RIFLE

TAKE-DOWN, SINGLE SHOT

Nickel plated barrels, walnut stock, single shot take-down, larger barrel is the pump and air chamber, smaller one is the shooting barrel, length 36 in., w't per dozen 17 lbs.

No. C5025—Per dozen $80.00

ONE DOZEN IN A CASE

QUACKENBUSH

TAKE-DOWN, SINGLE SHOT

No. C7—Shoots strong and accurately, 17-100 felted slugs, BB air rifle shot or 17-100 darts, 17 in. round barrel, blued finish, metal parts all steel except inner barrel which is made of brass, American walnut stock, nicely finished, action and trigger gray blue finish, six steel darts and three paper targets, packed with each rifle, length overall 38 in., w't each 2¼ lbs. per dozen $122.40

By simply pushing in the barrel the gun is cocked and the breech opened for handy loading. An excellent arm for small game, also well adapted for target shooting.

ONE IN A BOX WITH SIX STEEL DARTS AND THREE FANCY PAPER TARGETS

No. C17-100—Felted slugs for No. C7 Quackenbush and other makes of single shot rifles, per 1000 .....$2.30

Felted slug prevents leakage of air, desirable for accurate shooting.

Half dozen in a box

BOSS.

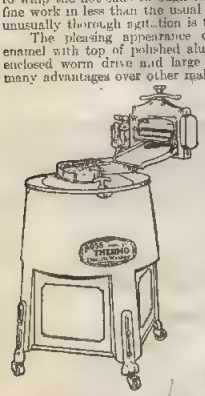
No better proof of Boss merit could be desired than the well known popularity and continued success of the Boss line since its introduction in 1889, an unbroken period of over 33 years. Quality washers built to give the king of service and satisfaction every purchaser has a right to expect, at the lowest possible cost, always has been and will continue to be the Boss policy.

THERMO.

The Thermo represents the last word in electric washers. For fast, thorough washing and dependable service, it stands alone.

With a tub constructed on the thermos bottle principle to keep the suds hot during washing period and the patented Boss aerowing to whip the hot suds through the clothes, the Thermo does extra fine work in less than the usual time. Continuous hot suds with unusually thorough agitation is the secret.

The pleasing appearance of the Thermo—glistening gray enamel with top of polished aluminum—its extra large capacity, enclosed worm drive and large size aluminum wringer, gives it many advantages over other makes.



The Tub—Constructed with a triple wall. The outer wall is of 1-inch red cypress and the inner wall of copper, heavily tinned on the inside, with a sealed air space between the outer and inner walls. This thermo construction keeps the suds hot for entire washing, greatly increases cleansing action of the soap and makes it unnecessary to boil the clothes.

The Wringer—Made of aluminum, with 12-inch semi-soft cushion rolls which wrings large or small pieces thoroughly without breaking buttons. Safety feed guides and emergency pressure release make it easy and safe to operate. Wringer locks in four positions and is started, stopped or reversed by conveniently located lever.

Aerowing Agitator—Made of heavy aluminum, polished with kid glove smoothness, rustless and stainless; wide perforated wings swirl the hot suds ninety times a minute. Handles heavy blankets or flimsy garments effectively and safely.

The motor is ¼ H. P. General Electric, splash proof, fitted with a 10-foot water proof cord and standard attachment plug.

The motor and all working parts are enclosed, but easily accessible. The enclosed cabinet construction makes machine absolutely safe for the home with children.

Legs fitted with adjustable brackets, which permits adjusting the height of the machine, and sturdy, easy rolling casters.

Each

No. 52—Thermo Electric Washing Machine; 110 volt, A. C. current; capacity, 16-gallons; length wringer rolls, 12 inches; shipping weight, 225 lbs. **$220.00**

Other than 110 volt, A. C. 60 cycle for shipment from factory, F. O. B. Cincinnati at prices ruling at date of shipment.

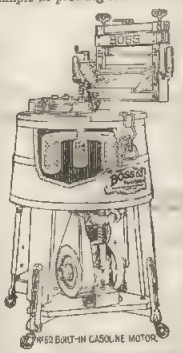
GASOLINE MOTOR.

Lack of electricity prevents many homes from having electric washers, but it cannot keep them from having electric washer comfort.

Boss engine power washers will provide it for them. No washer is simpler to operate, no electric washer does better work. These machines do everything an electric washer will do, and they have all the conveniences of an electric model.

The gasoline motor model is a washer that carries its power with it. Mounted on casters, easy to move and useable anywhere.

Starts with a pull of the rope starter. The engine requires no attention while running. A touch of the finger stops it just as simple as pressing the button to start and stop the electric washer.



Boss gasoline motor, air cooled, 4 cycle, valve in head type. Built on automobile motor principles. Develops ¾ H. P. at 1750 R. P. M. Not to be compared with the ordinary cheap 2 cycle gasoline engine. Runs 10 hours on 1 gallon of gasoline. Oil is used almost negligible. A simple, dependable and economical power unit.

The tub is made of 1-inch red cypress, deeply corrugated on the inside. The legs are fitted with an adjustable bracket which makes it possible to raise or lower the machine to any desired height. Equipped with sturdy, easy rolling casters.

The Aerowing agitator is made of heavy aluminum, polished with kid glove smoothness, rustless and stainless; wide perforated wings swirl the hot suds ninety times a minute. Handles heavy blankets or flimsy garments effectively and safely.

The wringer has 12-inch semi-soft cushion rolls which wrings large or small pieces thoroughly without breaking buttons. Safety feed guides and emergency pressure release make it easy and safe to operate. Wringer locks in four positions and is started, stopped or reversed by conveniently located lever.

Each

No. 62 –Gasoline Motor Washing Machine; capacity, 16 gallons; shipping weight, 260 lbs **$195.00**

BELT POWER.

Boss belt power washer model 60, same as model 62 except without gasoline motor. For homes already equipped with small gasoline engines. Has 5-inch belt pulley. Speed of pulley, 600 R. P. M.

Each

No. 60—Belt Power Washing Machine; capacity, 16 gallons; shipping weight, 200 lbs. **$85.00**

CYPRESS TUB.

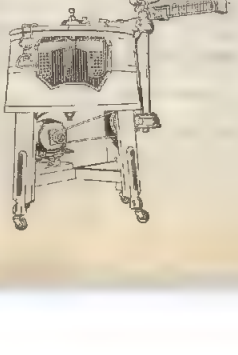
Extra large tub of best quality cypress, completely enclosed gears; dependable ¼ H. P. motor, patented Boss Aerowing agitator.

The wringer starts, stops or reverses at a touch of the control lever. It locks securely in either of four positions. Cushion rubber rolls do not break buttons. Has emergency pressure release and feed guides. Rollers on drain board.

The model 50 is superior to ordinary metal tub washers because its heavy cypress tub keeps the water hot longer. The tub is smoothly finished inside and is easy to keep clean. It will outwear an ordinary metal tub.

A sturdy dependable washer, ¼ H. P. motor, sturdy back bone, care free worm drive, leak proof brass drain, simplicity of construction. Cover swings back out of way and allows plenty of room for wringing from washer. Raising cover stops machine; lowering cover starts it. No clutch to wear out.

Aerowing agitator, heavy aluminum, polished to kid glove smoothness, rustless and stainless. Handles heavy blankets or flimsy garments effectively and safely. A patented and exclusive Boss feature.



Each

No. 50—Boss Electric Washing Machine; 110 volts, A. C. current; capacity, 16 gallons; shipping weight each, 225 lbs. **$147.00**

Other than 110 volt, A. C. 60 cycle for shipment from factory, F. O. B. Cincinnati at prices ruling at date of shipment.

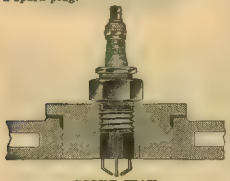
Per box of 10....$11.60

*Indicates Used on Factory Equipment. One in a Box, Ten in a Carton. Approximate Weight Per Box 3½ Lbs.

POSITION OF SPARK PLUG IN CYLINDER

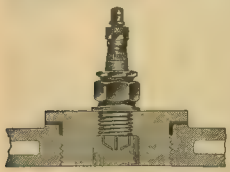
The correct position of the spark plug electrodes within the cylinder is an important item and the successful operation of an engine depends to a great extent upon the correct fitting of a spark plug.



RIGHT WAY

This illustration shows the correct position of the firing points of the plug in position in the cylinder.

The best results are obtained when the firing points are surrounded by the fresh gaseous mixture.



WRONG WAY

This illustration shows the improper fitting of a plug in the cylinder.

The recess between the firing points and the top of cylinder forms a pocket for burnt gas and permits carbon to accumulate rapidly, causing the plug to misfire.

Excessive oil in the combustion chamber, or too rich mixtures of gasoline will cause any spark plug to become fouled or short-circuited by carbon deposits. Unless you remove the cause of the trouble by giving proper attention to engine valves, pistons, rings, lubrication, carburetor adjustment, etc., cleaning will give you temporary relief.

It is also necessary to make any spark plug function perfectly to see that the gap between the electrodes (where the spark jumps) is kept adjusted to .020 to .032 inch. The requirements of any particular engine may vary—you may have to experiment to find just the right setting. When you have found it, keep your plugs always adjusted.

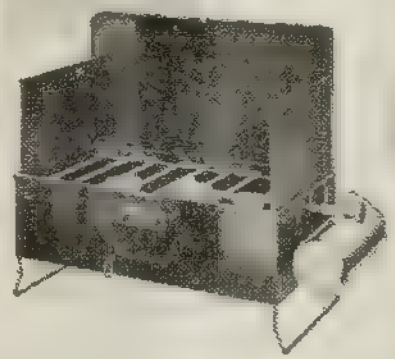
Auto Cook Kits

Gasoline Syphon and Folding Stand

Prentiss Wabers Feature Stove No. 4



A moderateness of price distinguishes this two-burner stove as an exceptional value, for it embodies practically all the desirable features that would ordinarily be wanted in an efficient two-burner stove for camping and picnics.

It is built of 24-gauge sheet steel, with dark brown enamel baked on, has folding windshields and legs, strong hinged grate and one-piece drawn brass tank. When not in use the tank packs inside, as illustrated below. Closed it measures 17x9x6 inches, and weighs approximately 12 pounds. A convenient funnel and brass pump are included in the equipment. For size, weight and all-round usefulness its value is unmatched. Each in carton.

No. 23R1. Each 3.50

Camp Stove Showing Case Closed

This illustration shows stoves Nos. 23R1 and 23R2, as they appear when closed.

Gasoline Syphon

A most convenient adjunct to the equipment of the camper, as a slight pull on the plunger starts the gasoline flowing from your auto tank direct to the stove—simple, efficient and inexpensive.

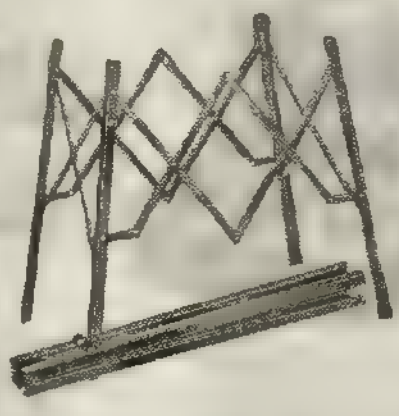
No. 23R3. Each ..... .66

Prentiss Wabers Feature Stove No. 5

This large two-burner stove of brown enameled 24-gauge sheet steel, has the unbreakable steel rod, hinged grate, and good sized one-piece drawn brass tank, and a warming shelf attached to the cover strongly supported by the wind shields. A decided convenience to keep prepared foods warm while others are being cooked. Closes to compact size of 18 9x19x5 inches, and weighs approximately 18 pounds. Priced complete with pump and funnel. Each in carton.

No. 23R2. Each 5.00

Prentiss Wabers Folding Stand



Almost as great a convenience as the stove itself is the Folding Stand for Camp Kooking Kits. It raises the cooking surface to a height of 26½ inches, increasing the safety and comfort of camp cooking. It is strongly built and enameled to prevent rust and has riveted joints which extend to fit stoves No. 33R1 and No. 23R2 with equal satisfaction. It is exceptionally strong and rigid, and folds to the compact size of 21¼x1½x1½ inches and weighs only 3½ pounds. Each in carton.

No. 23R4. Each 1.27

STORE LADDERS.

THE MILBRADT.

Made to fit any kind of shelving; good hardwood lumber, handsomely finished, perfectly safe as they cannot jump the track. Take little space; run noiselessly and easily; extra wide shelf at top. All iron work on ladders, as well as supporting brackets, is malleable and aluminum bronzed.

How to Measure—Give height from floor to top of base shelf, width from front of base shelf to front edge of upright, height from base shelf to top of shelf to which track is to be fastened.

For Wood Track Only.

A bent ladder intended for shelving with a wide base. Wheels run noiselessly on steel track.

	Each
No. 1—Bent; has paper filled wheels running on steel track; fastened to shelving with rubber wheels against base shelf	**$40.00**
No. 5—Straight; otherwise same as No. 1	**38.00**

	Each
No. 2—Bent; floor ladder; used where shelving is not strong enough to use other styles; top runs on wood track fixed to shelving, but weight of ladder is on wheels resting on floor; adjusts itself to uneven floor; uses wood track only	**$40.00**

	Per Foot
Wood Track—For No. 2 ladder	**$0.60**

How to Order.

Ladders Nos. 1, 2, 3, 4 and 5 give the exact height from floor to top of base shelf, the exact width or projection of base shelf and the exact height from top of base shelf to top of shelf where track is to be fastened, and the track should be fastened in front of a shelf that is about three feet down from highest point you wish to reach. Where the floor slopes, it is necessary to give height of base shelf at both ends of shelving. Also state number feet of track required.

EXTRA TRACK.

	Per Foot
Regular Aluminum Bronzed Track—With brackets	**$0.70**
Extra Strong Aluminum Bronzed Track—With brackets	**.80**

For description of Brackets and Track, see pages 811, 812.

Cut shows part of top fixture for ladder No. 2, it also shows regular hardwood track that it runs on.

Track and Brackets are not furnished with ladder and must be ordered extra.

FRANCHISE

PONTIAC SIX

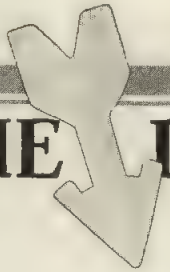
CHIEF OF THE SIXES

The brilliant new Pontiac Six with Fisher-built coach or coupe body, at $825, offers value undreamed of by the automobile buyer of a year ago.

Alert, aggressive merchants will recognize in the Oakland-Pontiac double-profit franchise, that combination of permanence, of unusual sales advantages and of ever-widening markets, with which to build a sound and unusually profitable business.

OAKLAND MOTOR CAR CO., PONTIAC, MICH.

GENERAL MOTORS



THE DOUBLE

OAKLAND SIX

WINNING AND HOLDING GOOD WILL

In your town, and every town, automobile men are watching with amazement the tremendously increasing demand for low-priced quality sixes.

The Oakland-Pontiac double franchise is tapping this rich, new field with two lines of sixes, each a leader in performance, appearance and value in its price class.

The advanced, spirited Oakland Six, in seven beautiful body types, ranging from $975 to $1295, has already doubled the business of Oakland dealers in the past few months.

PRODUCTS OF

The new Roamer eight-in-line sedan listing at $1985

Larger Eight Cylinder Sedan Added by Roamer

To the existing line of four, six and eight-cylinder cars, the Roamer Motor Car Co. (Canada), Limited, have added a new and more powerful eight-in-line chassis on which two body models, a 5-passenger sedan and a 4-passenger coupe, both listing at $1985, is offered. Standard units are used throughout in the construction of the new Roamer model and such features as Lockheed hydraulic four-wheel brakes, 33 by 6.00 in. balloon tires and a wide range of de luxe equipment are included in the price f.o.b. Kalamazoo, Mich.

A Lycoming 3¼ by 4¼ in. "L" head engine of 33.80 S.A.E. horse power rating and embodying a 5-bearing crankshaft, cast iron pistons, and Link-Belt front end drive is employed. Generator, ignition and starter are separate and of Auto-Lite make. The carburetor is of Schebler make with fuel delivered from a 15 gallon rear tank by a Stewart vacuum system.

Both clutch and transmission are formed in unit with the engine, the former being a single plate Borg and Beck and the latter of Durston make with three speeds forward. Drive to the rear axle is through two metal type Machanics universal joints and a tubular propeller shaft. The axle is of the ¾ floating type with spiral drive and of Salisbury make. Propulsion and drive are taken through the springs and the gear ratio is 4.63 to 1. Service brakes are hydraulically operated on all four wheels with the hand brake connected to a drum on the front end of the propeller shaft.

The front axle is also of Salisbury make with the steering gear a Ross of the cam and lever type. Springs are semi-elliptics all round with those on the front being 36 by 2 in. and those on the rear 56½ by 2 in. Ready for the road the complete car weighs 3580 lbs. The wheelbase of the new model is 126 in.

Conventional wood construction with steel panels is employed on the four-door body. The interiors are upholstered in mohair and velour while the body finish on both are in two-tone lacquer. Standard equipment includes disk wheels, automatic windshield cleaner, Moto-Meter, heater, rear view mirror, traffic signal, and trunk with rack.

Hudson-Essex Seats Adjustable

A new seating arrangement for the front passengers in the Hudson and Essex coaches and Hudson brougham is announced by the Hudson Motor Car Co. The front seats in all these cars are now of the individual type and have been developed to provide greatest comfort for passengers.

Both the seat cushion and back of the front individual seats can be adjusted.

Dodge-Graham Set Record

Retail sales of Dodge Bros. motor cars and Graham Bros. trucks by dealers in the United States in the period from January 2 to April 3, 1926, established another phenomenal record with a total of 70,599 units as compared with 51,318, a gain of 19,281, or 37 per cent over the same period in 1925.

Car Changes Made in April

Jordan A—7-p. Sedan price cut.
Cleveland 31—New De Luxe sedan.
Peerless 6-80—New Roadster and Phaeton.
Wills Ste. Claire T-6—Price cuts.
Marmon—New 4-p. speedster.
Paige—Adds 115 in. W. B. model.
Dodge Bros.—New sport roadster.
Chandler—New Berline.
Moon Series A—Price changes.
Star 6—Price increase on touring.
Roamer—New 8-80 eight-cylinder chassis.

HORSE AND PONY LAWN MOWERS.

GENUINE PHILADELPHIA.

PLAIN BEARINGS.

TWO MEN OR PONY.

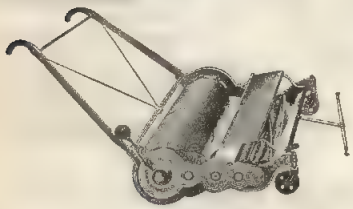
Can be drawn by two men or by a small pony, therefore can be used where trees and shrubbery will not admit a horse.

Its construction is simple and, with its solid frame, the revolving cylinder can be removed by taking off the two box caps, making it easy to repair. Every machine is guaranteed to do good work.

12-inch driving wheels, 6¾-inch cylinder with 4 corrugated steel blades. Bottom knife is adjustable to cylinder.

Cut, inches	25	30
Weight, pounds	150	155
Each	$70 00	100 00

DRAFT POLE, PONY.



This style is standard the world over, being used on government grounds, public parks and large lawns throughout the country.

The original Philadelphia Pony Mower, with solid, revolving, 4-knife cutter.

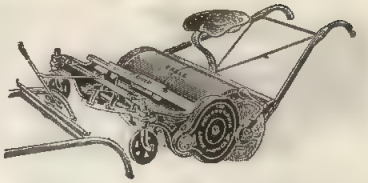
Every machine warranted.

The 30-inch size is made with either open or closed cylinder. In ordering this size be sure to designate which is wanted.

The 35-inch size is made only with open cylinder.

Cut, inches	30	35
Weight, pounds	450	500
Each	$135 00	165 00

EAGLE, HORSE.



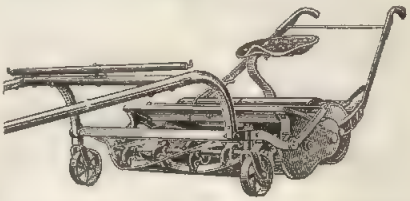
Made with added weight of iron for strength, increased diameter of cylinder for draft and large shafting and journals for durability. Has patent adjustable boxes for taking up the wear of journals, wrought iron front and back girths, making the frame solid; cutting cylinder is stationary; bed knife is adjustable to cylinder; cylinder blades are riveted to the spiders

Five cylinder blades, height of driving roller 14 inches, diameter of cylinder 7¼ inches.

Equipped with seat, shafts and side draft attachment. (No reduction is made without seat and shafts.)

Cut, inches	30	35	40
Weight, pounds	645	670	710
Each	$150 00	185.00	210 00

HORSE.



The best Horse Lawn Mower made. Has wrought iron frame and caster roller attachment which can be raised or lowered at the will of driver while machine is in motion. The spiral blades are bolted on the cylinder frame and adjusted by set screws, an adjustment which no other machine has.

"Crown Razors"

A Good Judge of Razors will buy these. Each Razor Guaranteed

The Crown Razor is a special product in the razor line. Manufactured by the Crown Razor Co., of Boston, Mass. It is strictly high grade, made of best decarbonized American steel, by skilled mechanics. It has the finish and appearance as well as cutting quality of a razor that would sell at many times the price quoted. Each razor is fully guaranteed, and if found defective, will be replaced with a new one.

These razors are made with greatest care, and we are therefore safe in saying that no razor at a similar price in the market is as good. For mail-order men, street men, razor agents, canvassers, premium men and dealers, these razors have no equal.

The handler or dealer may ask most any price he desires for these razors, because the quality, appearance and finish justifies it. The evenness of the temper and the cutting quality is seldom obtained in other makes. We are sure that a trial order will result in many repeaters. It is positively one of the best razors for mail order exploitation.

"Crown Razors"

A Good Judge of Razors will buy these. Each Razor Guaranteed

The Crown Razor is a special product in the razor line. Manufactured by the Crown Razor Co., of Boston, Mass. It is strictly high grade, made of best decarbonized American steel, by skilled mechanics. It has the finish and appearance as well as cutting quality of a razor that would sell at many times the price quoted. Each razor is fully guaranteed, and if found defective, will be replaced with a new one.

These razors are made with greatest care, and we are therefore safe in saying that no razor at a similar price in the market is as good. For mail-order men, street men, razor agents, canvassers, premium men and dealers, these razors have no equal.

The handler or dealer may ask most any price he desires for these razors, because the quality, appearance and finish justifies it. The evenness of the temper and the cutting quality is seldom obtained in other makes. We are sure that a trial order will result in many repeaters. It is positively one of the best razors for mail order exploitation.

WALKER.

WALKER ASSORTMENT.

WALKER BALLOON JACK DISPLAY.

The Walker balloon tire jack display, lithographed in eight colors and picturing to the car owner what the right jack means to him when changing tires, is the most elaborate sales help ever offered to dealers in the history of jack selling.

Placed in the dealer's window, it suggests to every passerby the way to make tire changing easy. This beautiful display is free to the dealer with ten Walker balloon jacks, three types, which will fill the requirement of every make of car

Every car with balloon tires needs a low jack with high lifting range and the advantage of a long handle for placing and operating the jack. While these jacks are designed especially for balloon tires, they are just as desirable for cord or fabric tires.

More sales and more profit await the dealers who immediately place this display in their window.

Per Assortment

No. A-1003—Walker Balloon Tire Jack Assortment; consists of 1 lithograph display, 3 No. A-126 jacks, 3 No. A-620 jacks and 4 No. A-520 jacks; weight per assortment, 120 lbs. **$58.80**

WALKER TRUCK.

The No. A-216B meets the need of speed wagons and 1-ton truck drivers. All wearing surfaces machined to gauge. The ball bearings, one to one gear ratio with a 15-inch handle, allows this jack to lift its load with ease.

Each

No. A-216B—Walker Jack; capacity, 2½ tons; height 10 inches, raise, 6 inches; weight each, 8 lbs. **$4.90**

WALKER SCREW.

Walker screw jacks designed for trucks. The flip cap gives two lifting heights. These jacks are adaptable to practically all makes and models within their capacity. The standard and gears are malleable, also the socket, which is fitted with a pipe handle. The screw is steel, with machine cut thread. High grade, high power jacks.

Each

No. A-251—Walker Screw Jack; height, 10 inches; raise, 6 inches; height of extension cap, 2½ inches; capacity 5 tons; screw diameter, 1¼ inches; weight, 17½ lbs . **$11.20**

No. A-266—Walker Screw Jack; height, 10 inches, raise, 6 inches; height of extension cap, 3 inches; capacity, 6 tons; screw diameter, 1½ inches; weight, 20 lbs. . . . **13.30**

WALKER TRUCK.

Walker Badger Jack No. A-5 is designed for three-ton motor trucks. Drop forged pawls and a case hardened steel rack provide ample strength. The bearing pins are nickel steel on close centers, making the lift easy. Carefully machined parts, properly assembled, insure positive dependable action. The double cap gives two lifting heights.

Each

No. A-5—Walker Jack; height, 10 inches; extension cap, 1½ inches; raise, 6 inches; capacity, 3 tons; weight each, 16½ lbs. **$9.80**

The Walker Badger Jack No. A-55 is designed for heavy motor trucks. The rack bar and lifting pawls are case hardened drop forgings. The bearing pins are nickel steel. The forged foot lift enlarges the range. The broad base, 36-inch handle and massive structure of this jack makes it indispensable in road-side emergencies.

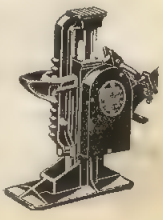
Each

No. A-55—Walker Jack; height 14½ inches; height of foot, 2-8¼ inches; raise, 6½ inches; capacity, 5 tons, weight each, 32 lbs **$21.00**

Built for the heaviest trucks; it has gone through the most rigid mechanical and service tests. The material is absolutely the best to be had, high carbon steel gears, pinions, pawls and racks and nickel steel pins are used, these parts being specially heat treated. The leverage is compounded through gears and is so powerful that one man can easily lift a dead weight of seven and one-half tons with the thirty-six inch extension handle furnished with the jack.

Each

No. A-475—Walker Auto Jack; height, 13 inches; raise, 7 inches; capacity, 7½ tons; weight each, 30 lbs. **$28.00**

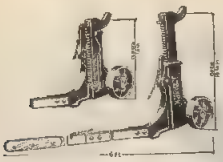


For aligning wheels, adjusting brakes, replacing springs and axles. A car can't slip off. The broad V shaped foot lift gets down to within 4 inches from the ground. You can always get under the lowest point and, because of the broad extension on each side, you can set Blue Boy parallel with springs or frames and still have room for plenty of action. Its heat treated rack bar and drop forged dogs make it unusually strong and rugged and give it a full 3-ton capacity.

Each

No. A-125—Walker Blue Boy Jack; height, 10½ inches; height of foot, 4 to 9⅝ inches; raise, 7 inches; capacity, 2 tons; weight each, 19 lbs. **$12.60**

WALKER JUMP.

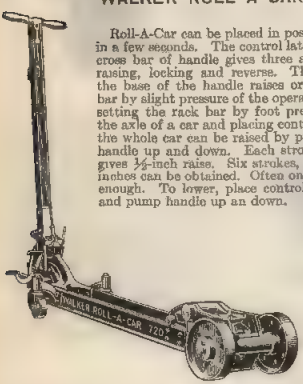


The Walker Jump Jack was developed on a definite understanding of the actual need of a strictly modern jack for tire service work. To operate, catch hold of long handle, roll jack underneath axle of car, pull chain attached to handle. This releases rackbar and strong spiral spring shoots lifting rack against axle. The rack is automatically locked in place. Press down on handle. This shoves wheels forward, automatically raising car to proper height for tire removal and replacement. When work is completed, raise handle of jump jack and car is lowered. There are no adjustments. No tinkering around. No getting down on the ground, pavement, garage or shop floor.

Each

No. 710—Walker Jump Jack; height closed, 13 inches, open, 19 inches; weight, 30 lbs.; handle length, 6 feet; capacity, 1 ton..... **$17.50**

WALKER ROLL-A-CAR.



Roll-A-Car can be placed in position under a car in a few seconds. The control latch just below the cross bar of handle gives three absolute controls, raising, locking and reverse. The foot pedal at the base of the handle raises or lowers the rack bar by slight pressure of the operator's foot. After setting the rack bar by foot pressure up against the axle of a car and placing control latch at raise, the whole car can be raised by pumping the main handle up and down. Each stroke of the handle gives ½-inch raise. Six strokes, or a raise of 4½ inches can be obtained. Often one or two inches is enough. To lower, place control latch at reverse and pump handle up an down.

Construction. Main frames, malleable iron; lifting pawls, high carbon drop forged steel, heat treated. Front and rear wheels of malleable iron. Springs made from oil tempered steel. Rack bars, high carbon steel. Cap is of drop forged heat treated steel.

Each

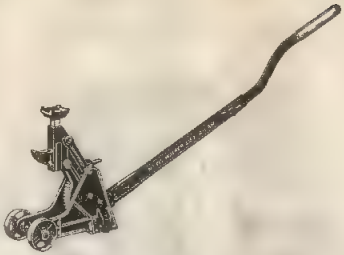
No. 725 Roll-A-Car; weight each, 117 lbs.; lowest point, 8 inches; highest point, 18 inches; capacity, 5000 lbs.; length, 50 inches.. . . . . **$72.00**

No. 726—Roll-A-Car; same as No. 725, except rubber tires. **100.00**

No. 720—Roll-A-Car; weight, 117 lbs.; lowest point, 7 inches; highest point, 16½ inches; length, 50 inches, capacity, 5000 lbs..... **72.00**

No. 721—Roll-A-Car; same as No. 720, except rubber tires. **100.00**

WALKER LIFT-A-CAR.



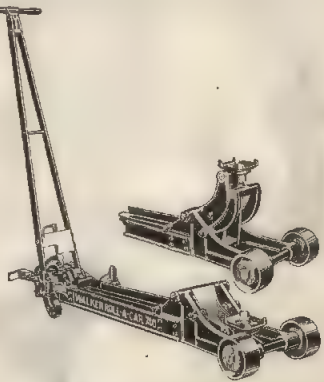
Cars equipped with balloon tires require a low jack to get under the axle when the tire is flat. Lift-A-Car does the trick. A few short easy strokes with the 48-inch handle, which clears gas tanks, bumpers, spare tires and fenders. The foot lift 3½ inches from the ground when lowered, will grab the axle of any low slung car and make the lift to the desired height

Built to lift one corner of the heaviest car with minimum effort. All working parts are sturdily built. The frame is malleable iron. The pawls drop forged, rack bar and top case are hardened steel and the cantilever principle of lifting make Lift-A-Car an all around jack.

Each

No. A-715A—Walker Lift-A-Car Jack; height, 7¼ inches; height of foot, 3½-7¾ inches; raise, 15¾ inches; capacity, 2000 lbs.; wheel base, 10½ inches; weight, 40 lbs. . **$35.00**

WALKER ROLL-A-CAR.



The last word in garage jacks. Will lift from any position under a car, front, rear or side. Every conceivable lift that is required can be made in the smallest operating space with the least labor. The exclusive safety features embodied in this jack which prevents injury to operator or damage to a car while being lifted or lowered, the automatic reverse which operates when the high lifting point is reached, preventing damage to jack, and the means of disengaging the handle while the car rests on jack, are the greatest steps in advance in the history of jack building.

Each

No. A-740—Walker Roll-A-Car Jack; capacity, 5000 lbs.; low lifting point, 5 inches; raise under power, 12 inches; maximum height, 17 inches; weight each, 120 lbs..... **$72.00**

WALKER.

The No. A-610 is of ¾-ton capacity and is of the ratchet type. Rigid construction, Walker quality, insures long Life. Suitable for a light car. A good jack is the most important piece of equipment to be carried in a car. It is the one piece of equipment that pays big dividends. This jack fitted with a 15-inch tire changing handle is equal to any emergency.

Each

No. A-610 –Walker Steel Jack; ¾-ton capacity; height, 9¼ inches; raise, 5¾ inches; weight, 4½ lbs. **$1.50**

We recommend this jack for light and medium-weight cars. The base is large, standard, well ribbed, the steel working parts and steel rack strong and durable. The lift is exceptionally easy, a short stroke of the handle gives a rapid raise, the reverse is positive. Tripping the lever and pumping the handle lowers the jack. Double cap gives two lifting heights.

Each

No. A-1—Auto Jack; ¾-ton capacity; height, 9¾ inches; raise, 5¼ inches, weight each, 7 lbs **$4.20**

One in a carton.

The Walker jack No. A-600 is pressed steel with malleable lifting pawls and cap. The rack is steel with milled teeth. The special bridge type construction of the standard gives an absolute rigid frame. The base is heavy, with turned edges which prevent it from bending in service. The 15-inch handle and positive raising and lowering mechanism makes for simple, easy operation.

Each

No. A-600—Walker Steel Jack; 1-ton capacity; height, 10 inches; raise, 6 inches; weight, 5¼ lbs. **$1.90**

Walker Badger jack No. A-3 is a powerful and dependable one-ton jack. Heavy pawls, operated by great handle leverage, raise the load on the steel rack with ease and pressure and automatically lock and prevent dropping the load. All the working parts are oversize and built to stand up. Double cap provides two lifting heights.

Each

No. A-3–Walker Badger Jack; height. 10 inches; raise, 5½ inches; height of extension cap, 1½ inches; capacity, 1 ton; weight, 9 lbs. **$5.40**

The No. A-605 has been designed for the new Ford car. With the flip cap the jack will handle Fords with either cord or balloon tires. The channel rack and one piece frame insure rigid construction. All parts are baked enamel to prevent rust.

Each

No. A-605—Walker Steel Jack; ¾-ton capacity; height, 8¼ inches; raise, 5½ inches; weight each, 5 lbs. **$1.60**

The low height, 33-inch folding crank handle and telescoping screw, make the No. A-520 the best jack built for cars equipped with any size balloon tire or cars with the lowest axles. Through the use of a telescoping screw, a total height of 16 inches is obtained. The use of ball bearings make it very easy to operate.

Each

No. A-520—Walker Jack; height, 7½ inches, raise, 8½ inches; capacity, 1 ton; weight each, 9 lbs.; screw diameter 1¼-inch. **$6.30**

The Walker No. A-620 steel jack with long handle and 7-inch raise fills the demand for an adjustable foot lift jack to be used on smaller cars equipped with any type or size of cord or fabric tire. The one-piece steel frame construction, broad heavy base, steel rack with milled teeth, and oversized bearing pins, combines in this jack every desirable feature.

Each

No. A-620—Walker Steel Jack; 1-ton capacity; height, 10¼ inches; raise, 8½ inches; range of foot, 3 to 8½ inches, weight, 12 lbs. . . **$4.20**

A Walker long handle jack designed expressly for balloon tires. This new jack is of typical Walker construction and embodies the same general design as our popular No. A-116, excepting that the lifting range and height of the jack are different. This new jack has met with the full approval of the engineers of car manufacturers now using balloon tires.

Each

No. A-126—Walker Badger Jack; height, 10⅝ inches; raise 7 inches; height of foot raise, from 3¾ to 9⅝ inches, capacity, 1 ton; weight, 14 lbs. **$7.00**

WESTERN VISIBLE DISPENSING UNIT

VISIBLE GLASS CONTAINER—Is made of heavy flint glass and pump can be furnished with either 5-gal., 10-gal. or 15 gal. container at varying prices as noted below. The figures on glass are decalcomanias in bright red with indicating arrows in black outlined in red. Inside the container are the fill, overflow and return pipes, all 1¼-inch. All pipes and castings inside container are finished in a pure white gasoline-resisting paint.

CABINET—The cabinet or pump housing is built of sheet steel, made in two parts, making it a simple matter to take down should this be necessary. A swing door fitted with brass padlock allows access to parts. Door is fitted with slotted opening to receive discharge end of hose which is locked inside of pump at night.

HOSE AND FILLING NOZZLE—With each pump we furnish 10 ft. of 1¼-inch metal hose, rubber and cotton covered, having adjustable brass couplings.

SHUT OFF COCK—Shut-off cock is located at outlet point of pump. This allows operator to be in one position at all times during period of discharge. Another advantage of this cock is that hose drains after each operation. At option of purchaser we can fit discharge end of hose with lever shut-off cock at same price.

ELECTRIC WIRING—Entire cabinet is wired, ready for attaching to local circuit. One socket is located on top of pump for inside of globe, and a socket is located on right and left-hand sides of the glass container. A 12-inch canteen shaped light globe is furnished with each pump. No lamps are furnished.

FILL AND DISCHARGE—With either hand pump or with air pressure it requires but twenty eight seconds to fill a 10-gal. container and forty seconds to discharge same amount.

FINISH—Our standard finish is bright vermilion with black trimmings. We can, however, finish in any color at option of purchaser.

DIMENSIONS OF PUMP—Height, 10 feet 4 inches to top of light globe. Base casting, 20 inches by 20 inches. Height to discharge opening, 5 feet 10 inches. Shipping weight, 475 lbs.

TANKS—Are built of either 12 or 14 gauge galvanized steel, welded throughout, making a leak-proof tank. Furnished complete with double fill pipes fitted with strainers, lock cap, lock, keys and measuring stick.

GUARANTEE—We guarantee all our outfits to be as represented and agree to make good any defects in material or workmanship which may develop within one year from date of sale.

GASOLINE OUTFITS

WESTERN 6 GALLON VISIBLE CURB PUMP WITH COMBINATION PISTON AND VISIBLE PUMP

VISIBLE GLASS CYLINDER—Is made of heavy, clear flint glass, the figures on same being in bright red and black arrows indicate liquid level line. The cylinder is protected by a metal screen which is removable. Cylinder is securely fitted to top and bottom castings by six stay rods and by removing the nuts from bottom of stay rods, cylinder may be taken down at any time inside should require cleaning.

The cabinet or pump housing is made of sheet metal, the door being lowered to open cabinet, when door is raised it automatically fastens and is locked by a brass padlock. The door slides work in grooves and door is raised and lowered with little effort.

PUMP—Is Long Distance Piston type, adjusted to measure 1, 2, 3, 4, or 5 gallons at a stroke, 9-inch seamless brass cylinder., ⅜ inch brass piston rod., heavy brass valves and stuffing box., cut steel gears, bronze bushed and protected by gear guard., case hardened bearings and spindles. The pump measures the exact amount desired into the glass container.

AUTOMATIC GEAR SHIFT—For quick return of rack bar, which can be reversed in a ratio of one reverse motion to five forward turns.

GALLON METER—Keeps an accurate check on all gasoline drawn up to 99999 gallons at which point it reverts to 00000, making it a continuous meter. The figures are large and legible stamped into the metal, it is built with the precision of a watch.

FILTER—Is mounted on pump plate and all gasoline is filtered and strained from water and other impurities before it enters glass cylinder. The accumulation of foreign matter may be drained from filter at will.

An automatic drain valve is attached to pump which allows hose to drain out clean as soon as flow stops.

With each pump is furnished 10-ft. of 1-inch metal hose, rubber and cotton covered and having adjustable brass couplings, the filling nozzle is fitted with fine brass removable strainer.

Pump is equipped with an instantaneous shut off cock, by merely raising or lowering the lever, the supply line is opened or closed.

A 12-inch canteen shaped globe is furnished, fitted with socket inside for lamp and two weather proof fibre sockets are located on top on either side of glass cylinder. Wires are ready for connecting to local circuit. No lamps furnished.

Handle may be slipped off and carried inside of building, making pump fool and meddler proof.

QUANTITY STOPS—For, 1, 2, 3, 4 and 5 gallons are located in front on pump standard., to change measurement it is but necessary to push in the nickeled disc stamped with the quantity desired, turn pump handle and the exact amount is discharged into glass container above.

Pump and cabinet are highly finished in vermillion enamel, with nickel trimmings and gold lettering.

DIMENSIONS OF PUMP—Height 9 feet, 9 inches, diameter 15 inches, shipping weight 550 lbs., 2-inch suction pipe.

Outfits guaranted to be as represented and the manufacturer agrees to make good any defects in material or workmanship which may develop within one year from date of sale.

Are built of either 12 or 14 gauge galvanized steel, welded thruout except the flanges which are riveted and welded to tank, this making a leak proof tank. Furnished complete with double brass foot valves, suction pipe in tank, 3¼-inch by 2-inch reducing plug., double fill pipes with strainers, lock cap, lock and keys and with measuring stick to determine amount in tank. Each tank is fitted with three flanged openings, 2-inch for fill pipe, 1-inch for overflow return pipe and 3¼-inch for reducing plug and 2-inch suction pipe. Tanks are inspected and bear the approval label of a National Board of Fire Underwriters.

Double Foot Valves for use in Underground Tanks ..... each★ $10.00

GASOLINE OUTFITS

Prices on Application

IMPERIAL LONG DISTANCE

The pump is adjusted to measure gallons, half-gallons, quarts or pints at a stroke, is built of cast and wrought iron with cylinders, valves, stuffing-box, and piston rods of brass. Gears are all cut steel. Furnished in vermilion enamel with nickel trimmings.

The pump is equipped with **discharge register** which automatically tallies every gallon up to 10 that is pumped; has **safety automatic shut-off cock** and **locking device.** Requires but two and one-half turns of the handle to discharge a gallon, giving an actual pumping capacity of ten gallons per minute.

Tanks are built of galvanized steel, riveted and soldered throughout and protected by three coats of rust-resisting paint. Each tank is filled with **heavy brass double foot valves, double fill pipes** with strainers and lock cap.

With each outfit we furnish **locks and keys, bolts for fastening pumps, measuring stick** for tank, **two 1½ inch pipe unions** and complete instructions for installing. **We do not furnish pipe.**

Pumps and tanks are tested, labeled and **approved by the National Board of Fire Underwriters. Equipment guaranteed** against defect in material or workmanship for a period of three years.

LEVELING INSTRUMENTS

STARRETT

For Attaining Angles in Horizontal Plane Only

For contractors, farmers, masons, etc. Light weight and has a wide range of work.

The upper plate is connected to the tripod head by a ball and socket joint, and is leveled by the leveling screws. This plate is recessed to contain a graduated arc for taking angles, and on the plate is the frame with level and sight tube for taking horizontal angles only. The nickel plated sight tube on this instrument is plain, with no lenses, 12 in. long, with small eye aperture and the usual cross wires. Each

No. 101A—With Plain Sight Tube, Long Legs and Plain Level Vial.....$15.00

No. 101B—With Plain Sight Tube, Long Legs and Ground Level Vial..... 16.75

No. 101C—With Telescope, Long Legs and Ground Level Vial 25 00

Iron Target—Without Pole..... 1 50

STARRETT TRANSIT

Furnished in Wood Carrying Case

The instrument is composed of iron and brass, and consists of a tripod, to the head of which is connected by a ball-and-socket joint an upper plate which can be leveled by the leveling screws.

This plate is recessed to contain a graduated arc for taking horizontal angles. This arc is ½ of a circumference, reading 90° each side of 0, and being independent of level and sight tube can be turned and used at any point of a complete circle. On this plate rests a triangular frame to which are attached a level, a graduated arc for taking vertical angles, graduated 45° each side of 0, and a sight tube. The plain sight tube has no lenses, is brass, 12 in. long; in one end is a small eye aperture, in the other the usual cross wires.

The telescope has cross lines, is adjustable to distances, and is same size and length as plain sight tube. The lens is well protected from dirt and breakage by a friction cap, and a shutter for the eye aperture.

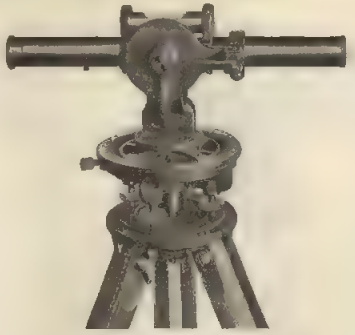
With short legs, as shown in the cut, the instrument is 8 in. high. With long extension legs, which fasten on over the short legs, the height can be adjusted from 2 ft. 8 in. to 4 ft. 8 in. The sight tube, level case, and graduated arcs are nickel plated, the other parts are japanned. Each

No. 99B—With Plain Sight Tube, Long Legs and Plain Level Vial $20.00

No. 99F—With Telescope, Long Legs and Ground Level Vial 40.00

Iron Target—Without Pole..... 1.50

WHITE IMPROVED DUPLEX



A Low Priced Combination Level-Transit

Polished brass telescope 10 in. long. Drawer eyepiece. Fixed cross hairs, ten diameters achromatic lens system showing objects upright, provided with index look permitting release into tilting position up to 45° above or below horizon. Bronze adjustable standards. Silvered brass circle 4¾ in. diameter, divided by 360° in quadrants, revolving under arm. Bronze leveling head. Three point type bearing surface Each

No. 2052—Polished Brass, Lacquered and Olive Green, Complete with Tripod, Plumb Bob, Flexible Leveling Rod and Carrying Case, Weight 17 Lbs.....$35.00

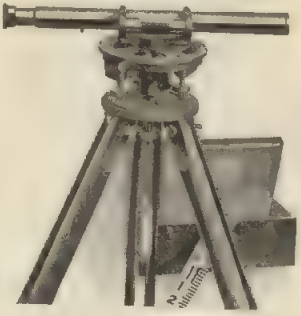
UTILITY FARM LEVEL



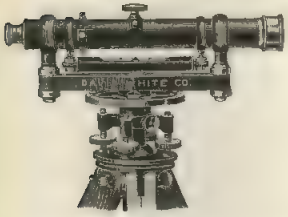
For Contractors, Road Builders and Farmers

The sturdiest, most compact, and most practical instruments of its kind ever put on the market. It has a 10 in. telescope with adjustable eye piece, fixed cross hairs, ten diameter achromatic lens system, horizontal circle graduated to degrees, index arm, four leveling screws and spirit level. Each

No. 2050—Complete Equipment Including Carrying Case, Tripod, Plumb Bob, 12½ ft. Flexible Rod, and a Book of Instructions, Weight Each 14 Lbs..$25 00

LEVELING INSTRUMENTS

WHITE CONTRACTORS DUMPY LEVEL



No. 2038

These instruments will be found very serviceable for Millwrights, Architects, Mason Contractors and Builders, also for Drainage Contractors for tile draining and other operations where lines are to be run with stations but a short distance apart.

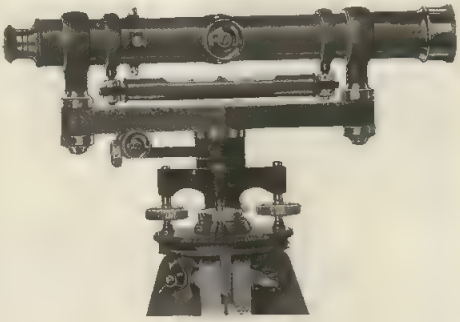
Especially designed to meet the growing demand for a level selling at a moderate price, but still possessing the essential characteristics of the higher priced "Y" level. The telescope is 12 inches long with magnifying power 25 diameters. Aperture of objective lens 1¼ inches. Horizontal circle 4½ inches in diameter and graduated from 0 to 90 degrees each way, with vernier reading to 5 minutes. The circle can be set at zero at any given point. Center extra long and well tapered, and made of hard bell metal. Telescope of fine definition, and the objective lens is focused by rack and pinion of improved make. Improved eye-piece for precise focusing of the cross-hairs. Telescope yokes of best composition metal, permanently fixed, thus insuring greater stability. This instrument, unlike the "Y" level, has very few adjustments and when once adjusted it stays adjusted a longer period of time. Tripod is made of best seasoned hardwood. A metal trivit having three sharp points, for placing the level on any surface of wood or stone, is furnished with each instrument. Level vial is extra long, carefully ground and graduated on the glass. Instrument packed erect, ready for use, in polished hardwood box with strap, containing full directions for use, together with screw capped plumb bob, sun shade, dust cap and adjusting pins.

	Each
No. 2038—Complete with Tripod, Case and Accessories, Weight 28 Lbs.	$65.00
No. 2039—Same as No. 2038, with the Exception that it is Provided with a Clamp and Tangent Movement, thus Enabling the Instrument to be Clamped More Securely and a Movement in the horizontal Plane to be Made More Accurately	70.00

WHITE ROAD BUILDERS LEVEL

This recently designed Instrument has instantly met with the approval of road builders throughout the United States and Canada and is without exception the finest Level of its class on the market.

The telescope is 12 inches long with magnifying power 25 diameters. Aperture of objective lens 1¼ inches. Center extra long and well tapered and made of hard bell metal. Telescope of fine definition, objective lens focused by rack and pinion of improved make. Improved eye-piece for precise focusing of the cross-hairs. Telescope yokes of the best composition metal, permanently fixed, thus insuring great stability. This instrument, unlike the "Y" level, has very few adjustments and when once adjusted stays adjusted a long period of time. Tripod is made of best seasoned hardwood. A metal trivit having three sharp points, for placing the level on any surface of wood or stone, furnished with each instrument. Level vial is extra long, carefully ground and graduated on the glass. Instrument packed erect, ready for use, in polished hardwood box with strap, containing full directions for use, together with screw capped plumb bob, sun shade, dust cap and adjusting pins.



No. 2036

	Each
No. 2035—Complete with Tripod, Case and Accessories, Weight 28 Lbs.	$60.00
No. 2036—Same as No. 2035, with the Exception that it is Provided with a Clamp and Tangent Movement, Thus Enabling the Instrument to be Clamped More Securely and a Movement in a Horizontal Plane to be Made More Accurately	65.00

LEVELING INSTRUMENTS

WHITE IMPROVED CONVERTIBLE

No 2020

The "White" Convertible Level, a combination Level and Transit, is an instrument indispensible for the speedy and accurate performance of every known building operation. It is especially recommended to Architects, Contractors and Builders, Millwrights and Drainage Engineers, Mason Contractors and Landscape Gardeners, Grading Contractors, and Road Engineers.

Telescope—12 in. long with dust shade. Magnifying power 25 diameters showing objects erect. Object glass 1¼ in. aperture; rack and pinion movement to object slide; spiral movement to eye-piece. Cross hairs, sun-shade and dust-cap. Range 5 feet to one mile. Lenses of finest quality, level to telescope 4 in. long, housed in tube with protection bridge, graduated on the glass and ground to a sensitiveness of 60 sec. of arc to 1/10 inch motion of bubble

Cross-Bar and Wyes—Cross-bar and standards are cast integral and heavily ribbed and strengthened. Wyes (one of which is adjustable) are of improved design with lock-nuts for locking yokes, dispensing with old style pin bolts. One wye yoke is provided with stop insuring true position of cross-hairs when leveling. Cross-bar and standards are constructed of steel-like bell metal. Convertible standards provided with two brass straps which hold telescope firmly in the trunnions when in transit position.

Circle—4½ in. diameter with eight reinforced spokes, divided to degrees numbered 0—90 in quadrants and reading by vernier to 5 minutes Circle is movable for the purpose of setting same at zero at any given point and provided with a set-screw.

Leveling-Head—Improved design, heavily ribbed, with clamp and tangent screw. Four leveling screws with shoes Center extra long and constructed of hard bell-metal. Shifting center.

Regular Equipment Solid leg tripod with iron shoes and protection cap to head. Bolts provided with wing nuts for tightening by hand. Polished hardwood carrying case with strong lock and strap Six-ounce plumb-bob, trivit (for foundation work), sun-shade, and adjustable pins. Full instructions for use with each level.

Finish and Weight—Instrument is finished in rich olive alligatorite with small parts in bright gold, making a very tasty and durable finish.

Special Features of White Improved Convertible Levels.

(1) The cross-bar is drop-centered and cast integral with standards. (Patented.)

(2) Spirit level glass always rests safely below telescope out of harm's way, whether used as level or transit

(3) No loose attachments to fasten on by means of thumb screws. Nothing to get out of order or adjustment. Always accurate. Always dependable.

(4) Extra fine and powerful telescope (25 diameter power). Extra large objective lens (1¼ in. aperture). Extra long telescope (12 in.)

(5) Only ten seconds are required to change instrument from an accurate level to an equally accurate transit. Standards, which accommodate telescope when in transit position, do not interfere when instrument is used as a level; in fact, they serve as a protection to spirit level glass

(6) Shifting center.

	Each
No. 2020—Complete with Tripod, Case and Accessories, Weight 15 Lbs.....	$ 95.00
No. 2021—Same as No. 2020, but with Vertical Arc Divided to Degrees Numbered 0—40 Each Way and Reading by Vernier to 5 Minutes.....	105.00

In Place of Regular Equipment, Both Levels, No. 2020 and No. 2021, May be Furnished with the Following Options

(A) Compass attached to instrument, of suitable accuracy for building work
(B) Heavy split leg tripod in place of regular solid leg tripod
(C) Heavy extension leg tripod, in place of regular solid leg tripod
(E) Fixed stadia hairs reading 1 foot in 100 feet on any rod

No 2021

GOGGLES

No. C243Y—Consists of 12 pair selected assorted goggles mounted on a handsome "two-way" sturdy display card in a new color scheme—six goggles mounted on each side; the glass colors are assorted Fieuzal, Amber, smoke and Amethyst. 6 goggles have mottled shell celluloid frames and 6 have crystal celluloid frames; assorted round and drop eye rims, curved and straight bows, size of display card height 15⅝ in., width 8½ in., per assortment **$12.40**

ONE ASSORTMENT IN A BOX

Gotten up especially with the idea of catering to the Railroad Men, Autoists and industrial workers who desire a goggle to afford protection to the eyes and comfort in wearing.

Comply with recommendations of proposed legislation for head and eye protection of industrial employes, each goggle is put up in an individual metal case.

Assortment consists of 6 PAIR WILLSON'S GOGGLES with 1⅞ -in. Clear No-Strain Lenses as follows:

2 pair A1-ALBEX—With adjustable bridge, ventilated leather side guards and flexible Cable earbows.

1 pair E2, with adjustable bridge, wire screen side guards and detachable elastic head-band. All face-touching parts are bound with velvet.

2 pair H31, same as E2 except that the lenses are oval and the bridge is a "Nosebridge" or "saddle" design.

1 pair R8, with slide buckle leather bridge, otherwise same as E2.

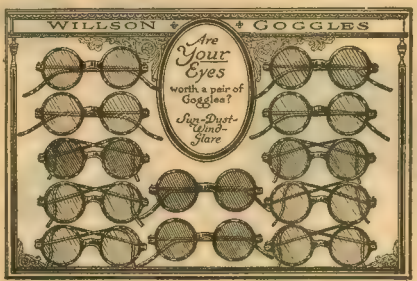
No. C4Y—

Per assortment of 6 pairs . . **$10.80**

ONE ASSORTMENT IN A BOX

No. C1KY—Assortment, consists of 10 pair selecten goggles with round glass lenses in assorted colors—amber, smoke, amethyst and fieuval; 5 each 1½ and 1⅝ in. lenses; imitation tortoise shell frames and temples; mounted on an attractive, colored easel counter display card measuring 12×13¾ in., per assortment **$6.00**

ONE ASSSORTMENT IN A CARTON



No. C22Y—Assortment, consists of 12 pair selected goggles with 1¾ in. round glass lenses in assorted colors—amber, smoke, amethyst and fieuval; 5 each with riding bow and curved temples; imitation tortoise shell frames and temples; mounted on an attractive colored easel counter display card measuring 12×18 in. ..... per assortment **$12.40**

ONE ASSORTMENT IN A CARTON

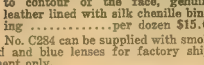
GOGGLES

Non-Strain.

No. C284—For engineers, firemen, auto-drivers, with full vision non-strain, clear white removable glass lenses, special adjustment aluminum frame which can be fitted perfectly to contour of the face, genuine leather lined with silk chenille binding .....per dozen $15.00

No. C284 can be supplied with smoked and blue lenses for factory shipment only.

ONE PAIR IN A CARDBOARD BOX

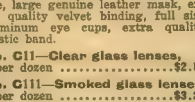


IL-A-NOY, mechanic's or automobile, large genuine leather mask, extra quality velvet binding, full size aluminum eye cups, extra quality elastic band.

No. C11—Clear glass lenses, per dozen $2.50

No. C111—Smoked glass lenses, per dozen $3.20

ONE DOZEN IN A BOX



Aluminum cups, with ventilating holes, fitted with 1⅞ in. lenses set in leather frame with elastic cord.

No. C26—Clear glass lenses, per dozen $1.70

NOTE—In ordering plane irons always give number of plane for which iron is wanted. Below we give a list of irons adapted to each gage plane

Size 1¾ inch for plane Nos. 044, 045
Size 2 inch for plane Nos. 041, 043, 044, 045
Size 2¼ inch for plane Nos. 046, 047½, 048, 048, 049
Size 2½ inch for plane Nos. 047, 50.

FLOOR SCRAPERS

Stearns' Adjustable Cross Handle

Cast iron frame, aluminum finish, hardwood handles; forged steel braces; rubber tired wheels, tool steel blade

The knife scrapes the floor when the machine is drawn toward the operator and will therefore work up to the wall and into the corners. knife is firmly clamped in the scraper which, together with the weight of the machine, nearly all of which rests on the knife, prevents vibration or chatter, doing away with all wavy effects on the floor.

	Each
No. 10F—Width knife 6 inches; 5 inch wheels; length handle and braces 38½ inches; weight each 135 lbs.	$30 00

One in a box

	Each
No. 10FB—Extra blade for No. 10F floor scraper; weight 3 ozs	$1 80

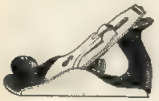
ADJUSTABLE IRON PLANES

BAILEY BENCH

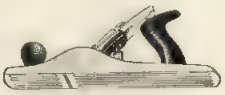
In the Bailey Planes the frog may be adjusted for width of throat opening after removing the cap and the cutter and slightly loosening the screws which clamp the frog to the base.

Ribbed construction of the bottom and the machined surfaces gives great solidity and solid setting for the frog.

Cutters adjustable endwise and sidewise, rosewood handles and knobs.



No. 4.



No. 5C

With Smooth Bottom

	Each
No. 2—Smooth, 7 in. Long, 1⅝ in. Cutter, Weight Each 2¼ Lbs.	$5.00
No. 3—Smooth, 8 in. Long, 1¾ in. Cutter, Weight Each 3¼ Lbs.	5.50

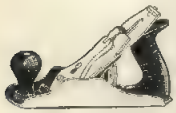
All Above, One in a Box

ADJUSTABLE STEEL PLANES

STANLEY



With Smooth Bottom

These Planes are similar in design to the regular Bailey Iron Plane, but are of Forged Steel Construction. They have the toughness to withstand a blow from a fall or other cause that would break the regular iron plane.

	Each
No. 84—Smooth, 9 in. Long, 2 in. Cutter, Weight Each 3 Lbs.	$6 50
No. 85—Jack, 14 in. Long, 2 in Cutter, Weight Each 3¾ Lbs.	7 50

One in a Box.

WOOD BOTTOM PLANES

BAILEY ADJUSTABLE

Cutter Adjustable Endwise and Sidewise

Beechwood Bottom, Handle and Knob, Black Japanned Iron Frame.

	Each
No. 27½—Jack, 15 in. Long, 2¼ in. Cutter, Weight Each 4¾ Lbs.	$5.80

One in a Package.

ADJUSTABLE IRON PLANES

STANLEY CARRIAGE MAKERS RABBET

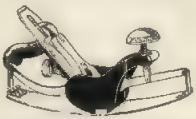
Flat Bottom, Rosewood Handle and Knob

	Each
No. 10½—9 in. Long, 2⅛ in. Cutter, Weight Each 3 Lbs.	$7 00
No. 10—13 in. Long, 2⅛ in. Cutter, Weight Each 4¼ Lbs.	8 70

Especially adapted for the heavy framing required in mining work, for carriage or wagon building, or in any work of similar nature.

One in a Box

STANLEY ADJUSTABLE CIRCULAR



Graduated Scale for Setting Face

Flexible Steel Face, Japanned Stock, with Graduated Scale for Setting Face.

	Each
No. 113—10 in. Long, 1⅝ in. Cutter, Weight Each 3½ Lbs.	$9.60

One in a Box.

VICTOR ADJUSTABLE CIRCULAR

Flexible Steel Face, Japanned

	Each
No. 20—10 in. Long, 1⅝ in. Cutter. Weight Each 4 Lbs.	$12 00

The face is fastened at each end to the plane body and adjusted by a screw at the center.

This construction gives great strength, cutters adjusted endwise and sidewise

One in a Box.

IRON BLOCK PLANES

STANLEY

Non-Adjustable

Black Japanned Iron Frame, English Steel Cutter, Tempered and Ground, Honed Ready for Use. Each

No. 101—3 ½ in. Long, 1 in. Cutter, Weight Each ⅛ Lb. ... $0.60

Endwise Lever Adjustment

Black Japanned Iron Frame, Polished Face, English Steel Cutter Tempered and Ground, Honed Ready for Use. Each

No. 103—5 ½ in. Long, 1⅝ in. Cutter, Weight Each ⅞ Lb ... $1 50

Non-Adjustable

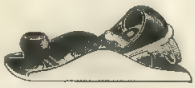
Black Japanned Iron Frame, Polished Sides and Face, Stained Applewood Knob. Each

No. 110—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. ... $1 60

Endwise Lever Adjustment

Japanned Iron Frame, Polished Sides and Face, Rosewood Knob. Each

No. 120—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. ... $2 20



Endwise Screw Adjustment

Japanned Iron Frame, Polished Sides and Face, Nickel Plated Adjusting Screw, Rosewood Knob, Lever Cap. Each

No. 220—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. ... $2.30

STANLEY DOUBLE END

Reversible

Japanned Iron Body, Polished Sides and Face, Stained Applewood Knob. Each

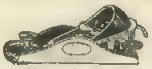
No. 130—8 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. ... $2.30

This plane has two slots and two Cutter Seats. The center seat and slot to be used for ordinary block plane work, the other slot and seat for use when it is desired to work same as a bull nose plane.

All Above, One in a Box

IRON BLOCK PLANES

BAILEY ADJUSTABLE

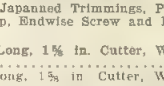


Adjustable Throat

Iron Frame, Japanned Trimmings, Polished Sides and Face, Handy Grip, Endwise Screw and Lateral Lever Adjustment. Each

No. 9½—6 in. Long, 1⅝ in. Cutter, Weight Each 1½ Lbs. ... $3.00

No. 15—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. ... 3 20



Adjustable Throat, Knuckle Joint

Japanned Iron Frame, Polished Sides and Face, Nickel Plated Trimmings, Handy Grip, Endwise Screw and Lateral Lever Adjustment. Each

No. 18—6 in. Long, 1⅝ in. Cutter, Weight Each 1½ Lbs. ... $3.90

No. 19—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs ... 4.20

The Knuckle Joint permits a great leverage, consequently the lever can be placed in position or removed with very little effort.

STANLEY ADJUSTABLE LOW ANGLE

Adjustable Throat

Iron Frame, Polished Sides and Face, Nickel Plated Trimmings, Endwise Screw Adjustment. Each

No. 60—6 in. Long, 1⅝ in. Cutter, Weight Each 1¼ Lbs. ... $3 50

In the Low-Angle Planes the cutter rests on its seat at an angle of only 12 degrees. This angle permits of great ease in working across the grain on hard woods. They have adjustable throats, which allow of the opening or closing of the mouth, as coarse or fine work may require.

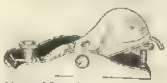
STANLEY RABBET AND BLOCK

Rabbet and Block Each

No. 140—7 in Long, 1¾ in. Cutter, Rosewood Knob, with Detachable Side, Nickel Plated Trimmings, Weight Each 1 Lb. ... $4 00

The Detachable Side will easily change this tool from a Block Plane to a Rabbet Plane, or vice versa. The Cutter is set on a skew and is adjustable endwise

STANLEY STEEL



Knuckle Joint, Adjustable Throat with "Hand-y" Feature

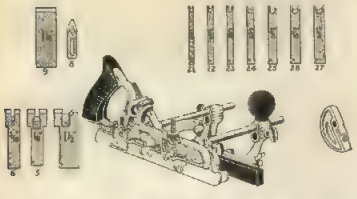
Similar in construction to the regular No. 18 Bailey Block Plane but the Bottom and the Adjustable Front are made of steel instead of iron making it practically indestructible. Each

No. 818—6 in. Long, 1⅝ in. Cutter, Weight Each 1¼ Lbs. ... $4 70

All Above, One in a Box.

ADJUSTABLE IRON PLANES

STANLEY PLOW, BEADING, RABBET AND MATCHING



Seven Tools in One, in Compact and Practical Form

Each

No. 45—10 in. Long, Nickel Plated Stock and Fence, Rosewood Handle and Knob, Complete with 23 Cutters as Described Below.....$20 00

Weight Each 9½ Pounds.

One in a Neat Steel Box, Complete with Cutters.

This Plane embraces in a compact and practical form (1) Beading and Center Beading Plane, (2) Plow, (3) Dado, (4) Rabbet and Filletster, (5) Match Plane, (6) Sash Plane, (7) Slitting Plane.

Each Plane is accompanied by seven Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in.); Eleven Plow and Dado Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝, ¾, ⅞ and ⅞ in.); One 1¼ in. Filletster, One Slitting, One 7/16 in Match Tool, One ¼ in. Match Tool and One 1½ in. Sash Tool; Twenty-three Tools in all.

The Plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand. For beading at a distance from the edge of a board, attach Cam Rest (see cut at right of plane) to the front arm between the sliding section and fence to prevent the fence sagging. In certain work attach same to the rear arm to prevent the plane from rocking.

STANLEY PATENT UNIVERSAL COMBINATION

All metal parts of the Planes are nickel plated. The handles and fences are made of selected rosewood, and every part is finished.

All parts are interchangeable.

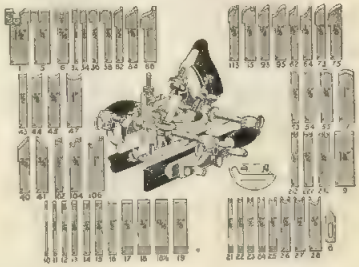
This tool in addition to being a Beading Plane, a Plow, Dado, Rabbet, Filletster, Match Plane, Sash Plane and a Slitting Plane, is also a Superior Moulding Plane and will accommodate cutters of almost any shape and size.

Each

No. 55—10 in. Long, Nickel Plated, Rosewood Handles and Fences, Complete with 55 Cutters as Described Below.....$40.00

Weight Each 15¼ Pounds

One in a Neat Steel Box, Complete with Cutters.

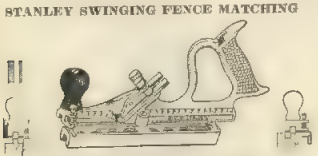


The Following Cutters are Furnished with Each Plane

One 1 5/16 in. Sash Tool; one ¼ in. Match Tool one 7/16 in. Match Tool; one Slitting Tool, one 1¼ in. Filletster; twelve Plow and Dado Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝, ¾, ⅞ and 1 in.), eight Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½ and ⅝ in.), eight Quarter Rounds (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½ and ⅝ in.); four Fluting Tools (¼, ⅜, ½ and ¾ in.), four Hollows (½, ⅝, ¾ and 1 in.), three Reverse Ogees (½, ¾ and 1 in.); two Quarter Hollows (½ and ¾ in.), two Quarter Rounds (⅝ and ⅞ in.), three Reverse Ogees (½, ¾ and 1 in.); two Roman Ogees (⅝ and ⅞ in.); three Grecian Ogees (½, ⅝ and 1 in.), two Quarter Rounds with Bead (⅝ and ⅞ in.); three Reading Tools with two Beads (⅛, 3/16 and ¼ in.); one ⅝ in Right Hand and one ⅝ in Left Hand Chamfers.

The Plane is fitted with Spurs for working across the grain and a special Cam Rest to be located on the front arm when working at a distance from the edge of the board, to keep the fence from sagging, or on the rear arm on certain work to prevent the possibility of the Plane rocking. All parts are interchangeable.

STANLEY SWINGING FENCE MATCHING



Nickel Plated, Rosewood Knob

These Planes have two Cutters of the same width, and one extra wide Cutter. The Fence in one setting exposes two Cutters for cutting the Tongue, and, when reversed leaves only one exposed for cutting the Groove. On thicker boards than the plane works on center the extra wide cutter is used when cutting the tongue.

Each

No. 48—Cuts 7/16 in. Groove on Boards ¾ to 1¾ in., Centers on ⅞ in., Weight Each 3¾ Lbs.....$7.20

STANLEY ROUTER

Open Throat

Nickel Plated, Beechwood Handles, with Cutters and Attachments for Closing Throat on Narrow Surfaces and Regulating Depth of Cut.

Used for Surfacing the Bottoms of Grooves or Other Depressions Parallel with the Surface of the Work.

Each

No. 71 7½ in. Long, With ¼ and ½ in. Cutter and Smoothing Cutter. Weight Each 2⅝ Lbs. .$5 50

The Cutters are adjustable and can be held on the front of the cutter post for regular work, or on the back for bull-nose work.

One in a Box.

ADJUSTABLE IRON PLANES
STANLEY RABBET

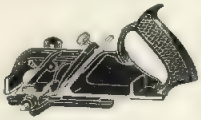
With Adjustable Depth Gauge

Japanned Iron Stock, 8 in. Long, with Spur for Working Across Grain

Nos.	191	192
Cutter, Inches	1¾	1
Weight Each, Lbs.	2¼	2
Each	$3.70	3.40

One in a Box

STANLEY DUPLEX, FILLETSTER AND RABBET



With Adjustable Depth Gauge

Japanned Iron Frame, Adjustable Fence, Detachable Depth Gauge

No. 78—8½ in. Long, 1½ in. Cutter, Weight Each 3 Lbs. ..... Each $4.40

This Plane has two seats for the cutters, one for regular work and the other where a bull-nose is required. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut. To work same as rabbet plane, remove fence and arm.

One in a Box

SCRAPER PLANES
STANLEY DOUBLE HANDLE VENEER

For Scraping Veneer or for Cabinet Work

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blade is adjustable endwise and for angle, and can be firmly locked in position desired.

Each

No. 12—6¼ in. Long, 2⅞ in Cutter, Weight Each 3¾ Lbs. $6.50
Extra Blades ..... .65

One in a Box.

STANLEY SINGLE HANDLE

Rosewood Handle and Knob

This Plane has the same form as the regular Bailey Plane and is preferred by some users to the double handle Scraper Plane. The blade is adjustable endwise and for angle, and can be firmly locked in position desired

Each

No. 112—9 in. Long, 2⅝ in. Blade, Weight 4 Lbs. ..$5.90
Extra Blades ..... .65

One in a Box.

CABINET SCRAPERS
STANLEY HAND

No. 0—High Grade English Steel, Carefully Tempered

Size, Inches	3½x6
Weight Each, Oz.	6
Each	$0.80

Six in a Box.

CABINET SCRAPERS
STANLEY ROLLER

Nickel Plated Frame, Tool Steel Blade, Beechwood Handle

Roller back of blade acts as support to relieve the strain on the wrist, handles detachable for working in corners

Each

No. 83—9½ in. Long, 4 in. Blade, Weight Each 1¼ Lbs. $2.40
Extra Blades—3 in. Wide. ..... .65

One in a Box

STARRETT UNIVERSAL

Stained Hardwood Handle and Grip, Tool Steel Blade

Has eight sharp cutting edges perfectly ground, ball joint handle, locked or released by a slight turn, can be locked at any angle

Each

No. 194—7 in. Handle, Blade 3x4½ in., Weight Each 1¼ Lbs $2.00
Extra Blades..... .50

One in a Box.

PERFECTION

Adjustable

Nickel Plated Malleable Iron Holder, Polished Hardwood Handle, Brass Ferrule.

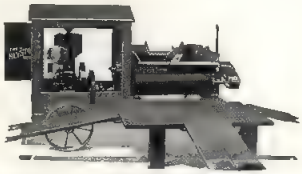
PORTABLE PLASTER AND MORTAR MIXERS

Rubber-tired Trailer



4 Wheels-Steel tires

Blystone Mixers are guaranteed to successfully mix old fashioned hair and hard wall plaster, brown, scratch and finish.

The Patented Reverse Spiral Shovel System shown above is found only on the Blystone and it is only with such a system that the required thoroughness of mix for plaster and mortar can be had. As a mixer for the slacking of lime there is no equal on the market to the sturdy Blystone.

Experienced plasterers have found that Blystone-mixed plaster will carry from 10 to 12 shovels more of sand and still be fat, will spread 15 to 20% more yardage without droppings and save the daily wages of 10 men on the mixing job.

SPECIFICATIONS

Capacity: 5, 7, and 9 cubic feet.

Height of Charge: For all trailer sizes 45".

Mixing Drum: The same drums used for the sturdy products plant Blystone Mixers are used for the plaster and mortar line. Liners of No. 8 gauge high carbon steel can be had.

Frame: The trailers are built on 4" I beams cross braced by 4" welded channels. The corners are stiffened up by means of welded gussets. The standards are lowered to make charging easier and the dumping height is to accommodate the use of regular wheelbarrows. The best steel only is used in these frames 105", 116", 124" long overall respectively, by 44½" wide overall.

Running Gear: Solid Goodrich 24" x 3" rubber tires. Bronze-bushed bearings. Axles of best steel 49½" wide overall. Pneumatic tires 30 x 3½" interchangeable with Ford wheels can be had if desired. These raise height of charge 3".

Power Required: 3, 4 and 6 H.P. respectively Le Roi single and twin cylinder, hopper-cooled engines with clutch or clutch built to mixer. Electric motor power can be had on this equipment. The H.P. ratings are ample for the size of each mixer.

Weight: 2000, 2490 and 2600 pounds respectively. Trailer stub makes hook-up easy and transportation swift without rattling off all the parts.

Capacity: 7 and 9 cubic feet.

Mixing Drum: 39¼" and 47¼" inside in length. Same drums used in products mixers.

Discharge: Hand wheel or power tilting discharge on 7 foot optional at prices listed in current list. Power tilting device standard equipment on 9 foot. Also heavier heads used on 9 foot mixer. The two mentioned ways of discharge can be had on all Blystone Portable Mixers, truck or trailer.

Frame: Heavy 4" channels form the framework upon which rests the mixer and the bed-plate for power plant. Heavy axles and good front bolster are provided to sustain the weight and make handling on the job easy. 112" and 122" long overall respectively. 48" wide.

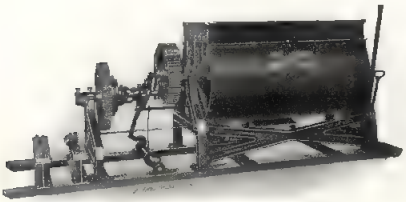
Running Gear: Four steel wheels 4" x 20" and 4" x 24" front and back respectively, fitted with good bearings and grease cups. Width of tread on these mixers is 55." This is also the overall width of the mixer.

Power Required: 4 and 6 H.P. respectively. Le Roi single or twin cylinder engines respectively. Motor power also can be had upon specification of current, phase, cycle and voltage desired.

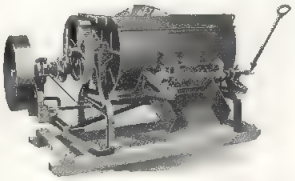
Weight: 2670 and 3000 pounds respectively.

General: The truck type of Blystone Mixer can be furnished with portable loading platform at a slight extra charge. The cab containing the power-plant is roomy enough to admit a few tools of general use. It can be securely locked. It is made of wood. The cab of the trailer type is sheet steel.

BLYSTONE CONCRETE PRODUCTS MIXERS



B No. 4. Blystone 14 foot Oversize



B No. 2. Blystone 9 foot Side Discharge

Sturdiness of construction in Blystone Mixers is easily seen in the above illustrations.

The Blystone is known in nearly 85% of the successful products plants for the higher quality of the products it turns out. Men of long experience in the making of all kinds of products from plain block and tile to ornamental trimstone demand the "Only Mixer That Shovels"—the Blystone.

Blystone Mixers are guaranteed to make a more thorough mix of wet, semi-wet or dry materials than can be made in any other manner.

SPECIFICATIONS

Capacity: 14 cubic feet mixed material.

Height of Charge: 51".

Mixing Drum: The drum of the Blystone Oversize 14 foot mixer is 55¾" long inside and 36" wide inside. It is made of ½" high carbon steel and protected from the abrasion of the mix by No. 8 gauge high carbon steel liners. These liners in three pieces, the center section wider to resist the constant wear from the passing of materials across the center of the drum. Capacity as rated above is from the bottom of the drum to the centerline of the main mixing shaft

Frame: Heavy 5" steel channels form the skids. Cross braces are of the same material four in number. Overall length is 140". Motor rails above are heavy steel I beams which also help stiffen the frame. There is absolutely no chance for weaving or disalignment of this frame after years of constant use. 140" long overall by 37" wide overall.

Power Required: 15 H.P. 720-850 R.P.M. motor or belt to Lemley Clutch Pulley. Give motor frame number, diameter of shaft and keyway when ordering mixers ready to receive motor. R.P.M. of countershaft 150. Countershaft to main 4 to 1. Ratio of reduction from motor to countershaft 7 to 1.

Discharge: Bottom sliding gear door or side hinge toggle door.

Weight: 5,000 pounds.

Capacity: 9 cubic feet mixed material.

Height of Charge: 40".

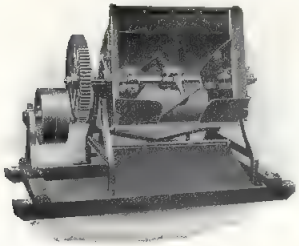
Mixing Drum: The 9 foot drum is 47½" long inside. It is of high carbon steel and can be protected with No. 8 gauge high carbon liners at a slight additional charge listed in the current price list. The top of the drum is shielded by an ample lip preventing the splashing of the mix over the top. A handy lip at the back of the drum projects at an angle to make charge with sacked cement easy.

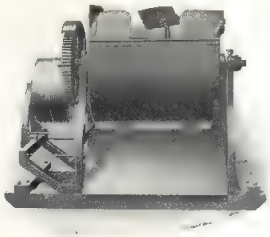
Frame: The wooden skids of the 9 foot Blystone Products Plant Mixer are cross-braced to strengthen frame. When furnished ready to mount motor or with motor drive this mixer is equipped with steel skids, properly cross-braced against side sway, thus making a rigid sturdy frame 84" long overall and 54½" wide.

Power Required: 5 H.P. motor direct drive, belt drive with clutch and pulley as illustrated or 6 H P. Le Roi gasoline engine. Speed of countershaft 150 R.P M.

Discharge: Hand wheel tilting device, bottom door sliding gear type or side door hinge toggle type as illustrated above. The hinges are heavy. The top of the door inside is beveled in 1" to prevent any clogging of the hinge joint. The toggles offer just enough resistance when closing the door to make a good tight locking door. Size of the opening is 8" x 16". Power discharge tilting device with leather faced clutch can be had

Weight: 1300 pounds.





A-NO. 1 BLYSTONE

Capacity	.3 cu. ft
Length of drum inside	27¼"
Width of drum inside	23¼"

Power required	3 HP
Size of pulley	5" x 24"
Speed of Countershaft	.150 RI M.
Weight	1200 lbs.

BLYSTONE MIXERS FOR SMALL PRODUCTS PLANTS

For the small products plant.

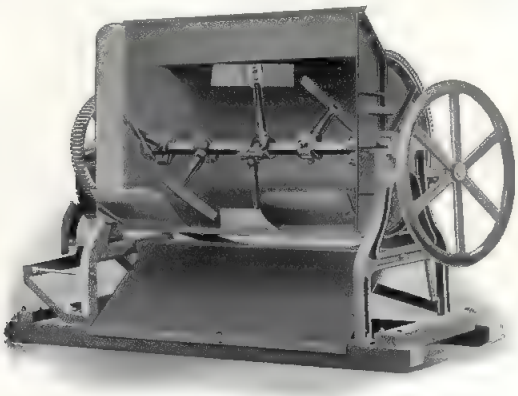
The three foot A No. 1 is especially good for mixing facings. It is widely used for this purpose in large concrete pipe plants.

Tight and loose pulleys standard equipment.

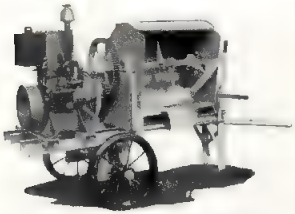
Clutch and pulley, as with all larger Blystones, can be had at a small advance in price.

The five-foot mixer is used in smaller products plants and central mixing plants for plaster and mortar work.

It has four shovels in place of six as in the larger mixers. Clutch and pulley are standard equipment. Direct motor or engine drive can also be furnished. See the current price list.



The Only Mixer That Shovels



BLYSTONE MIXERETTE

"THE ONLY MIXER THAT SHOVELS"—PLASTER, MORTAR, CONCRETE

Below is the new Plaster Mixerette. Acetylene-welded drum, adjustable water-tight packing glands in heads, machine-fitted die-cast removable bearings, Alemite lubrication, bronze bushed roller bearings at hubs, wheelbarrow height dump, head end control. Will earn you enough in three weeks to pay for itself and upkeep.

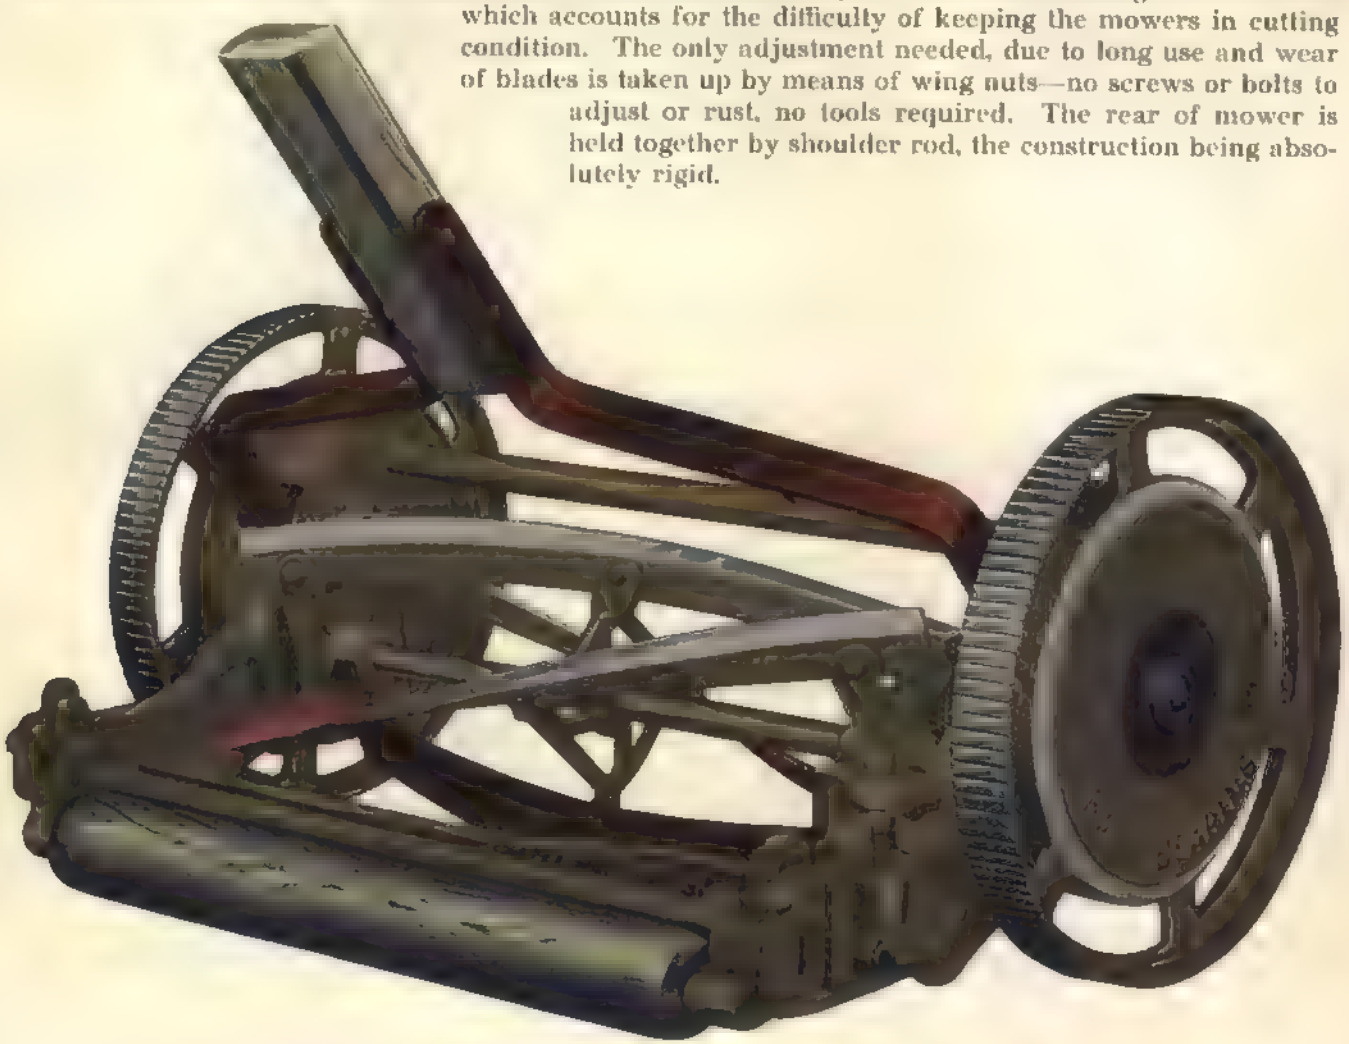
SUPREME LAWN MOWERS

Witte's Supreme; Full Floating Knife Bar; Ball Bearings; High Wheels

The Witte's Supreme Ball-Bearing Lawn Mower furnishes many new features entirely unknown in other mowers on the market. It is practically a fool-proof mower, being entirely free of complicated adjustments. The outstanding feature is the *Floating Stationary Knife Bar*, pivoted on steel cones and unlike other stationary blades that are subject to all the twisting of the frame which accounts for the difficulty of keeping the mowers in cutting condition. The only adjustment needed, due to long use and wear of blades is taken up by means of wing nuts—no screws or bolts to adjust or rust, no tools required. The rear of mower is held together by shoulder rod, the construction being absolutely rigid.



Highest grade cast iron side frames, gear casings and drive wheels, heavy spoke flange raised wheels; four crucible steel revolving blades, oil tempered; ⅝-inch cutter shaft; self-sharpening; adjustable malleable iron roller brackets with grass catcher attachment; wrought steel handle braces; 3½ foot hardwood varnished handle; 2-inch hardwood roller; mower beautifully finished in carmine and gold bronze.

High Wheels, 10 in. diam.; Four Blade Cutter, 6 in. diam.

LAWN MOWERS

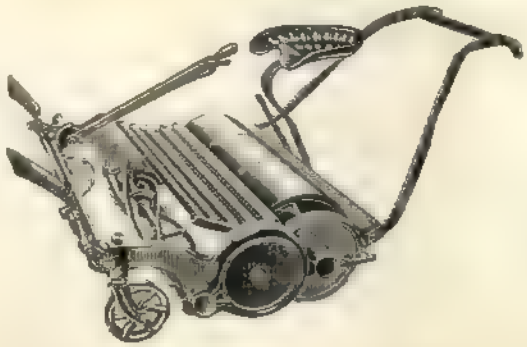
Richmond; Horse



A high grade mower that will withstand the hardest usage and give perfect satisfaction under all conditions; has all of the latest improvements; easy and convenient to operate. The frame is strongly reinforced and all parts are carefully fitted to exact dimensions; the graduated raising and lowering device enables the driver to instantly adjust the cutting height and allow the knives to pass over a stone; both the stationary and revolving knives can be removed without disturbing the frame or touching the other part of the mower; 15 inch drive rollers; four knives of highest grade crucible steel, oil tempered; triple gear drive; positive clutch and ratchet; indestructable; all bearings turn in adjustable bronze bushings; fully equipped with driver seat, shafts and side draft attachment, hand painted, red and green colors and striped

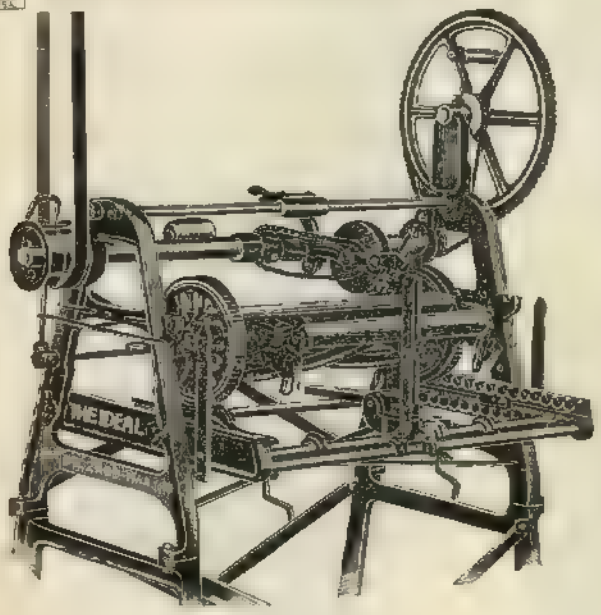
54—Ball-bearing cups	.25

NOTE In ordering parts always give the number and name of the part wanted, the width of cut of machine, and the year in which it was made, or the style number; the width is cast in raised figures on the knife bar on mowers made prior to 1898 the year and date of manufacturer is cast on the side plate, on those made in 1898 and later the style number, which takes the place of the year date, is cast on the drive wheel. Do not give patent dates; these will not identify the mower. Most of these parts weigh less than 4 lbs. and can be sent by mail or express at slight cost. Mower is right or left as you push.

LAWN MOWER SHARPENERS



Ideal

Japanned cast iron frame (18 inches wide on floor, 30 inches wide over all), stationary carriage and large sprocket wheel 16 inches in diameter, with 5 inch wood handle; frame is full steel braced, height over all 53 inches; carriage has gas pipe front and rods with gas pipe front bar (on which mower rests); ball bearing steel main driving shaft 1¼ inches in diameter, with ball bearing carborundum wheel 5 inches in diameter, with ⅝ inch face; main bearings are babbitted with extra good babbitt and are self-aligning; grinding wheel is driven by a ⅜ inch high grade bicycle chain from the main shaft, and main shaft connected to the large sprocket wheel by ¼ inch bicycle chain, while the screw feed shaft is driven by a round leather belt; grinding wheel is mounted on a ball bearing hub which makes it easily adjustable and very easy running; arm which carries the grinding wheel is pushed along the shaft by a sliding head; sliding head is driven by a ¾ inch steel screw shaft behind the guide shaft; feed is thrown out by a small trip lever; cast-iron japanned adjustable attachment bar will hold any straight cutting mower blade; or a few ¼ inch bolts of various lengths will clamp any mower blade to the attachment; attachment bar is planed on one side to hold planer knives; japanned steel roller rest with pin adjustable in height; complete with skate sharpener attachment; circular giving full directions for use furnished with each machine; will grind all mowers with 24 inch blades or less.

HOLMES & EDWARDS
SUPER PLATE INLAID IS DIFFERENT

HOLMES & EDWARDS Super Plate Inlaid is different. Every piece is heavily plated with pure silver and in addition those used most often have Solid Silver Inlaid under the plate at the two rest points to insure permanent satisfaction

THIS distinct quality feature can be easily demonstrated with the Sales Service helps furnished you to help sell more merchandise if you ask for them.

These helps, with a greater national advertising campaign in the most powerful women's publications, keep Holmes & Edwards Super Plate—Inlaid as

"The fastest growing line of Silver Plate in America"

THE new Octagonal Super Chest is a most worthy successor to our previous give-away case. As before, there is NO CHARGE for the chest itself when furnished with a 26-piece set of Holmes & Edwards Super Plate—Inlaid

HONOR BRAND Sweaters

MEN'S SWEATERS

HONOR BRAND Sweaters

Nothing can take the place of a sweater! When your customer wants a snug-fitting, warm garment that is practical for sports, work and dress-up wear, he buys one of these styles.

Note—The terms "wool faced" and "worsted faced" mean that the wool or worsted is thrown to the face of the garment and the cotton or merino to the back. Sizes given are actual—we do not use skimp cut garments.

Cotton Coat [illegible] knit stock [illegible] for hemmed [illegible] pockets. Sizes 36 to 46. ½ doz. in box.

Made by The Keystone Watch Case Company

The New 10 Size Howard Watch

This movement is manufactured on new principles combining simplicity and accuracy.

It is made in Three grades,

21 Jewel, 5 Positions
19 Jewel, 5 Positions
17 Jewel, 3 Positions

Adjusted to temperature, isochronism and positions. The dial plate carries the steady pins and permits a direct and permanent alignment of bridges with dial plate, securing accuracy in position of all Jewel holes.

The safety mainspring is more efficient than the usual safety devices. The lower end stone caps, being held by spring tension, screws are eliminated.

All hands (including second hand) will set directly from the stem. Stem is locked automatically without help of screws.

INTERCHANGEABLE SOCKETS

MOSSBERG SMALL SERIES

Small Series Sockets

For owner work there are no wrenches which compare with drawn steel sockets at as low a price, and these Mossberg drawn steel sockets that have been on the market for twenty years are quite guaranteed.

Small Series Sockets are marked to exact opening of sockets. The marking of each socket represents the short diameter of nuts, bolt heads and screw heads **plus** the clearance

Construction—Drawn by pressure from cold rolled steel, thereby retaining the necessary long grain in structure

Finish—Mottled and lacquered.

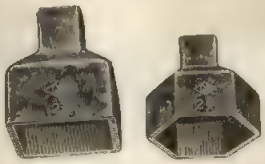
MOSSBERG LARGE SERIES



These **Large** Series Sockets and Handles are particularly useful for steel erectors, bridge contractors, truck operators, machine assembly, locomotive repair.

The **Large** Series Sockets begin in sizes where the smaller sockets end—and fit up to 1⅛ in. bolts

Construction — Drawn by pressure from Cold Sheet Steel, thereby retaining the long grain.

Finish Mottled and lacquered.

STANDARD FORD WRENCHES

CONNECTING ROD

The most useful all-round wrench for Ford cars. Special chrome steel alloy socket

Particularly fits: Connecting rod cap screws (all). (Also fits 10 other adjustments).

Made of ½ in. Steel Bar. Ratchet parts properly hardened.

Sockets of chrome steel alloy.

Burnished Nickel Finish.

Each

No. 624—10¼ in. Long, Weight 1¼ Lbs. $2.50

Made of ½ in. Chrome Manganese Steel Bar. Deep dome top socket of special analysis steel.

Burnished Nickel Finish

Fits the fourth connecting rod bolts and units without dismounting the motor, and also fits 10 other adjustments

Openings—⅝ in

Each

No. 623 10¼ in Long Weight 1 Lb $0.58

RATCHET TENSION SPRING

For Reverse and Brake Pedals.

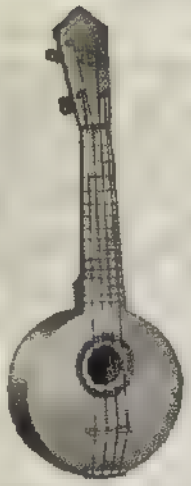
Does a hard job easily. A fast moving item because it is made just for this work

Made of heavy steel with properly hardened ratchet and spring, Burnished Nickel Finish.

Each

No. 645 –6⅛ in. Long, Weight 4 Oz. $0.50

Musical Instruments



Ukulele with Maple-wood Body. Black enameled pegs, full size scale. Decalcomania stripe around sound hole. Nickel plated tail-piece. Body 6½ inches, length 18 inches. Each in box.

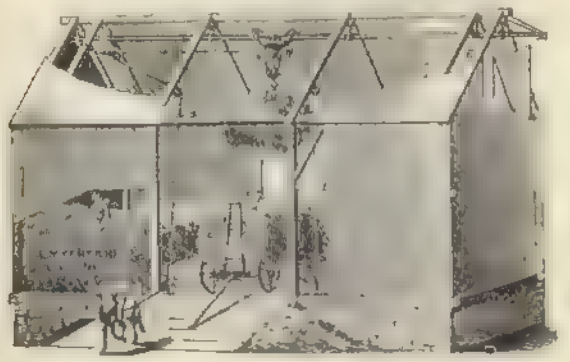
HAY UNLOADER OUTFIT

Myers

Illustrating how track, rope, stop and pulley should be placed in barn.

Place pulley to draw the carrier back into the mow directly under and in line with track, as shown in cut, do not allow steel track hanging hooks to project below casting under track through which they are screwed, as they will interfere with the carrier; above illustration shows how steel track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn; also shows how rafter brackets are placed.



How to reverse carrier; set fork in hay; tie ends of rope together, to which horse and weight are attached, pull on small rope until knot comes to the floor, then untie ropes; fasten weight G on small rope; change pulley A to floor hook H; this reverses carrier for opposite direction without leaving the floor or climbing up; use all knot passing pulleys; for taking in hay at end of barn use V-shaped brace for track support, as shown in cut.

Material Required for a Steel Track Outfit for Different Length Barns:

For a 40 foot barn; one hay unloader; 36 feet steel track; 19 hanging hooks; 19 rafter brackets; 5 knot passing pulleys; 1 fork or 3 slings; 6 floor hooks; 110 feet ¾ inch manilla rope; 50 feet ⅜ inch check rope; 40 feet ⅜ inch reverse rope.

For a 50 foot barn; one hay unloader; 48 feet steel track; 25 hanging hooks; 25 rafter brackets; 5 knot passing pulleys; 1 fork or 3 slings; 6 floor hooks; 130 feet ¾ inch manilla rope; 55 feet ⅜ inch check rope; 50 feet ⅜ inch reverse rope.

For a 60 foot barn; one hay unloader; 54 feet steel track; 28 hanging hooks; 28 rafter brackets; 5 knot passing pulleys; 1 fork or 3 slings; 6 floor hooks; 160 feet ¾ inch manilla rope; 60 feet ⅜ inch check rope; 60 feet ⅜ inch reverse rope.

For a 70 foot barn; one hay unloader; 66 feet steel track; 34 hanging hooks; 34 rafter brackets; 5 knot passing pulleys; 1 fork or 3 slings; 6 floor hooks; 190 feet ¾ inch draft rope; 70 feet ⅜ inch check rope; 70 feet ⅜ inch reverse rope.

For a 80 foot barn; one hay unloader; 78 feet steel track; 40 hanging hooks; 40 rafter brackets; 4 lbs bracket nails; 5 knot passing pulleys; 1 fork or 3 slings; 6 floor hooks; 210 feet ¾ inch draft rope; 80 feet ⅜ inch check rope; 80 feet ⅜ inch reverse rope.

Different length barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end to horse, same amount of draft rope; if draft rope be returned to same end of barn and then down, this requires about one-fourth more draft rope.

HAY UNLOADERS OR CARRIERS

MYERS CLOVER LEAF

For Double Steel Track

Swivel and Reversible; 16 Inch Truck

Substantially made of the best annealed malleable iron, thoroughly braced, which insures strength sufficient to withstand the most severe usage; equipped with large open mouth, swinging fork pulley and double force locking device which engages the frame of the fork pulley on both sides allowing the load to swing clear and avoiding a strain; used with Myer's double steel track No. 824; aluminum finish, trimmings in red.

With Trip and Two End Stops

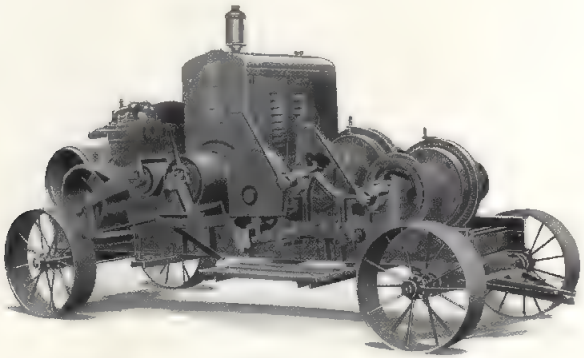
One set (8 clamps) in wood box



Novo Combination Hoist and Air Compressor
(TWO-IN-ONE)

Novo Combination Hoist and Air Compressor Outfits Two-In-One—are, as the name indicates, double purpose units. The use of these outfits lessens the amount of equipment necessary for doing many kinds of work.

As seen by the illustration of outfit, a hoist single drum on AL16, ND16, and ED17 and double drum on ED 57 forms one end of the outfit. A Novo four cylinder engine AF, 18 H.P., NF, 25 H.P., or EF, 40 H.P. is between the hoist on one end and an air compressor at the other end of the outfit.

Outfits are substantially mounted on steel channel or "I" beam frame, with cast semi-steel spreaders When furnished without truck, heavy timber skids are bolted to frame. Trucks with heavy steel wheels and with team or truck hitch furnished, when so ordered.

SPECIFICATIONS

Outfit No.	Engine	Hoist			Compressor			Dimensions in Inches			Approx. Net Weight Lbs Skid Mounted

Outfit AL16—One winch head standard.
Outfit ED57—Two winch heads standard, one on each drum.
Outfit ND16—One winch head standard Jaw clutch extra
Outfit ED17—One winch head standard Jaw clutch extra
*These Outfits can also be furnished with double drum hoists (same capacities)
†Weight of Outfit ED57 mounted on truck as illustrated, 9800 pounds, nc.

Rating is based upon atmosphere conditions at sea level.

For Prospecting and Mining

Effort is wasted in assessment work when countless ten foot holes are dug. By concentrating energy in one excavation, real information can be secured and something will be accomplished that will be of considerable value later on.

A Novo Combination Hoist and Air Compressor can be taken direct to the job. The hoist has sufficient capacity for such work and the air compressor furnishes the air required without a large line loss

In addition, the engine can be used for other power purposes. But the one man is needed to operate the outfit. Truck mounted outfits are easily transported.

For General Construction Work and Bridge and Tank Erection

For construction, remodeling, or demolition work a Novo Combination Hoist and Air Compressor outfit is especially useful One engine runs both units.

The portability of Novo Two-In-One Combination Hoist and Air Compressor outfits increases their usefulness and minimizes the cost

In structural steel work, the hoist is used to raise the steel and hold it in place while the air compressor furnishes the air to operate the riveting hammers or other air tools

The Air Compressor unit used on outfits AL16 and ND 16 will operate two riveting hammers or their equivalents continuously. The Air Compressor units used on outfits ED17 and ED57 will operate two rotating drills of the jackhammer type or four riveting hammers. The hoist capacities and cable speeds are listed in the specifications.

Novo Type TN Hoist

Single Drum, Single Speed—Reversible

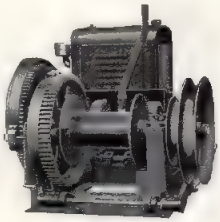

Figure 606
Novo Type TN Hoist

Novo Type TN Hoist is a single drum, single speed reversible outfit. It is furnished with 6, 8, and 10 H.P. Novo single cylinder, Model RF and YF, two cylinder, 6 to 12 H.P. and Model AF, four cylinder, 18 H.P. engines.

Two speed sheave on drum shaft makes outfit especially adapted to handle double platform elevator, handling loads up to 3000 pounds.

Drum is 8¼ inches in diameter and 15 inches long, and will hold 850 feet of ½ inch or 1500 feet of ⅜ inch cable.

Steel channel base is bolted to one-piece semi-steel cast hoist frame, and extends back for engine mounting.

All bearings, except brake shaft bearing, are of babbitt and are adjustable. Bearing caps securely held by stud bolts and nuts. Lubrication is by compression grease cups.

Drum is semi-steel casting, round and smooth. It is 8½ inches in diameter and 15 inches in length, and will hold 850 feet of ½-inch or 1500 feet of ⅜-inch cable. Drum can be disengaged permitting sheave to be operated independently.

Two adjustable clutches, one for forward movement and one for reverse, are contracting band type. Friction linings are easily replaced when worn. Clutches operated by conveniently placed lever. Intermediate position of lever between clutches stops mechanism.

Brake is contracting type, controlled by foot pedal with ratchet. Can be locked, holding load in any position.

Gears are semi-steel cast. Machine cut teeth. Turned and polished brake surface integral part of drum gear Note. When so ordered, and at extra cost, special gearing can be furnished on Type TN Hoist, which will increase the line speeds shown in table on other side of Technical Data Sheet The capacities of hoists will be decreased proportionately.

Type TN Hoists, when equipped with YF two cylinder, 9 to 12 H. P., and AF four cylinder 18 H. P. engines, are provided with engine throttle placed within easy reach of operator.

The Two Speed Sheave is a one-piece semi-steel casting for handling double platform material elevators. Larger groove has nearly double the line speed of the smaller groove. Sheave can be disengaged permitting drum to be operated independently.

For line speeds and loads, weights, dimensions, etc., see specifications below.

SPECIFICATIONS

NOTE—Heavy face type indicates speeds and loads that will be furnished unless otherwise specified

Novo Type C Force Pumping Outfits

These are moderate pressure, double acting, single cylinder pumps meeting the requirements of a low priced and economically operated outfit. The capacities of the two smaller outfits are the same, (16 gallons per minute displacement) but operating pressures are different.

Three sizes of Type C force pumping outfits are built using a Novo 1½, 3, or 4 H.P. single cylinder engine. Pressures from 55 to 75 pounds per square inch or total heads of from 125 to 175 feet.

These outfits can draw water from the usual 20 foot lift below the pump. The pump proper is double acting with valves and water chambers at both ends. The pump cylinder has a removable brass lining which can be renewed when worn. The valves and valve seats are of brass. The valves are accessible by removing the caps that cover them without disturbing other parts. Piston rod is brass to prevent corrosion.

Suction and discharge lines are interchangeable and can be connected on either side of rig. Pump must not be more than 20 feet above water supply.

Novo Type U Pumping Outfits

Fig. 780 shows a 4 H. P. Type U Pumping Outfit and represents the sizes shown in the specifications below. It is an especially sturdy unit but at the same time is compact and light enough to be moved quickly and easily from one job to another. It is built complete in our own plant. The engine and pump are mounted on a combined channel and columnar base providing a most substantial foundation. Cut below shows base in form of skid which makes the outfit exceptionally easy to move about.

The pump has a brass lined cylinder, tobin bronze piston rod, brass wing valves with beveled seats easily accessible for inspection or renewal, brass valve seats, piston packed with cup leathers, brass stuffing box, gland, and nut. Suction and discharge openings are on both sides of pump.

The suction valves are above the piston and therefore cannot leak water when the pump is stopped. The Type U Pumping Outfit, therefore, is always primed and will immediately pick up its suction after a long period of rest.

Novo Type W Pumping Outfits

These Pumping Outfits Especially Recommended for Road Work

There are 11 sizes of Novo Type W duplex, double acting pressure pumps. Novo single, two and four cylinder engines are power units used on these outfits. Capacities: 13 to 130 gallons per minute displacement. Pressures: 120 to 800 pounds per square inch.

Pump crankshaft is a heavy steel casting with flange for bull gear cast integral. Bull gear bolted to flange, eliminating all keys, set screws, etc.

Larger sizes of Novo Type W Pumps have clutch on engine, permitting engine to be started and load thrown in after engine attains full speed.

The Type W Pump is capable of delivering large quantities of water—more than is actually required in most cases. In determining the size of pump for supplying water to a concrete mixer, figure on 6 to 8½ gallons of water per sack of cement in each batch plus water used for sprinkling, etc.

*RF Engine is radiator cooled type.
Steel Housing on engine is standard equipment for RFW and AFW Outfits. Outfits Nos. 300A and 306A with 6 H. P. engine do not have clutch. All other Outfits listed above are equipped with clutch.

Novo Triplex Pumping Outfits

Novo Triplex Pumping Outfits are compact, self-contained units of great strength, and are adapted to any high pressure pumping requirements where weight is not objectionable. Engine and pump are mounted on a substantial cast iron base, insuring accurate and permanent alignment.

Novo single, two and four cylinder engines are power units used on the outfits. A friction clutch is provided on all sizes so that the engine can be started without load and the clutch thrown in after the engine has attained full speed.

The pump proper embodies the principle of the three-throw crankshaft with the crank pins at an angle of 120 degrees to each other by which arrangement the strokes follow and overlap, resulting in a continuous and uniform action upon the fluid being pumped and insuring an easy and constant flow through the delivery pipe, with a corresponding high degree of efficiency in the operation of the pump.

The description and the illustrations of the triplex pump applies, in general, to all outfits listed in the specifications below. Details of construction vary somewhat, depending upon the conditions and pressures under which they operate.

Complete equipment on Novo Triplex Pumping Outfits includes Novo one, two, four cylinder gasoline engines, (with cooling system, fuel reservoir and carburetor, and high tension magneto ignition) triplex pump, friction clutch, and relief valve for pump.

PYREX TRANSPARENT OVEN WARE

A heavy clear glass made of special material which will withstand the sudden change of temperature incident to baking. It is the most sanitary material for any utensils requiring constant cleaning; will not glaze, flake nor scratch.

Pyrex Ware saves food and fuel by baking better, browner and quicker; the food is baked and served in the same dish.

"Crown Razors"

A Good Judge of Razors will buy these. Each Razor Guaranteed

The Crown Razor is a special product in the razor line. Manufactured by the Crown Razor Co., of Boston, Mass. It is strictly high grade, made of best decarbonized American steel, by skilled mechanics. It has the finish and appearance as well as cutting quality of a razor that would sell at many times the price quoted. Each razor is fully guaranteed, and if found defective, will be replaced with a new one.

These razors are made with greatest care, and we are therefore safe in saying that no razor at a similar price in the market is as good. For mail-order men, street men, razor agents, canvassers, premium men and dealers, these razors have no equal.

The handier or dealer may ask most any price he desires for these razors, because the quality, appearance and finish justifies it. The evenness of the temper and the cutting quality is seldom obtained in other makes. We are sure that a trial order will result in many repeaters. It is positively one of the best razors for mail order exploitation.

No. C5585. Crown Razor, square point, extra hollow ground, ⅝-in. blade, highly polished black handle. Dozen 4.00

No. C5588. Crown Razor, round point, ⅝-inch blade, extra hollow ground finish, polished black handle. Dozen 4.00

COLTS AUTOMATIC PISTOLS

The action of these pistols is automatic, except that the trigger must be pulled to fire each shot, the cartridges being supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell extracted, and a new cartridge loaded into the chamber, all thes operations taking place automatically. This automatic operation of the pistol is effected by the recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has no disturbing effect.

All Colts' Automatic Pistols are equipped with safety devices.

No. C1NP.

Vest pocket model, hammerless, 25 caliber, 6 shots, 2 in. barrel, 4¼ in. over all, checkered wood stocks, adapted for 25 automatic pistol cartridges.

No. C1C—Blued .....each $27.20
No. C1N—Nickel plated .....each 27.20

Hamilton Watch

The Railroad Timekeeper of America

The HAMILTON MASTERPIECE

Here is the ideal watch for presentation purposes. The Hamilton Masterpiece represents the highest art of the watchmaker and the gold- and platinum-smith combined in a watch of phenomenal accuracy, always in good taste and beyond fads and fancies.

Masterpiece in 18K hand-made white or green gold case. Dial of brush finished sterling silver with raised numerals of 18K gold.

Price $250.00
List $303.20

In response to the demand for a platinum cased Hamilton, we have designed the model below, remarkable for its beauty and simplicity.

Masterpiece in platinum. Beautifully modelled of platinum. Dial of sterling silver with solid gold raised numerals and solid gold hands.

Price $685.00
List $825.00

This remarkable example of Hamilton craftsmanship is altogether worthy its name. The cases, fashioned of extra heavy 18K white or green gold or platinum, are hand made throughout. Fitted with a 23 jewel movement, adjusted to heat, cold, isochronism and five positions; has patent motor barrel, gold train, steel escape wheel, double roller escapement, sapphire pallets, micrometric regulator, Breguet hairspring and compensation balance.

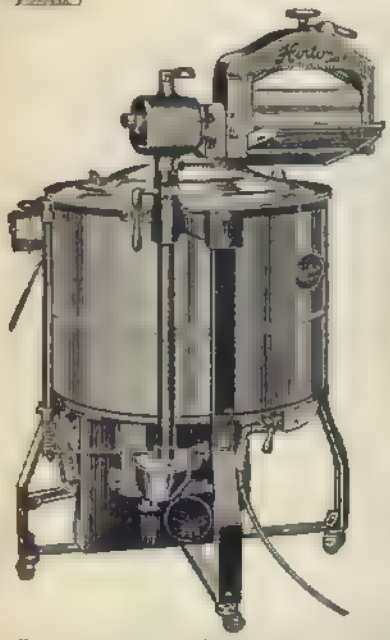
WASHING MACHINES



Horton Electric
Three Cup Vacuum Type

Tub or tank is made of heavy sheet copper, nickeled inside; instead of natural copper finish the outside is finished with copper bronze and two coats of water-proof varnish, this finish will not discolor or tarnish and will last indefinitely; four substantial steel legs, braced at bottom and on heavy roller-bearing casters gives perfect rigidity and balance; three large vacuum cups made of pressed copper, move up and down at the rate of sixty strokes per minute; they cover the entire surface and change position at each stroke by friction; by this method it is impossible to tear the clothes, the cups are adjustable for large or small load; motor with ¼ H. P. of latest closed type design, protected from overload or dry bearings by patented temperature relay or motor protector that shuts off current automatically when motor becomes too hot; metal frame wringer has 12-inch rolls and is equipped with positive safety device that instantly releases all pressure; it swings in any position; washer can be equipped with a complete gas heater to keep water at the desired temperature.

Standard Family Size

Each

Ⓕ**No. H40GH**—With Gas Heater; shipping weight 310 lbs. . **225 40**

Horton Electric
Three Wing Agitator

Made entirely of metal; tub of heavy sheet copper, nickeled inside; outside specially treated finish that will not tarnish or discolor; all mechanism and operating parts are beneath the tub (self-oiling), the lid is therefore free from all heavy mechanical parts and can be easily removed and washing inspected while machine is running; a large one piece, die cast, three wing aluminum agitator at the top of the shaft produces a quick vibrationless, positive washing action; swinging wringer a safety trigger instantly separates the large 12 inch size rolls; wringer and washer can be used at the same time; perfectly balanced on four channel steel legs, mounted on especially designed casters; heavy duty motor with ample power to wash and wring at the same time; fully guaranteed.

Each

WASHING MACHINES

Horton

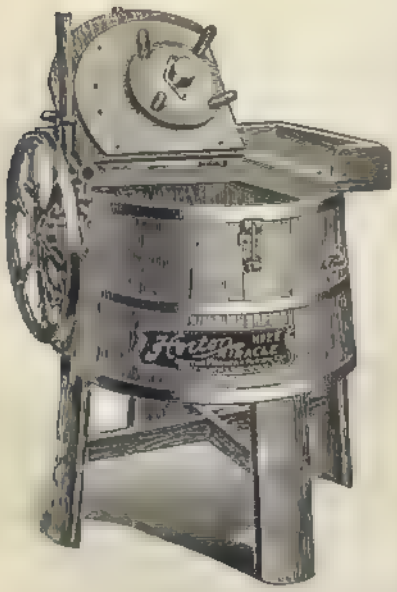
Motor High Speed

A very high speed washer among the leaders in the hand power field.

Tub is made of best grade Louisiana red cypress, sanitary, odorless and easy to keep clean, body has high grade natural varnish finish with heavy iron bronzed hoops; automatic cover lift and lock; special metal faucet for draining the tub; all metal parts on the inside of the tub are, galvanized, rust-proof and non-corrosive; spiral cut gears give speed, ease and smoothness in running; four wing patented wood dolly will not catch or tear the clothes, all operating mechanism is carefully assembled; ball bearings add to the smooth operation and durability of machines.

Each

No. H23 Standard family size; capacity 16 gallons; shipping weight 86 lbs. **$27 00**



Horton Miracle

For Use as hand power or gasoline engine

Equipped with the simplest and easiest running mechanism of any washing machine manufactured; the driving gears are cut instead of cast, causing the teeth to mesh perfectly and reducing friction to a minimum, no lost motion; the momentum is maintained by the large heavy flywheel, the operating lever can be placed in either one of two positions convenient for a short or tall person, adult or child; the dolly post is guarded by a galvanized cup, eliminating all possibility of tearing the clothes. To meet the demand of farmers or others requiring a washer that can be run by a gas engine or other method of power, the flywheel can be taken off and a power pulley put in its place; the belt need not be removed when lid is opened

Tub is made of selected Louisiana red cypress wood, finished natural with three coats of coach varnish, mechanism in gold bronze, flywheel and hoops green enameled.

Standard Family Size; Capacity 16 Gallons

Each

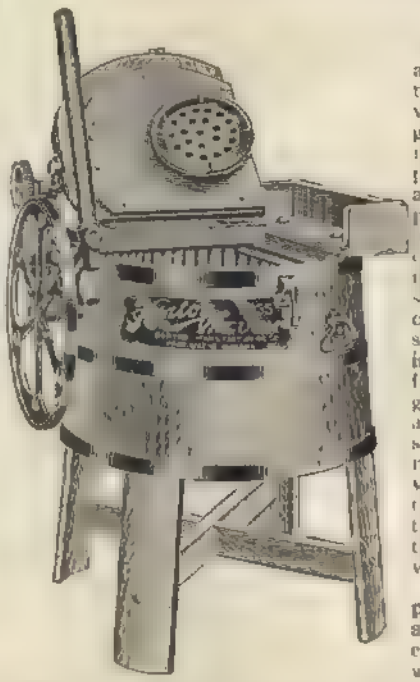
No. H22—Hand Power; shipping weight 100 lbs. **$27 00**

No. H22P With Power Pulley; shipping weight 105 lbs. **27 00**

One in a crate

No. PP -Extra Power Pulley; weight 5 lbs. **3 30**

WASHING MACHINES



Horton Vacuum

Extra large tub of Louisiana cypress wood attractively finished in natural varnish, fly wheel and hoops green enameled, balance of mechanism in gold bronze, plunger heavily galvanized, all gears are covered; the plunger or agitator does 50% more work with the same effort than any other machine because it makes $2\frac{1}{2}$ strokes to each stroke of the operating lever; this high speed without more power is made possible by the frictionless, machine-cut gears and the perfectly balanced mechanism; this high speed of the plunger with its many perforations or air valves, causes so much agitation that the clothes are thoroughly cleaned in less time than by any other vacuum type machine.

Can be operated by power of any kind as well as by hand, by simply exchanging the large fly wheel for an 8 inch flat belt pulley; this valuable feature is possible because the gears are disengaged when lid is opened and this also eliminates the need of tight or loose pulleys

Standard Family Size; Capacity 18 Gallons

Each

No. H35—Hand Power; shipping weight 120 lbs. **$30 00**

No. H35P—With Power Pulley; shipping weight 125 lbs. **30 00**

One in a crate

No. PP—Extra Power Pulley; weight 5 lbs. **3 30**

Horton Peerless

Water Power

By connecting the machine to the city water faucet, the water pressure does the rest; the motor with which this washer is equipped is the most powerful made for the purpose; it is a new departure in water motor construction; its mechanism is very simple; instead of having poppet valves like other motors, it has, **one automatic sliding valve** which is not dependent on springs to operate; this does away with all spring and valve trouble which has caused so much grief to users of ordinary motors; this motor will work to best advantage with a water pressure of 35 lbs or over, but will operate on as low as 20 lbs. water pressure. Tub is made of selected Louisiana red cypress wood, thoroughly seasoned; natural wood finish; hoops and trimmings enameled green, motor finished in red enamel, dolly post is guarded by a galvanized cup to prevent tearing clothes.

Each

No. H30—Standard family size, capacity 16 gallons; complete with wire bound intake and discharge hose; shipping weight 75 lbs. **$33 30**

One in a crate

WASHING MACHINES

1904 Automatic

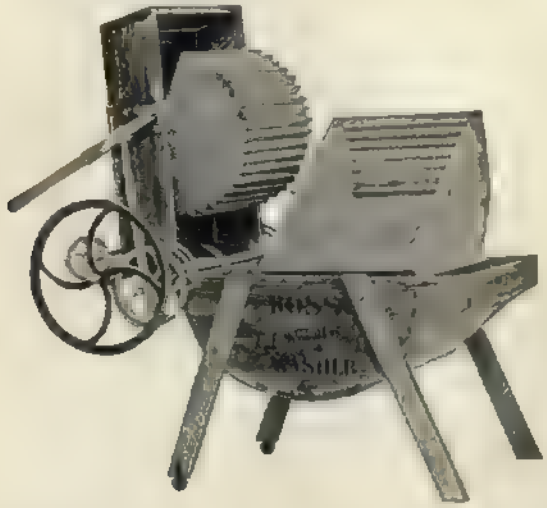
Large round tub made of Louisiana cypress, natural finish and varnished, corrugated on inside, large opening with detachable lid; detachable hardwood legs with malleable iron castings; operated by drawing the handle around and back a quarter turn, letting one hand rest on the ball on other end of handle; the hand rest also permits the operator to put any amount of pressure desired on the rub-board, a very desirable feature when washing dirty clothes; has automatic spring attachment which makes machine work surprisingly easy; rub-board is substantially made of cypress wood.

Each

No. 1904—Standard family size; capacity 16 gallons; weight each crated 70 lbs. . **$20 00**

One in a crate

Boss Self Working Ball Bearing Fly Wheel
For Hand or Belt Power



Lever action; body made of Louisiana cypress, natural finish and varnished; heavy galvanized iron bottom with metal drain faucet; galvanized castings and trimmings, clothes are placed between two semi-circular rub-boards which operate simultaneously in opposite directions, producing a rubbing, squeezing suction that cleans quickly and thoroughly; equipped with high speed ball-bearing fly wheel mechanism and operated by lever instead of hand wheel; at every fifty strokes of the lever, fly wheel makes 300 revolutions and the two cylinders oscillate 180 times—90 forward and backward strokes every minute; all gears are machine cut and smooth running; fly wheel has belt groove and may be motor driven; large rigid wringer attachment; rollers on rear legs.

Each

No. 32—Standard family size; capacity 16 gallons; weight crated each 120 lbs. **$33 00**

No. 33—Large family size; capacity 19 gallons; weight crated each 135 lbs. . . **35 00**

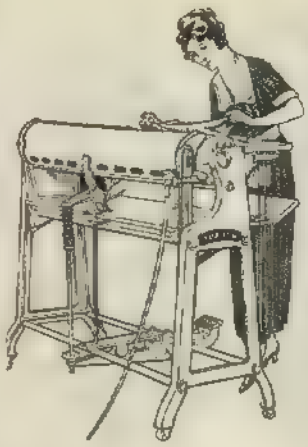
IRONING MACHINES

Horton Open End



The open end construction enables the operator to iron ruffles, cuffs, etc., doing the ironing perfectly and with ease; the heavily padded roll revolves against a perfectly smooth polished ironing shoe, giving a much better finish than is possible by hand, due to the greatly increased pressure; convenient clutch to start, stop and reverse roll quickly; perfect combustion gas mixer gives the proper mixture of gas and air, heavy roller bearing casters; special high grade motor with convenient switch; hand screw to give desired tension; foot levers to control ironing shoe to permit free use of hands; ironed clothes drop on finely finished table; convenient clothes rack of large capacity; entire mechanism covered, insures safety to hands and adds to beauty of machine.

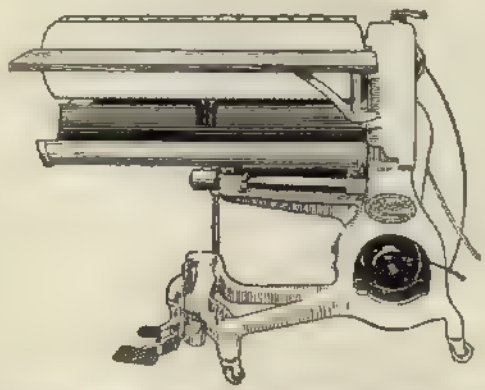
Gas Heated

	Each
Ⓕ**No. 46**—Width of roll 46 inches; weight 370 lbs.	**$217 00**

Electric Heated 110 volts A. C.

Ⓕ**No. 46E**—Width of roll 46 inches, weight 370 lbs.	**280 00**

Horton Du-All



Simple and sturdy in construction, there is practically nothing to get out of order, it operates smoothly without vibration or noise, and with ordinary care will give service for a life-time; the well padded roll has a complete open end over which shirts, dresses, skirts, etc., can be slipped and ironed on all sides; the hood board can be swung out of the way when ironing complicated pieces; the specially designed pedal is easy to operate from any position, the operator sits comfortable on an ordinary chair, requires very little floor space, roller bearing casters, padded roll has 150 square inch ironing surface; every feature represents the utmost in quality and construction.

MOSSBERG WRENCHES

SOCKET WRENCH BOARD

Assortment contains 80 Wrenches

This display stand will turn over more wrenches at less cost than other salesmen.

It is well built and harmonizes with salesroom fixtures.

The quantity of each wrench (22 different types) is an assortment and a complete one with which the dealer in accessories may safely start in a very profitable department.

Store Display Stand Description:

Construction: Cabinet work with three coats of finish. Second growth chestnut.

Hooks: Each pair holds two wrenches. Hooks are nickeled.

Finish: Natural grain.
Size: 20 in. wide by 66 in. high. Easel back.

Assortment Descriptions:

Construction: All bar items of heavy 1/2 inch steel.

Crowfoot wrenches are forged from solid steel.

Finish: Burnished nickel.

A small quantity of each of 22 wrenches that are in constant demand from FORD owners. Each wrench in the quantity that sales warrant.

ONE SET IN A WOOD BOX

MOSSBERG WRENCHES

SMALL SERIES SOCKETS

For owner work there are no wrenches which compare with drawn steel sockets as Mossberg sockets.

Sockets are marked to exact opening of sockets. The marking of each socket represents the short diameter of nuts, bolt heads and screw heads plus the clearance.

Construction: Drawn by pressure from cold rolled steel, thereby retaining the necessary long grain in structure.

Finish: Mottled and lacquered.

Sizes marked ★ are shipped from factory only

A CRESCENT WRENCH FOR ALL-AROUND USE

At the Right Price

Retail Price $9.00 Per Dozen

This wrench must not be confused with cast iron and malleable wrenches of the same type. It is a tool of value; one that upholds the Crescent reputation for dependability.

A sturdy, general purpose tool, entirely forged from special analysis steel. Hardened and oil tempered.

Teeth in handle accurately milled, giving ease of adjustment. Face of jaws are also milled, so that they grip along their entire surface.

Spring under adjusting knurl holds jaw set until adjustment is changed.

Adjusting knurl turned from a solid bar of steel and hardened.

Hand polished finish, giving a splendid appearance.

No. G6500—019—9 in. long, with a capacity, fully open, of 3 in. Length of jaw 1¼ in. W't per doz. 12 lbs., per dozen $12.00

ONE IN A BOX

No. C6536—30—W't 4¾ lbs., per set $6.90

ONE SET IN A BOX

STANDARD TAPPET WRENCH SET

Tappet rods on poppet valves should be adjusted often—if the motor is to be expected to run quietly.

Special wrenches are needed because the adjusting nut and check nuts are thin.

For easy adjustment, the wrenches must meet the exacting conditions; that is, they must be long and thin and generally must be used in pairs, and must be made of high carbon steel. Contains: 8 double-end wrenches, 16 openings.

Wrench No.	Wrench Opening Sizes Inches	Length Inches	Thickness Inches
2—F201	3/8, 7/16	7	1/8
1—F203	1/2, 9/16	7	1/8
1—F204	1/2, 9/16	7	3/16
1—F205	5/8, 11/16	8	1/8
1—F206	5/8, 11/16	8	3/16
1—F207	3/4, 13/16	8	3/16
1—F208	3/4, 7/8	8	3/16

Construction: High carbon steel.

Finish: Burnished nickel, hardened, edges round, openings accurate.

No. C6506—200—Shipping w't 1¾ lb., per set $3.30

EACH SET IN CANVAS ROLL

"EVER WEAR" SOCKET WRENCH SET

"Ever-Wear" Socket Set of wrenches for use for repairs, assembly, and hardest work.

Tools are made to withstand the most unreasonable demands and are so warranted.

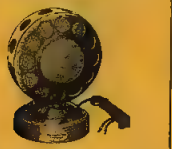
STIMULATORS

"Kodel Micro" Radio Loud Speaker

Looks Like a Broadcasting Microphone

Nationally advertised; one of the most popular products of Kodel Radio Corp. Equipped with genuine UTAH UNIT



3HG985—The unit volume—the universal symbol of radio—encased in a base transformer, like a wonderful, new, efficient, loud speaker. Adapts to any set; any make. Case with genuine UTAH loud speaker unit. Plugs in good receiving set and operates. With cord. Each, n. bet. Suggested retail price $18.50 . Each **$10.95**

"Franco" Storage "A" Batteries for Radio Sets

6 Volts—Rubber Case

90 or 120 Ampere Hour Size

Built especially for radio use. Heavy plates replace possibility of buckling or sulphating. Patent vent plugs and method of sealing prevent acid spilling. Hard rubber leak-proof case. Shipped fully charged dust proof wood box.

3HG951—6 volts 90 ampere hour capacity. ....Each **$11.25**

3HG965—6 volts, 120 ampere hour capacity .... Each **13.25**

1927 Model "ALADDIN" 5-Tube Radio Set

Suggested Retail Price $65.00—Your Cost $38.00—(40% Off Retail List)

For months, Mr. Carl Frenzel, noted radio engineer, has been directing work for the development of a moderately priced set with all the new improvements. With the announcement of the 1927 model "Aladdin" the success of his efforts is demonstrated. Superb selectivity, and an ease for dial fix range is measured by thousands of miles. The realistic, brilliant tone of former "Aladdin" models is retained, as well as the simplified tuning feature.

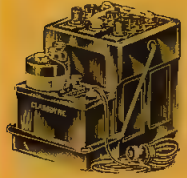
Solid Walnut Cabinet

21 in. long, 9¾ in. high, 14½ in. deep. Genuine solid walnut cabinet, 2-tone finish, hand polished. 5-tube circuit. Panel engraved for wave lengths on the center tuning dial and the desired program is easily and quickly located by turning the 3 dials to the same position. Stations are evenly spaced on dials. All electrical parts except sockets mounted out of sight beneath sub-panel inside cabinet. Equipped with battery cable with special connections to accommodate the use of the new power tubes in the last audio stage for extraordinary volume. For use with storage battery tubes. Complete instructions with each set

3H1250—1927 model "Aladdin" 5-tube receiving set Each **$39.00**

5 tubes (201A or 30 A type), 6 volt storage "A" battery, 90 volts or more "B" battery, loud speaker and antenna outfit required to equip the 1927 "Aladdin" 5 tube set. All parts listed on regular radio pages.

"Clarodyne" Radio "A" Power Unit



One of the most efficient, but inexpensive "A" power units on the market. Both battery and trickle charger are manufactured by two of the best known makers.

6 Volts

3HG949—Clarodyne battery, 6 volts, 35 ampere hr., hard rubber case, heavy 6% x8 in. plates, selected wood separators. Battery equipped with heavy enameled cap to hold trickle charger. Electrolytic type charger, for continuous charge at a rate of .5—.75 amperes (fully 70% greater than any other trickle charger). Unit operates continuously and delivers full power at all times. Noiseless. Operates from 110 to 120 volts 50 to 60 cycle alternating current. Each in box. Each **$13.85**

CLARODYNE RADIO DEALERS

Are Making **66⅔%** PROFIT (on cost)

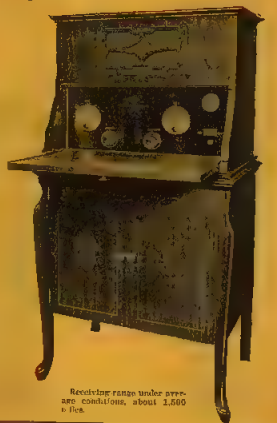
Write for Exclusive Agency Proposition

Address—C. Stute, Radio Dept.

"MURDOCK" 6-TUBE NEUTRODYNE RADIO SET

No Aerial or Ground Required—Built-in Speaker

Only limited quantity, and the usual price is at least 10% higher! Order early if you wish to take advantage of this bargain special.



Receiving range under average conditions, about 1,500 miles.

2-Dial Tuning Control

Special period design console cabinet of solid mahogany, 53 in. high, 26 in. wide, 17 in. deep, antique silver finish fittings. 6-tube neutrodyne circuit; 3 stages of radio frequency, detector, 2 stages of audio amplification. 2-dial tuning control. Electrical parts completely shielded in cast aluminum cases. Equipped with Jewel meter and special battery switch to give readings of "A" or "B" batteries at any time. Revolving loop antenna and full toned, cone-shaped loud speaker of the latest type are built into cabinet. Room for all batteries inside cabinet. Complete instruction with each set

Set With Tubes Only

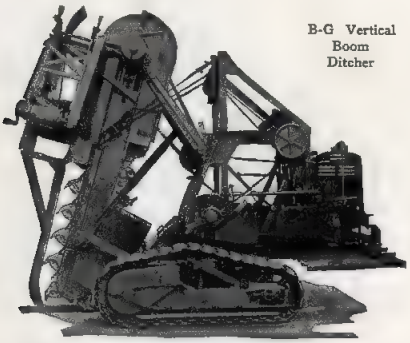
3HG608—(Mfrs 204) "Murdock" 6-tube set with 6 matched "201A Radiotron" tubes

Each **$150.00**

Set With Complete Equipment

3HG609—"Murdock" 6-tube neutrodyne receiver with the following equipment which makes a complete tube least receiving outfit; 6 matched "201A Radiotron" tubes 2 "B" batteries, 45 volts each, 6 volt, 120 ampere-hour storage "A" battery; "Dymac" headset; phone plug

Each **$171.50**



B-G Vertical Boom Ditcher

Barber-Greene Ditcher for Cutting Both Mains and Services

After cutting mains, the Barber-Greene Ditcher can be used for cutting services off from the main at any angle and any depth up to 7 feet. No trouble about steering it anywhere; it can be turned around on a flat car.

Nominal digging widths, 9", 14" and 18". Special widths may be arranged for.

—SPECIFICATIONS—

Vertical Digging Boom: Digs straight down. Can dig post holes if necessary. No preliminary shoveling needed to start digging. Box type, built up of heavy steel castings and shapes. Maximum depth 7', various widths.

Self-Cleaning Bucket: The bucket is made part of the chain. A long lip forming the inner part of the bucket kicks out every time it passes over the head sprocket, passes through the other part of the bucket, and thus makes discharge of the bucket positive. Already proved successful in every sort of material. Buckets 9", 14", and 18" wide. Other widths special.

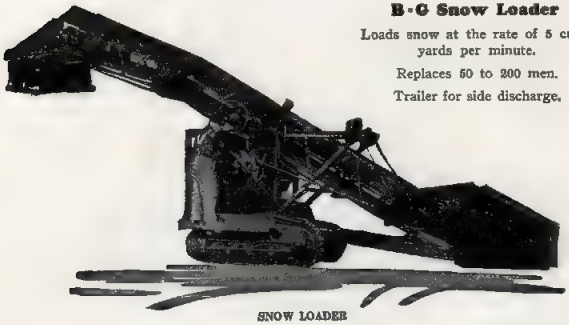
Full-Crawler Mounting: Entire machine carried on a single pair of crawlers. This means greater maneuvering ability, more accuracy and greater ease in steering. One crawler can be stopped and all the power put into the other. The machine can be turned around on top of a flat car. Crawlers are 68" long and 14" wide, giving a bearing pressure of only 8 pounds per square inch.

Overload-Release Sprocket: Heavy springs hold the inner part of this sprocket against the outer part. Too much strain on the bucket line causes the springs to give, and the outer part rotates around the inner, coming to operating position again. This action can be repeated indefinitely until the operator decides that it is necessary to lift the boom and pass over, or until the object is dislodged. No replacements or adjustments of parts necessary.

It is possible often to dislodge a stone by constantly picking at it with the sprocket slipping. On the other hand, if the obstruction is a pipe, it has been found that a bucket usually catches onto the pipe and holds indefinitely without cutting the pipe.

Control: All operating levers arranged conveniently for one-man operation. Master clutch operated by foot lever. Separate clutch for each crawler arranged so that crawler can be controlled separately or together with one hand. Gear shift lever similar to a truck for changing traveling speeds. Similar arrangement for changing digging speeds. Automatic throw-out of power hoist. Governor for regulating engine speed.

Dimensions and Weights: Overall length 16' 6". Minimum clearance with boom raised 12', with boom digging, 9' 11½". Overall width of machine with 9" or 14" boom — 7' 2", with 18" boom — 8' 5". Width of crawlers on ground 7' 2". Shipping weight 15,000 pounds. Shipping height without stripping machine, 11' 7".



SNOW LOADER

B-G Snow Loader

Loads snow at the rate of 5 cubic yards per minute.

Replaces 50 to 200 men.

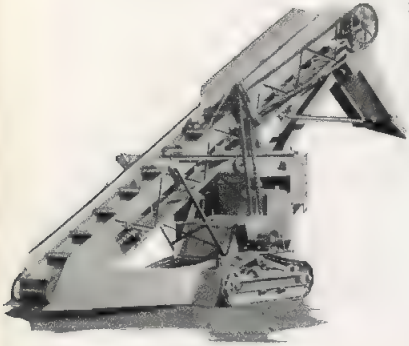
Trailer for side discharge.

B-G Coal Loader

For loading all kinds and sizes of coal. Curved flights 5" deep. Dust screens for certain sizes.

B-G Coal Feeder

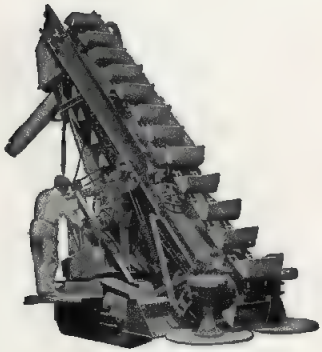
This machine designed for work in a shallow track hopper. Unloads coal or coke at rate of a car an hour.



B-G Box Car Loader

Extended or telescoped by means of a rack and pinion. Telescoped, can be turned around INSIDE a box car. Extended, will pile to end of car.

B-G Box Car Loader, Telescoped



Model 42 Self-feeding Loader

Barber-Greene Self-Feeding Bucket Loader, Model No. 42

Adaptable for loading and batching on city paving or country road work. Loads as readily on the grade from small stock piles as at central stock piles. Can be used for loading scarified subgrade materials, etc., before concreting begins.

—SPECIFICATIONS—

Self-Feeder: Two 36" discs at the foot of the bucket boom rotate toward the center, feeding the buckets. Angle of the discs and height off the ground adjusted easily by operator. Cleaning width 6' 4". Patented.

Transmission: Four speeds. For loading 3' per minute, 60' and 120' per minute for travelling. Reverse 35' per minute. No differential.

Traction: Tread 10" wide and 68" long. One-piece cast steel frame. Tight housing for other moving parts.

Power: Buda 4-cylinder gasoline engine, Model WTU, rated at 28 H. P. Force feed oil lubrication, water pump, removable cylinder head and 3-point suspension.

Clutches: A master clutch multiple dry disc type, with foot lever control controls all movement at the engine. Jaw clutch controls movement of the bucket line. Outside-band clutches control steering. Master clutch enclosed in bell housing at engine, others tightly housed above and below, in frame.

Buckets: Large M. I. buckets 20 x 9 cast with high backs. Spaced every 18", but offset so that they clean a width at the discs of 22".

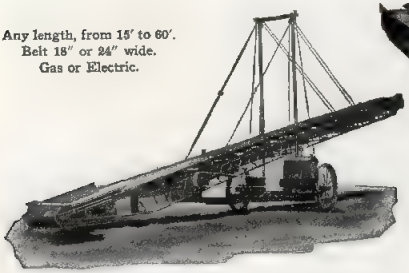
Hopper and Spouts: Swivel spout, strike off hopper, double-compartment hopper, etc., furnished as per specifications. Hoppers have variable capacities up to 28 cubic feet.

Auxiliary Equipment: McCord Radiator, Pierce Governor, Eisemann Magneto, United Air Cleaner, and Zenith Carburetor.

Capacity: 1¾ cubic yards per minute.

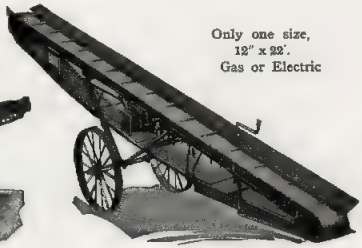
Dimensions: Length, 21' 9"; width, 6' 4". Length of crawlers, 68"; width, 10". Discharge height, 9' 6". Maximum height in working position, 16' 9". Weight, 12,000 pounds.

Any length, from 15′ to 60′.
Belt 18″ or 24″ wide.
Gas or Electric.



B-G Style "N" Conveyor

Only one size,
12″ x 22′.
Gas or Electric



B-G Type "U" Universal Conveyor

Style N. Portable Conveyors with either 18″ or 24″ belt widths are furnished in practically any length up to 60′ to do any material handling job.

Type U conveyors are produced to provide a low-priced conveyor which will replace economically even the small shoveler and wheeler gang.

—SPECIFICATIONS—

Style "N"

Sectional Construction: Standard intermediate sections, Warren truss type, can be inserted any time after the machine is installed. Practically any length of conveyor can be had between 15′ and 60′. Intermediate sections are furnished in multiples of 3′ up to 15′. Butt joint connections of wrought iron castings; no lap joints.

Carriers: Dustproof carriers lubricated by industrial Alemite system. Three-roll troughing carriers. Belt either 18″ or 24″ in width. Rubber covered 4-ply.

Low-Strong Hopper: Style N has a low hopper. For withstanding the abuse of loading, the hopper is made particularly strong.

Convenient Takeup: Long takeup screws with Acme thread make it possible to take up the belt while the hopper end remains under a car. Sliding frame type.

Head-End Drive: Style N is head end drive with the head pulley actually pulling the conveyor belt which carries the load. Yet all the weight of the motor is kept at the tail end. Power is transmitted to the head pulley by means of steel shafting. Either electric motor or gasoline engine can be used. The motor is mounted inside the frame, the engine on the track.

Swivel Wheels: Truck wheels can be set to make it possible to turn the conveyor in a circle about its hopper as a pivot, or about its discharge end in the same way.

Trucks: Various trucks are available for every purpose.

Type "U"

Iron-Clad Belt: Curved cross cleats and continuous side cleats on the type U 12″ belt make a small belt with carrying capacity equal to troughed belts much larger in width. This patented construction prevents belt wear as well as increased capacity.

Open End Hopper: To make it easy to push the Type U hopper end into a pile, the lower end is left exposed. It is also conveniently low. A special plate is provided if it is necessary to cover this end.

High Discharge: Although only 22′ long, Type U has a discharge height of 11′ 9″.

Full Length Skirt Boards: Large lumps carried along by the cupped cleats are prevented from falling by the skirt boards running the full length of the machine. These skirt boards are mounted so that they do not wear the belt.

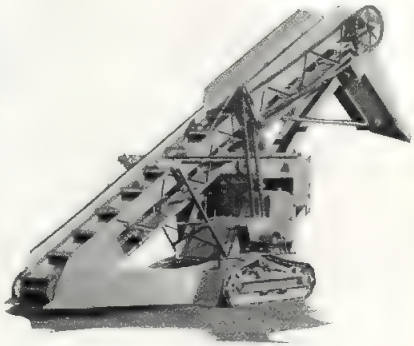
Head End Drive: Head pulley pulls the conveyor belt which carries the load. Both head and tail pulley are steel.

Rugged Frame: A 4″channel frame provides strength with light weight.

Simple Truck: No rods or cables projecting above the belt. Electric motor mounted inside frame, gasoline engine mounted on truck beside frame. Two wheels only on truck in either case.

General Dimensions: Length 22′ only. Width of belt 12″ only. Maximum discharge height 11′ 9″. Minimum discharge 6′ 8″. Approximate shipping weight 2500 pounds.

B-G Flight Loader



B-G Crawler Flight Loader

Self-Propelled

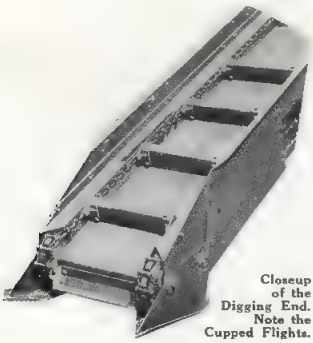
Here are two machines for handling all kinds and sizes of coal, and replacing a whole gang of shovelers.

It doesn't take a gang to move these machines; they are self-propelled.

SPECIFICATIONS

Power: On the Flight Loader, a 2-cylinder 8 HP Le Roi engine or a 7½ HP 1800 RPM electric motor. On the Crawler Flight Loader, a 4-cylinder 15 HP Le Roi engine or a 10 HP electric motor.

Traction: Wheels 42"x6" on a single heavy truck axle. Front end of the machine slides on special adjustable boot at the digging end. Crawlers 10" wide, 4'2" long. Same type of digging end, but heavier.
Transmission: Regular Auto-truck transmissions are used to give three speeds forward and one reverse, no matter whether the machine is powered by gasoline engine or electric motor.



Closeup of the Digging End. Note the Cupped Flights.

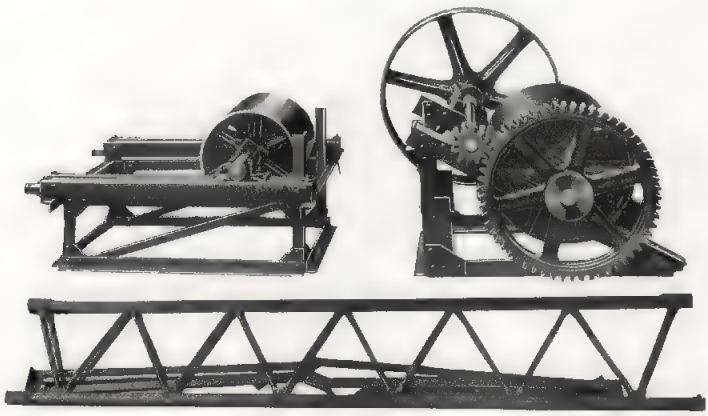
Travelling Speeds: Flight Loader travels in low 35 ft. per min., second 65 ft. per min., high 111 ft. per min., and reverse 29 ft. per min. The Crawler Flight Loader makes 29 ft. per min., second 53 ft. per min, high 100 ft. per min., and reverse 29 ft. per min.

Conveyor: Boom is 23' long, width 23" inside the trough plates, flights are 17" wide and 4¼" high on the Flight Loader. The Crawler machine is heavier, having a width between the trough plates of 2'6", flights 23" wide and 5" high.

General Dimensions:

Flight Loader		Low Discharge Crawler Loader	High Discharge Crawler Loader
Length	25'	23'6"	22'
Min. Height travelling	10'1"	11'8"	12'9"
Max. Disch. Ht. without screen or spout	13'4"	11'10⅛"	13 11¾"
Max. Ht. of Disch. with screen	11'	6'11"	9'

Capacity: Flight Loader ¾ to 1 cu. yd. per min. Crawler Flight Loader 1½ cu. yds.



Barber-Greene Permanent Conveyor

Above are shown standard ends and an intermediate section of a Barber-Greene permanent conveyor. If you wish a longer conveyor than our 60′ portable, and if the conveyor does not have to be moved, the B-G permanent is just the thing.

These ends and enough intermediate sections to bring the conveyor to any length can be shipped from stock.

SPECIFICATIONS

Sectional Construction: Standard intermediate sections, Warren truss type, can be inserted any time after the machine is installed. Sections are furnished in multiples of 3′ up to 15′. Butt joints of wrought iron castings connect the sections; no lap joints.

Carriers: Alemite lubrication. Troughing carriers have three rolls each. Rolls are 4″ in diameter.

Takeup: Acme thread on the takeup screws make it possible to take up belt under all conditions. Located on drive section.

Belt: Either 18″ or 24″ width. See chart for proper thickness to use.

Drive: The drive pulley may be located at either end of the conveyor. Reversing switches of the proper type provided when it is necessary to run the belt in either direction.

Many factors must be considered before the right-sized drive end and motor or engine can be specified. The accompanying chart covers a few conditions.

Power and Belt Data for Permanent Conveyors 50-lb. Material

Capacity, Material Weighing 50 lbs. per Cubic ft. For 18 in. 60 Tons per hr., or 89 Cubic yds. per hr. For 24 in. 112 Tons per hr., or 166 Cubic yds. per hr.

MASTER CLUTCH PULLEYS FOR CRUSO SEPARATORS

Operate by tightening the hand wheel to start and loosening same to stop. Only four parts to the outfit. Can be driven by flat or round belt. In order to arrive at size of connecting pulley for Cruso Separator multiply the diameter of the pulley 14 in. by the speed 60 turns per minute. Divide the product by the speed of the line shaft and the answer is the diameter of the connecting pulley.

Diameter of wheel 14 in., width of face 2¼ in., w't each 15 lbs.,

No. D55—Flat and round belt.....each **$10.00**

IMPROVED DOMO CREAM SEPARATORS

AN UNEXCELLED SKIMMER, PERFECTLY CLEANABLE, POPULAR PRICED

No. 2.

No. THAX.

The small "AX" size, 10x13 in. base and 16 in. tall—for Domestic use only—not more than two cows, has an open solid one-piece bowl convenient to operate and as readily cleaned as a milk bottle. The "AX" size will get more cream than is possible by setting the milk skimming a single cow's milk, 3 to 12 quarts in 10 to 15 minutes. The "AX" size is usually sold without stand, but the solid stand for No. 1 also mounts the "AX".

The Nos. TH10, TH11, TH12 and TH12C are equipped with the most efficient disced bowl, described below. They may be mounted on a table or bench to operate successfully, but must stand solid to skim perfectly and not wiggle or vibrate in operation. Any vibration hinders skimming the same as does shaking or stirring milk on which cream is rising.

Nos. TH10, TH11 and TH12. Without Stand

No. TH13 Domo, 25 in. high and TH14 Domo, 28 in. high are intended for 8 to 18 cows. These sizes should always be mounted on a rigid stand to avoid jarring. Properly mounted, the Domo always runs smoothly and noiselessly.

DOMO'S loose, overhung, self-balancing, small, all pressed steel bowl, with gears running in a constant oil bath and with bronze brushed bearings insures the smoothest, easiest running.

DOMO'S bowl is most simple and compact as made of fewest parts possible to cleanest skimming, is quickly and completely taken apart to clean as perfectly as a china plate and as readily re-assembled, features of the utmost importance in its daily use.

DOMO'S unexcelled skimming which is of first importance, combined with its superior construction, accounts for its most satisfactory service and the success it enjoys.

DOMO'S bowl discs are mixable, but best skimming results from keeping the discs in the same order after it is put into service. It will also skim cool milk, which however, is discouraged as a wasteful practice.

Kept in condition and handled according to DIRECTIONS, DOMO pays for itself in a short time in the extra cream it takes out of the milk, skimming so perfectly that less than 2-100ths of 1% of fat remains in the skimmed milk, an amount imperceptible except by Babcock test.

No. TH12A.

DOMO is most handy in consequence of its compactness and simplicity, yet it has the capacity of larger, heavier separators, and excepting the small "AX" and "BX" sizes, has oil bathed gears as illustrated Fig. 1, and with its small, light, highly efficient, loose overhung self-balancing bowl -Fig. 2—and bronze bushed bearings is easiest running.

No. THAX—Domo—Capacity 90 lbs. or 9 gals, per hour, w't boxed 35 lbs., without stand, each $30.00

No. TH10—Domo—Capacity 180 lbs. or 18 gals. per hour, w't boxed 50 lbs., without stand, each $47.50

No. TH11—Domo—Capacity 220 lbs. or 22 gals. per hour, w't boxed 55 lbs., without stand, each $55.00

No. TH12—Domo—Capacity 300 lbs. or 30 gals. per hour, w't boxed 70 lbs., without stand, each $60.00

No. TH12A—Domo—Capacity 300 lbs. or 30 gals. per hour, supply tank on bracket like model TH13, w't boxed 75 lbs., without stand ..... each $65.00

No. TH13—Domo—Capacity 450 lbs. or 45 gals. per hour, w't boxed 112 lbs., without stand, with tank bracket ..... each $90.00

No. TH13S—Domo—Boxed with loose stand, w't 167 lbs. ..... each $95.50

No. TH13 With Stand.

EXTRA STANDS

No. TH1—For Nos. THAX, TH10 and TH11 Domos, w't each 45 lbs., loose, extra ... each $7.50

No. TH2—For Nos. TH12 and TH12A Domos, w't each 50 lbs., loose, extra ..... each $7.50

For list of separate parts and details of operation, see DOMO DIRECTIONS with every separator.

No. TH3—For TH13 Domo, w't each 55 lbs., loose, extra ..... each $8.00

ASK FOR DOMO PRINTED MATTER FOR DISTRIBUTION

For Domo Repairs see Pages 1040 and 1041.

IMPORTANT

Every DOMO, when carefully set up so it runs smooth will skim perfectly if operated according to DIRECTIONS, kept in nice running condition and the bowl kept bright and sweet.

See description of DOMO'S details in DIRECTIONS packed with every separator.

Always URGE the purchase of a separator somewhat larger than is needed, as a larger size skims small lots of milk equally clean or when required, the milk of more cows, or the increased quantity of milk when cows are fresh.

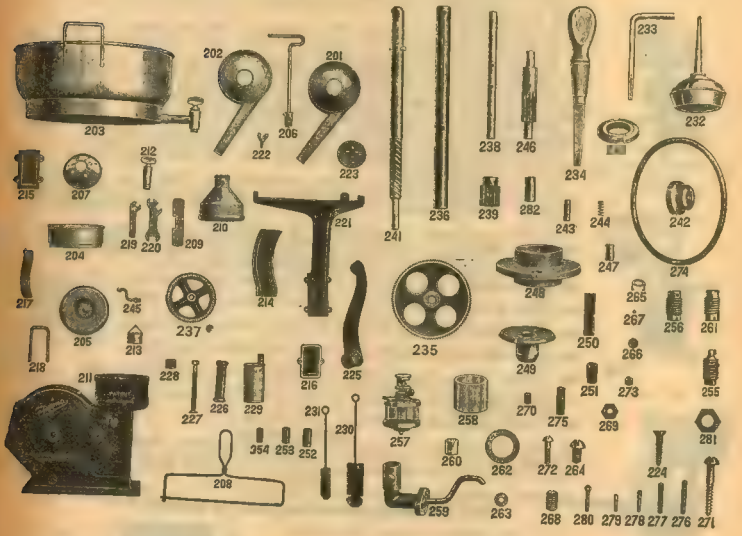
No TH1.

ILLUSTRATIONS OF REPAIRS FOR DOMO SEPARATORS

Nos. 10, 11, 12, 13, 14, 23, 24, 25, AX and BX.

In ordering always specify the number and name of the part and the size of the separator.

Thus: 1 — No. 274 Ring for No. 12 DOMO



FOR LOW MODEL EXCLUSIVELY

SIMPLEX DILUTION CREAM SEPARATORS

TH1206
With Three Wood Legs.

Nos. TH204 to TH212.

Place on bench or shelf extended over edge high enough for pail to go under.

Single can, dilution type, XXXX bright tin, concave bottom slanting to outlet to drain completely, concealed straightway faucet readily cleaned and cannot be knocked off, two gauges, reversible combinaiton ventilation cover and strainer, strainer removable.

Directions—Set in cool place, pour fresh milk through reversed cover, add like amount of cold water or ice. In cold weather less water answers. When separation is complete (after two or three hours) first draw skim milk, then the cream, after which scald and sun-sweeten for next milk

Nature's way, with only pure water added.
(Actual capacity is double milk capacity shown.)

WITH LEGS

No. TH1206—Milk capacity 5½ gal., size 15x20 in., w't crated 20 lbs. ..... each **$8.00**

ONE IN A FIBRE SHIPPING CASE

WITHOUT LEGS

Nos.	TH204	TH206	TH208	TH210	TH212
Milk cap., gal.	4	5½	7½	9½	11
Sizes, in.	15x15	15x20	15x23	15x27	15x30
W't crated, lbs.	15	16	16½	18½	24
Each	$7.00	7.70	8.20	8.50	9.30

ONE IN A FIBRE CARTON

TANK CREAM SEPARATORS

Galvanized steel outer water tank, heavy bright tin removable milk can painted water side slanting bottom draining completely. Reversible combination cover and strainer, the cone strainer removable.

Nos.	TH6	TH8	TH9
Milk cap., gal.	6	8	11
W't crated, lbs.	28	31	35
Each	$10.50	12.50	13.50

ONE IN A FIBRE CARTON

MARVEL DILUTION CREAM SEPARATOR

Marvel Dilution Cream Separator, (milk cap. one half), heavy tin tank, japanned outside; packed complete with reversible ventilating cover and three legs in fibre case.

Nos.	TH201	TH202	TH203
Cap., gal.	10	14	18
Diam., in.	12½	14½	17
Height tank, in.	19	19	17
Shipping w't, lbs.	13	15	18
Each	$6.50	7.50	8.70

MILK COOLERS

Fill inner receptacle with cold water and ice when available or use with running water by attaching hose to cooler. Will cool milk quickly for shipping.

Bright, Heavy Tin.

No. TH22—18 qt. milk tank, 1 to 25 cows, accommodating 3 milkers, diam. base 23 in., height 25 in., w't crtd. 30 lbs., each **$11.50**

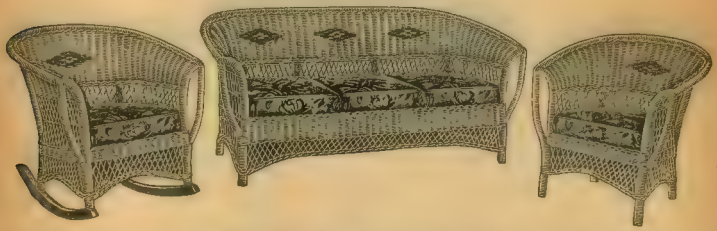
No. TH33—34 qt., 25 to 50 cows, 5 milkers, diam. of base 26 in., height 26 in., w't crtd. 37½ lbs., each **$13.50**

No. TH44—50 qt., 50 to 100 cows, 8 milkers, diam. of base 29 in., height 26 in., w't crtd. 40 lbs. ..... each **$16.50**

ONE IN A CRATE

HIGH GRADE FIBRE SUITES

Manufactured with unusual care and skill. The many features of strength insure long and satisfactory service. Designs are strikingly beautiful and the finish as smooth as glass. May be had in Baronial Brown, Blue and Gold, Fawn Blue, Orangetone or any two-tone colors. Covered in Cretonne or Tapestry. For other covering and striped or decorated finishes, write for prices.



COMPLETE SUITE ONLY. Settee, Rocker and Chair. Woven Open—Woven Back. Seat of Settee 23½×60 in. Back 21 in. high. Seat of Rocker or Chair 19½×19½ in. Back 21 in. high. W't per suite 210 lbs.

GENUINE HOHNER HARMONICAS

HOHNER'S CHROMATIC is the last word in the development of the mouth-organ. It is a very important invention as it releases the Harmonica from the field of melodies written in the major scales into the realm of musical masterpieces by the world's greatest composers.

This remarkable instrument has been used in some of the largest theaters in the country with great success. The Hohner Chromatic harmonica by a slight manipulation of a lever, provides a sharp or flat of unfailing accuracy. This important feature places the Hohner Chromatic Harmanica on a par with the leading instruments.

It is simple in its construction and manipulation. No knowledge of music or notes is is required to perform on it.

The Chromatic Harmonica consists of two scales, "C" and "C#" Supplies all the missing half tones not found on the regular type harmonica.

No. C260—Hohner's Chromatic, length 4¾ in., 10 holes, 40 perfectly tuned reeds, brass plates, heavy convex nickel plated covers, fitted with patented wind-saving device and slide permitting player to obtain the half notes instantaneously; each instrument in a fine wooden box with imitation black leather covering,
per dozen **$42.00**

GENUINE HOHNER HARMONICAS

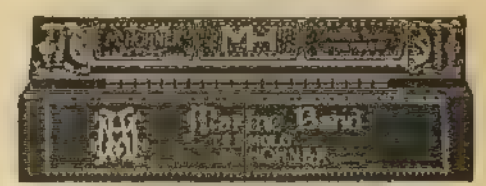
HOHNER'S CHROMATIC is the last word in the development of the mouth-organ. It is a very important invention as it releases the Harmonica from the field of melodies written in the major scales into the realm of musical masterpieces by the world's greatest composers.

This remarkable instrument has been used in some of the largest theaters in the country with great success. The Hohner Chromatic harmonica by a slight manipulation of a lever, provides a sharp or flat of unfailing accuracy. This important feature places the Hohner Chromatic Harmanica on a par with the leading instruments.

It is simple in its construction and manipulation. No knowledge of music or notes is is required to perform on it.

The Chromatic Harmonica consists of two scales, "C" and "C#" Supplies all the missing half tones not found on the regular type harmonica.

No. C260—Hohner's Chromatic, length 4¾ in., 10 holes, 40 perfectly tuned reeds, brass plates, heavy convex nickel plated covers, fitted with patented wind-saving device and slide permitting player to obtain the half notes instantaneously; each instrument in a fine wooden box with imitation black leather covering,
per dozen **$42.00**



No. C152—Marine Band Tremolo, length 7¾ in., 20 double holes, 40 reeds, brass plates, fancy nickel plated covers, mahogany frames, extension ends with handsome gold decorations. Each instrument packed in a heavy telescope box, handsomely decorated with gold lettering.
per dozen **$15.00**

No. C146—Marine Band Tremolo, double sided harmonica in 2 keys, length 7¼ in., 32 double holes, 64 reeds, brass plates, fancy nickel plated covers, mahogany frame, extension ends with handsome gold decorations. Each instrument is packed in a heavy telescope box, handsomely decorated with gold lettering,

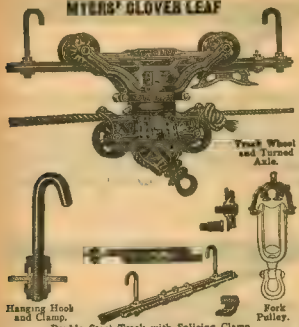
HAY CARRIERS

MYERS' CLOVER LEAF



Double Steel Track with Splicing Clamp.

This combination machine (both swivel and reversable) can be reversed by drawing the rope through from end to end or by turning the swivel.

It is constructed with flanged wheels revolving on ⅞ in. turned steel bearings. The lock is composed of three parts and has no springs. The carrier has a large, flaring mouth to receive the fork pulley. The pulley can swing backward or forward without becoming detached. This swinging fork pulley is a decided advantage when used for filling a mow above beams, as it relieves all side strain from car.

No. NM114—Hay Carriers, for double steel track, malleable iron, aluminum finish, ¾ in. turned steel axles, swivel and reversible, possible force lock, no springs, w't 27 lbs. ..... each $14.35

No. NM644—Double Steel Track, with splicing clamps, lengths 6 and 12 ft., w't per foot 2 lbs., per foot $0.35

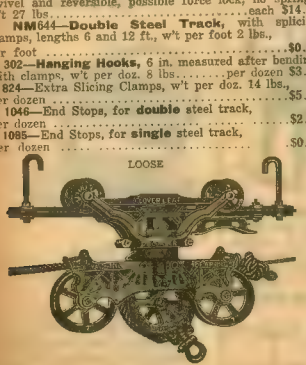
No. 302—Hanging Hooks, 6 in. measured after bending, with clamps, w't per doz. 8 lbs. ..... per dozen $3.00

No. 824—Extra Slicing Clamps, w't per doz. 14 lbs., per dozen $5.05

No. 1046—End Stops, for double steel track, per dozen $2.10

No. 1085—End Stops, for single steel track, per dozen $0.85

LOOSE



No. NM124—7 in. sheaves, with 1⅞ in. steel bearings with groove suitable for carrying wire cable or ¾ in. Manila or Sisal draft rope, w't 37 lbs., otherwise same as No. 114, each $17.50

No. NM4—Hay Carriers, for double angle steel track, malleable iron, painted red with two coats of baking enamel, turned iron bushings, swivel and reversible, open bell for fork or sling, w't 24 lbs. ..... each $11.00

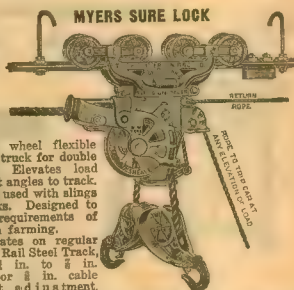
No. AM20—Steel track, lengths of 6 and 12 ft., w't per foot 2 lbs. ..... each $0.30

No. 25—Hanging hooks, 5½ in., w't per doz. 4½ lbs., per dozen $2.50

No. 45—Steel rafter brackets, w't per doz. 24 lbs. ..... per dozen $1.00

LOOSE

MYERS SURE LOCK



Four wheel flexible engine truck for double track. Elevates load at right angles to track. Can be used with slings or forks. Designed to meet requirements of modern farming.

Operates on regular Double Rail Steel Track, uses ⅝ in. to ¾ in. rope, or ⅝ in. cable without adjustment. Load is elevated at right angles to track and when discharged into the mow it lays parallel with the load on the wagon requiring less labor in distributing hay over mow. Operates automatically, tripped by sling pulleys striking plate immediately under machine; also arranged with separate trip rope which allows load to be carried into mow at any elevation desired.

Construction—A long heavy wheel-base truck, with four large track wheels mounted on turned steel axles. Rope wheel 7 in. diam., fitted with 1 7/16 in. machined steel bearing. Rope lock arranged so that pressure on rope is proportional to weight of load, by which it is controlled. Rope lock so powerful that smooth faced rope jaws only are necessary, eliminating all wear on rope.

No. NM30—Myers Sure Lock sling unloader, rope draft for double steel track ..... each $28.00

Peter Pan Trio
STYLE N*

NAMED after the wife* of a famous millionaire—for whom we created this style—this necklace is without question the most exquisite design ever shown in pearls. Tiny pearls which only Deltah can make, graduating to larger sizes toward the centers—with the superb sheen and perfection assembled with infinite care into a three strand necklace beautiful beyond words. With Cabochon Pearl clasp of Sterling Silver in handsome gift case as shown at right.

*Design patented U. S. Patent Office. Substitutions and imitations are not only violative of this Style N Trio design but are dangerous because they deceive the public from its source and thereby imitations and substitutions never can be as good.

DELTAH PEARLS
The World's Most Beautiful Necklaces

Deltahs *ARE* The World's Most Beautiful Pearls

AND rightly you expect this. L. Heller & Son, largest concern in the pearl making industry, is universally recognized as world leader in pearl fabrication. Three groups of laboratories—at Geneva, Switzerland, Paris, France and New York—produce these exquisite "Heller"-made Pearls whose beauty defies description. To appreciate them you must actually see them—"The Pearls which make Beautiful Women more Beautiful."

They *ADD* to Your Charm—You Need Several Strands For Your Different Costumes

No jewels add such charm to your person—such sparkle to eyes or softness to skin—as lovely pearls. No gems are as flattering to woman's innate charm. But—for the same reason you have several hats or several pairs of shoes—you will want different strands of pearls to match your different costumes. In the following 8 pages we present the newest and most beautiful fashions in pearls.

For Additional Deltahs See Following Pages

Perfect Reproductions of Genuine Orientals—

WORTH from $5,000 to $25,000—such are the necklaces shown on this page. They are the very finest Pearl reproductions science can make. Only Heller can offer such surpassing quality at such moderate prices. If you would make a lifetime gift, then choose a necklace of these soft shimmering Pearls.

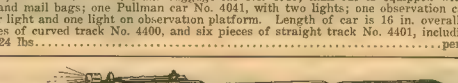
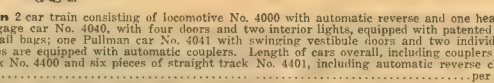
ELECTRIC TRAINS

For General Description See Page 2213

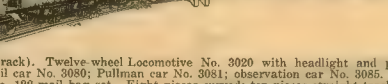
No. C1433—Maroon 3-car train, consisting of locomotive No. 4019, with two headlights which reverse automatically as locomotive reverses; combination mail car and baggage car No. 4040; mail car is equipped with patented automatic mail bag catcher and mail bags; one Pullman car No. 4041, with two lights; one observation car No. 4042 with two lights; one interior light and one light on observation platform. Length of car is 16 in. overall. Length of body is 14¼ in., eight pieces of curved track No. 4400, and six pieces of straight track No. 4401, including automatic reverse clips, w't per set 24 lbs. ..... per dozen sets **$494.00**



No. C1432—Green 2 car train consisting of locomotive No. 4000 with automatic reverse and one headlight; combination mail and baggage car No. 4040, with four doors and two interior lights, equipped with patented automatic mail bag catcher and mail bags; one Pullman car No. 4041 with swinging vestibule doors and two individual lights; all cars and locomotives are equipped with automatic couplers. Length of cars overall, including couplers 16 in.; eight pieces of curved track No. 4400 and six pieces of straight track No. 4401, including automatic reverse clips, w't per set 20 lbs. ..... per dozen sets **$380.00**



No. C1307—(No. 0 Gauge Track). Twelve-wheel Locomotive No. 3020 with headlight and patented automatic reverse, length 12¾ in.; U. S. mail car No. 3080; Pullman car No. 3081; observation car No. 3085. Length of cars 9¼ in. All cars electric lighted. No. 122 mail bag set. Eight pieces curved; ten pieces straight track. Train complete including track terminal connection, track binding clips and reverse track unit. Length of train 48 in. Length of track 182 in. W't per set 12 lbs. ..... per dozen sets **$319.20**



No. C1305—(No. 0 Gauge Track). Twelve-wheel Locomotive No. 3020 with headlight and patented automatic reverse, length 12¾ in.; U. S. mail car with double sliding doors. Pullman car. Both cars have interior electric lights. Length of cars 9¼ in. No. 122 mail bag set. Eight pieces curved; four pieces straight track. Train complete including track terminal connection, track binding clips and reverse track unit. Length of train 36¾ in. Length of track 122 in. W't per set 10¼ lbs. ..... per dozen sets **$273.60**

ALL ABOVE, ONE SET IN A STRONG LITHOGRAPHED BOX

"Made in America" American Flyer "The Train with the Guarantee" Registered U.S. Patent Office

MECHANICAL TRAINS

The engines are of latest design made of highest quality cast iron and are beautifully decorated.

The cars are made of heavy sheet metal, beautifully lithographed in various colors. The cars are made up of baggage, passenger, various freight cars and caboose.

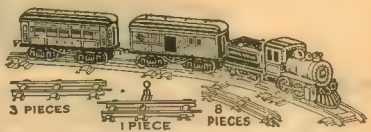
The tracks are made of heavy tin. Each section of track is 10½ in. long.

No. C0—Cast iron, speed governed engine 6¼ in. Tender 3¾ in. Car 5¾ in. Eight pieces curved track. Length of track 82 in. Length of train 16¾ in. W't per outfit 3 lbs. .....per dozen outfits $28.50

No. C1—Cast iron, speed governed engine 6¼ in. Tender 3½ in. Largest size single truck car 6¼ in. Eight pieces curved, two pieces straight track. Length of track 103 in. Length of train 18¾ in. W't per outfit 3¾ lbs., per dozen outfits.....$34.20

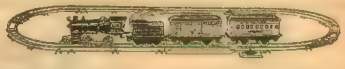
No. C2—Engine 6¼ in. Tender 4 in. Cars 5¾ in. Baggage car has sliding doors. Eight pieces curved, two pieces straight track. Length of track 103 in. Length of train 24¾ in. W't per outfit 4 lbs., per dozen outfits.....$39.20

No. C5—Train consists of locomotive No. 13 equipped with piston rod and brakes—length 7 in. Tender 4 in. Cars 5¾ in. Baggage car has sliding doors. Fourteen pieces curved track and cross over form figure 8. Length of track 160 in. Length of train 25 in. W't per outfit 4¾ lbs. .....per dozen outfits $53.20



No. C15—Train consists of largest type locomotive No. 15, speed governed with piston rods, brake and automatic brake stop; length 7½ in. Tender No. 120 with imitation coal. Baggage car No. 1105 with sliding doors and one passenger car No. 1106. Cars are the largest type and are equipped with swivel double truck and disappearing couplers. Six pieces of curved and six pieces of straight track including one piece with automatic brake stop. This makes it possible to stop the train on signal without touching the train itself. Length of track 145 in. Length of train 35 in. W't per outfit 5¼ lbs., per dozen outfits.....$76.00

No. C3—Train consists of speed governed locomotive No. 2 equipped with piston rods and brake, tender No. 120, baggage car No. 1108A with sliding doors, two passenger cars No. 1107. Eight pieces of curved and four pieces of straight track form oval 123 in. in circumference. Length of train 31 in. W't per outfit 4½ lbs., per dozen outfits.....$46.80



No. C13—Train consists of locomotive No. 13 equipped with piston rod and brakes—length 7 in. Tender 4 in. Cars 5¾ in. Baggage car has sliding doors. Ten pieces curved, two pieces straight track, two switches form oval and circle. Length of track 160 in. Length of train 25 in. Train can be switched from large oval to small oval by opening or closing both switches. W't per outfit 5 lbs.....per dozen outfits $59.80

EACH OUTFIT PACKED IN INDIVIDUAL CARTON BEAUTIFULLY LABELED.

HUMMER TRAINS

Built to meet the demand for popular priced American trains. Constructed by the same skilled workmen who make the "American Flyer" Trains.

Engines are formed from heavy sheet steel, black enameled and latest designs. Clockworks have strong steel spring which pulls "The Hummer" at a great speed.

Cars are made all in one piece which makes them very strong. Hummer engines are not covered by 6 months' guarantee.

No. G73—Steel engine, length 6¾ in. Tender 3¾ in. Car 4¾ in. Four pieces of track, length 60 in. W't per outfit 1¾ lbs. ..... per dozen outfits $16.50

ONE IN A CARTON

No. G74—Steel engine, 6¾ in. Tender 3¾ in. Cars 4¾ in. Four pieces of curved track, two pieces straight. Length of track 80 in. Length of train 19¾ in. W't per outfit 2 lbs. ..... per dozen outfits $19.70

ELECTRIC TRAINS

FOR GENERAL DESCRIPTION SEE PAGE 2213.

No. C1228—(No. 0 Gauge Track). A complete outfit with 8-in. heavy pressed steel electric locomotive with headlight, and 6½ in. double truck cars with disappearing couplers. Baggage car has sliding doors. Passenger car and observation car have interior electric lights. Complete as shown including No. 2011 Semaphore, No. 96 Intermediate Station 9½ in., No. 83 Tunnel 14 in., No. 2009 Arc Light, No. 122 Mail Bag Set. Sixteen pieces curved track, four pieces straight track, two switches, one crossover, track terminal connection and track binding clips. Length of train 31 in. Length of track 265 in. W't per set 14⅔ lbs.....per dozen sets **$278.70**

No. C1220—Heavy pressed steel engine with headlight, 8 in. Double truck cars with disappearing couplers, 6½ in. Baggage car has sliding doors. Passenger car and observation car have interior electric lights. No. 122 Mail Bag Set. Eight pieces curved, 4 pieces straight track. Train complete including track terminal connection and track binding clips. Length of train 31 in. Length of track 122 in. W't per set 7½ lbs.....per dozen sets **$152.00**

ALL ABOVE, ONE SET IN A STRONG LITHOGRAPHED BOX

TRANSFORMERS

For use with alternating current only, 110 volt, 60 cycle primary. Transformers are positively air cooled; do not have any pitch or tar to run out and burn the child when there is a "short."

No. C1249—Capacity 50 watts, secondary voltage from 5½ to 8½ volts in ½ volt steps . . .per dozen **$50.60**

No. C1250—Capacity 75 watts, secondary voltage from 5½ to 14 volts in ½ volt steps....per dozen **$58.20**

No. C1261—Capacity 100 watts, for use with No. C1432 and No. C1433 wide gauge trains, secondary voltage from 8 to 20½ volts in ½ volt steps.....per dozen **$83.60**

Made in America
"American Flyer"
The Train with the Guarantee — Registered U.S. Patent Office

ELECTRIC TRAINS

Made by the same careful workmen that have made our mechanical trains so famously popular. Engines are modeled from the latest type New York Central electric locomotives and are by far the best miniature electric locomotives on the market.

These trains can be run on 3 or 4 dry cells, or by connecting up a transformer to your electric light socket, if, it is, 110-volt, 60 cycle alternating current. Be sure to read the instructions very closely before trying to operate these trains.

"No rheostats furnished with trains. They are not needed with American Flyer 1925 transformers."

No. C1102—Electric Type Locomotive No. 1096 with headlight, length 6⅞ in. Two No. 1120 Pullman Cars, length 5¾ in. each. Length of train 21 in. Eight pieces of track including track terminal and track binding clips. Length of track 82 in. W't per set 4¾ lbs., per dozen sets $88.70

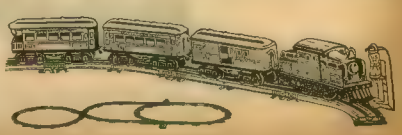
No. C1202—Heavy pressed steel engine with headlight, length 8 in. Largest single truck cars, 6¾ in. Baggage Car has sliding doors. Eight pieces curved; 2 pieces straight track. Train complete including terminal connection and track binding clips. Length of train 24 in. Length of track 102 in. W't per set 5¼ lbs. ..... per dozen sets $106.40

No. C1217—Heavy pressed steel engine with headlight, 8 in. Baggage car with sliding doors. Passenger car and observation car. Double truck cars with disappearing couplers, length 6¾ in. Eight pieces curved; four pieces straight track. Train complete including track terminal connection and track binding clips. Length of train 31 in.

Length of track 122 in. W't per set 7¼ lbs. ..... per dozen sets $136.80

No. C1221—(No. 0 Gauge Track). Heavy pressed steel engine with headlight, 8 in. Baggage car has sliding doors. Passenger car and observation car have interior electric lights. Complete as shown, including automatic mail bag catcher. Double truck cars with disappearing couplers, 6¾ in. Eight pieces curved, six pieces straight track. Length of train 31 in. Length of track 142 in. W't per set 10¼ lbs., per dozen sets $182.40

No. C1227—(No. 0 Gauge Track). Train complete including track terminal connection and track binding clips. Heavy pressed steel engine with headlight, 8 in. Double truck cars with disappearing couplers, 6¾ in. Baggage car has sliding doors. Passenger car and observation car have interior electric lights. No. 122 Mail Bag Set. Length of train 31 in. Length of track 245 in. W't per set 10¾ lbs. ..... per dozen sets $202.70



ALL ABOVE, ONE SET IN A STRONG LITHOGRAPHED BOX

OIL TANK CAR

No. C1118—Double Truck for No. 0 gauge track, per dozen $15.20

CAR ASSORTMENTS

No. C11—Consists of six cars, Nos. 1107, 1108, 1109, 1110, 1111 and 1119 for No. 0 gauge track, per assortment $2.80

DANGER SIGNALS

No. C206.

No. C206 — Beautifully decorated, green, white, blue and black, made of heavy pressed steel, for No. 0 gauge track, height 7 in., w't per doz. 3 lbs....per doz. $3.80

No. C2016—Electric Lighted Automatic Danger Signal Bell with Track Terminal and Special Track, for No. 0 gauge track. Height 9½ in. .....per doz. $53.20

No. C2016.

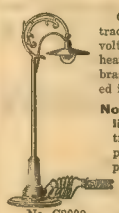
TRACK TERMINALS

No. C412—For No. 0 gauge track.....per dozen $3.80

SEMAPHORES

No. C2011—Mechanical Semaphore, single arm; height 9½ in.....per dozen $11.10

ARC LIGHTS



No. C2009.

Complete with wire, track connections and 10 volt frosted bulb, made of heavy cast iron and cast brass, beautifully enameled in green.

No. C2009 — Single light, for No. 0 gauge track, height 11 in., w't per doz. 12 lbs., per dozen $30.40

No. C2020.

WATER TANK

No. C2020—Height 9½ in.....per dozen $15.20

ELECTRIC LIGHT BULBS

No. C432—6 volt, for use on cars semaphores, etc. .....per dozen $4.50
No. C433—10 volt, for use on arc lights, per dozen $6.80

SIGNAL AND LIGHT

No. C2017.

No. C2017—Enameled green and black, red signal light, complete with track and terminal for No. 0 gauge track, height 9½ in., w't per doz. 3 lbs., per dozen $30.40

TELEGRAPH POLES

Made of drawn steel tubing, beautifully enameled.

No. C209—Single arm, height 6½ in., w't doz. 3 lbs., per dozen $3.80

No. C210—Double arm, height 10½ in., w't per doz. 5 lbs.....per dozen $7.60

No. C209.

HUMMER TRAINS

Built to meet the demand for popular priced American trains. Constructed by the same skilled workmen who make the "American Flyer" Trains.

Engines are formed from heavy sheet steel, black enameled and latest designs. Clockworks have strong steel spring which pulls "The Hummer" at a great speed.

Cars are made all in one piece which makes them very strong. Hummer engines are not covered by 6 months' guarantee.

No. G73—Steel engine, length 6¾ in. Tender 3¾ in. Car 4¾ in. Four pieces of track, length 60 in. W't per outfit 1¾ lbs. ..... per dozen outfits $16.50

Congress and pen blades

Per Dozen

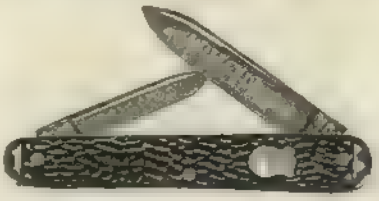
No. 3507—Stag Handle ... **$18 00**
No. 2412—Green Celluloid Handle. 18 00

Striped Celluloid Handle; length closed 3¼ inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade.

Per Dozen

No. 2410—Spear and pen blades... **$18 00**



Stag Handle; length closed 3¼ inches; nickel silver bolsters and shield, half crocus polished large blade

Per Dozen

No. 5002ST—Spear and pen blades..**$17 00**

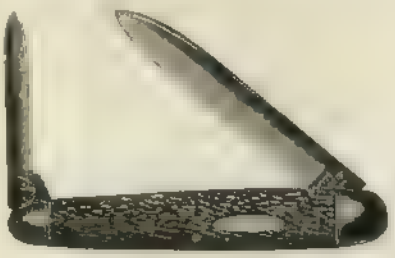
No. 2403

Length closed 3⅜ inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade

Clip and pen blades

Per Dozen

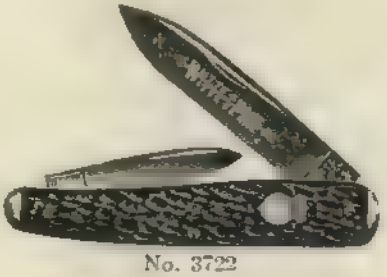
No. 2403—Stag Handle..... **$17 00**
No. 2413—Green Celluloid Handle. 18 00



Stag Handle; length closed 3⅛ inches, nickel silver bolsters and shield, brass lining, half crocus polished large blade.

Per Dozen

No. 3506—Spear and pen blades **$17 00**



No. 3722

Length closed 3¼ inches; nickel silver bolsters and shield; brass lining, half crocus polished large blade; spear and pen blade.

Per Dozen

No. 3722—Stag Handle..... **$18 00**
No. 3732—White Celluloid Handle 18 00
No. 3742—Tortoise Shell, Celluloid Handle 18 00

Length closed 3¼ inches; nickel silver tips, nickel silver shield; brass lining; half crocus polished large blade

Spear and pen blades

Per Dozen

No. 5002SP—**Smoked Pearl Celluloid Handle**..... **$17 00**
No. 5002W—White Celluloid Handle **17 00**

Length closed 3¼ inches, nickel silver tips and shield; brass lining; half crocus polished large blade

Spear and pen blades

Per Dozen

No. 2402—Smoked Pearl Celluloid Handle **$18 00**
No. 2401—Black Celluloid Handle. 18 00

White Celluloid Handle; length closed 3¼ inches, brass lining, half crocus polished large blade.

Per Dozen

No. 3018—Spear and eraser blades...**$16 00**

Stag Handle; length closed 3 inches, nickel silver tips and shield; brass lining, full crocus polished blades.

Per Dozen

No. 3442—One spear; two pen and one nail file blades **$27 00**

Stag Handle, length closed 3¼ inches, nickel silver bolsters and shield; brass lining; half crocus polished large blade

Per Dozen

No. 3532—Spear, pen and nail file blades **$27 00**

All above half dozen in a box; weight per dozen from 1 to 2 lbs.

WITTE'S PRIDE POCKET KNIVES

Highest grade crucible steel blades, carefully tempered and ground to a perfect edge, sharpened and honed ready for use. Every knife thoroughly inspected and tested before leaving factory. Fully guaranteed.

Pearl Handle, length closed 2⅝ inches, nickel silver tips, brass lining; full crocus polished blades.

Per Dozen

No. 7034P—Spear and pen blades.. **$16 00**

Pearl Handle; length closed 2¼ inches, nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

No. 5115P Spear and pen blades....**$18 00**

Pearl Handle; length closed 2½ inches; nickel silver bolsters and shackle; brass lining; full crocus polished large blade.

Per Dozen

No. 5041½P—Spear and pen blades **$18 00**

Pearl Handle; length closed 3 inches; nickel silver bolsters; brass lining; half crocus polished large blade

Per Dozen

No. 7188P –Congress and pen blades **$24 00**

Pearl Handle; length closed 2⅞ inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade.

Per Dozen

No. 5061 –Spear and pen blades .. **$27 00**

Pearl Handle; length closed 3¼ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

No. 5060—Spear and pen blades **$27 00**

Pearl Handle; length closed 3 ¼ inches nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

No. 5057P—Spear and pen blades **$30 00**

Pearl Handle; length closed 3⅜ inches; brass lining; half crocus polished large blade

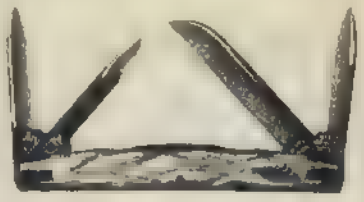
Per Dozen

No. 1261P –Spear and pen blades .. **$32 00**

Pearl Handle; length closed 3¼ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

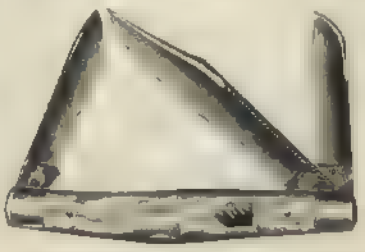
No. 7915P –One spear, two pen and one nail file blade.... **$36 00**



Pearl Handle; length closed 3¼ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

No. 7922P—One congress, two pen and one nail file blade... **$36 00**



Pearl Handle; length closed 3¼ inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade.

Per Dozen

No. 73500P—One clip, one sheep foot, and one speying blade.....**$44 00**

Pearl Handle; length closed 3¾ inches, nickel silver bolsters; brass lining, half crocus polished large blade

Per Dozen

No. 2230P—Physicians spear and pen blades **$44 00**

Pearl Handle; length closed 3 inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade

Per Dozen

No. 497P One spear, one pen and one pair scissors **$45 00**

Pearl Handle; length closed 3⅜ inches; nickel silver tips; brass lining; half crocus polished large blade

Per Dozen

No. 3580P –One spear and two pen blades **$48 00**

Pearl Handle; length closed 3½ inches; nickel silver tips and shield; brass lining; half crocus polished large blade.

Per Dozen

No. 7010P—One large, two small pens and one nail file blade..... **$56 00**

Pearl Handle; length closed 3½ inches; nickel silver bolsters and shield; brass lining; half crocus polished large blade.

Per Dozen

No. 7538P—One spear, one sheep foot and one pen blade **$48 00**

All above half dozen in a box; weight per dozen from 1 to 2½ lbs.

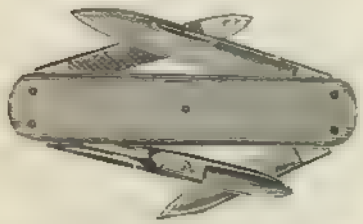
WITTE'S PRIDE POCKET KNIVES

Highest grade crucible steel blades, carefully tempered and ground to a perfect edge, sharpened and honed ready for use. Every knife thoroughly inspected and tested before leaving factory Fully guaranteed

Pearl Handle; length closed 3 inches, nickel silver lining; full crocus polished blades.

Per Dozen

No. 6052P One spear, one pen and one nail file blade.. . . . . **$60 00**



White Grained Celluloid Handle; length closed 3½ inches; brass lining; full crocus polished blades.

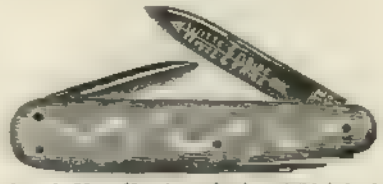
Per Dozen

No. 368W —One spear, one pen, one nail file blade, and one pair scissors **$36 00**

Pearl Handle; length closed 2 7/8 inches, nickel silver bolsters; brass lining, full crocus polished blades.

Per Dozen

No. 7456P—One spear, one pen and one nail file blade. **$40 00**



Pearl Handle; length closed 3¼ inches, nickel silver lining; full crocus polished blades

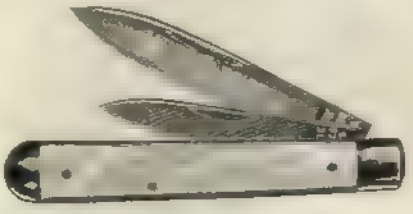
Per Dozen

No. 7052P—One spear, one pen and one nail file blade **$60 00**

Pearl Hand e; length closed 2½ inches; nickel silver bolsters and shackle; brass lining; half crocus polished blades

Per Dozen

No. 7592½P—One spear, one nail file blade and one pair scissors **$36 00**



Pearl Handle; length closed 2 ¼ inches; nickel silver bolster and [illegible] half crocus polished blades; brass lining.

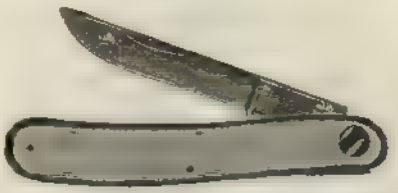
Per Dozen

No. 6024P—Large spear and pen blades **$24 00**

White Grained Celluloid Handle; length closed 4⅜ inches; brass lining; half crocus polished blade.

Per Dozen

No. 1508—Budding knife blade. **$14 00**



White Grained Celluloid Handle; length closed 3⅜ inches; brass lining; full crocus polished blade.

Per Dozen

No. 146W—Corn knife blade **$12 00**

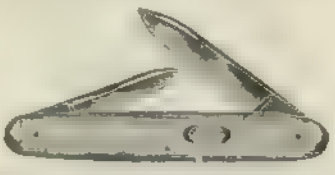
FLYLOCK POCKET KNIVES

Automatically opens and locks in one operation, by pressing and drawing the button

Rosewood Celluloid Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

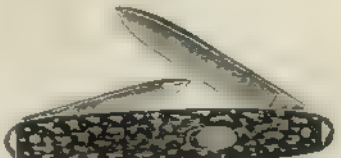
No. 1201 One spear and one pen blade.. . . . . **$26 00**



White Celluloid Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

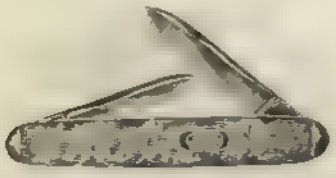
No. 1203—One spear and one pen blade **$26 00**



Stag Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade

Per Dozen

No. 1206—One spear and one pen blade **$26 00**



Tortoise Shell Celluloid Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade

Per Dozen

No. 1202—One spear and one pen blade. **$26 00**

Gold Celluloid Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

Per Dozen

No. 1204—One spear and one pen blade. **$26 00**

Smoked Pearl Celluloid Handle; length closed 3½ inches; nickel silver bolsters; brass lining; half crocus polished large blade.

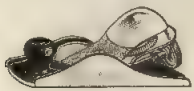
Per Dozen

No. 1208—One spear and one pen blade. **$26.00**

All above half dozen in a box; weight per dozen from 1½ to 2½ lbs.

ADJUSTABLE IRON PLANES

STANLEY RABBET AND BLOCK



With Detachable Side

Rosewood Knob with Detachable Side, Nickel Plated Trimmings

Each

No. 140—7 in. Long, 1¾ in. Cutter, Weight Each 1½ Lbs. $3.00

The detachable side will easily change this tool from a Block Plane to a Rabbet Plane or vice versa. The cutter is set on a skew and is adjustable endwise.

STANLEY LOW ANGLE

For Heavy Work Across the Grain

Japanned Iron Frame, Rosewood Handle and Knob, Adjustable Throat. The Cutter is Adjustable and Set at an Angle of 12 Degrees.

Each

No. 62—14 in. Long, 2 in. Cutter, Weight Each 3⅝ Lbs $5 60

STANLEY SCRUB

Round Edge Bit

Japanned Iron Frame, Beechwood Handle and Knob.

Each

No. 40—9½ in. Long, 1⅛ in. Cutter, Weight Each 2⅛ Lbs. $2.45

No. 40½—10½ in. Long, 1½ in. Cutter, Weight Each 2½ Lbs. 3 25

For planing down to a rough dimension any board that is too wide to conveniently rip with a hand saw. This is made possible by reason of the peculiar shape of the extra heavy cutter.

STANLEY CARRIAGE MAKERS RABBET

Adjustable Cutters, Rosewood Handle and Knob, Japanned Iron Frame

Each

No. 10½—9 in. Long, 2⅛ in. Cutter, Weight Each 3 Lbs. $5.30

No. 10—13 in. Long, 2⅛ in Cutter, Weight Each 4¼ Lbs. 6 40

Especially adapted for the heavy framing required in mining work, or carriage or wagon building, or any other work of similar nature.

ADJUSTABLE IRON PLANES

STANLEY RABBET

With Adjustable Depth Gauge

Japanned Iron Stock, 8 in. Long, with Spur for Working Across Grain.

Nos.	190	191	192
Cutter, Inches	1½	1¼	1
Weight Each, Lbs.	3½	2¼	2
Each	$2 95	2.80	2.60

These Planes will lie perfectly flat on either side and can be used with right or left hand while planing into corners or up against perpendicular surfaces. They are fitted with a spur and a detachable depth gauge.

STANLEY DUPLEX, FILLETSTER AND RABBET

With Adjustable Depth Gauge

Japanned Iron Frame, Adjustable Fence, Detachable Depth Gauge. Each.

No. 78—8½ in. Long, 1¼ in. Cutter, Weight Each 3 Lbs. $3 20

No. A78—Aluminum, Weight Each 1¼ Lbs. 4.20

These Planes have two seats for the cutters, one for regular work and the other where a bull nose is required. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut. To work same as a rabbet plane, remove fence and arm.

STANLEY CABINET MAKERS RABBET

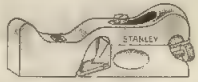
Adjustable Throat, Endwise Screw Adjustment

Iron, Nickel Plated, with "Handy" Feature on the side which forms a convenient Grip for the Hand. Each

No. 90—4 in. Long, 1 in. Cutter, Weight Each 1 Lb. .$4.00

Adapted for fine cabinet or other work where extreme accuracy is desired. It will lie perfectly flat on either side and can be worked with either right or left hand

This Plane is of the Bull Nose Pattern so that it can be used close up into corners or other difficult places.



Adjustable Throat, Endwise Screw Adjustment

Iron, Nickel Plated, with "Handy" Feature on the side which forms a convenient Grip for the Hand

Nos.	92	93	94
Length, Inches	5½	6½	7⅛
Width Cutter, Inches	⅝	1	1¼
Weight Each, Lbs.	1⅛	1¾	2
Each	$4 00	4.80	5.55

By removing the front a chisel plane is obtained.

ADJUSTABLE IRON PLANES

GAUGE SELF-SETTING

The Self-Setting Feature lies in the fact that the Plane Iron, if taken out to be sharpened, goes back in exactly the same position as before removed. Likewise the plane cap when taken out to allow removal of cutter, goes back in the same position. Rosewood handle and knob, iron body, smooth bottom.

SMOOTH

Each

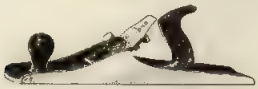
No. G4—9 in. Long, 2 in. Cutter, Weight Each 3 Lbs. . . $4.60

JACK

Each

No. G5—14 in. Long, 2 in. Cutter, Weight Each 4¼ Lbs. $5 80

FORE



Each

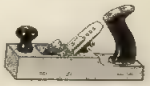
No. G6—18 in. Long, 2¼ in. Cutter, Weight Each 5¾ Lbs. $6.80

ADJUSTABLE WOOD PLANES

GAUGE SELF-SETTING

These have the same adjustment as the Iron Planes described above. The bottom, handle and knob are made of selected, well-seasoned beech.

SMOOTH



Each

No. G22—10 in. Long, 1⅝ in. Cutter, Weight Each 2¾ Lbs. $4.50

No. G35—10 in Long, 2 in. Cutter, Weight Each 3 Lbs. 4 80

No. G36—10½ in. Long, 2¼ in. Cutter, Weight Each 3¾ Lbs. 5.25

JACK

Each

No. H26—14 in. Long, 2 in. Cutter, Weight Each 4¼ Lbs. $5.25

FORE AND JOINTER

Each

No. G28—Fore, 18 in. Long, 2¼ in. Cutter, Weight Each 6 Lbs. $6.00

No. G30—Jointer, 22 in. Long, 2¼ in. Cutter, Weight Each 7 Lbs. 6.40

WOOD BOTTOM PLANES

BAILEY ADJUSTABLE

A Wood Plane of Superior Quality. The Bottom, Handle, and Knob are made from selected and well seasoned beech, the Cutters are the regular "Bailey" Type, and are adjustable both endwise and sidewise.

The Frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs. These lugs are screwed and securely pinned into the wood bottom. This method holds the wood bottom and top iron firmly together. Black Japanned Iron Frame.

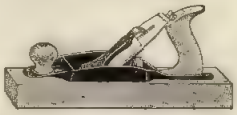
HANDLED, SMOOTH

Each

No. 35—9 in. Long, 2 in. Cutter, Weight Each 3¼ Lbs $4.20

No. 36—10 in. Long, 2⅜ in. Cutter, Weight Each 4 Lbs. 4.75

JACK AND FORE



Each

No. 26—Jack, 15 in. Long, 2 in. Cutter, Weight Each 3¾ Lbs. $3 70

No. 27½—Jack, 15 in. Long, 2⅜ in. Cutter, Weight Each 4⅝ Lbs. 4.30

No. 28—Fore, 18 in. Long, 2⅜ in Cutter, Weight Each 5½ Lbs. 4 70

CIRCULAR PLANES

VICTOR ADJUSTABLE

For Inside or Outside Circles

Black Japanned Finish, Cutters adjustable endwise and sidewise. Center Screw Adjustment with Stop

Each

No. 20—10 in. Long, 1⅝ in. Cutter, Weight Each 4 Lbs $9.15

STANLEY ADJUSTABLE

Right Side.

Left Side.

Graduated Scale for Setting Face

Flexible Steel Face, Japanned Stock, with Graduated Scale for Setting Face .

Each

No. 113—10 in. Long, 1⅝ in. Cutter, Weight Each 3½ Lbs. $7 45

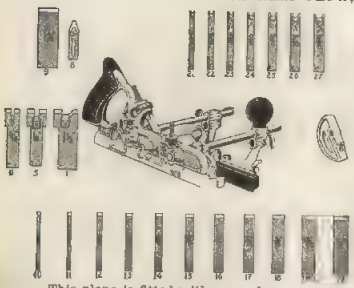
NOTE—When ordering, always give Plane Number and Part Number.

COMBINATION PLANES

STANLEY PLOW, BEADING, RABBET AND MATCHING



Seven Tools in One, in Compact and Practical Form

Each

No. 45—10 in. Long, Nickel Plated Stock and Fence, Rosewood Handle and Knob, Complete with 23 Cutters as Described Below, Weight Each 9½ Lbs **$15 50**

One in a Neat Steel Box, Complete with Cutters.

This plane embraces in a compact and practical form (1) Beading and Center Beading Plane, (2) Plow, (3) Dado, (4) Rabbet and Filletster, (5) Match Plane, (6) Sash Plane, (7) Slitting Plane.

Each plane is accompanied by seven Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in.); Eleven Plow and Dado Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 5/8, ¾, ⅞ and ⅞ in.); One 1¼ in Filletster, One Slitting, One ⅝ in. Match Tool, One ¼ in Hatch Tool, and One 1½ in Sash Tool; Twenty-three Tools in all.

This plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand

For beading at a distance from the edge of a board, attach Cam Rest (see cut at right of plane) to the front arm between the sliding section and fence to prevent the fence sagging. In certain work attach same to the rear arm to prevent the plane from rocking

STANLEY HOLLOWS AND ROUNDS

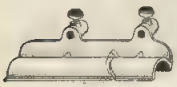
For Use on No. 45 Plane Only and Not Included in Price of Plane

Sold in Sets, Each Set Comprises One Hollow, One Round and Two Cutters

Nos.	6	8	10	12
Cutter, Inches	½	⅝	¾	1
Works Circles, Inches	⅝	1	1¼	1½
Per Set	$2.30	2.30	2.50	2.50

STANLEY NOSING TOOL

For Use on No. 45 Plane Only and Not Included in Price of Plane

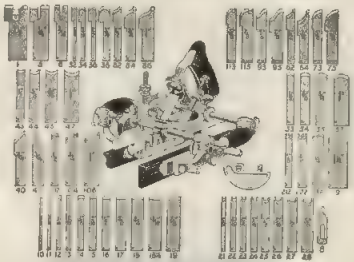


This is a specially formed bottom The tool and its cutter will form what might be called an exaggerated round as in shaping the edges of stair treads.

Each

No. 5—Nosing Tool with One Cutter..... **$1 75**

STANLEY PATENT UNIVERSAL COMBINATION



All metal parts of the planes are nickel plated. The handles and fence are made of selected rosewood, and every part is finished.

All parts are interchangeable.

This tool, in addition to being a Beading Plane, a Plow, Dado, Rabbet, Filletster, Match Plane, Sash Plane and a Slitting Plane, is also a Superior Moulding Plane and will accommodate cutters of almost any shape and size.

Each

No. 55—10 in Long Nickel Plated, Rosewood Handles and Fences, Complete with 55 Cutters as Described Below, Weight Each 15¼ Lbs **$28 00**

One in a Neat Steel Box, Complete with Cutters

The Following Cutters are Furnished with Each Plane

One 1½ in. Sash Tool; one ¼ in Match Tool; one ⅝ in Match Tool, one Slitting Tool, one 1¼ in. Filletster, twelve Plow and Dado Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 5/8, ¾, ⅞ and ⅞ in.); nine Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 5/8, and ¾ in.); four Fluting Tools (¼, ⅜, ½ and ¾ in.); four Hollows (½, ⅝, ¾ and 1 in.); four Rounds (½, ⅝, ¾ and 1 in.), two Quarter Hollows (⅝ and ¾ in.), two Quarter Rounds (⅝ and ⅞ in.), three Reverse Ogees (½, ¾ and 1 in.), two Roman Ogees (⅝ and ¾ in.), three Grecian Ogees (½, ¾ and 1 in.); two Quarter Rounds with Bead (⅝ and ⅞ in.); three Reeding Tools with two Beads (⅛, ¼ and ¼ in.); one ¾ in Right Hand and one ¾ in Left Hand Chamfers

The plane is fitted with spurs for working across the grain and a special cam rest to be located on the front arm when working at a distance from the edge of the board to keep the fence from sagging, or on the rear arm on certain work to prevent the possibility of the plane rocking. All parts are interchangeable.

CABINET SCRAPERS

STANLEY

Japanned, Raised Handles, Tool Steel Blade

The blade may be sprung to a slight curve by means of a Thumb Screw giving ease of operation and quickness of cut.

	Each
No. 80—11 in. Long, 2⅝ in. Blade, Weight Each 1¾ Lbs.	$1.45
Extra Blades	.30

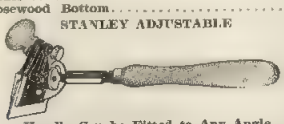
STANLEY WOOD FACE

Nickel Plated, Raised Handles, Tool Steel Blade

This Scraper has a Rosewood Face for use in the finest cabinet work.

	Each
No. 81—10 in. Long, 2⅛ in. Blade, Weight Each 2¼ Lbs.	$2.35
Extra Blades	.30
Extra Rosewood Bottom	.40

STANLEY ADJUSTABLE



Handle Can be Fitted to Any Angle

Japanned Iron Frame, Tool Steel Blade, Adjustable Hardwood Handle and Knob, Holds Blades of Different Forms and Widths.

	Each
No. 82—14½ in. Long, 3 in. Blade, Weight Each 1¾ Lbs.	$1 00
Extra Blades	.30

PERFECTION

Adjustable

Nickel Plated Malleable Iron Holder, Polished Hardwood Handle, Brass Ferrule.

	Each
No. 3—12 in. Long, 3x3 inch, 16 Gauge, Beveled Silver Steel Blade, Weight Per Dozen 13 Lbs.	$1.00
Extra Blades	.35

ATKINS RAMSHORN

Malleable Iron Face Clamp

White Maple Block, Varnished and Polished.

	Each
No. 4—12 in. Long, 3x3 in. Beveled Edge Silver Steel Blade	$1.45
Extra Blades	.35

STARRETTS UNIVERSAL

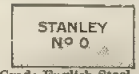
Stained Hardwood Handle and Grip, Tool Steel Blade

Has eight sharp cutting edges perfectly ground. Ball joint handle, locked or released by a slight turn, can be locked at any angle

	Each
No. 194—7 in. Handle, Blade 3x4½ in., Weight Each 1¼ Lbs.	$1.50
Extra Blades	.30

HAND SCRAPERS

STANLEY



No. 0—High Grade English Steel, Special Temper

Size, Inches	2½x5	3x4	3x5	3x6	3½x6
Wt. Per Dozen, Lbs.	2	2	2½	3	3¾
Each	$0 45	.40	.45	.55	.55

Weight Per Dozen, Lbs.		3	3½	4
Per Dozen		$6.30	6.30	7 00

SWAN NECK

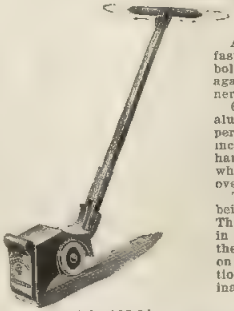
For Moulding and Special Work

Special Saw Steel, Hand Blocked and Tempered.

No. A18—6 in. Long.....Per Dozen $6.70

FLOOR SCRAPERS

STEARNS



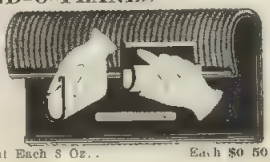
Adjustable cross handle fastened with clamp and wing bolt, allowing user to get against walls and into corners.

6 inch cast iron frame, aluminum finish, 6 inch tempered tool steel blade, 38½ inch natural finish hardwood handle, 5 inch rubber tired wheels, 55 inches length over all.

This machine is used by being drawn towards the user. The blade is firmly clamped in the scraper, the weight of the machine, resting mostly on the blade, prevents vibration or clatter, and thus eliminates wavy effects on floor

	Each
No. 10—Weight 135 Lbs.	$20 00

SAND-O-PLANES



For Sanding Straight or Curved Surfaces

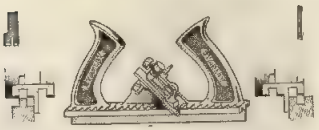
Holds Full Size Sheet of Sand Paper.

Rebounding cushion prevents clogging and supplies life and action and eliminates waste. Easy hand hold

Sand-O-Planes—Weight 8 Oz.. Each $0 50

ADJUSTABLE IRON PLANES

STANLEY DOUBLE END MATCHING



Nickel Plated Iron Handles and Body

These Planes have two cutters, a plow, and a tongue tool, both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on center. Both tongue and groove are cut by working the tool in the same direction, by merely reversing it end for end.

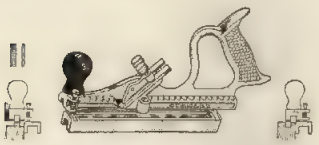
Each

No. 146—Cuts ⅛ in Groove on ⅜ to ½ in. Boards, Centers on ⅜ in., Weight Each 1½ Lbs. **$4.00**

No. 147—Cuts ⅜ in. Groove on ½ to ⅝ in. Boards, Centers on ⅝ in., Weight Each 1⅞ Lbs..... 4 25

No. 148—Cuts ¼ in. Groove on ¾ to 1 in. Boards, Centers on ⅞ in., Weight Each 2⅝ Lbs..... 4.50

STANLEY SWINGING FENCE MATCHING



Nickel Plated, Rosewood Knob

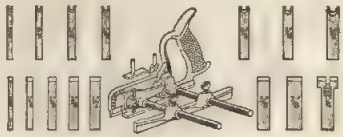
These Planes have two cutters of the same width, and one extra wide cutter The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is used when cutting the tongue.

Each

No. 48—Cuts 1/16 in Groove on Boards, ⅜ to 1¾ in., Centers on ⅞ in., Weight Each 3¾ Lbs.....**$5.30**

No. 49—Cuts 1/16 in. Groove on Boards ½ to ¾ in., Centers on ½ in., Weight Each 2⅝ Lbs..... 5.30

STANLEY COMBINED PLOW, BEADING AND MATCHING



Complete with 15 Cutters

A small combination plane for light work. Adapted for Plow, Beading, Matching and Rabbet work. Fitted with spurs, depth gauge, and a fence with a 5 in. adjustment.

Each

No. 50—9¾ in. Long, Nickel Plated Stock and Fence, Weight Each 3½ Lbs **$8 50**

The cutters comprise 7 plow and dado bits, one each ¼, 1/16, ⅜, 1/16, ½, ⅝ and ⅜ in., 7 beading tools, one each ⅛, 1/16, ¼, 1/16, ⅜, 1/16 and ½ in. and a ¼ in. tonguing tool.

STANLEY SKEW CUTTER COMBINATION

Complete with 12 Cutters

Nickel Plated Stock and Fence, Rosewood Handle and Knob.

For Plow, Dado, Filletster, Matching and Rabbet work. Fitted with spurs, a depth gauge and a fence with Rosewood face.

Each

No. 46—10½ in. Long, Weight Each 5¾ Lbs.....**$10.95**

The cutters comprise 9 plow and dado bits, 1/16, ¼, 1/16, ⅜, ½, ⅝, 1/16, ⅞ and 1¼ in.; a 1½ in. filletster cutter; a ¼ in. tonguing tool, and a splitting cutter.

Each

No. 47—Without Fence, with ⅜, ½, ⅝, 1/16, ⅞,1 1/8 in Dado and Slitting Cutter, otherwise same as No 46, Weight Each 3¾ Lbs. **$8.65**

STANLEY CORNER ROUNDING

A New Plane Designed for Rounding Corners, on Batteus, Casings, Shelvings, Etc.

Japanned Iron Frame, Polished Face, Best English Steel Cutters, sharpened ready for use The frame of this plane is made with two convenient hand holes, particularly convenient for grasping with either one or both hands

Each

No. 144A—¼ in. Cutters, 7¼ in. Long, Weight Each 1¼ Lbs.. . . . . **$1 50**
No. 144B—⅜ in. Cutters, 7¼ in. Long, Weight Each 1¼ Lbs. **1.50**
No. 144C—½ in. Cutters, 7¼ in. Long, Weight Each 1¼ Lbs.. . . . . **1 50**

2¼ in. for Plane Nos. G6, G27½, G28, G30, G36.
2½ in. for Plane Nos G7, G31

Always give Number of Plane and Size of Iron when ordering.

SCRAPER PLANES

STANLEY DOUBLE HANDLE VENEER

For Scraping Veneer or for Cabinet Work

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blade is adjustable endwise and for angle, and can be firmly locked in position desired.

Each

No. 12—6¼ in. Long, 2⅞ in. Cutter, Weight Each 3¾ Lbs. $4 00
Extra Blades ..... .50

With Rosewood Bottom

Japanned Iron Frame, Rosewood Handles, Endwise Adjustment. The Blade can be locked at any angle.

Each

No. 12½—6¼ in. Long, 2⅞ in. Cutter, Weight Each 4 Lbs $6.65
Extra Blades ..... .50
Extra Rosewood Bottom ..... .45

This wood bottom is especially adapted for use on very fine work, as it renders less liable the possibility of marring or scratching the surface being worked upon. This bottom is detachable, and, when worn, can be readily removed and a new one substituted

STANLEY SINGLE HANDLE

Rosewood Handle and Knob

This Plane has the same form as the regular Bailey Plane and is perferred by some users to the double handle Scraper Plane. The blade is adjustable endwise and for angle, and can be firmly locked in position desired

Each

No. 112—9 in. Long, 2⅞ in. Cutter, Weight 4 Lbs. ... $4 30
Extra Blades 50

SCRAPER PLANE BLADES

STANLEY

Extra Heavy

High Grade English Steel, Special Temper. Each

No. 12S—Size 2⅞x5⅛ in., 16 Gauge. $0.55

ATKINS

Extra Heavy

Atkins Silver Steel Hardened and Tempered. Each

No. 12A—Size 2⅞x5⅛ in., 16 Gauge. $0 50

JENNINGS

Extra Heavy

Extra Quality Saw Steel, Hand Blocked and Tempered. Each

No. 12J—Size 2⅞x5⅛ in., 16 Gauge. $0.50

The above blades fit Nos. 12, 12½ or 112 Stanley Scraper Planes.

IRON BLOCK PLANES

STANLEY

Non-Adjustable

Black Japanned Iron Frame, Polished Face, English Steel Cutter, Tempered and Ground, Honed Ready for Use.

Each

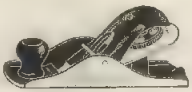
No. 102—5½ in. Long, 1⅝ in. Cutter, Weight Each ⅞ Lb $0.85

Endwise Lever Adjustment

Black Japanned Iron Frame, Polished Face, English Steel Cutter Tempered and Ground, Honed Ready for Use.

Each

No. 103—5½ in. Long, 1⅝ in. Cutter, Weight Each ⅞ Lb $1 20

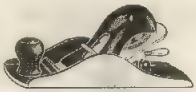


Non-Adjustable

Black Japanned Iron Frame, Polished Sides and Face, Stained Applewood Knob

Each

No. 110—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs $1 20

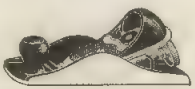


Endwise Lever Adjustment

Japanned Iron Frame, Polished Sides and Face, Rosewood Knob.

Each

No. 120—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs $1 65

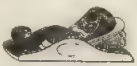


Endwise Screw Adjustment

Japanned Iron Frame, Polished Sides and Face, Nickel Plated Adjusting Screw, Rosewood Knob, Lever Cap.

Each

No. 220—7 in. Long, 1⅝ in. Cutter, Weight Each 1½ Lbs. $1 70



Endwise Screw Adjustment

Japanned Iron Frame, Polished Sides and Face, Nickel Plated Adjusting Screw, Rosewood Knob, Lever Cap, with Handy Grip.

Each

No. 203—5½ in. Long, 1⅝ in. Cutter, Weight Each 1⅛ Lbs. $1.50

Designed especially for Manual Training use.

IRON BLOCK PLANES

STANLEY LOW ANGLE

Endwise Screw Adjustment

Nickel Plated Trimmings, Polished Sides and Face, Rosewood Knob, Cutter Rests on Seat at 12 Degree Angle, with Handy Grip.

Each

No. 61—6 in. Long, 1⅝ in. Cutter, Weight Each 1¼ Lbs. $2.80

No. 63—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. 2.75

BAILEY ADJUSTABLE

Adjustable Throat

Endwise Screw and Lateral Lever Adjustment, Japanned Trimmings, with Handy Grip.

Each

No. 9½—6 in. Long, 1⅝ in. Cutter, Weight Each 1½ Lbs. $2 30

No. 15—7 in. Long, 1⅝ in. Cutters, Weight Each 1⅝ Lbs. 2.40

Knuckle Joint, Adjustable Throat

Endwise Screw and Lateral Lever Adjustment, Nickel Plated Trimmings, with Handy Grip.

Each

No. 18—6 in. Long, 1⅝ in. Cutter, Weight Each 1½ Lbs $3.00

The knuckle joint permits of great leverage, consequently the lever can be placed in position or removed with very little effort

BAILEY LOW ANGLE

Low Angle, Adjustable Throat

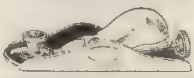
Endwise Screw Adjustment, Japanned Trimmings, with Handy Grip.

Each

No. 60½—6 in. Long, 1⅝ in. Cutter, Weight Each 1¼ Lbs. $2 40

No. 65½—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. 2.60

In the Low Angle Planes, the cutter rests on its seat at an angle of only 12 degrees. This angle permits of great ease in working across the grain on hard woods. They have adjustable throats, which allow of the opening or closing of the mouth as coarse or fine work may require.



Knuckle Joint, Adjustable Throat

Endwise Screw Adjustment, Nickel Plated Trimmings, with Handy Grip.

Each

No. 65—7 in. Long, 1⅝ in. Cutter, Weight Each 1⅝ Lbs. $3.15

Bailey Block Planes have the most improved form of adjustment, which enables the user to accurately adjust the cutter either endwise or sidewise.

All have adjustable throats which permit of the opening or closing of the mouth as coarse or fine work may require The "Hand-y" feature on the sides forms a conventent grip for the hand.

ADJUSTABLE IRON PLANES

STANLEY BULL NOSE RABBET

Adjustable Mouth

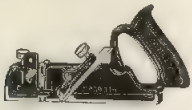
Japanned Iron Frame, Polished Face.

Each

No. 75—4 in. Long, 1 in. Cutter, Weight Each ⅝ Lb. **$0 75**

Very useful for working close up into corners or other difficult places. The mouth can be adjusted for different widths by means of the set screw on top of the plane.

STANLEY IMPROVED DADO



No. 39—With Adjustable Depth Gauge

Japanned Iron Stock, 8 in. Long, with Skew Cutters and Two Adjustable Spurs.

Width, Inches	¼	⅜	½	⅝
Weight Each, Lbs	1⅝	1⅝	1¾	2
Each	$2 90	$3.10	$3.30	$3.45

Width, Inches	¾	⅞	⅞	1
Weight Each, Lbs.	2	2	2⅛	2⅛
Each	$3 60	$3.80	$3.80	$ 95

The great advantage of these Dado Planes over those of wood is that they will keep true under all conditions even in the narrowest widths. They have skew cutters, an adjustable depth gauge and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

STANLEY EDGE TRIMMING

Japanned Iron Body, English Steel Cutter.

Each

No. 95—6 in. Long, ⅞ in. Cutter, Weight Each 1¼ Lbs **$1 90**

For trimming or smoothing the edge of boards for a square or close fit. The cutter works on a skew. Wood blocks of various bevels may be attached enabling the user to make a slanting cut.

STANLEY CABINET MAKERS EDGE

Adjustable Cutter, Rosewood Knob, Japanned Iron Frame

A Chisel Plane for Piano Makers and all Cabinet Workers. The Cutting Edge being located at the extreme end of the Plane gives the tool the form of a chisel. The cutter rests on a solid bed practically its entire length and is adjustable end wise

Each

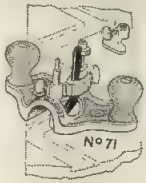
No. 97—10 in. Long, 2¼ in. Cutter, Weight Each 3¾ Lbs. **$4.40**

There is no other Plane on the market that can be worked in such small space or so close up in the corners.

ADJUSTABLE IRON PLANES

STANLEY ROUTER

For surfacing the bottom of grooves or other depressions parallel with the surface of the work. A wooden bottom of any size can be attached, enabling the user to router on large openings. A ¼ and ½ in. cutter and a patented smoothing cutter furnished with each plane.

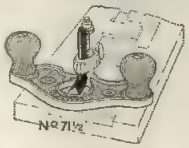


Open Throat

Nickel Plated, Beechwood Handles, with Cutters and Attachments for Closing Throat on Narrow Surfaces and Regulating Depth of Cut.

Each

No. 71—7½ in. Long, Weight Each 2⅝ Lbs. **$4.10**



Closed Throat

Nickel Plated, Beechwood Handles, with Cutters.

Each

No. 71½—7½ in. Long, Weight Each 2⅛ Lbs. **$3 20**

STANLEY BELT MAKERS

With Adjustable Throat

Japanned Iron Body, Hardwood Handle, Cutter Adjustable Endwise.

Each

No. 11—5⅜ in. Long, 2⅜ in. Cutter, Weight Each 3½ Lbs. **$4 30**

This Plane is used for chamfering down the ends of belts before fastening them together.

STANLEY BUTCHER BLOCK

For Truing Up Butchers' Blocks

Japanned Iron Body, Beechwood Handle and Knob, with Toothed and Plain Cutter.

Each

No. 64—12⅛ in. Long, 2 in. Cutter, Weight Each 4 Lbs. **$5 60**

In addition to the special cutter, the regular cutter is provided for smoothing the final surface of the block.

ADJUSTABLE PLANES

STANLEY "BED" ROCK

In the Bedrock Planes the bottom of the Frog is machined so as to make it a tongue which fits into a groove formed in the bottom of the Plane. This insures great solidity and perfect alignment between the Frog and the bottom. The movement of the Frog in the groove for widening or opening the throat and the loosening or tightening of the Frog to the base of the plane is governed by screw adjustment which may be operated without removing the cap on the cutter. Rosewood Handles and Knobs.

All above, one in a box.

The Charm of the Pearl is Everlasting

But the alluring mystery of its origin and the richness of its historical significance do not alone account for the remarkable vogue of the pearl. After all, the beauty of the gem itself is the truest explanation of its perennial popularity.

La Tausca Pearls

A Token

In no gift is true sentiment more fittingly symbolized.

The Most Cherished Gift for Every Occasion

The 24 and 30 inch lengths are the most sought for. Whatever the character of your attire—richly ornate, severely simple and practical, the 24 and 30 inch necklaces of pearls are most appropriate at all times. And this, too, explains its perennial vogue with all women. Differing ever so widely in their choice of other things, women unite enthusiastically in admiration of the pearl. La Tausca pearls give you all the pearl beauty found in necklaces costing thousands of dollars.

A metal Jewel Case studded with stones—as made by goldsmiths of old.

All La Tausca Pearls Are Indestructible Quality

The Gift Ideal!

La Tausca Pearls De Luxe

Each of these graceful strands has an exquisite clasp of genuine diamonds. These are the higher-priced numbers for you to carry, pearls of queenly beauty so distinguished in appearance that they will command instant attention and in many cases will result in selling your customer a necklace far more costly than she thought of buying. The only way of attracting this high-class business is to carry the finer qualities of La Tausca pearl necklaces.

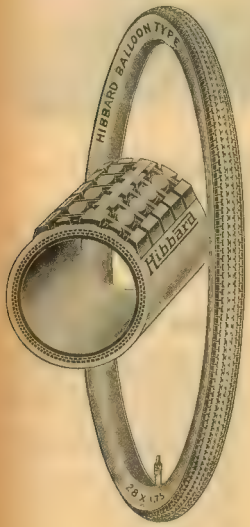
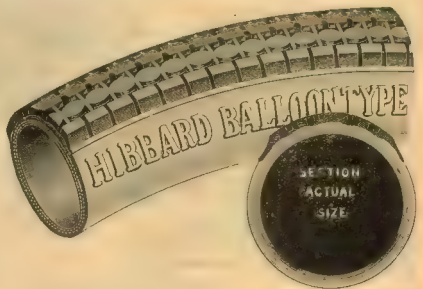
The Hibbard Balloon Type Bicycle Tire

BALLOON TYPE BICYCLE TIRE, SINGLE TUBE, SIMILAR IN CONSTRUCTION TO AUTOMOBILE TIRES NOW READY FOR YOUR BICYCLE





WOVEN FABRIC AND IS MANUFACTURED TO GIVE EXTREME

EASY RIDING—HELPS TO ABSORB SHOCKS, JARS OF ROUGH ROADS. THIS TIRE IS CONSTRUCTED OF SPECIALLY SERVICE AND WEAR—AT THE SAME TIME INCREASING THE RIDING QUALITIES OF THE BICYCLE.

The **Hibbard** Balloon type bicycle tire is made in two sizes, for 28 inch wheels 1.75 inches in width and for Juvenile bicycles 26 inch wheels 1.75 inch in width. When inflated properly to balloon type pressure these tires will fit the forks without trouble.

Construction of **Hibbard** Balloon Type Bicycle:

TUBE—Heavy pure gun tube of tough elastic—non-porous rubber—gray in color.

FABRIC—Special bicycle fabric woven for exclusive use in balloon type tires—3 ply.

TREAD—Latest design of non-skid road gripping studded tread of tough resilient rubber compounded to give maximum wear and service.

APPEARANCE—White side walls with a non-blooming deep black tread, tapered edges.

GUARANTEE—Fully guaranteed for one year from date of sale.

No. TC108—28×1.75, w't per pair 5½ lbs.....per pair **$8.50**

No. TC108—26×1.75, w't per pair 4¾ lbs.....per pair **8.20**

TWENTY-FIVE PAIR IN A CASE

SELF-SETTING IRON PLANES

CORRUGATED BOTTOM

Corrugated bottom planes are preferred by many users, because of there being less friction from the bottom, runs a little lighter. They have the self setting cutter iron made from special high grade steel.

The malleable Frog and Steel Cap reduce greatly the liability of breakage.

The Handle and Knob are made of highly finished, thoroughly seasoned rosewood. These are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned. Plane is finely finished throughout.

The self-cutting feature lies in the construction of the plane iron. If taken out to be honed or sharpened, goes back in same position as before removal. The plane cannot chatter because the cutter iron is held rigid at the point by the cap; at the same time the cap screw used for tightening the cap is pressing against the binder plate on top of the cutter iron. This pressure against the binder plate holds the cutter firm its entire length.

SELF-SETTING WOOD PLANES

Wood planes are preferred by many because of being lighter in weight than the iron planes.

Wood Planes are made of specially selected beechwood, thoroughly seasoned and dried.

The iron frog with adjustable throat will lengthen greatly the life of these wood planes, as this frog and throat can be moved up to permit the bottom of the plane to be trued up when worn.

The cutter iron can also be adjusted sidewise by loosening the small screw that holds the binder plate to cutter.

Keep cutter iron sharp and properly adjusted, and you will have a plane that is easy to push and will give the greatest satisfaction. In sharpening, care should be taken to keep the cutting edge straight and square with the edge of the cutter iron. Cutting iron can be adjusted sidewise by loosening the set screw that holds binder plate to top of cutting iron.

SMOOTH

No. 835 —10 in. long, 2 in. cutter, w't each 2¼ lbs., each $6.70

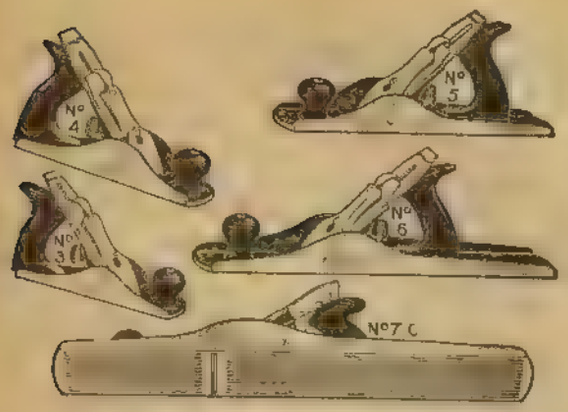
Made of a special steel, carefully forged, hardened and tempered. Bell face; round neck and poll; curved claw which easily pulls any size of nails and brads. Face, poll and top of claw are polished, rest of head dull black. Sound hickory handle, dull black. 13 inches over all. Weight without handle, 11½ ounces, per dozen $16.10

ONE IN A BOX

PLANES

"BAILEY" ADJUSTABLE IRON



The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use, is adjustable both endwise and sidewise, and bedded to the heel of bevel. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated—see cut 7C—as desired.

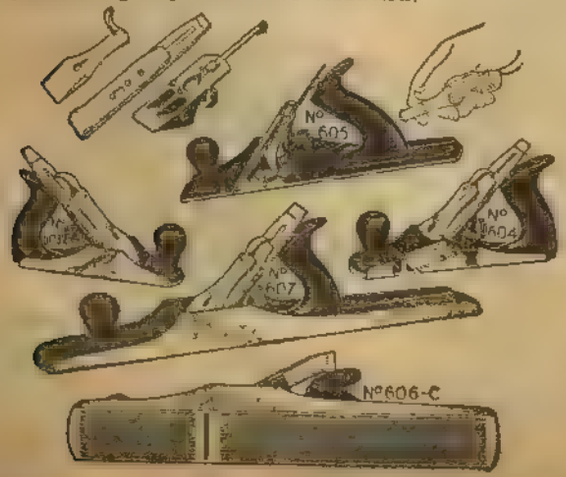
STANLEY "BED ROCK"

For fine work on hard and knotty wood, this plane surpasses all others.

The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.



The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.

Bottoms either flat or corrugated (see No. 606C) as desired.

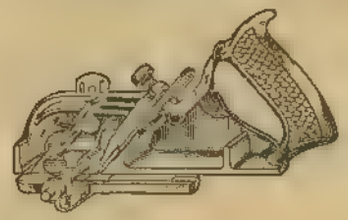
OUR VERY BEST

Our Very Best Is The Very Best

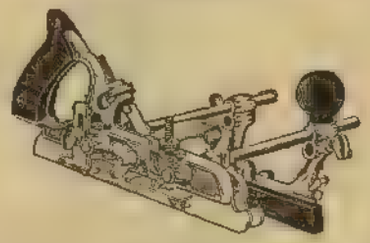
ALUMINUM DUPLEX RABBET & FILLISTER



This Plane has two seats for the cutter, one for regular and the other for bull-nose work. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom. To work as a rabbet plane remove fence and arms. Cutter has an improved lever adjustment endwise. The aluminum fence and body make it light in weight.

No. 78A—8⅛ in. long, 1⅛ in. cutter, w't each 1½ lbs.....each $5.40

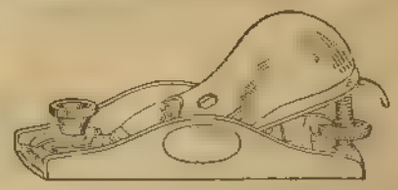
ALUMINUM COMBINATION PLANE



No. 45A—Similar in design to the regular Stanley No. 45 Plane. Being made of aluminum it is exceptionally light in weight and will not rust. Handle and knob are rosewood. Complete with 23 cutters consisting of 1⅛ in. Sash Tool, ¼ and 5/16 in. Match Tool, one Slitting Tool, 1¼ in. Fillester. ⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, 1⅛ and ⅞ in. Plow and Dado Tools. ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in. Beading Tools. Each plane has an adjustable fence and depth gauge, spurs for use across the grain and can be used right or left hand. W't each 7¾ lbs.....each $24.00

ONE IN A BOX

ALUMINUM BLOCK PLANES



No. 18A—Length 6 in., 1⅝ in. cutter, bottom and adjustable front made of aluminum, this makes it extremely light in weight and will not rust, knuckle joint and steel lever cap, nickel plated, w't each ⅝ lbs., each $4.55

ONE IN A BOX

STEEL BLOCK PLANES

Plane is similar in construction to regular No. 18 Block Plane except bottom and adjustable front are made of steel instead of grey iron, making it practically indestructible.

Knuckle joint steel lever cap, nickel plated.

No. 18S—Length 6 in., cutter 1⅝ in., w't each 1¼ lbs.....each $4.55

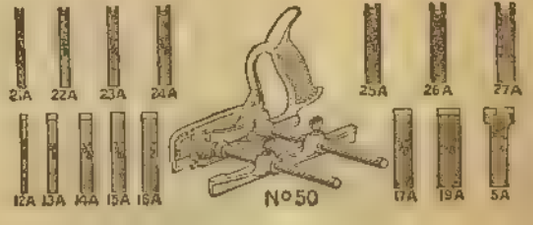
Extra Screws .....per dozen .96

ONE IN A BOX

PLOW, BEADING AND MATCHING



For light work, consists of a main stock with metal handle, carrying a spur and a depth gauge and forming a support for one side of cutter, a sliding section carrying a spur and forming a support for other side of cutter, a fence with a 5 inch adjustment.

The cutters comprise 7 plow and dado bits—¼, 5/16, ⅜, 7/16, ½, ⅝ and ¾ inch, 7 beading tools, ¼, 5/16, ⅜, 5/16, ⅜, 7/16 and ½ inch, and a ¼ inch tonguing tool.

No. 50—Nickel plated, length 9½ inches, 15 cutters, w't 3½ lbs., each $10.90

ONE IN A BOX

PLOW, DADO, FILLISTER AND MATCHING

Skew cutters are the feature of this plane, main stock carries a spur, depth gauge, slitting cutter, sliding section carrying a spur forming an extra sole for the plane. Rosewood handle and knob.

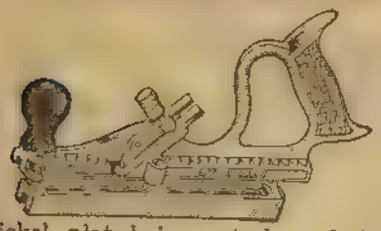
Cutters comprise 8 plow and dado bits—3/16, ¼, 5/16, ⅜, ½, ⅝, ¾, 1¼ in., 1½ in. fillister cutter, ¼ in. tonguing tool and slitting cutter.

No. 46—Nickel plated, length 10½ in., 11 cutters, w't 5¾ lbs., each $14.00

ONE IN A BOX

STANLEY ADJUSTABLE PLANES

TONGUING AND GROOVING



Nickel plated iron stock and face, including tonguing and grooving tools.

The fence is set in a center pivot and can be swung around and locked either way. Set one way it exposes two cutters for cutting the tongue and when reversed leaves only one exposed for making the groove.

No. 48—8¾ in., for ⅝ to 1¼ in. boards, w't 3 lbs. .....each $6.80

No. 49—8 in., for ½ to ¾ in. boards, w't 2½ lbs. .....each $6.80

ONE IN A BOX

DOUBLE END MATCH

Nickel Plated.

Provided with both tongue and groove irons With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit.

No. 146—Matches ⅝ in. boards, cuts groove ⅜ in., w't 1½ lbs., each $5.10

No. 147—Matches ¾ in. boards, cuts groove 5/16 in., w't 2 lbs., each $5.45

No. 148—Matches ⅞ in. boards, cuts groove ½ in., w't 2¾ lbs., each $5.75

ONE IN A BOX

RABBET AND FILLISTER

The sides and bottom being square with each other, the planes will lie perfectly flat on either side. Adjustable fence slides under bottom to regulate width of cut. Has one spur on each side and adjustable depth gauge. Is suitable for either right or left hand work. The front part of plane can be easily detached thus providing a bull nose plane.

No. 278—Japanned iron stock and fence, 6¾ in. long, 1 in. cutter, w't 2 lbs. .....each $4.10

ONE IN A BOX

IMPROVED RABBET

Iron stock, length 8 in., with depth gauge.

WITH SPUR

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

Nos.	190	191	192
Cutter, in.	1⅝	1¼	1
W't, lbs.	2½	2¼	2
Each	$3 80	3.55	3 30

ONE IN A BOX

DUPLEX RABBET AND FILLISTER

This plane has two seats for the cutter, one for regular work and the other where a bull nose is required. Has spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom regulating width of cut. To use as rabbet plane, remove fence and arms.

No. 78—8¾ in. iron stock and fence, 1⅝ in. cutter, w't 3 lbs., each $4.20

ONE IN A BOX

SKEW CUTTER, FILLISTER AND RABBET

The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. By removing arms and fence a skew cutter rabbet plane is obtained.

No. 289—8¾ in., japanned, 1⅝ in. cutter with fence and depth gauge and two adjustable spurs, one on each side, w't 4 lbs. .....each $4.90

ONE IN A BOX

WOODWORKERS' ROUTER

For surfacing the bottom of grooves and depressions parallel with the general surface of the work. The open throat design gives more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip and a second attachment for closing the throat for use on narrow surfaces.

Open Throat.

No. 71—Nickel plated, width 7⅛ in., ¼ and ½ in. steel bits, with throat attachment, w't 2⅛ lbs., each $5.20

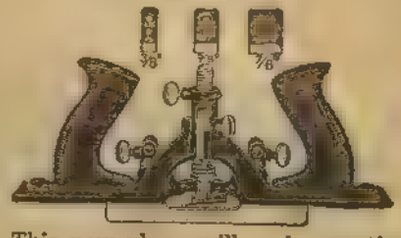
ONE IN A BOX

Closed Throat.

No. 71½—Nickel plated, width 7⅛ in., ¼ and ½ in. steel bits, w't 2¼ lbs., each $4.10

ONE IN A BOX

DOOR TRIM



This new plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. Cutter can be set to work from either end of the plane or across it. Spring prevents taking a heavier chip than can be easily carried.

No. 171—11 in., japanned, nickel plated trimmings, rosewood handles, 3 forged steel cutters, w't 3 lbs., each $7.60

ONE IN A BOX

Cotton Sampler

We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in H.S.B. & CO.'S pocket knives. Slight variations are made to adapt them to the different knives of which they form a part. All are made from Wardlow's Celebrated English crucible steel. Each blade is forged in the most approved manner by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a new method which insures a uniform and lasting edge. All blades bearing the H.S.B. & CO.'S trademark are carefully ground and finished. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaws and neither too hard or too soft.

In material, workmanship and design the H.S.B. & CO.'S pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of an American factory which has in its employ cutlers who have served thirty, forty and fifty years in their service.

ETCHING CUTLERY

Etching Department.

STYLES OF ETCHING

The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this is done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they have been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that a sufficient—not a large—quantity is ordered each time to warrant it, and that the goods are such that we as a firm would care to affix our guaranty.

We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

Hibbard STAINLESS STEEL POCKET KNIVES

A stainless pocket knife that will not rust, stain, tarnish, discolor or corrode. A knife that really has a lasting, sharp cutting edge.

STAYS SHARP—STAYS BRIGHT

THE KNIFE THAT WILL LAST A LIFETIME

The ideal knife for campers, sportsmen, fishermen, tourists, farmers, mechanics, office men, or anyone that carries a pocket knife. Give wonderful satisfaction and pleasure in use. Many pocket knives are discarded after they become rusty and dirty looking. Hibbard Stainless Steel Pocket Knives always remain bright and shiny and always have that new and clean appearance, as there is nothing to rust and nothing to stain.

The attractive window display we send along with every order for these assortments will sell many Hibbard Stainless Knives for your customers. It catches the eye, makes passers-by stop and observe. Sells by suggestion. All dealer has to do is to place a lemon in a mason jar three quarters full of water, stick one of the Hibbard Stainless Pocket Knives and an ordinary old carbon steel pocket knife into same as indicated on large display card. Put the jar, display cards, etc. in a prominent place in show window and big results are bound to follow.

Get after this business at once and before the other fellow beats you to it. It will surprise you how easily you can roll up a volume of business on this item.

Blades are made of Stainless Steel, mirror polished on both sides, brass linings, nickel silver bolsters, rivets and name plate; stainless steel springs, name plate is Stamped STAINLESS STEEL. Length when closed $3\frac{5}{16}$ in.

Hibbard STAINLESS STEEL POCKET KNIVES

Showing the Most Effective Manner in Which to Display them.

NOW WE HAVE IT!

A Stainless Steel Pocket Knife that will not Rust, Stain, Tarnish or Corrode. One that really has a Lasting, Keen Cutting Edge.

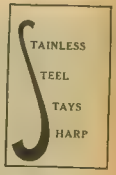
STAYS SHARP—STAYS BRIGHT

"The Knife that will Last a Life Time"

Paste Banner on Show Window in Conspicuous Place.

Place This Display Card on One Side of Jar.

THE KNIVES IN THE JAR TELL THE STORY
STAINLESS STEEL
A Stainless Knife
Note The Mirror-Like Finish
CARBON STEEL
An Ordinary Carbon Steel Knife
Note The Rust and Stains



Place This Display Card on One Side of Jar.

Place lemon on bottom of a mason fruit jar. Stick an ordinary carbon steel pocket knife in lemon on one side and a Hibbard Stainless Steel Pocket Knife opposite same as indicated in cut above. Fill mason jar three-quarters full of water and place near window banner in show window folding back that part of large display card that is cut out, and fit over jar.

A STAINLESS STEEL POCKET KNIFE
THAT REALLY HAS A LASTING
KEEN CUTTING EDGE
STAYS SHARP STAYS BRIGHT
"THE KNIFE THAT WILL LAST A LIFETIME"

Place assortment close to window in front of jar, but not too close as not to obstruct the view of knives in jar.

A small flashlight placed in back of the assortment case so that the rays shine into the jar will aid greatly in bringing out the contrast between the STAINLESS STEEL KNIFE and the carbon steel knife.

REGULATOR AND AUDITORIUM WALL CLOCKS

Prices Each.

WATCHMAKERS' BENCHES

No. M8705. Solid oak, light golden finish $37.00
No. M8706. Solid birch, mahogany finish. 37.00

This is a very popular Bench and is one that has always given satisfaction. It has twelve drawers, an apron slide, a chalk box. All the panels are 3-ply, same as in the curtain benches. It has a solid bottom and a railing around the edges of the top to prevent material from falling off.

It is well made and finely finished.

Dimensions—Length, 40 in.; depth, 20 in., height to working surface, 38 in.

Shipping weight, 135 lbs. crated.

No. M8707. Solid oak, light golden finish. $64.00
No. M8708. Solid birch, mahogany finish 54.00

It has fourteen drawers, the one in the upper left hand corner is a short drawer arranged for chucks, a chalk box, an apron slide and a compartment for foot wheel. Bench rests on metal sliding glides.

The drawers are locked automatically, locking the drawer over the chalk box, locks every drawer at the same time.

All panels are 3-ply laminated stock, and can not split or warp, and is nearly impossible to break.

Dimensions: Length, 44 inches; depth, 26½ inches; height to working surface, 38 inches.

Shipping weight, 200 lbs.

No. M8709. Solid oak, light golden finish $58.50
No. M8710. Solid birch, mahogany finish 58.50

It has ten drawers, the one in the upper left hand corner is a short drawer with a chuck block allowing passage of belt back of drawer. It also contains a chalk box, a cupboard, a compartment for foot wheel, a solid bottom, and 3-ply laminated panels. Bench rests on metal sliding glides.

The drawers are locked automatically; locking the drawer over the chalk box locks every drawer at the same time.

If desired, a grooved bottom material tray and 113 corked bottles, 1⅜ x ⅝ inches, can be furnished in the wide center drawer.

Dimensions: Length, 44 inches; depth, 26½ inches, height to working surface, 38 inches.

Shipping weight, 190 lbs.

No. M8711. Solid oak, light golden finish. $34.00

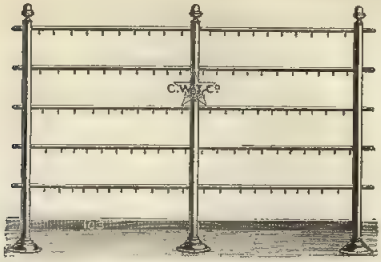
WATCH RACKS

Our Watch Racks are made of solid brass tubing and nicely finished. The round tips and acorns are highly polished brass, while the bases and ornaments are finished in bronze.



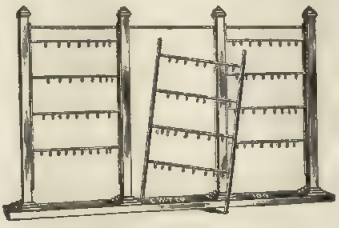
No. M8745. Nickel plated, for 75 watches..... each, $14.50
No. M8746. Copper oxidized finish, for 75 watches..... each, 16.00
No. M8747. Nickel plated, for 100 watches..... each, 16.50
No. M8748. Copper oxidized finish, for 100 watches..... each, 18.00
Dimensions, 30 in. high, 44 in. wide.

No. M8749. Nickel plated, for 50 watches..... each, $9.50
No. M8750. Copper oxidized finish, 50 watches..... each, 11.00
Dimensions: 29 in. high, 20 in. wide.

MADE TO ORDER WATCH RACKS

WATCH REPAIR CASE.

No
M8751. Light golden oak each, $16.50
M8752. Birch mahogany..each, 16.50
With brass hooks to hold fifty watches. Swinging door with double thick glass and lock.
Dimensions: 34 in. high, 21 in. wide, 3½ inches deep inside.

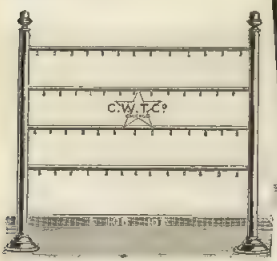


SECTIONAL WATCH RACK FOR BENCH.

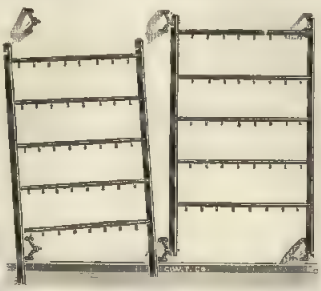
The demand for Sectional Watch Racks, as to size, style and finish, is so varied that we are unable to carry a completed rack in stock, but as we have on hand all parts and materials, we are in a position to quote low prices and give prompt service. The uprights are of solid square brass tubing, the sides of sections are of solid flat brass and the cross bars have a slot running the entire length which gives the hooks a spring fit and at the same time permitting them to be set in any particular place or removed entirely.

REMOVABLE WALL WATCH RACK.

No. M8753. Oxidized copper finish
Each $16.75
This rack is 28 inches high, 29 inches wide, supported about 1½ inches from the wall by four brackets. Can easily be removed at night without disturbing or removing the repair watches.



No
M8754. Nickel plated 40 watches each $8.00
M8755. Copper oxidized, 40 watches each, 9.00
M8756. Nickel plated, 50 watches each, 8.50
M8757. Copper oxidized, 50 watches..each, 9.50



SECTIONAL WATCH RACK TO HANG FROM WALL.

We are in position to furnish any number of watch rack sections in any size, complete with the proper number of wall brackets such as are shown in illustration, which are fastened to the wall by screws and rigidly support the sections at both top and bottom in such a way that they can be easily removed at night and hung in safe.

HANGING WATCH RACK.

No. M8758. Copper oxidized, for 50 watches .....each, $14.75
This new rack is designed to be hung in the window by chains as shown and taken off and set in safe over night without handling the watches.

AMBASSADOR PATTERN ILLUSTRATED

BESIDES the 26-piece and 29-piece combinations listed above, the tray will hold 35-piece, 38-piece and 44-piece sets. The tray may be used as a unit for setting the table. Then the removable velvet pad may be slipped in buffet or serving table drawer, while the tray itself is used for serving.

It may be had in burnished gold and polychrome with old rose velvet lining; blue and silver with mistral blue lining or mahogany with mistral blue lining. The center of the tray proper is of polished natural mahogany.

Sold only with the silverware

INTERNATIONAL SILVER CO.

1847 ROGERS BROS.

ANCESTRAL PATTERN ILLUSTRATED MAY BE HAD WITH WARE IN ANY PATTERN

THE 50-PIECE UTILITY TRAY

THE Utility Tray combines the virtues of a serving tray with those of a silverware rack that may be removed and stored in the buffet or serving table while the tray is in use. It is particularly salable with the 50-piece assortment

The color combinations are gold polychrome with old rose velvet lining and mahogany with mistral blue velvet lining. Shown in both color combinations so that there is a variety for your trade to choose from the 50-piece Utility Tray Sets are easily sold. *Sold only with the silverware*

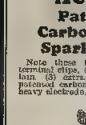
AC SPARK PLUGS

NATIONALLY ADVERTISED

Great advances have recently been made in construction of "AC" plugs; (1) new design insuring perfect alignment, (2) new alloy for sparking points, (3) new electrically fused insulator core and (4) new glaze to minimize accumulation of soot.

"AC1075" Patented Carbon Proof Spark Plugs

Note these features: (1) spring terminal clips, (2) heavy body porcelain, (3) extra long bracket, (4) patented carbon proof ring, and (5) heavy electrode.



4K8145—(Mfrs 1075) Special plug designed and built specially for Ford motor, ⅝ in. thread patented carbon proof construction. Each **36c**

Profitable Side Lines For Toy Dealers

PROGRESSIVE toy dealers, looking for additional and profitable lines, will find nothing better than greeting cards, desk sets, leather goods, children's books and games, gift merchandise, etc.

THE MODERN STATIONER is the merchandising paper of the stationery trade and the official organ of three thousand modern buyers of social and staple stationery, as well as educational toys and games. It tells how to go about selling these lines most profitably.

We will be glad to send you a copy on request.

Bottletot
A PETITE BABY

infringes on no other doll patents

..It is an original baby, different in principle and action from all others. It is NOT a mechanical doll

The bottle is removable from the hand.. The doll is COMPLETE with or without the bottle. Our own design patents are pending.

America's TOYTOWNS will be full of PETITE Baby Dolls for XMAS

Here is a doll parade that pictures only a few numbers from the "Petite" line.

We can't show them all here and cold type simply will not do justice in describing them.

As one vitally interested in the SALES and TURNOVER of your doll department you owe it to yourself to see this line and find out WHY every buyer who has bought them has been so greatly enthusiastic about them.

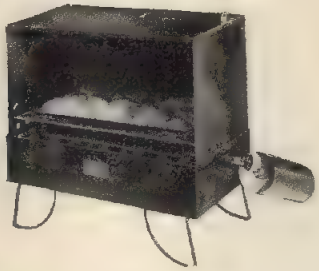
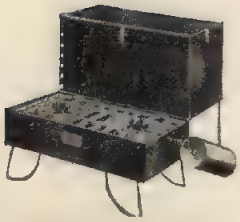
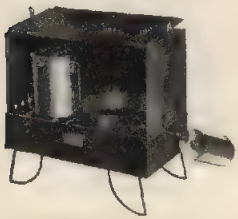
Welcome G. Young & Son, 116 Bedford Street, Boston, Mass.

Here is the New
AMERICAN KAMPKOOK
with built-in oven and heater





Kampkook No. 8 with oven grate removed and oven tipped back for use as warming closet.



The built-in oven, used as a wind-shield protects fire on all sides and top, making the No. 8 actually wind proof.

Can you imagine a more attractive and more salable camp stove than the popular American Kampkook with a fine folding oven, as handy and efficient as Kampkook itself built right into it?

Here it is—the new American Kampkook No. 8 with a big, roomy, built-in oven that bakes, broils and roasts just like a kitchen range.

It's more than an oven—it is a perfect tent heater, a real warming closet and in windy weather protects fire on all four sides and top, a new and highly important feature. And the price is as attractive as the stove itself. Write or wire for full particulars now. Address nearest office.

The Tiny Arcadians Start their "Pep" Campaign through National Advertising

Thousands of children will be told the story of ARCADE TOYS—thousands of letters will be written to Santa Claus asking to be remembered—hundreds of progressive dealers will "cash in" as a result.

Over 10,000,000 families are going to be told the story of the Tiny Arcadians and their nationally famous Arcade Toys within the next three months. Many of that audience will be children—and they are going to specify Arcade Toys in those all-important letters to Santa Claus.

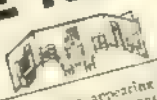
Arcade Toys have proved profitable business builders in hundreds of the best toy shops and stores in the past. They are going still stronger this year. Write us for catalog today, be prepared to "cash in" on your share of this profitable business

Ask Your Jobber for Prices.

The Tiny Arcadians find Santa Claus a stern boss!

ARCADE TOYS

They look real



One of a series of advertisements appearing in Ladies' Home Journal, Good Housekeeping, Child Life, and Junior Home Magazine

ARCADE MANUFACTURING COMPANY

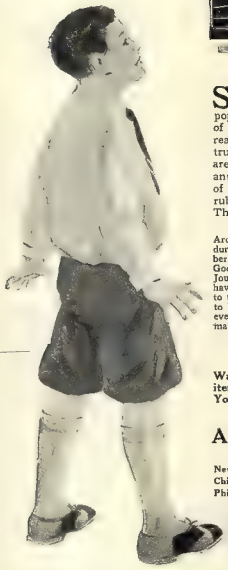
Creators of The Tiny Arcadians and Arcade Toys

FREEPORT, ILLINOIS

Ever increasing in popularity—and there are reasons why!

ARCADE TOYS

Made by the Tiny Arcadians



TOY DOUBLE DECK YELLOW COACH

STURDY cast iron toys, so designed and finished that they look like the real thing—is it any wonder Arcade Toys are popular with the children and toy dealers? With the final coat of bright glistening enamel, these toys represent to the children real playthings out of their everyday world; miniatures of cars, trucks, busses, tractors and many other items with which they are well acquainted. They appeal to the "kiddies" at once! Hours and hours of fun with Arcade Toys—no clock work to get out of order, and sturdy enough to stand the hardest knocks. Real rubber tires, too, can be furnished for all our automotive toys. The extra cost is small.

Arcade Toys are advertised nationally during the months of October, November and December. Such magazines as Good Housekeeping, Ladies Home Journal, Child Life and Junior Home, have carried the story of Arcade Toys to the thousands of homes urging them to buy their iron toys of you. Dealers everywhere are cashing in on the demand thus created.

Betty Bronson Cinderella Doll Makes Hit at Macy's Children's Party

More than one thousand Betty Bronson Cinderella dolls were sold at the children's doll party staged at Macy's department store, New York City, during the children's week held September 11th to 18th. Throughout the entire seven days thousands of women and children thronged before the demonstration booth, where the extraordinary story dramatizing doll was exhibited by two well-known actresses. The accompanying photograph shows Miss Virginia Crane, dancer (left), and Miss Naomi Staub, entertainer and singer, who were dressed in costumes like those on the Cinderella doll

On September 11th, the opening day, the Madame Hendron organization gave a doll party on the stage erected on the fourth floor, with many prominent screen celebrities in attendance. Nancy Kely, the five-year-old screen star, who has played with Gloria Swanson, Lois Wilson, and other big stars, was featured at this party. Many of the junior stars of the Paramount school of acting participated in the doll party on the stage. Hazel Forbes, who won the Hotel Astor beauty contest last year, and who is now under contract with the Famous Players-Lasky Corporation, told of interesting doll customs throughout the world.

Speaking of the great interest created by the Betty Bronson Cinderella doll at this demonstration in Macy's, Mr. Rudolph Hopf, President of the Averill Manufacturing Company, stated that the doll will undoubtedly develop into one of the largest sellers at the coming Christmas season

"It was amazing to watch the wonder and delight of the children and mothers when they witnessed the dramatization of the ever interesting story of Cinderella at the demonstration of the Betty Bronson Cinderella Doll

Effanbee Dolls Cheer Little Cripples

The Effanbee doll sign on the spare tire covering of Pete Shannon's car out in Pasadena, Calif., attracted the eye of one of the doctors of the Pasadena Emergency Hospital. He asked the Effanbee salesmen where the dolls could be obtained, because he found that they were a great relief to children in the hospital, who, previous to and after surgical treatment necessitated by auto accidents, etc. The good doctor wanted to place an order for a few dozen. Pete took the "order" and Effanbee filled it within two days, acompanied by a receipted bill.

The Eureka Pneumatic Spray Company, Richmond Hill, L. I., N. Y., are offering an innovation in spray guns. This house has been manufacturing sprayers for finishing purposes for over twenty-seven years. The latest development consists of an absolutely dependable self-centering arrangement of air and fluid nozzles on a spray gun, air nozzle being guided into and held in position by the fluid nozzle in a manner which precludes the possibility of these members being other than absolutely concentric. The latest improvement in the Eureka line assures accurate concentricity at all times and is practically fool-proof This latest air nozzle has a serrated central aperture, the inner portion of the serrations acting as a guide encircling the fluid nozzle, at all times assuring accuracy of position. At the same time it is found that this construction greatly benefits the spray which is delivered in a uniform density. This nozzle arrangement is embodied in Eureka gun sprayer No. 150, also in their container type of sprayer Model No. 44. It is also claimed through this improvement that the spray is delivered on to the surface of uniform density and leaving almost no perceptable blended edge, giving a result very close to that produced by a brush.

Arranbee Doll Company, manufacturers of "Nursing Bottle Baby" report a wide sale for this unique item. The unusual feature of this doll is the fact that to all appearances the doll actually drinks the harmless milk like fluid contained in the unbreakable bottle when the rubber nipple is placed to its lips. The bottle refils instantly as soon as the arm is returned to its natural position. Messrs. Artbaum and Rothstein of this company are enthusiastic over the reception which their item is receiving and state that in spite of the large influx of orders, their manufacturing facilities are being continualy increased to keep pace with the demand. This doll possesses a sweet baby face and is charmingly attired in long and short dresses cut in the prevailing mode.

Ordinarily, Santa Claus would find it somewhat inconvenient to tote around bowling alleys for depositing in the stockings hung by the chimney fireplace or to place under the Christmas tree, but The Brinkman Engineering Co., of Dayton, Ohio, make a bowling alley, which, while an exact duplicate of the regulation affair, is of sizable proportions for gifts. For durability, the Brinkman Bowling Alley is made entirely of metal, has automatic pin-setter, regular ball return, and is provided with spring-shooter, ten steel pins and two steel bowling balls. Altogether a fine game outfit and one that is appreciated by any youngster. The Brinkman Engineering Co. also features an exceptionally attractive line of toy telephones, well made and at a range of popular prices that makes selling easy to all classes of trade. For early delivery, to avoid disappointments during the holiday rush, the manufacturers advise immediate placement of orders.

Czechoslovak toy exports for the first six months of 1925 and 1926, with the principal countries of destination:

United States Largest Buyer of Czechoslovak Toys

Czechoslovakian exports of wooden toys in the year 1925 totaled 1,262 metric tons, valued at 15,588,000 Czechoslovak crowns, or $467,640, compared with 1,094 metric tons valued at 13,095,000 Czechoslovak crowns, or $392,850, in 1924. The principal markets for Czechoslovak wooden toys are the United States and the United Kingdom.

Statistical data prepared by the Czechoslovak Government total 1925 exports to the United States at 288 metric tons, to the United Kingdom at 369 metric tons, and to Germany at 267 metric tons. The German imports were largely reshipped to America. It is therefore safe to assume that the United States is the largest foreign market for Czechoslovak wooden toys. Other markets are France, Italy, Austria, and New South Wales.

In metal toys the United States is also the principal market, taking approximately 50 per cent of the total exports, its purchases in 1925 having totaled 103 metric tons valued at 1,387,650 Czechoslovak crowns, or $41,629. United Kingdom is the second largest buyer with 98 metric tons, valued at 1,244,111 Czechoslovak crowns, or $37,323. Other active markets are Poland, Austria, New South Wales, Yugoslavia, and Germany.

Czechoslovakia's Foreign Trade in Toys

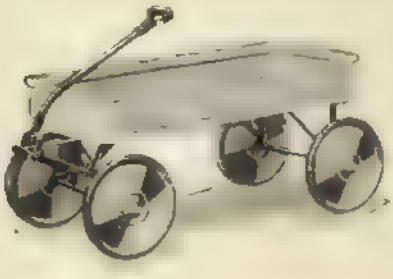
The foreign trade of Czechoslovakia in wooden and metal toys for 1924 and 1925 is shown by the accompanying tables.

Possibility for Sale of American Toys

If American toys can be placed on the market competitive with German prices, they should sell well. The type of toy which could most readily be introduced would be a metal novelty, because of small domestic production. Rubber and celluloid toys should also sell well.

[Lists of toy dealers may be obtained upon application to the Commercial Intelligence Division.]

Due to the demand for a low-priced All-Steel Coaster wagon, the Gendron Wheel Company has brought out a new number which they call the Bull-Dog. This wagon has found a ready market and sales have already reached a large volume and are showing a steady increase as the Holiday season approaches. The body is 15 x 31 inches made of heavy steel, large roll around top of box, sides beaded and top and bottom are joined by a heavy double lap seam. It has a new improved corrugated gear, roller bearing wheels, 9½ inch, heavy ¼ inch corrugated rubber tires, and a heavy tubular handle with handle bracket and U prevents handle from striking roll It is finished in a snappy red decorated with gold, with gear and handle black. While this wagon has been produced to sell at a price, the high Gendron quality has been retained.



R. B. & L. Mfg. Co. have scored heavily with their very handsome doll, having a head made of flesh tone rubber. It has the real bloom of healthy childhood, is washable, and, quite naturally, unbreakable. James A. Hearn & Son recently devoted an entire window to a display of these dolls and featured them in newspaper advertising with excellent effect.

James O'Brien, who has been one of the toy trade's leading lights for a quarter century, has taken over the management of M. Gropper & Sons. This concern, makers of Onyx and Cerise Marbles and Prima Agate, have been located on Union Square but their extensive business has made necessary a move to larger space, in the Fifth Avenue Building.

Mr. O'Brien entered the toy industry in 1901, with the New York Rubber Co., and was identified with this concern until 1923. In that year he went to the New York Ball & Toy Co. On the taking over of that concern by the Paramount Rubber Co., he decided to abandon rubber balls and toys, in favor of marbles. Mr. O'Brien's winning personality and thorough knowledge of toy conditions, coupled with the high quality of the M. Gropper & Sons line, augur well for the continued success of that firm in their new home at 200 Fifth Avenue.

An innovation in Christmas tree illumination is announced by the Decorative Products Co., 57 Walker Street, New York. This is the "Haupt Unit." These Units are large size decorative figures, for use in connection with ordinary Christmas tree lighting outfits. The Units are fitted with an "adaptor," which enables them to fit over an ordinary clear Christmas tree lamp. In this way, larger ornaments are possible, and when the bulb burns out it is only necessary to buy another low price bulb, as the decoration itself is not harmed.

The E. I. Horsman Co., Inc., have experienced an increasingly large demand for their HEbee-SHEbee dolls. These are the doll form of "Twelvetrees Kids." The creation of that famous artist appearing in magazines and newspapers of national circulation. Extra pressure has been put on the production department in the Horsman factory, in order to be sure to take care of all demands for HEbee-SHEbees for the Holiday season.

The Delta Specialty Co. are busy trying to catch up with orders for the "American Girl" Sewing Machine. They figure that it will take until November 1st to make enough of these machines to fill orders on hand. They will fill orders received from now on, in rotation, from the factory output after the 1st of November. They have received many complimentary letters from people who had early shipments of the "American Girl" Sewing Machines, praising its quality and appealing appearance and, highest praise of all, enclosing reorders.

The Jefferson Electric Mfg. Co. have recently made a change in their toy transformers. The Little Jeff Transformer is now made in two models—one delivering six secondary voltages, ranging from 5½ to 13 volts in 1½ volt steps, and the other also having six secondary voltages but arranged in 1 volt steps from 5½ to 10½ volts. Either model is made both for 50 to 133 cycles and 25 to 40 cycles.

The Moline Pressed Steel Co. have gotten out a little booklet, which should prove very valuable reading to all merchants and salespeople selling the "Buddy L" products. The booklet contains a series of questions and answers regarding "Buddy L" playthings, and also a brief outline of the origin of "Buddy L" toys and a description of the numbers now included in the line. The idea for this booklet was conceived when a young man, selling "Buddy L" toys for one of the large stores in New York, asked a visiting representative of the Moline Pressed Steel Co. a number of questions about the line, with the idea of preparing himself to better talk about the goods and, as would naturally follow, of improving his sales. The questions and answers made such an interesting story and were of so much value to him in increasing his sales, that he suggested that Moline Pressed Steel Co. pass on the information to every person whose duties bring him in contact with the "Buddy L" line of steel playthings.

The American Flyer Mfg. Co. has gotten out an attractive full color window display cut-out in two sizes—one about 4 ft. high, and the other 10 in. high. They are also supplying a window hanger featuring the same illustration. The accompanying illustration shows this American Flyer dealer help but, of course, cannot do it justice in black and white, as the splendid colors of the cut-out and window hanger are sure to command attention.

Selchow & Righter Co. announce that they have purchased the sole rights to "Sumrun" The American Minaru, and are now offering this popular game to the trade. This game includes a lithographed playing board depicting a race track and a board showing the odds that each horse is entitled to. Five beautifully lithographed metal horses and a set of attractive poker chips comprising 50 in number are also furnished. This game can be purchased with or without playing cards Full directions are furnished with each game which comes packed in an attractive box. "Sumrun" provides no end of excitement and in view of the fact that any number can play, it is suitable for parties, clubs and all sorts of social gatherings.

An excellent tie-up with that popular form of entertainment—the movies, has been affected by the Ted Toy-lers, Inc. This company manufactures a toy called "The Blue Walking Sailor," which bears a very close likeness, both in design and action, to Billy Dooley, well known screen comedian appearing in pictures released by the Educational Film Exchanges, Inc This Ted Toy makes a fine feature for a window display during the showing of Billy Dooley pictures at local theaters Many buyers are arranging to have the movie exhibitors furnish them with large display pictures from the Dooley Comedies, to be used in connection with the toys. Another tie-up, beneficial to both toy store and movie house, is to have a display of walking sailors in the lobby of the theater.

An innovation in the doll carriage line has been put on the market by the Children's Vehicle Corp. This is the "Park Parader" outfit, consisting of a C.V.C. doll carriage, cretonne top cover and a nursemaid's apron to match. The doll carriage is of fiber reed, with an 8-inch x 16-inch body and 6-inch wheels, and is furnished in cream, chocolate, grey or blue. The cretonne cover goes over the hood, and the nursemaid's apron, for the little girl to wear while wheeling her doll, is made in cretonne with a fluffy silk like edging. This new idea in doll carriage adds color and novelty to an already popular line

The "ParkParader" is one of ten C.V.C products. Others in this well known line include baby carriages, wheel toys, strollers and juvenile and adult furniture. Including the latter, is a line of bungalow furniture, which is becoming increasingly popular for both winter and summer use in bungalows and small apartments. There are several suites, ranging from three to ive pieces, and they are made in one-tone and two-tone finishes.

The Beauty Doll Manufacturing Co., New York City, is offering an unusually attractive item in "Peaches," a mama doll with sleeping-eyes that stands thirty inches high, made of stuffed body with unbreakable head, legs and arms, and with genuine human hair wig of long curls. It is neatly dressed, and individually boxed. "Peaches is big in value as well as big in size, and is offered to the trade at the remarkably low price of $48.00 per dozen. Buyers on the lookout for bargains of impressive proportions would do well to look into this

Irish Toys

Dublin, Sept. 11.—A factory for the production of a wide variety of toys for exportation is successfully established in the city of Galway. Its customers are chiefly English purchasers who turned to it when the world war excluded German toys from the British market. The saorstat imports annually about $200,000 worth of toys, and the official trade journal urges home buyers to try Galway.

Toymaking in Shanghai

Because it has modern machinery and is able to use mass-production methods, Shanghai is getting to acquire supremacy in the Chinese toymaking business, writes Reginald Sweetland in a recent issue of the Chicago News. Though the craft is centuries old, only within recent years has machinery been used in it to any great extent. Shanghai has three toymaking establishments, the oldest of which turns out as many as fifty different kinds of wooden toys. The China Industrial Training works also has a toy department and manufactures 495 different types of toys of wood, rubber, tin and clay. These are distributed all over China, as well as in the Straits Settlement. The products are distinctly western in type and include harmonicas, automobiles, steamships and pistols

The toy trade will be glad to know that Irving Fink, president of the Ay-Won Toy & Novelty Corp., who has been seriously ill with pneumonia, is now on the road to recovery, and his genial smile will soon be seen again among the trade. Mr. Fink and Alex Ginsberg, treasurer of the Ay-Won Corp., expect a big holiday business this year, and are preparing accordingly

Atlantic Toy Mfg. Co., makers of baby and mama dolls, are offering a specialty toy at this time that should make many friends as a twenty-five-cent seller. It is called "American Boy Parlor Basket Ball Game" and is sold in knock down form for easy shipping. A rubber ball is provided with each outfit and each game is packed in an attractive cardboard box, lithographed in red and green.

One of the large toy stores in Long Island offers a bonus to their sales force for selling suggestions and putting one of these suggestions into effect a few weeks ago met with unexpected success. The "Radio Ring Game," No. 101 of the American Game and Toy Corporation, had been attracting attention in a moderate way, but the sales suggestion was made to make a prominent display in the window and offer a game to the one who made the largest total in nine shots. The offer took at sight. The line formed to await their chance and feeling sure they could beat their own score, if they had more practice, the big majority bought a game to take home This experiment was so successful that it was repeated in two weeks with even better results then the first.

Rockaway Mfg. Co. makers of Safety Walkers at Cincinnati and the Edwards Mfg. Co. makers of the Ranger Line of Repeating Cap Pistols at Cincinnati have made the Davis & Voetsch salesrooms, 242-250 Fourth Ave. their New York office. Arthur Guterman is in charge of these two lines

W. W. Vail With Wolf

Just as we go to press we learn that W. W. Vail has been appointed buyer and manager of Louis Wolf & Co.'s domestic toy department. A more complete notice will be given in the next issue

EASTER!

The Holiday Rush Must Not Work to the Neglect of Easter.

Plan Your Display Feature Attractions and Buying Now.

Owing to the sudden and serious illness of F. L. Reukauf, who does the buying for several of the departments of the Leader Mercantile Company of Minneapolis, and which illness necessitated Mr. Reukauf's removal to a hospital while in New York during September, the duties of making supplemental purchases in New York of other lines besides toys devolved upon J. Kriedler of the toy, house furnishings and sporting goods departments

Dolls Showed Trend of Fashion to 1950 Exhibit by A. & S. of Brooklyn

COSTUME dances showing the changing fashions from the time of "Eve" to 1950 were given by animated puppets in the Abraham & Straus booth at the Brooklyn Industrial Exposition at Grand Central Palace, September 27th to October 9th. Emphasis was placed on the authentic styles which the Abraham & Straus store has helped to introduce while "serving Brooklyn since 1865." A prologue showed the starting point almost right over again in the probable vogue of 1950. Each costume dance from 1865 to the present time was accompanied by a song of the period.

Twenty-four marionettes participated in the review. The relative importance of the male in developing fashions was indicated by the fact that three of the dolls were men, while twenty-one were girls. All of the puppets were high-grade felt dolls

Performances lasted forty minutes each, starting every hour from 1 to 10, except at 6 p. m. Two of the numbers of especial interest were those displaying the styles of 1893 and 1875. The former was a "gored skirt" copied from a *Vogue* fashion plate of the period. In the 1875 number—a "bustle girl" danced the polka.

A man went into a shop and asked for a comb.

"Do you want a narrow man's comb?" asked the clerk.

"No," said the customer, "I want a comb for a stout man with rubber teeth."—*London Opinion.*

Can Be Adapted for Store Use

Concrete Coasting Track in Golden Gate Park

THE most unique coasting track in the world is located in Golden Gate Park, San Francisco. Six hundred feet of concrete-lined roadway, having an easy gradient of 3 per cent at the start to give the youngsters sufficient momentum, and then leveling out to a 2 per cent grade for the remainder of the distance, makes an ideal coasting track for the children and insures that their speed be kept within the limits of safety without robbing them of the thrills of coasting

Twelve cars, painted in vivid blue, green, yellow and red; the three wheels rubber tired and with footrests on the steering post, make coasting de luxe possible for the kiddies; but best of all, at the end of the journey the cars are put on an electrically operated conveyor platform and hoisted to the starting platform for the next trip.

One photo shown here shows a girl coaster speeding around the bend which is banked while the other shows her coming down the home stretch.

The erection of this wonderful coaster was made possible through the generosity of Mr. Herbert Fleishhacker (one of San Francisco's most public-spirited citizens) who furnished $5,000 for the construction of the coaster.

Owing to the sudden and serious illness of F. L. NOTICE—When ordering always give the name, year and model of car as well as number of battery.

FIRE EXTINGUISHERS

Boyce Fire Syphon

Endorsed by Fire Underwriters and all well known Fire Engineers; this instrument rightfully belongs in every home, garage, motor car, motor boat and factory. Case is made of heavy undentable seamless brass, with a beautiful "Matt gold" finish that cannot tarnish and is everlasting; valve parts made of monel metal absolutely positive in operation; equipped with a panic proof handle, pumps easily and springs into action immediately when turned in either direction, holds one quart of Boyce fire chemical, a small quantity of which smothers the fire; can be refilled after use; has rust-proof bronze plate with directions always visible, also fitted with radium dial by which the instrument is easily located in darkness.

Each

No. BFS—Capacity 1 quart; length over all 14 inches; diameter 3 inches; weight each 8 lbs. **$15 00**

One in a carton, complete with bracket

Pyrene

Made entirely of brass; operated by turning to left and working like a pump; approved by the National Board of Fire Underwriters, liquid is a chemical combination of purely organic materials, having an aromatic odor and a high specific gravity, and as it touches the fire it is converted into a dense white gas blanket which surrounds the fire and smothers it instantly; will not stain the most delicate fabric or injure anything with which it may come in contact; does not lose its strength or deteriorate with age; will not freeze at temperature of 60 degrees F. below zero. Length over all 14 inches; diameter 3 inches; complete with black enameled bracket

Each

No. PFE—Capacity 1 quart; polished brass; weight each 6 lbs..... **$16 00**

One in a cardboard box

Pyrene Fire Extinguisher Liquid

For refilling Pyrene Fire Extinguisher

Per Can

No. PL—Capacity 1 quart; weight 3½ lbs..... **$2 25**

In screw top tin cans

Aaron

Approved by National Board of Fire Underwriters; made of copper, polished; throws stream 50 feet; tested to a safety factor of 585 lbs.; hook for hanging; complete with chemical charge.

Each

No. AFE—Capacity 2½ gallons; length 25 inches; diameter 7½ inches; weight each 16 lbs..... **$24 00**

One in a carton

Stempels; Foam Type

The same general appearance as the Aaron; made of copper, polished; approved by the National Board of Fire Underwriters; the foam charge used is known as Amdyco, each and every bubble contains carbon dioxide, a tube the full length of the inside contains aluminum sulphate, and when turned over for use against the fire, the two agents coming in contact with each other create a spread over the surface, cutting off the supply of oxygen, and so quenches the fire

Each

No. SFT—Capacity 2½ gallons; length 24 inches; diameter 7½ inches; weight each 25 lbs..... **$38 00**

One in a carton

Stempels; Hand Pump

Approved by National Board of Fire Underwriters; made of heavy galvanized steel; painted on inside with a heavy coat of asphaltum and outside with red enamel; high quality brass pump, double action and acid resisting; three ply fabric non-kinkable hose; simple operation of the pump enables the operator to throw a continuous stream 45 to 50 feet, will not freeze at temperature of 40 degrees F below zero.

Each

No. SHP—Capacity 5 gallons; length over all 27½ inches; diameter 9½ inches; weight each 30 lbs..... **$30 00**

One in a carton

CONSIDER

Who Sells The A-C Dayton.

If anyone should know the respective merits of the various radio receivers on the market, it is the jobber, who sooner or later sees all of them.

The A-C DAYTON is not only sold by leading jobbers throughout the country but is universally endorsed by them. They like it because it sells and then stays sold—which means greater profit for all concerned.

Such a receiver deserves investigation, at least. Tear off this corner, sign your name in the margin and mail to us. We will send you full information.

The A-C Electrical Mfg Co.
Dayton, Ohio.

FAN STEEL

Balkite Radio Power Units

The Balkite Radio Power Units convert any radio set into a light socket receiver, without changes and additions. All Balkite Radio Power Units are permanent pieces of equipment. They have no bulbs and nothing to wear out or require replacement. All are built to conform with the standards set by the Underwriters' Laboratories.

The Balkite Trickle Charger

Balkite Trickle Charger, Model K. For radio "A" batteries. Charging rate approximately .5 amperes. It eliminates the attention usually required by the "A" battery and converts the battery into a complete radio power unit supplying "A" current from the light socket.

Can be used as a trickle charger with any 6-volt "A" battery. With 6-volt batteries it can be used as intermittent charger. Or as a trickle charger if a resistance is added. It is noiseless in operation and in most instances can be used during reception.

Operates from 110-120-volt AC current. Models for both 60 and 50 cycles. Watts consumption, 15. Dimensions, 5½" high x 6½" long x 2¾" wide. Net weight, 4½ lbs. Weight, packed, 6½ lbs.

No. 3R17. Each..... **6.50**

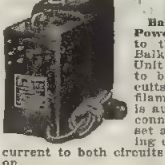
New Balkite Charger with Trickle and High Charging Rates

Balkite Charger — Model J. For either 4 or 6-volt "A" batteries: A low rate which, when used on continuous or trickle charge, will usually be enough to keep the storage battery at full power. A high charging rate for heavy use. It combines the advantages of Trickle and rapid charging. Charging rates: to 6-volt battery, high rate, 2.5 amperes, low rate, .5 amperes. To 4-volt battery, high rate, .8 amperes; low rate, .2 amperes

Operates from 110-120-volt AC current. Models for both 60 and 50 cycles. Also for 24-40 cycles with 1.5 amperes high rate. Dimensions, 7⅝" high x 8⅜" long x 5⅝" wide. Net weight, 14½ lbs. Packed weight, 20 lbs. Watts consumption at high rate, 60; at low rate, 6 volts, 13 watts; 4 volts, 9 watts.

No. 3R15. Each..... **12.68**

The Balkite Combination Radio Power Unit



Balkite Combination Radio Power Unit. When connected to the "A" battery this new Balkite Combination Power Unit furnishes automatic power to both the "A" and "B" circuits. It is controlled by the filament switch on the set and is automatic in operation. Once connected to the battery and set and plugged into the lighting circuit, it delivers full even current to both circuits whenever the set is tuned on.

The Balkite Combination will serve any set now using either a 4 or 6-volt "A" battery and requiring not more than 30 milliamperes of "B" current at 135 volts. This includes practically all sets up to 8 tubes.

Operates from 110-120-volt AC current. Models for both 60 and 50 cycles. Watts consumption, 15. It is very small. Dimensions, 8¾" high x 4¼" wide x 14" long. Net weight, 20 lbs. Packed 30 lbs.

No. 3R25. Each..... **38.68**

Balkite "B"

Balkite "B" replaces "B" batteries entirely and supplies plate current from the light socket. It is radically different from all other "B" devices. It is entirely noiseless in operation. It uses no tubes, and has nothing to wear out or require replacement. It is a permanent piece of equipment. It does not deteriorate from use or lying idle. Its current cost is negligible. With sets of high current requirements its use effects a considerable saving. Because of the low resistance circuit, its current output is secured without the use of dangerously high voltages. After connection to the set it requires no adjustment.

Balkite "B" is made in three models, Balkite "B"-W, Balkite "B"-X and Balkite "B"-Y. To take care of the requirements of any set. All models operate from 110-120-volt AC current. Models for both 60 and 50 cycles.

Balkite "B"-W

Model W. The new, popular priced model. Recommended for sets having 5 tubes or less and requiring 67 to 90 volts. Has separate tap for detector tubes. Watts consumption, 7. Size, 8" x 8⅛" x 3¼". Net weight, 11 lbs. Packed 14½ lbs.

No. 3R22. Each..... **17.88**

Balkite "B"-X

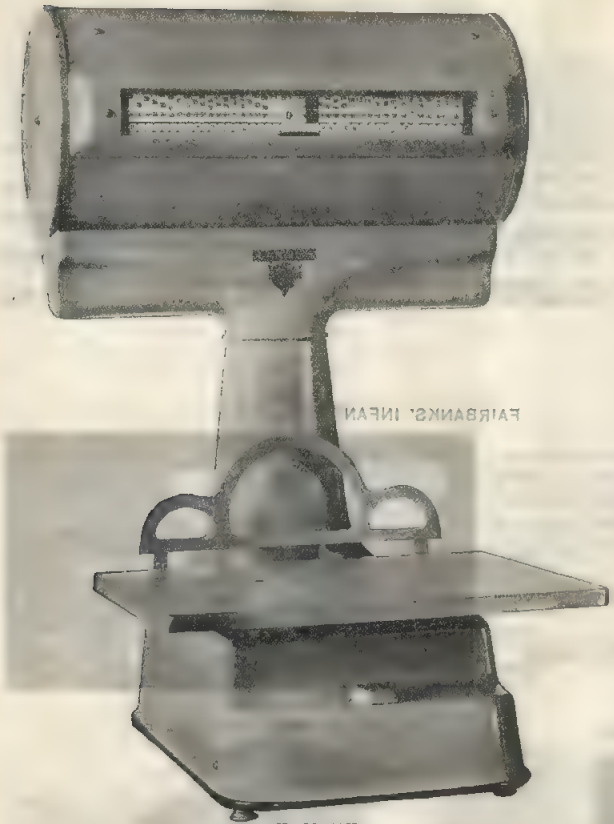
Model X. Recommended for sets of 5 to 8 tubes or less (including power tubes) where 90 to 135 volts are required. Intermediate and detector taps give proper output for the various circuits. Output rating, 30 milliamperes at 135 volts at 115 line volts. Watts consumption, 12. Size 8⅜"x8⅜"x4½". Net weight, 14 lbs. Packed 21 lbs.

No. 3R23. Each..... **27.30**

Balkite "B"-Y

Model Y. This universal unit has a very high output and will serve practically any standard set now on the market, including the largest. It is specially designed for sets using the new UX112 and UX171 power tubes. It meets the needs of very large sets where volume and tone quality are required. It has sufficient volume for hall use. It is provided with taps for small sets. Its low resistance circuit gives excellent regulation over the entire operating range. Output rating 40 milliamperes at 150 volts at 115 line volts. Watts consumption, 17. Size, 8⅜"x13"x4½". Net weight, 29 lbs. Packed 38 lbs.

No. 3R24. Each..... **44.85**



No. M-10AH.

Two-way spirit level indicating in both directions. Always in plain sight.

Oil dash pot, using any good light oil. Very readily adjustable

Large aluminum platform, 16x12½ inches.

Column set forward on top of base, bringing reading line of chart closer to operator.

Double knife edge pivots resting on self-aligning agate bearings, doing away with counter-balance weight, insuring accuracy and long life.

Automatic thermostat of simple and light weight construction, which maintains absolutely the accuracy of the scale under all temperature conditions

Optional Charts.

TRENCH OR SEWER BRACES

DUFF ALL IRON

Forged Steel, Malleable Iron and Oversize Bolts Used Throughout

Universal Ball and Socket Swivel Ends allow brace to grip tight at all angles. Can be used year after year and are therefore more economical than timbers and wedges that can only be used once. Can be put to use immediately and no time is lost cutting wedges, blocks, etc.

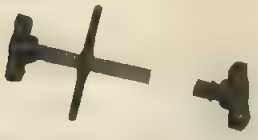
Ball and socket joints adjust themselves automatically.

Size Screw, Inches	1⅛x12	1⅛x14	1⅛x14	1⅛x16	1⅛x16
L'th Brace Closed, In.	18	21	24	27	30
Wt Doz., Lbs., Comp.	210	222	234	246	256
Per Dozen, Complete	$23.00	24.00	24.00	26.00	26.00

Length given is over all measurement of brace when closed. Take extreme width of trench, deduct for planking on both sides of trench (usually about 8 in.) and a few inches for variations in cut. The remainder will give size of brace wanted, the screw being extended to tighten brace in position.

TRENCH OR SEWER BRACE FITTINGS

DUFF ALL IRON, EXTENSIBLE



Ordinary Gas Pipe All That is Used for Barrel

Contractor need only cut own pipe to length required, and drill small hole at one end to insert a cotter pin, which holds brace together.

Size Screw, Inches	1½x12	1⅝x14	1½x16
Weight Per Dozen, Lbs.	185	192	204
Per Dozen, Complete (without Pipe)	$20.00	21.00	22.00
Screw Ends Only, Per Dozen,	15.00	16.00	17.00

JACKS

GENUINE BARRETT AUTOMATIC LOWERING

No. 50

An eccentric at the side controls the reversing mechanism, a half turn of the eccentric changes the direction of the jack.

Double-acting, lifting load on both up and down stroke of lever. Heavy construction wood operating handle

Frame or Base is Malleable Iron, Rack is Forged Steel Oil Toughened with Machine Cut Teeth. Case Hardened Steel Bearings.

Nos. 2 and 4

No. 50 is particularly adapted to the rapid handling of machinery of all kinds.

Nos. 2 and 4 are standard for all general purposes and are universally used.

	Each
No. 50—Capacity 5 Tons, Height 16 in., Raise 8 in., Weight Complete 35 Lbs.	$16 00
No. 2—Capacity 10 Tons, Height 21 in. Raise 10 in., Weight Complete 70 Lbs.	25 00
No. 4—Capacity 15 Tons, Height 22 in., Raise 10 in., Weight Complete 106 Lbs.	35.00

JACKS

GENUINE BARRETT TRIP OR TRACK

Leverage is compound and double acting, raising the load on both the upward and downward strokes of the lever

Load is instantly dropped from any elevation by means of the trip at the side of the socket lever. Positive and quick in action

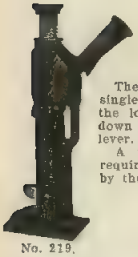
Rectangular shaped base, ribbed. Machine finished working parts.

Round Socket Lever and Wooden Operating Handle

Each

No. 1—Capacity 10 Tons, Height 25¼ in., Raise 13½ in., Weight 70 Lbs..... $22 00

GENUINE BARRETT AUTOMATIC LOWERING



These Jacks are single-acting, raising the load only on the down stroke of the lever.

A wide variety of requirements are met by these two Jacks.

No. 219. No. 18.

Single Acting

No. 18 is widely used by contractors, bridge builders, industrial plants, railways, etc.

No. 219 is specially suitable for handling empty and lightly loaded freight cars.

SIMPLEX TRACK AND BALLAST

Tripping Type, Double Action

Operates on the upward and downward stroke of the lever.

The principles, design, construction and low element of friction, together with the trunnions, square sockets, lubricant retaining bearings, and the forged and heat treated steel rack bars and pawls of .40 to .50 carbon, have produced results that have earned the approval of thousands. The fulcrum centers are the shortest of any Track Jack built.

Square Socket, without Pole

Each

No. 101—Capacity 10 Tons, Height 23 in., Lift 12½ in., Weight 58 Lbs..... $21.00

JACKS

SIMPLEX SINGLE ACTION

Automatic in raising and lowering, operated on downward or effective stroke of the lever.

A perfect tool built for rough and continuous service.

The standardized hollow base is particularly valuable when Jack is being used upon an oily shop floor or on a rough or uneven ground surface.

Short arc of travel of the lever socket is indicative of the short fulcrum centers and the man-power that is readily developed.

Each

No. 22—Capacity 10 Tons, Height 21¼ in., Lift 12 in., Weight 58 Lbs., Round Socket and 5 ft. Round Steel Lever Bar..... $25.00

SIMPLEX CAR AND INDUSTRIAL

The most powerful 15 Ton Automatic Jack on the market

Particularly adapted for steam and electric railway service, car shops, contractors, steel mills and general industrial duty.

Built without a machine screw. Equipped with Simplex Oval Socket and 6 ft. Oval Pole

Each

No. 20—15 Tons, Height 28 in., Lift 18 in., Weight 110 Lbs $40.00

SIMPLEX CAR AND INDUSTRIAL

A practical tool for shop use, mining equipment, motor trucks, electric railways and general industrial service.

Steel adjustable shoe is a useful feature in handling loads of variable heights. It can be instantly adjusted to the truck frames or arch bars and the body lifted on the cap.

Single Action

Each

No. 56—Capacity 7½ Tons Height 17 in., Lift 8¾ in., Complete with 5 ft., Steel Lever, Weight 44 Lbs. $30.00

SIMPLEX MINE AND INDUSTRIAL

Single Action, Automatic Raising or Lowering

Operates on the downward or effective stroke of the lever. Built upon the basic principle of safety. Has a surplus of power and a factor of safety for every emergency

Built exclusively of high carbon steel drop forging with malleable standard and equipped with steel lever bars

Capacity 5 Tons

One Dozen in a Case

RAILROAD LANTERNS

DIETZ "STANDARD"

For Signal Oil

Bright Tinned Steel, gives a Light of 2 Candle Power, Extra Special Screw Ratchet Burner, 1 in. Wick, Plain Heat Resisting "Vulcan" Globe.

Per Dozen

No. 39—10 in. High, Burns 24 Hours on One Filling, Shipping Weight Per Dozen 43 Lbs. **$28.50**

Made with a solid metal bell bottom and inside oil pot, which cannot drop out. Substantial round wire guard protects the globe. Globe and loose oil pot lift in and out when the top of the lantern is turned back on its hinge. Outside wick raiser.

A well balanced dependable signaling lantern.

One Dozen in a Case

DIETZ "VESTA", COLD BLAST

For Kerosene

Bright Tinned Steel, Gives a Light of 3 Candle Power, No. 600 Long Cone Burner, ⅝ in. Wick, Plain Heat Resisting "Vesta" Globe.

Per Dozen

Vesta—11 in. High, Burns 16 Hours on One Filling, Shipping Weight Per Dozen 42 Lbs. **$31.85**

This "Vesta" Kerosene Railroad Lantern excels the best of signal oil lanterns on practically every vital test of efficiency. It costs less to operate, gives more light, makes brighter, more easily read signals and stays lit in any weather. It is equally easy to clean, fill and light.

The oil pot fastens to the body of the lantern by a positive locking patented device operated by a twist of the hand. The top tips back to permit removal of globe. The wick raiser is outside

One Dozen in a Case.

ADLAKE KERO

For Kerosene

Bright Tinned Steel, Rigid Metal or Wood Bail, Convex Burner, ⅝ in. Wick. Plain Adlake Globe

Per Dozen

No. 250-A -9 in. High, Burns 20 to 26 Hours on One Filling, Shipping Weight Per Dozen 36 Lbs. **$48.00**

The rigid bail gives the user a larger hand grip

The encased oil pot eliminates the danger of losing a signal through the loss of the oil pot.

Note—When ordering, always state if metal or wood bail is wanted.

One Dozen in a Case.

MOORE WOOD BAIL

For Signal Oil

Bright Tin, Retinned, Wood Bail, Brass Burner, ⅝ in. Wick, Plain Short Globe.

Per Dozen

No. 1—8¾ in. High, Burns 12 Hours on One Filling, Shipping Weight Per Dozen 22 Lbs. **$48.00**

This lantern is light in weight and is of the popular short body type

One Dozen in a Case.

One in a box

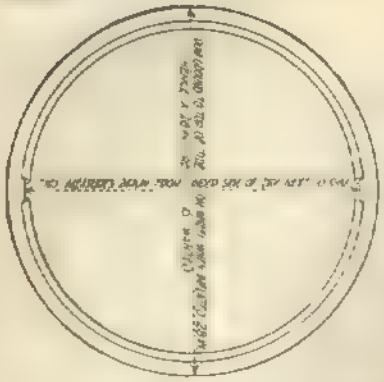
BICYCLE TIRE MEASUREMENTS



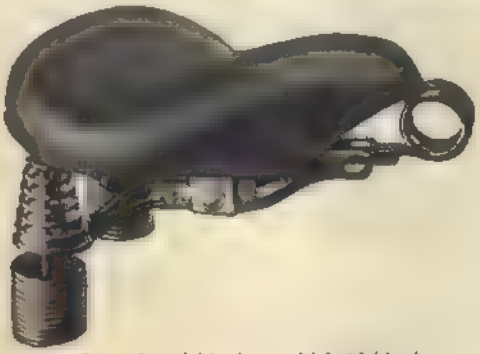
In order to procure the proper size tires to fit the different size wheels, we show below the correct way to measure a wheel for the size of the tire required.

To get size of tire wanted, measure straight across wheel from center of under side of tire next to wheel.

Wheel measuring 17 inches needs a 20 inch tire.
Wheel measuring 19 inches needs a 22 inch tire.
Wheel measuring 20½ inches needs a 24 inch tire.
Wheel measuring 22½ inches needs a 26 inch tire.
Wheel measuring 24½ inches needs a 28 inch tire
Wheel measuring 26½ inches needs a 30 inch tire.

Measuring from the ground to the top of the tire when inflated will show size of tire needed, as is shown by the perpendicular measurements

BICYCLE SADDLES



Motorbike

Fine leather seat top is hair padded and formed to fit the shape over a 5-ply veneered wood base, frame and springs of best steel; cushion comfort rear springs with front nose coil; light and very strong.

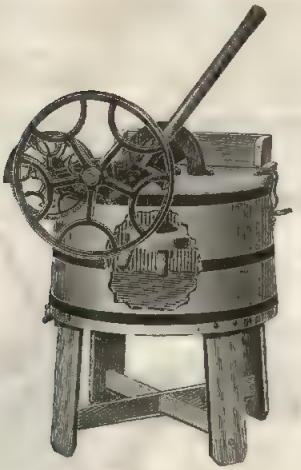
QUALITY.



A noiseless machine that runs very easily, due to the bearings being perfectly balanced. It is equipped with ball bearings, all friction is eliminated.

Dolly or dasher is of latest improved type with shield on bottom to protect clothes from injury. The finest and most delicate laces as well as coarsest fabrics can be washed without injury.

Has latest improved cover lock, all gears are protected with shields; has double socket for operating handle, allowing operator to sit or stand when using machine.

Has cut gears, ball bearing fly wheel and post. Segment gear and handles are malleable iron, legs are bolted to tub and braced with quarter inch rods. Wringer board is hinged and cover fastener is bolted on. Bottom drain has screw outlet which allows all water to drain out.

Tub is made of selected Louisiana Cypress, finished in a dark oak finish, hoops are heavy steel and finished in gold bronze.

Each

No. B-BQ—Blackstone Quality; capacity of tub, 22 gallons; dimensions of tub, depth 12 inches, diameter of top 24 inches, diameter of bottom 26 inches; weight each crated, 100 lbs. $22 50

One in a crate.

BELT POWER PULLEYS.

Convert the Quality hand power washer into a combination hand and power washing machine. Pulley made for flat belts.

Each

Belt Power Pulleys—For No. B-BQ washers..... $2.00

No. B-1005—Post Gears; for No. B-BQ washers..... .70

IMPROVED CAPITAL.

The improved Capital Water Power Washer is guaranteed to operate successfully and do the work thoroughly if water pressure is 20 pounds or over. It contains all the good points found in best water motor machines including the following:

Safety dasher which prevents the tearing of clothes. Polished brass motor which is rust proof, no danger of sand holes like the cast painted motor, has large size roller back of gear rack which is concave on top to hold oil. No danger of gear rack getting bent out of shape.

Intake pipe has intake pipe to prevent dirt entering motor-hose is wire wound with weight on exhaust hose.

The motor is made with paupet valve and brass springs; paupet valves always seat themselves and the longer they are operated the tighter they become thus saving power; they act very quickly and take less power than the sliding valves.

The tub is made of everlasting Louisiana Red Cypress, extra large size with stave legs, handsomely finished, nicely varnished, gold bronze hoops and trimmings.

Each

No. B-CPB—Blackstone Water Power; capacity of tub, 22 gallons; dimensions of tub, depth 12 inches, diameter of top 24 inches, diameter of bottom 26 inches; weight each crated, 100 lbs.....$25 00

One in a crate.

For Washing Machine Water Ejectors, see page 412.

BLACK & DECKER Engine Kits

The Illustration shows the UNIVERSAL KIT, which contains an assortment as shown below and is suitable for about 95% of the cars, trucks and buses in use today.

A high grade metal tool kit, with lock, containing the new Black & Decker Heavy-Duty Quarter-Inch Portable Electric Drill together with a complete assortment of Electric Drill Tools for cleaning carbon, valve reseating, and light grinding. There is plenty of room left so that you can carry an assortment of drill bits, so that the Quarter-Inch Electric Drill and everything that goes with it may be kept together under lock and key; and when you take your Black & Decker Engine Kit to a job you have everything together—no running back and forth.

PRICE

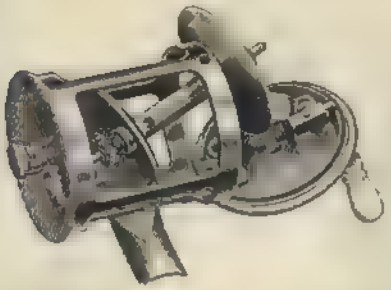
FISHING REELS



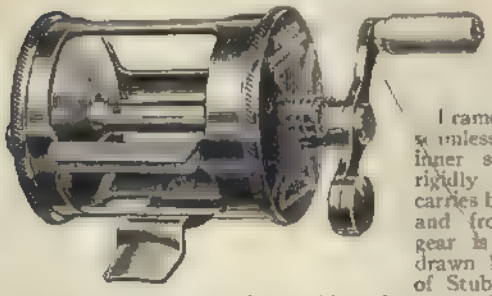
Samson

Quadruple multiplying; "Takapart" type with front plate hinged to frame; spool easily removed; seamless drawn brass frame, discs and reel seat, satin finish; hard-ened steel shaft and pivots set in bronze bearings; carefully cut gears insure utmost smoothness of action; has back sliding click.

Per Dozen

No. 500—Capacity 60 to 80 yards, weight per dozen about 7½ lbs. **$72.00**

One in a box



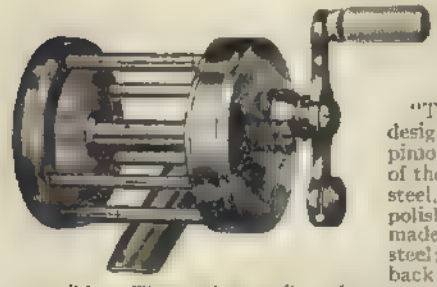
Blue Grass "Simplex" With Thumb Rest

Frame made of one piece seamless tubing, threaded on inner side; front plate is rigidly fixed in frame and carries bearing for both gears and front pivot of spool; gear is of one piece hard drawn brass rod; pinion is of Stub's steel, cut on rod running through spool, thus making pivot and pinion one solid piece; reel made entirely of nickel silver and brass, all brass parts heavily nickel plated.

Per Dozen

No. 33—Capacity 120 yards, diameter of discs 1⅝ inches; width of spool 1⅜ inches **$192 00**

One in a box, weight per dozen 6½ lbs.



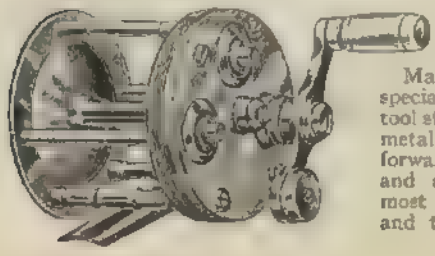
Blue Grass "Simplex" Quadruple Multiplying

"Takapart" reel of improved design; made of nickel silver, pinion and gear stud are made of the very best imported Stub's steel, tempered, ground and polished; click and spring are made of the best oil-tempered steel; the sliding click is on the back end of the reel and is easily accessible. This reel is easily taken apart for cleaning and oiling by unscrewing cap at back end and thumb nut on front end.

Per Dozen

No. 25—Capacity 85 yards, diameter of discs 1⅜ inches, width of spool 1½ inches **$240 00**

One in a box, weight per dozen 11 lbs.



Meek Quadruple Multiplying

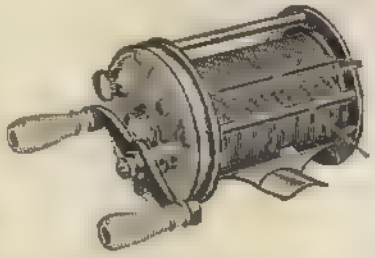
Made of watch nickel silver; special steel gears; tempered tool steel pivots and anti-friction metal bearings; balanced handle forward, with click and drag and screw off oil caps. The most popular reel for angling and tournament casting.

Per Dozen

No. 3M—Capacity 120 yards; diameter of discs 1⅝ inches; width of spool 1½ inches **$480 00**

One in a chamois bag in a box; weight per dozen 7½ lbs.

FISHING REELS



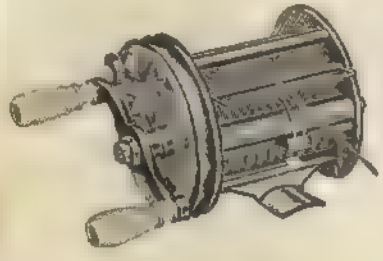
Oreno—Anti-Back-Lash

Satin finish with double grip; quadruple multiplying gear; dual size; by a single adjustment can be converted into a reel of the ordinary type; either way it has a smooth, easy, free running action.

Per Dozen

No. 900—Capacity 100 yards; diameter of spool 1⅝ inches; width 1⅜ inches; weight per dozen 8 lbs. **$104 00**

One in a box



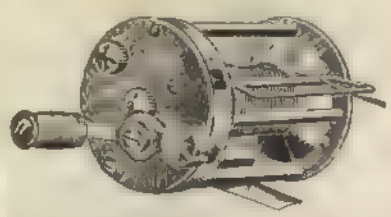
Oreno—Level Winding Anti-Back-Lash

Thumbing and spooling are entirely eliminated; it cannot back-lash, snarl or tangle; automatically spools itself, winding the line smooth and even; of dual use and by a simple adjustment can be converted into a straight level winding reel; satin finish with double grip; quadruple multiplying gear.

Per Dozen

No. 1000—Capacity 100 yards; diameter of spool 1⅝ inches; width 1⅜ inches; weight per dozen 9 lbs. **$136 00**

One in a box



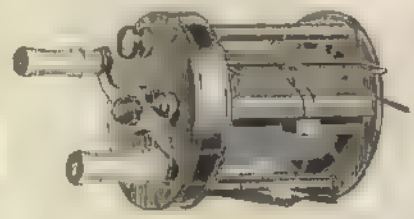
South Bend Anti-Back-Lash

Quadruple multiplying; best quality German silver frame; balancing crank with ivoroid handle; adjustable jeweled spool caps; tool steel spool pinion running in steel journals; phosphor bronze bearings; special cut hard drawn brass train gears; back sliding click; adjustable screw on front plate to regulate tension of brake or anti-back lash device; this device can be released by this adjusting screw and reel can be operated and thumbed as an ordinary reel.

Per Dozen

No 1131—Capacity 100 yards; diameter of discs 2 inches; width of spool 1¾ inches; weight per dozen 7½ lbs. **$160 00**

One in a box



South Bend Level Winding Anti-Back-Lash

A mechanically perfected combination of the well-known anti-back lash device of the South Bend Anti-Back-Lash reel, with the perfect level winding device of the Shakespeare reel, thumbing and spooling with this reel is entirely eliminated; it automatically spools itself. Cannot back-lash, snarl or tangle, the brake action applies itself only for that fraction of a second when the bait hits the water. Absolutely no attention need be given the spool when casting.

Made of best quality German silver, with double ivoroid handles; adjustable agate jeweled spool caps; tool steel pinions running in steel journals; phosphor bronze bearings; special cut hard drawn brass train gearings.

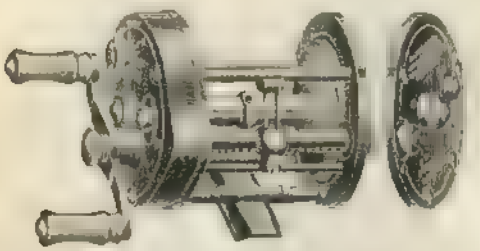
Per Dozen

No. 1200—Capacity 100 yards; diameter discs 2¼ inches, width of spool 1¾ inches **$264 00**

Packed one reel in chamois lined leather case with practice casting weight; weight per dozen 12 lbs.

FISHING REELS

Pflueger's "Supreme" Level Winding



Anti-Back-Lash

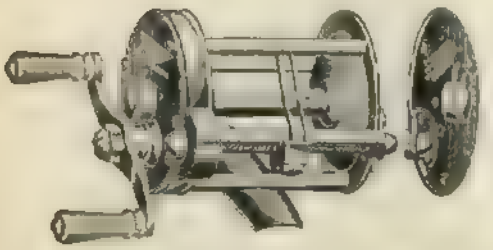
Quadruple multiplying, the anti back lash mechanism is contained within the reel eliminating all possibility of back lashing; embodies the best principles of construction and each part is made with the greatest degree of mechanical exactness, satin nickeled frame; finest tempered phosphor bronze gears; special phosphor bronze bearings; two pyralin ivory handles designed to fit and conform to the grip of the fingers

Per Dozen

No. 1573—1⅜ inch pillars 2¼ inch plate capacity 60 to 100 yards weight per dozen 7 lbs **$400 00**

One in a box

Pflueger's "Akron" Level Winding



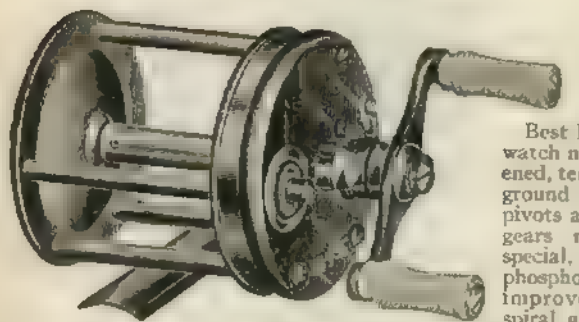
Quadruple multiplying, distinctive in design, built for wear and has ample line capacity, comfortable to palm, and easy to cast; level winding mechanism can be taken apart and cleaned without disturbing any other part of the reel; combination satin and polished nickel finish frame; tempered bronze gears; phosphor bronze bearings; two white celluloid handles designed to fit the grip of the fingers.

Per Dozen

No 1893—1⅜ inch pillars; 2 inch plate, capacity 60 to 100 yards, weight per dozen 6½ lbs **$96 00**

One in a box

Heddon's Bait Casting



Best hard drawn watch nickel, hardened, tempered and ground steel shaft, pivots and pinions; gears made from special, hard drawn phosphor bronze; improved helical spiral gears, insuring strength, power and smoothness of action, otherwise unobtainable; double multiplying; Heddon design, double handle with one inch radius 2⅝ inches long; durable, smooth velvet finish; easily oiled without taking apart; bottle of oil packed with each reel

Per Dozen

FISHING REELS

Winona Bait Casting

DeLuxe Model

This premier Indiana pattern reel gets more popular each season. Adjustable drag makes it practically self-thumbing; line spools itself the guard keeps it in place Thumb control on hub, no wet hands. Light aluminum spool, taken apart with the fingers. Spool 5 inches in diameter.

Per Dozen

Winona—With line guard; capacity 100 yards; weight per dozen 9 lbs. **$120 00**

One in a box

Martin's Improved Automatic

Made of the very best grade of materials, all parts requiring strength are made of brass or German silver; case is of aluminum to lessen weight; all bearings and bushings are firmly set and hand fitted, insuring accuracy and perfection in movements; mechanism is entirely enclosed. Each reel equipped with all the new features that go to make an automatic reel perfect. Brake lever supplied with lock, which when set, relieves the hand of operating lever and the reel becomes entirely independent, letting out line and taking in slack just as the fish may act. Each reel thoroughly tested before leaving factory.

Without Line Protector

Per Dozen

No. 1—Capacity 25 yards, weight per dozen 8 lbs. **$73 80**
No. 2—Capacity 30 yards, weight per dozen 8 lbs **82 40**

Blue Ribbon Original Brake Scooters

The brakes on these Scooters are made adjustable so as to take care of any wear there may be on the rubber tire. The brake roller is cast of aluminum which turns as brake is applied, eliminating any friction, bringing the Brake Scooter to a gentle stop. The action is simple and will not get out of order.

Nos. TC80 and TC100—Steel Handle.

Nos. TC8 and TC10—Hardwood Handle.

Steel construction throughout. All parts except nickel plated brake assembly and handle bars are baked enamel. Frame black and wheels red with yellow striping. Steel foot board red with yellow stripes. Rubber foot board pad and rubber hand grips are gray.

Rear wheel assembly complete with motorcycle stand which folds back when not in use. Front part assembly ⅜×⅞ in. rolled steel, all joints and connecting members steel riveted. Brake handle on right side just below handle bar. Fork assembly connected to frame by self-oiling swivel joint of cast aluminum with pivot formed by bolt which has washer and pin on lower end.

A Good Car is Worth Keeping Good

BOYCE MOTO METER

Accurate Knowledge of Conditions Under the Hood

The **Boyce Moto-Meter** is a motor heat gauge, attached to the radiator cap of automobiles, trucks or tractors, it accurately registers condition in which gasoline motor is operating by registering the temperature of the vapor directly above the water in the radiator. As the water in the bottom of the radiator is several degrees cooler than at top, the temperature of the air over the water represents the average temperature of the entire cooling system, rather than just one part of it. Therefore the **Boyce Moto-Meter** gives an accurate reading irrespective of the quantity of water in the radiator. Under normal conditions no modern automobile engine will overheat. It is only through negligence in applying water and oil, or the break down or failure of operation in some of the parts of the engine, that causes overheated engines, with the consequent damage.

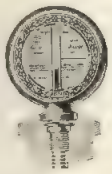
STANDARD MODEL

A perfect heat indicating instrument of the highest type. Because of its perfect workmanship, the Standard Model has been selected as regular equipment on many of the leading cars.

Nickel Plated, has a retaining ring embossed in laurel wreath design and a gold dial with hand lettering denoting various operating conditions of the motor.

Free name plate post card included with each Standard Model. Each

No. 30—Standard Model Complete $14.00



UNIVERSAL MODEL

This instrument is especially designed for use on passenger cars of medium size. Though slightly smaller than the Standard Model, it fulfills the same functions with the same high standard of efficiency.

Has beveled Crystals, both front and rear. Frame is finished in a durable highly polished nickel, embossed with laurel wreath design. Each

No. 32—Universal Model $10.50

JUNIOR MODEL

The Junior Model is a durable, accurate instrument, embodying all the features of the larger models.

Has a heavy Nickel Plated Frame, and the same temperature range as the larger instruments. Embossed with laurel wreath design. Each

No. 33—Junior Model . $7.00

MIDGET MODEL

Has a distinctive appeal to every small car owner. Its high standard of efficiency as well as its accuracy have made it one of the most popular instruments in the line.

Heavily Nickeled Frame with beveled Crystals make it an extremely ornamental as well as a useful addition to any car. Each

No. 34—Midget Model... .. . . .$5.00

MODEL "S", ILLUMINATED

For Steering Column

Miniature electric bulb placed behind dial provides illumination for night driving.

By means of a special steering column mounting (Model S) this instrument may be installed on a motor car in 15 minutes, as it is neither necessary to drill through the dashboard, or tap into the cylinder castings. A simple strap fits all sizes of steering columns and quickly secures the instrument dial right under ones eyes.

Patent bulb connection slips right through upper hose to the radiator with equal ease.

Radium Treated Dial Each

Model "S"—Complete for Steering Column Mtg . .$17.50

SPECIAL FORD MODEL

The Special for the Ford consists of a Midget Model Boyce Moto Meter mounted on a handsomely designed locking radiator cap, complete unit is Nickel Plated, and offers an article of great utility as well as beauty for the Ford car. Each

No. 36—4¾x4¼ in., Special Ford.....$5.75

SPECIAL ARISTOCRAT MODEL

Utility, beauty and protection—three elements combined — are offered in the Aristocrat Model.

The Midget Model mounted on a handsomely designed locking radiator cap Complete Unit Nickel Plated and assembled ready for installation.

Furnished complete with adaptors for Chevrolet, Chrysler, Overland, Star and Gray if so ordered. No adaptors are necessary when installing on the Ford.

Specify make of car, see above

Each

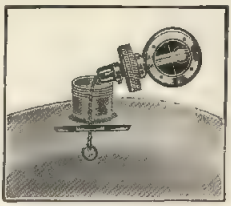
No. 35F—Aristocrat for Ford (No Adaptors).....$10.00

Complete with Name Plate Post Card.

Although regularly furnished with the Midget Model, the hole in the cap is sufficiently large to permit the use of the Universal Model and dealer can make this change if customer so desires at an increased price.

MOTOMETER LOCKS

SCHLAICH UNIVERSAL



For Boyce Moto-Meters

Positive protection against loss of the most important device on your car.

Allows you to unscrew the cap but absolutely prevents theft. It also prevents you from laying the instrument where it can drop and be broken.

No drilling or mechanical work of any nature is required, yet when it is on it cannot be taken off except by the owner. Instantly adjustable to any radiator neck.

For Boyce Moto-Meter Models

Each

No. 2—⅝ in. Size, "Standard" and "Universal"....$2.50

No. 3—⅞ in. Size, "Junior" and "Ford"..... 2.50

RADIATOR CAPS

MONOGRAM ORIGINAL Self Locking Wing Cap

Beauty—Protection—Individuality

Just screw the cap on, good and tight That's all there is to it. When turned in the reverse direction the outer body revolves on the inner No boring, punching, pins, screws, mutilation of threads, or hole to plug with lead. No time lost or wasted. A few taps with a small hammer suffices to attach the shield.

Protects Moto-Meter from theft as well as the Cap. Prevents accidental dropping or misplacing of cap and moto meter when filling radiator. Steam and water-tight. Allow easy filling of radiator. A push of the thumb opens the latch—the same is true of closing

SENIOR SIZES

Shown with "Universal" Boyce Motometer.

Standard Bar

Overall length of Cap 8¾ in. Cap is high grade all metal, heavily nickeled construction. Takes temperature meter with ⅝ in. stem

Complete with Standard Finish Shield showing initial or fraternal emblem as desired

Each

Monogram Senior Standard Bar Cap. $6 00

Wing Type

Shown with "Standard" Boyce Motometer.

Overall length of cap 5 in. Possesses all the well-known convenience and safety features of the Standard Bar

It is heavily nickel plated with highly polished conventional veinings against stippled nickel background.

Each

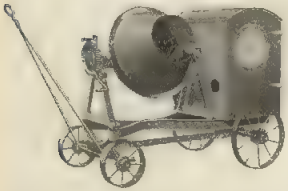
CONCRETE MIXERS

BRONCHO



Adaptable to any kind of construction work and is a money maker wherever it is put.

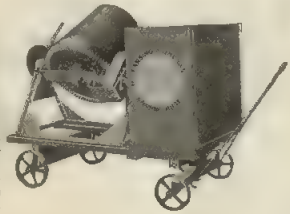
More easily moved than a mixing box

Has a mixed batch capacity of 4 cu. ft. (1-3-6 mix) and is rated at 40 yards of mixed concrete in ten hours but this is a very ordinary day's work.

Complete with 2 H. P. Engine Each

No. 5 Broncho—Length Over All 6½ ft., Width Over All 4½ ft., Diameter of Drum 31 in., Depth of Drum 27 in. Opening of Drum, 18 in., 16x4 in Front Wheels, 24x3 in Rear Wheels, Weight 1650 Lbs. $500 00

BRONCHO JR.



Intended for the smaller medium sized job where a large machine would be unsuitable.

A most economical Mixer for concrete work on small foundations, floors, culverts and sidewalks.

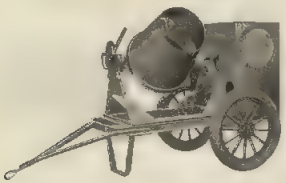
Drum is well balanced and can be easily tilted when loaded.

Can be loaded or dumped on either side, the same side, or loaded on one side and dumped on the other. Gray Iron and Steel Drum.

Complete with 1½ H. P. Engine

Broncho Jr.—Capacity 3 cu. ft., 24 Yards of Mixed Concrete a Day, Heavy Angle Iron Standards, Heavy Steel Paddles Bolted to the Drum, Complete with Tongue or Draw Pole, Weight Complete 850 Lbs. $185 00

BRONCHO JR. TRAILERS



Adapted to nearly all kinds of concrete work, from small repair jobs to large foundations. Rapid in its mixing action, easily charged and discharged and has real portability

1½ H. P. Hopper Cooled Gasoline Engine Equipped with Magneto Each

Broncho Jr. Trailer—26 in. Diameter Drum, 24 in. Deep with an 18 in. Opening, Height to Charge 41 in., Equipped with Ford Wheels Fitted with 30x3½ Clincher Rims and Pneumatic Tires, Weight Each 950 Lbs. $245.00

ROAD SCRAPERS

MICHIGAN

Made from Heavy Plates of specially Hardened Steel, Stamped from one Sheet without Joint Seam or Rivet, fitted with Steel Balls and perfect working Swivels, Steel Ears and Handle Pockets and Hardwood Handles.

With ⅛x1½ in. Steel Runners Each

No. 1M—32½x32x11½ in., Capacity 7 cu. ft., Weight Each 94 Lbs. $14 50

No. 2M—31½x29x11½ in Capacity 5 cu ft., Weight Each 84 Lbs 14 00

STEEL HODS

NEVERDRIP, MORTAR

Fitted with a Socket at end to hold Trowel for Scraping out Mortar when emptying. Adjustable socket permits renewal of Handle and shipment knocked down

Each

No. 158 26x12x11½ in., One Piece Sheet Steel, Waterproof, Reinforced at Edges and Dumping Points, Wood Shoulder Saddle, 42x1⅝ in. Handle. $3.00

STANDARD, BRICK

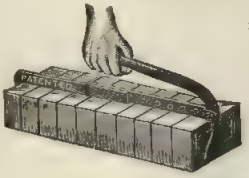
Fitted with Legs, at end for support when filling and to prevent bending of head. Adjustable socket permits renewal of handle and shipment knocked down.

Each

No. 162—22x7x10 in., One Piece Sheet Steel, Waterproof, Reinforced at Edges, Wood Shoulder Saddle, 42x1⅜ in. Handle. $2 35

BRICK CARRIERS

BUFFALO



Saves 25 per cent time in unloading a car of bricks and in carrying bricks from curb to pavers instead of wheeling them.

Prevents the chipping of bricks.

Each

No. 50—Adjustable to Four Paving Bricks or Twelve Regular $3 00

TWO HANDLE

Adjustable, Wrought Steel Each

No. 450—Takes 8 to 12 Bricks Wooden Handles, Saves Time and Bricks $4 50

BROWNING AUTOMATIC SHOTGUNS

Grade No. 1.

These guns are fitted with Cockerill Steel Barrels, of the same grade as used in Mauser rifles. The very high tensile strength of this steel, makes it possible to furnish a considerably lighter barrel, without any sacrifice of strength and thus reduce the weight of the gun. Matted receiver, English Walnut checkered stock and fore end. Half pistol grip stock. Standard dimensions, 14½ in. long, drop at heel 2½ in., at comb, 1⅝ in. An improved safety device is located in the forward end of trigger guard. Safety can be pushed to "SAFE" position from outside of trigger guard with the finger which eliminates any danger of finger slipping and accidentally pulling the trigger. A magazine cut off permits loaded shell in chamber to be ejected without disturbing shells in magazine. Barrel ring guide is forged in one piece with the barrel, instead of being a separate part. Double extractors insure positive extraction and feed. Side ejection, five shot, take-down, solid breech.

The only Browning Guns we shall be able to supply this year are those indicated below:

No. C700—12 gauge, 30 or 32 in. full choke or 28 in. modified choke, plain barrel, w't about 7¾ lbs. .....each $105.20

No. C700R—12 gauge, 30 or 32 in., full choke or 28 in. modified choke, RAISED MATTED RIB barrel, w't about 7¾ lbs., each $120.75

No. C16700—16 gauge, 28 or 30 in. full choke, or 26 in. modified choke, plain barrel, w't about 7 lbs. ....each $128.30

No. C16700R—16 gauge, 28 or 30 in. full choke, RAISED MATTED RIB barrel, w't about 7 lbs. .....each $143.85

ONE IN A BOX, TEN IN A CASE

SINGLE BARREL SHOT GUNS

HARRINGTON AND RICHARDSON HAMMER

Barrel—Blued steel choke bored for nitro powders.
Stock—Varnished, genuine American walnut stock and extra large snap fore end, full pistol grip, hard rubber butt plate.
Frame—Case hardened frame, top lever, low rebounding hammer, coil main and locking bolt springs, counter sunk trigger guard.
Construction—Harrington & Richardson Single Guns are made of the best materials and are carefully fitted and finished. Made for the use of nitro powders in standard ammunition. These guns cannot be opened when the hammer is cocked. Top lever will open the gun when pushed either to the right or left.

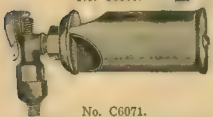
BUELL EXPLOSION WHISTLES

No. C6070.



No. C6071.

A powerful, practical and perfect warning device, fits in priming cup opening, thereby getting the explosion direct instead of through the exhaust valves. It can be installed on practically all cars without any other parts. On engines not fitted with priming cups such as the Ford, a special spark plug with an opening on the side to accommodate the whistle is furnished.

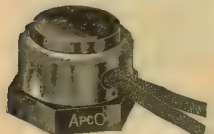
No. C6070—Single tone, whistle complete, ready for installation, w't each 1 lb.....each $6.00

No. C6071—Chime tone, whistle complete, ready for installation, w't each 1 lb.....each $8.00

No. C6072—Special Spark Plug for use on engines not having priming cups, w't each 10 oz., extra, each $1.30

ONE SET IN A BOX

APCO STEERING POST HORN BUTTON



The regular horn button on a Ford car is placed at an inconvenient point. This Button takes the place of the nut on the steering column post in the center and on top of the steering wheel. It can be installed in five minutes.

No. C7121—138—Beautifully finished; the shell is of non-rusting alloy, the nut is black and is Parkerized; will not rust, the contact springs are of phosphor bronze and the button is of hard black composition; packed in individual boxes, ten to a counter display carton, w't two ozs., per carton of ten $4.00

WE DO NOT BREAK CARTONS

APCO THROTTLE EXTENSION HORN BUTTON

For Ford drivers who like a horn button at their finger tips constantly. It slips on the gas or spark throttle lever where the fingers always rest.

It has a double advantage of being a throttle lever extension where larger diameter wheels are used.

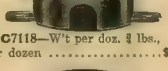
This button is the only satisfactory horn button for use with the lock free type of steering wheel. It can be installed in five minutes.

No. C7120—9—Packed in individual containers; 10 buttons to a counter display carton, we do not break cartons, w't three ounces, per carton of 10.....$11.50

HORN BUTTONS

The Universal Button is just the thing for your desk, door bell or any place you have the need of a push button. The entire top is movable so when it is pressed at any point the contact is made. The button shell is finished in beautiful black enamel, and top is a black composition, making a neat and attractive article.

This button is used by a number of the largest automobile as standard equipment.



No. C7118—W't per doz. 2 lbs., per dozen $4.80

This is the steering spider column button. Equipped with clamp to permit fastening the button to the steering spider.

No. C7119—W't per doz. 1 lb., per dozen $6.40

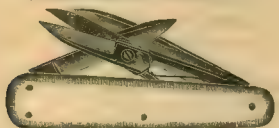
IMPORTED POCKET KNIVES

WONDERFUL VALUES IN GENTLEMEN'S POCKET KNIVES WITH SCISSORS



These Knives have First Quality Steel, and are Fully Warranted.

No. C242—Assortment consists of one dozen fine quality Pocket Knives with large cutting blade, Scissor and Nail File blade, handles are assorted as follows:

4 with Stag Coverings
4 with Shell Celluloid Coverings
1 with Smoked Pearl Celluloid Coverings
3 with Ivory Celluloid Coverings
Length when closed 3 1/16 in.

Each assortment in a handsome purple velvet lined partitioned display box .....per assortment **$24.00**

ONE ASSORTMENT IN A CARTON

An Attractive Assortment of W. H. Morley & Sons Scout Knives.

IDEALLY SUITED FOR GIRL SCOUTS AND JUNIOR SCOUTS ON ACCOUNT OF BEING A TRIFLE SMALLER THAN THE LARGE REGULATION SIZE BOY SCOUT KNIFE

Will instantly appeal to the Girl Scout and Camp Fire Girl on account of the size and attractiveness of the handles. Many Girl Scouts and Junior Scouts have done without the required pocket or belt knife on account of the regulation size scout knife being too large and heavy for the average girl scout or Junior Scout to handle and carry around on their hikes.

One large cutting blade, highly polished on front side, one combination screw driver and crown cap bottle opener blade, nicely glazed, one can opener blade, nicely glazed, one leather punch or gouge blade, nicely glazed, brass lined, nickel silver bolsters and shield, nickel silver toggle for fastening to chain or key hook, length when closed 3⅜ in.

No. C6409—Assortment consists of ONE DOZEN SCOUT KNIVES with assorted handles as follows—2 each stag, white ivory celluloid, smoked pearl shell celluloid, tortoise shell celluloid, Onyx shell celluloid and gold pearl shell celluloid, put up in a handsome partitioned purple plush lined leatherette covered display box .....per assortment **$24.00**

ONE ASSORTMENT IN A BOX

IMPORTED BOY SCOUT KNIVES

No. C1899—Boy Scout, 1 arge spear blade, combination screw driver and crown cap bottle opener blade, can opener blade and leather punch or gouge blade, nicely finished, stag handle, brass lined, nickel silver bolsters and shield, stamped SCOUT KNIFE, has nickel silver toggle for fastening on key chain or cord, length when closed 3⅜ in. .....per dozen **$23.00**

HALF DOZEN IN A BOX

7,000 r.p.m. From 91½ in. Racer

LOS ANGELES and Indianapolis will as usual be well represented at the annual 500 mile sweepstakes race to be held May 31st in the latter city. There will be at least five Duesenbergs, ten or more Miller-built cars and one or two modified Fords.

New Engines in Old Duesenberg Chassis

Duesenberg will start with the same running gear and bodies as used on the 122 in. jobs of last year, but will install in these chassis his new 91½ in. engines. According to Fred Duesenberg, who released preliminary data to the Automobile Trade Journal's Indianapolis correspondent, the new engines will have eight supercharged cylinders as heretofore. The bore is 2 3/16 and the stroke 3 in. approximately.

While admitting the new jobs will turn up much faster, he did not care to specify exact engine speeds. He stated that it would not be surprising to see the 91½ in. jobs give the same or better track speeds than the bigger engines of last year. New quirks in details of the engine and application of things he has discovered during the year makes it look as though the smaller engines will develop even greater brake hp. than the 122 in. jobs.

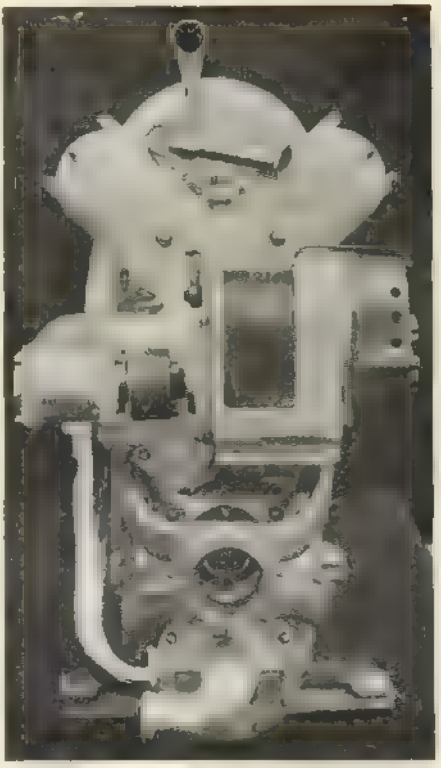
Hamlin Chevrolet Front Drive Specials

Patented Hamlin front drive universals will be employed on the modified Ford being built in the Chevrolet shops. The remaining chassis components are the development of the Fronty-Ford types that have performed dependably on the track in recent years. Ford parts will be quite extensively used throughout with a sixteen valve Fronty-Ford engine of only 2⅞ in. bore by 3½ in. stroke. A supercharger will be fitted and the jobs will turn up to 6000 r.p.m., according to Arthur Chevrolet.

The regular Ford rear cross elliptic spring will be used at front and rear in conjunction with double front axles of the tubular type which are bent forward at the center to accommodate the central universal, from which drive shafts interposed between upper and lower tubes will transmit the drive to front wheels. This construction is somewhat like the front wheel drive British Alvis. Ford transmission and rear wheel brakes will be employed.

FACTS ABOUT INDIANAPOLIS RACE

Maximum piston displacement, 91½ cubic inches as against 122 last year.
Minimum car weight, 1400 lbs., same as last year.
Track, 2½ mile oval brick.
Distance, 500 miles.



Front end Miller 91½ inch race engine. Note new method of driving Robert Bosch magneto. The vee at top is formed by the two camshafts.

Miller Engines Have Possible 7000 r.p.m.

The new Miller jobs were previewed at the Miller engine works by the Automobile Trade Journal's correspondent. The new engines are of 90.2 cu. in. displacement with 154 b. h. p. and 7000 possible r. p. m. The bore, like on the Duesenberg, is 2 3/16 and the stroke 3 in. There are five main bearings, two overhead spur gear driven camshafts, and an integrally counterbalanced crankshaft as on the older model. The engine weighs 290 lb., or about 100 lb. less than the last year 122 in. engine of same make. There are two valves per cylinder, with one spark plug in center of each cylinder. The turbine supercharger in the new cars is built to drive off the crankshaft, as against the former drive off the camshaft.

Easier steering has been effected in the new cars with an all ball bearing steering

gear. Another feature is a positive lock for the clutch. Dogs dropping in slots in the flywheel prevent any possibility of clutch slipping when car is racing at high speed.

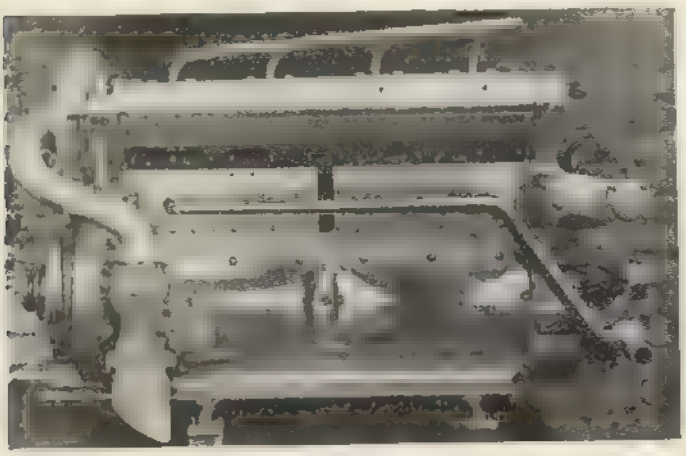
In exterior appearance the new Miller cars will look much the same as the Miller 122's, no important changes having been made in the construction of the body.

Miller has chosen New Departure Bearings, Robert Bosch magneto, Champion Spark Plugs, Rudge Whitworth wheels and Eskimo radiator core.

Inlet Miller engine. Note front engine mounting bracket, hose connection and shape inlet manifold line, and neat cover over overhead camshaft mechanism

One of the problems in the construction of the new cars, says Miller, was to distribute the required weight that was released from the engine with its reduction in size from the 122 cu. in. displacement to the maximum 91½ in. The necessary weight was added for the most part as low as possible. The front axles were made considerably heavier than necessary, as was the frame. Heavier metal was also used in the bottom oil and gas tanks. The body is two gauges heavier than on the old cars.

Red Shafer in one of the 91½ inch Duesenbergs that will race this year



Exhaust side, Miller. Note supercharger connection and single carburetor. Cylinders are in blocks of 4 with solid non-detachable heads

The oil tanks, one on each side of the frame, are welded to the gasoline tanks. The oil tanks have a capacity of six gal., the lower gas tanks 15 gallons and top tank at back of car 12 gallons.

Miller believes that the weight requirements (1400 lbs.) established are too high, declaring that much of the added weight is not necessary.

The New

Opens the Entire Motor Car

Fourth Step in Walter P. Chrysler's Plan to Furnish a Car of Chrysler *Standardized Quality* for Everyone gives Dealer Most Complete Sales Possibilities Industry Has Ever Known

The new Chrysler "50" is now presented as the fourth and latest step in Walter P. Chrysler's well-developed plan to furnish a car of Chrysler Standardized Quality for everyone.

Finer looking, full-sized, superior in comfort and handling ease to any car near its price, and bearing the name—Chrysler—which the public has endorsed as standing for the finest in motoring performance and value—the Chrysler "50" takes rank as the industry's finest of fours.

The Chrysler "50" rounds out the sound program conceived by Mr. Chrysler three years ago—a program to build under one name, in one group of plants, and to merchandise through one unified dealer organization, four complete lines of cars of Standardized Quality—ranging from $750 to $3595—which will meet the demands of all buyers in the four great quality markets.

At its phenomenally low prices the Chrysler "50" throws open to all Chrysler dealers on a QUALITY instead of on a PRICE basis a broad group of new buyers, more than

doubling the entire previous Chrysler money-making possibilities. With its announcement every Chrysler dealer can consider nine out of every ten motor car prospects as Chrysler prospects—and he can build by speedy sales and "repeat" business a stable and ever-increasing market for himself in his territory.

Chrysler and the Chrysler dealers have experienced wonderful success during the past few years.

The addition of the new Chrysler "50" to the complete line of Chrysler sixes—the sensational "60", the famous "70" and the superfine Imperial "80" with their distinct sales possibilities—opens a way to still greater development and to still greater profits.

Possibly you, too, can share in the profits which Chrysler's far-sighted policies now afford.

We will hold in strictest confidence your request for further details of the Chrysler franchise which gives you the most complete market coverage the industry has ever afforded, by a line of three splendid sixes and a four of super value.

Chrysler Model Numbers Mean Miles Per Hour

Heavily Nickeled
Strikingly Distinctive
The Elkhorn Cap fits clear back, leaving free opening for easy filling. Motometer can not strike hood. When closed the wing bar locks it securely
It Stays Sold

Here's What Your Customers Want

Here is a distinct improvement in radiator caps. The Ellison Cap is cast solid of U. S. Standard Bronze. It completely prevents trouble caused by the melting of softer metal and consequent clogging of radiators. There is a gain in durable attractiveness, too. U. S. Standard Bronze furnishes a superior base for the nickel plating. The finish lasts. And when it comes to locking, the Ellison Cap is in a class by itself. It closes the water outlet tightly and securely.

Two sizes:

Large cap	$6.00
Junior cap	4.50

Federal ORTHO-

*The fundamental exclusive circuit making possible Ortho-sonic reproduction is patented under U. S. Letters Patent No. 1,582,470

ORTHO-SONIC ANNOUNCEMENT

New beauty in the Federal line

Every radio retailer handling Federal Ortho-sonic Radio last season knows how extraordinary was the *acceptance* won by these sets. The Ortho-sonic circuit, now patented, afforded something entirely distinctive—set a new and higher mark in radio-tone perfection. Now comes another Federal achievement—a beauty and individuality of design entirely new in radio.

Six additional popular priced models with a price range from $75 to $400. And four custom-built models from $600 to $1000. Altogether giving you a radio set for every price need.

Sets distinguished by rich hardwood finishes, inlays, hand carving, lovely duo-tone wood effects on the outside; and on the inside, a circuit perfectly shielded, as ruggedly constructed, as beautiful in detail as its cabinet

Single-dial Control

The new models are operated either by a single-dial or a centralized control. Any station can be brought in by one manipulation. Never before has such range, power, selectivity and ease of operation been combined.

Behind all is the responsibility of an organization of engineers whose reputation for wireless, telephone and navy radio extends back over twenty-five years.

Far-reaching National Advertising

Federal Ortho-sonic Radio is backed by a national campaign that will reach millions of homes this coming season. Behind this, too, is a powerful campaign of newspaper advertising and special tie-ups which will send buyers directly to the retail stores for demonstrations.

If not already in line with Federal write your Federal wholesaler. Find out about the every-month profits the factory and wholesaler co-operation given every Federal retailer, the unusual sales and advertising service available. Find out about the liberal discounts allowed, the protection given, and the freedom from signed contracts and red tape.

If you do not know a Federal wholesaler, write us. Let us give you the facts.

WINNING AND HOLDING GOOD WILL

OAKLAND SIX

Money talks! For Oakland dealers it tells a brilliant story of success—a story of sales and profits doubled in a few short months.

Now the new Pontiac Six promises *doubled opportunities* and *redoubled profits* to holders of the Oakland-Pontiac franchise—and with little increase in capital outlay!

This newest low-cost Six introduces into its field, elements of size, quality and beauty that set a new measure of six-cylinder value. Already it is creating an unparalleled demand.

Oakland and Pontiac, together, reach and cover the two richest and fastest growing fine-car markets of the world, and are designed and priced to dominate those markets. Prices range from $825 to $1295.

Here is a connection which is permanent, which opens sales possibilities seldom offered and which assures aggressive dealers both, immediate profits and a lasting, successful business. Write for the interesting details.

Exceptional Performance Marks New Packards

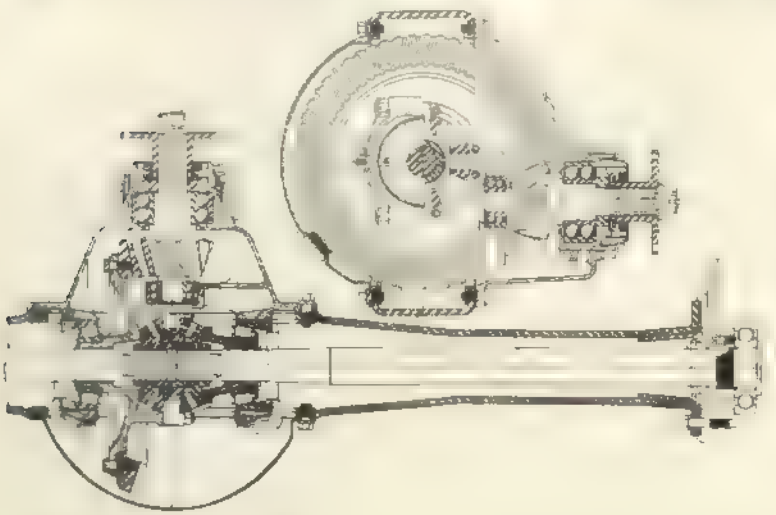
Hypoid rear axle gears, heavier crankshafts, aluminum piston, redesigned combustion chambers in new models

THE introduction of hypoid gearing insuring noiseless operation, longer life and increased load carrying capacity, is the outstanding feature of several important mechanical changes embodied in the improved line of Packard six and eight cylinder cars. The power output of both engines has been increased materially by the adoption of Nelson aluminum pistons having the Invar strut, redesigned combustion chambers, and new manifolding. Crankshafts have been made heavier, the bore of the eight has been increased by ⅛ in., and new two plate clutches are employed on both chassis.

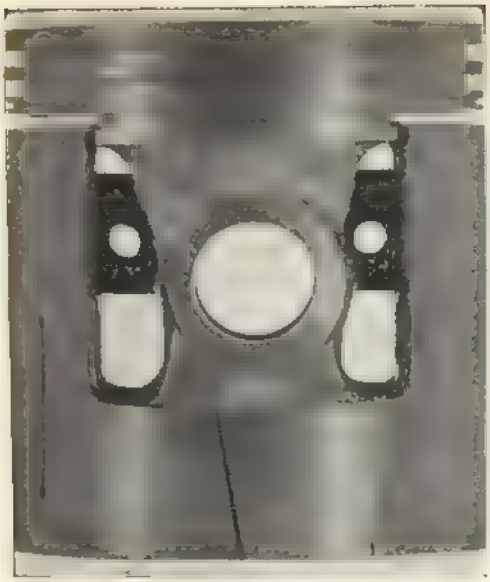
Coincident with the chassis changes, all closed bodies have been improved in design, chiefly by lowering the roof line, the adoption of the double belt moulding effect and the continuation of the roof over the windshield to form a permanent visor. The radiator design has been improved by smoothing out the inside contour of the shell although the characteristic exterior curves are retained. Full crowned one piece fenders are now standard equipment on the eight chassis. The line of bodies on both chassis is the same as before with all prices remaining unaltered except on four particular models which are revised as follows: 4 pass. coupe on both six and eight chassis increased $100 to $2685 and $4750 respectively with the 4 pass. roadster on both chassis decreased by $100 making them now $2685 on the smaller chassis and $3850 on the eight. Only minor changes have been made on the open models.

With the introduction of the improved line extensive changes have been made in the plant of the Packard Motor Co., several million dollars having been spent in the last few months in the remodeling and re-equipping of the shops. A continuous assembly starting with the chassis frame and finishing with the complete car ready for the road replaces the former method of assembling the chassis, then road testing the chassis and then mounting the body. A road test of several miles is given after the completed car leaves the assembly line and the car is then returned to the factory for a rigid inspection. At three distinct points in the completing and testing of the car the four wheel brakes are inspected and adjusted by special equipment.

Hypoid gears resemble bevel gears, but



Cross section showing hypoid gear layout. Note that axis of pinion is lower and offset with respect to ring gear axis in the new Packards



Nelson type Invar strut aluminum piston used in new Packards

the axis of the pinion is offset from the axis of the gear and does not intersect it. The tooth action of the gears combine the rolling action of spiral bevel gears with the sliding action of worm gears thereby introducing a sliding element along the entire face of each tooth. Another way of expressing the hypoid gear action is by comparing the action of a sled runner passing over a rough surface where the runner tends to ride over the surface smoothly. The sliding action of the hypoid gears has the same effect in smoothing out the tooth engagements and hence tend to run more smoothly than spiral gears.

On the new Packard cars, the axis of the pinion is offset 2 in. below the axis of ring gears and the effect of this arrangement can be seen clearly in the accompanying views.

The ring gear is attached to the differential carrier flange by series of cap screws thus insuring perfect alignment which is essential in the operation of hypoid gears. Two taper roller bearings are employed to carry the differential group in the customary manner. With this type of axle design the end thrust on the front bearing is reduced considerably and longer life for all axle parts is claimed through the smoother operation. As in the previous Packard spiral bevel axles, the straddle type of pinion mounting is employed and outside of the differential carrier, gears, and bearings, the axle is the same as before. The pressure angle of the hypoid gears is 17½ deg. with the spiral angle 35 per cent. Adjustment and maintenance of hypoid gears is very similar to that of spiral bevel gears, the amount of back lash being approximately the same. Packard is the first automobile company to put the hypoid gears into practical production and experiments on the roads with these axles have been in progress for the last year.

With the increased engine performance it has been possible to use lower gear ratios in the rear axle. Three ratios are provided for on each chassis as follows:

	Low	Standard	High
Six 5	to 1	4 2/3 to 1	4 1/3 to 1
Eight ...4 2/3	to 1	4 1/3 to 1	4 to 1

On the previous models the standard ratios on the six and eight cars were 5⅛ to 1 and 4 2-3 to 1 respectively. Due to the increased torque of the new engine the cars show much better agility at low speeds and easier handling in traffic.

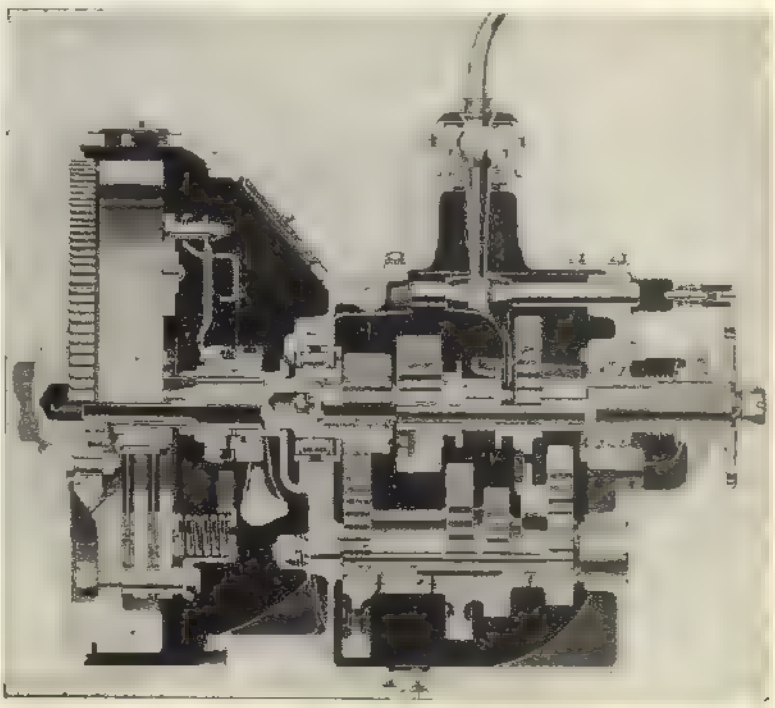
On the smaller engine, the b. h. p. has been boosted from approximately 60 to 81 h. p. at 3200 r.p.m. without change in piston displacement while the larger engine now develops 109 h. p. at 3200 r.p.m. as compared with the previous 80 h. p. The bore of the larger engine, however, has been increased by ⅛ in. to 3½ in. (same now as the six) to increase the low speed torque and facilitate production. With this increased power the N. A. C. C. h. p. being 39.20 the improved models are the fastest passenger cars built by Packard. Both models are capable now of an unusually high road speed which resolves itself in allowing a high touring speed to be maintained without fatigue. With the object of ascertaining the maximum speed on the improved "eights" the writer was permitted to drive one of the new seven passenger sedans. Due to the nature of the roads near the city it was impossible to reach top speed, but a rate of 86 m. p. h. was attained without any effort or feeling of unsteadiness. On slowing down to what was thought to be a normal comfortable touring speed with the throttle about one third open, the speedometer showed a speed of 55 m. p. h. The acceleration from this point seemed to be as quick as accelerating from 20 m. p. h. A speed of 58 m. p. h. was attained in second gear without any undue noise arising from the transmission while the car kept in a perfect straight line when the brakes were applied hard at 75 m. p. h. showing perfect equalization of the new internal shoe four wheel brakes.

In lightening the weight of the reciprocating parts, aluminum alloy pistons are employed in place of the previous cast iron pistons. Made specially to the specifications of the Packard Co. by the Bohn Alu-

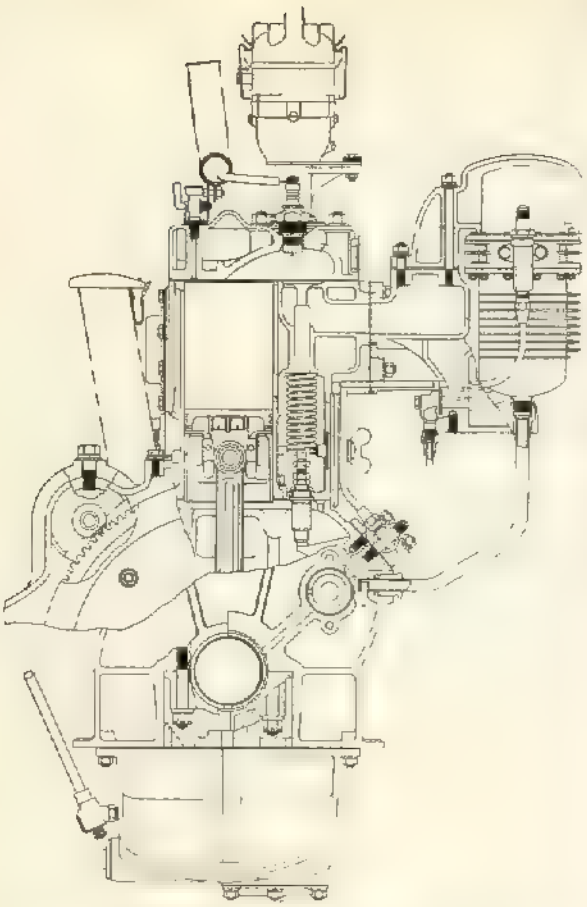
minum and Brass Corp., the new light alloy pistons employ two Invar steel struts located inside the piston skirt to control thermal expansion. The "cut-loose" for the piston head is provided for by saw cuts in the lowest or third piston ring groove on the bearing side. In this groove is fitted a Teetor oil control ring and the saw cuts in the groove act as oil relief holes in the customary type of piston. On each of the bearing sides of the piston two vertical relief saw cuts are made while the skirt is slotted on either side below the pin center. With the honed cylinder bores and the special piston design, the pistons are fitted to .002 in. clearance. Five operations are now performed on the cylinder bores and these are 1. rough bore, 2. semi-finish bore, 3. ream, 4. grind, 5. hone.

With the elimination of the extended lip on the piston skirt, the Skinner oil rectifying system now draws its oil through a bypass valve in the oil gage line instead of from the pistons as on the earlier series. A "tee" joint connected with the rear camshaft bearing permits the oil pressure to go to the oil gage and to a balance metering valve on side of the rectifier, the valve having direct connection with the vacuum side of the rectifier. Other changes along this line embrace a combination oil filter and breather preventing the throwing of oil at high speeds and the flanging of the valve cover plate to allow a cork gasket to be used in preventing the escape of oil past the cover plate.

A new design of combustion chamber termed by the Packard Co. as the "Turbo head" has allowed a higher compression and better turbulence with the resulting increase in brake h. p. In the new shape, the flat surface of the combustion head sets almost flush with the top of the block and extends approximately ⅔ way across the bore. The spark plug is located directly in the center of the domed portion and also comes in line with the centers of the valves with the points of the plug projecting well below the domed portion. The entire cylinder heads are machined all over with the combustion chamber polished also. New carburetors are provided to meet increased power of engines and both the intake and exhaust manifolding have undergone changes. Larger passages in the intake manifold have added greatly to the acceleration ability and the exhaust manifold is so constructed that the exhaust gases from the middle two cylinders pass through a chamber surrounding the intake manifold elbow and form a hot spot for heating the incoming mixture. In line with these changes, the firing order on the eight has been altered from 1-3-2-5-8-6-7-4 to 1-6-2-5-8-3-7-4 thus giving a complete change of direction flow resulting in reduced exhaust noises. Also, the depression in the manifold has been equalized by employing a tube



A new clutch of two plate construction is used in the new Packards



Cross section showing new combustion chamber and revised hookup of Skinner oil rectifier which eliminates piston skirt extensions formerly used

that connects the front and rear intake galleries in the cylinder block. Other changes include increasing the diameter of the fan pulley and reducing by two the number of coils in the valve springs. The appearance of the eight engine has been improved considerably by the use of nickel plated acorn type cylinder head nuts, aluminum parts sand-blasted, cylinder block, rods and piping enameled and large nickel plated nuts on spark plugs and new nickeled priming cups. Mufflers on both models have been increased to take care of the higher engine power.

Crankshafts on both engines have been made heavier although their design is unchanged. The diameter of the main bearings has been increased by ¼ in., the crankpin diameter is 1/16 in. greater and the width of the cheeks has been increased by ⅛ in. The new shafts on six and eight now weigh 82¾ lb. and 97½ lb., respectively. The Delco ignition distributor on both engines is of the single coil, air gap type. Employing a 4-lobed cam or the 8 insures positive firing in all cylinders at high speed. In the fuel system a gasoline filter is placed in the line between vacuum tank and carburetor.

Clutches of two plate construction with four friction surfaces are employed on both the six and eight-cylinder chassis to replace the former multiple disk clutches which have been used for several years. Specially treated moulded asbestos composition is riveted on either side of the two disks while the driving plate is unusually heavy and formed of cast-iron. The clutch shifter thrust bearing has also been made heavier and otherwise improved. Only minor changes have been made in the transmissions and a backing light switch has been added to the gear shifter rail cover.

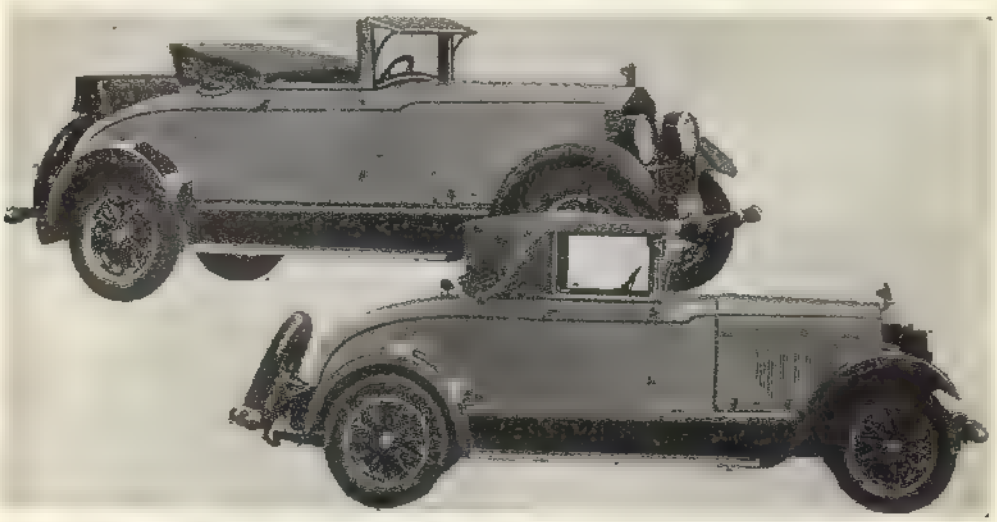
The first announcement is made at this time of the adoption of Packard-Bendix three-shoe internal four-wheel brakes, although the Packard cars appeared at the New York and Chicago national automobile shows so equipped. The general layout of the brake operating mechanism does not differ radically from the earlier method when a combination of exterior and interior brakes was used. A safety feature is incorporated in the front chassis springs on both cars. An auxiliary main leaf sets above the main leaf proper. The end of the auxiliary main leaf is curved upwards and into a hook over the eye formed in the true main leaf. In the event of failure of the front main leaf the weight is taken on the hook of the auxiliary leaf thereby retaining the front axle in place. On the Packard eight the rate of action of the front springs has been increased and three extra leaves have been added. Changes have been made also in the steering gear and the most important item is an improved method of locking the upper steering worm bushing in place.

On the tubular frame cross members the stock gage of the flanges has been increased from ¼ in. to 5/16 in. In addition the six-cylinder frame has been altered to accommodate Watson Stabilators which are now standard equipment on this model. Stabilators are continued on the eight chassis. An improvement has been made also in the spare wheel carrier to reduce the physical effort necessary to dismount and remount the spare wheel. The running boards on the eight chassis have been widened to give greater protection from wheel splashes.

Many improvements have been made in the interiors of the closed bodies. The

An emergency main plate is built into the Packard springs

front seat riser in the 5-passenger sedan has been removed, thus lowering the seat and increasing headroom, while all folding seats in other models have been redesigned to provide increased comfort. Doors are trimmed without pockets, small compartments being provided behind the front seat on the sedans. Rapid action window regulators in improved runways make for easier operation of the windows while a concealed method of attaching the door sill plates is adopted. In place of foot rails, hassocks upholstered to match the interior are used on the sedans. On the eight bodies, all exposed interior hardware is finished in Old English Bronze and all cowl and window mouldings are of walnut. Vanity and smoking cases finished in tooled leather resembling walnut are fitted in all sedans, while a special clock is offered on the eight cars. Otherwise the equipment on the Packard cars is the same as before.



The Elcar Landau Roadster with convertible top on both the six and eight cylinder chassis

Positive Action

Here's an air stand you can depend on—it's automatic! Won't vary more than one pound from its setting. Its action is positive and faultless. And, it's *easy* to operate.

The *American Automatic* AIR STAND

Now you can have an air stand which is absolutely *automatic* and *positive* in measuring the inflation of tires

Set the American Automatic Air Stand for the pressure desired and it *faithfully delivers* that amount, to within a one pound variation, into the tire!

Think what this means to your customer and you. Remember that the air stand is the one piece of equipment in your station that the motorist usually *handles himself*—and, a *dependable, automatic* air stand reflects credit on your station and service. Further, no more will you *lose gauges*—nor time and attention in *giving* them out and *getting* them back.

The American Automatic Air Stand operates on a *diaphragm-switch* principle — not by pressure regulating valve or electrical mechanism. Has no complicated construction — it is easy to operate. It has been "station-tested" and proven worthy.

While air is flowing into tire *the bell rings*—it *stops ringing* when pressure is reached and the air is *instantly* and *positively* shut off, even though the chuck is held on the tire.

Write today for details on this new automatic air stand—use the coupon

The American Oil Pump & Tank Company

1137 Findlay St. Cincinnati, Ohio

THE *American* AIR COMPRESSOR

For construction operation, wear and appearance this American Air Compressor stands supreme. Noiseless operation secured by using piston type disc valves no lapping. Cylinders are of semi-steel cast en bloc with case—connecting rods kept straight. Made in three sizes. Send coupon for prices and full information

ATWATER KENT RADIO

Model 35, six-tube ONE Dial receiver, less tubes and batteries, but with battery cable, $70.00

1926-1927

Policy, line, prices, advertising—are *right*

NO WONDER Atwater Kent dealers are jubilant over the Fall and Winter sales outlook. See what *they* see!

The sales policy—So satisfactory last year that it stands pat for 1926-1927, without the change of a comma.

The line—Four Receiving Sets. Five, six or seven tubes. Genuine ONE Dial operation, without auxiliary tuning devices, or three dials for those who prefer. Tone, selectivity and range of all models again improved by Atwater Kent engineering.

Three Radio Speaker models. One of them offers a new decorative note—doors of color.

The prices—Receivers from $60 to $140, including battery cable attached to each set. Radio Speakers, designed to bring out the best in Atwater Kent Receivers, from $16 to $23. A price for every customer.

The advertising—Radio's greatest campaign. Fifty-one consumer magazines with 20,347,533 circulation. *All kinds* of magazines—general, women's, boys', farmers'—monthlies and weeklies. Many back covers, many pages in color. A list of newspapers with 18,600,000 circulation. Posters on 4,358 billboards in and around 199 cities with a population of nearly 40,000,000. A profusion of new dealer helps—new window and counter displays, stuffers, and a mail campaign going direct to prospects from the dealers' stores, bearing the dealers' own names.

And the Atwater Kent Radio Hour—A powerful goodwill builder for dealers. Radio's finest program, broadcast weekly over a far-flung network, with special concerts outside the WEAF chain.

That's the lineup. No wonder Atwater Kent dealers are jubilant. Who wouldn't be?

better Tool

The New Model X

HALL 2 Hones in 1 HONE

Like the previous model Hall Hone, which was admittedly the most accurate and fastest cutting Cylinder Hone made, the new Model X combines both spring and solid pressure in one tool. It differs from the previous model only in that it is a still more accurate, a still faster cutting tool and embodies a much more rigid paralleling feature Spring and solid pressure adjustments are also external and more speedy.

Write for Circular

Absolutely Rigid; Perfectly Parallel

The new Model X Hall Hone is absolutely rigid under any degree of pressure. To finish a cylinder out of parallel is absolutely impossible. That's because of the precision ground cones actuating the stone carrier arms, applying equal pressure at extreme ends of arms at all times as illustrated at the lower left. Pressure may be changed from spring to solid as easily as starting and stopping the electric drill and almost as quickly

In spite of its increased rigidity and enlarged range through the use of oversize stones, the Model X Hone can be speedily operated with a good, high powered half-inch drill, but the use of a ⅝" drill is preferable.

Increase Your Reconditioning Profits

The Model X Hall Hone gets both the oval and taper. It will help you do a better job quicker and at more profit. Order a Hall Model X through your jobber today or write us for new descriptive circular

Price

$35

At Your Jobber's

How's This?

With the new Model X Hall Hone the operator can tell by the feel of the speed of the cylinder when the cylinder has been finished and to a ten-thousandth, it being necessary to use the cylinder gauge only to determine the actual oversize required

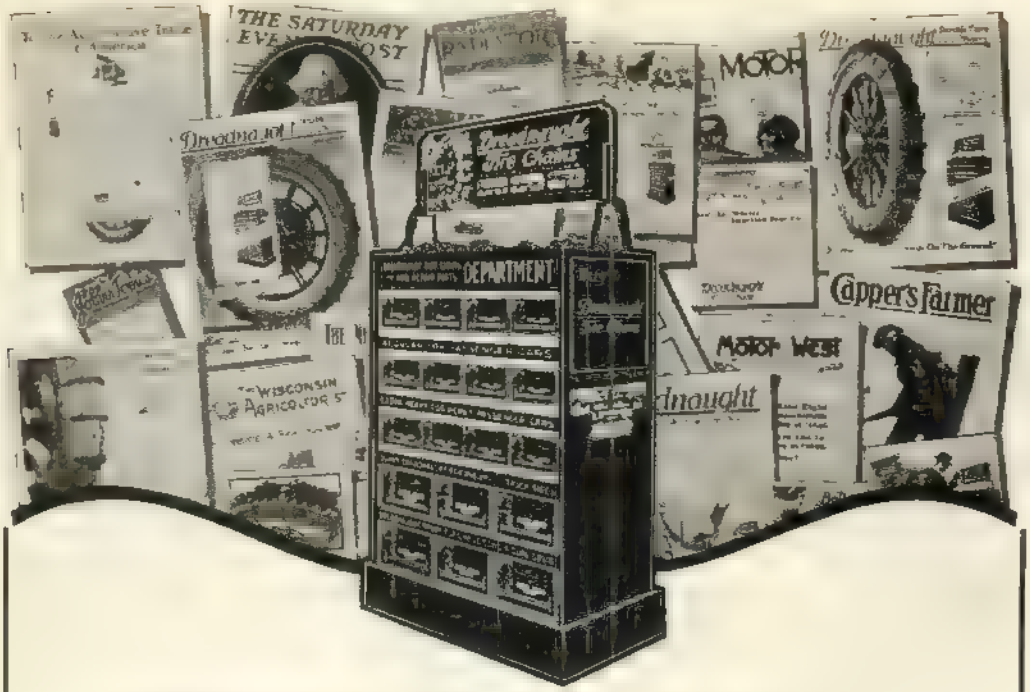
Solve your old "dealer problems" by taking on the line of new Auburn cars. Our policy makes dealers instead of breaks them. E. L. Cord, president, was a dealer before he became a manufacturer. He knows what you are up against. Write him.

AUBURN AUTOMOBILE COMPANY, AUBURN, INDIANA

AUBURN



Nationally Known—

It Sells When It's Shown!

A DREADNAUGHT "Ask-'em-to-Buy" Cabinet in your store where customers can see it makes people want Dreadnaughts at the very moment they're easy to get. Practically every person of purchasing power in your territory knows about Dreadnaughts, because of our nation-wide advertising and sales promotion, with selling punch in every bit of it. They are waiting to see the patented Blue Boy Fastener, which makes Dreadnaughts "Easy to put on! Easy to take off!"—and when they see, they'll buy!

Send for an "Ask-'em-to-Buy" Cabinet and get your share of the Spring demand for tire chains which Dreadnaught advertising is creating. Let people know that you sell the tire chain they've read so much about—it pays.

The simplest of all chains to put on and take off. When chain is drawn tight the Blue Boy Fastener *never* lets go.

There's a Dreadnaught Tire Chain to fit every size and type of Truck, Cord or Balloon Tire. The Famous Dreadnaught Double Duty Tire Chain has "Three Cross Chains Always on the Ground."

The Columbus McKinnon Chain Co.

get-away

Today's traffic problem is one of "get-away" at the "go" signal. The Ford when equipped with Bosch Ignition Type 600 gets away like a flash and is out ahead of the creeping traffic. The Bosch Type 600 for Fords eliminates ignition troubles, makes a smoother running motor, saves fuel, and is automatic in action. It adds power to take hills with less need to use low gear. Dealers are building a most satisfactory volume with this Bosch Product. This extra profit maker is easily sold and easily installed. Your wholesaler or the nearest Bosch Branch can fill your orders immediately. Reorders follow introduction.

Price $12.75

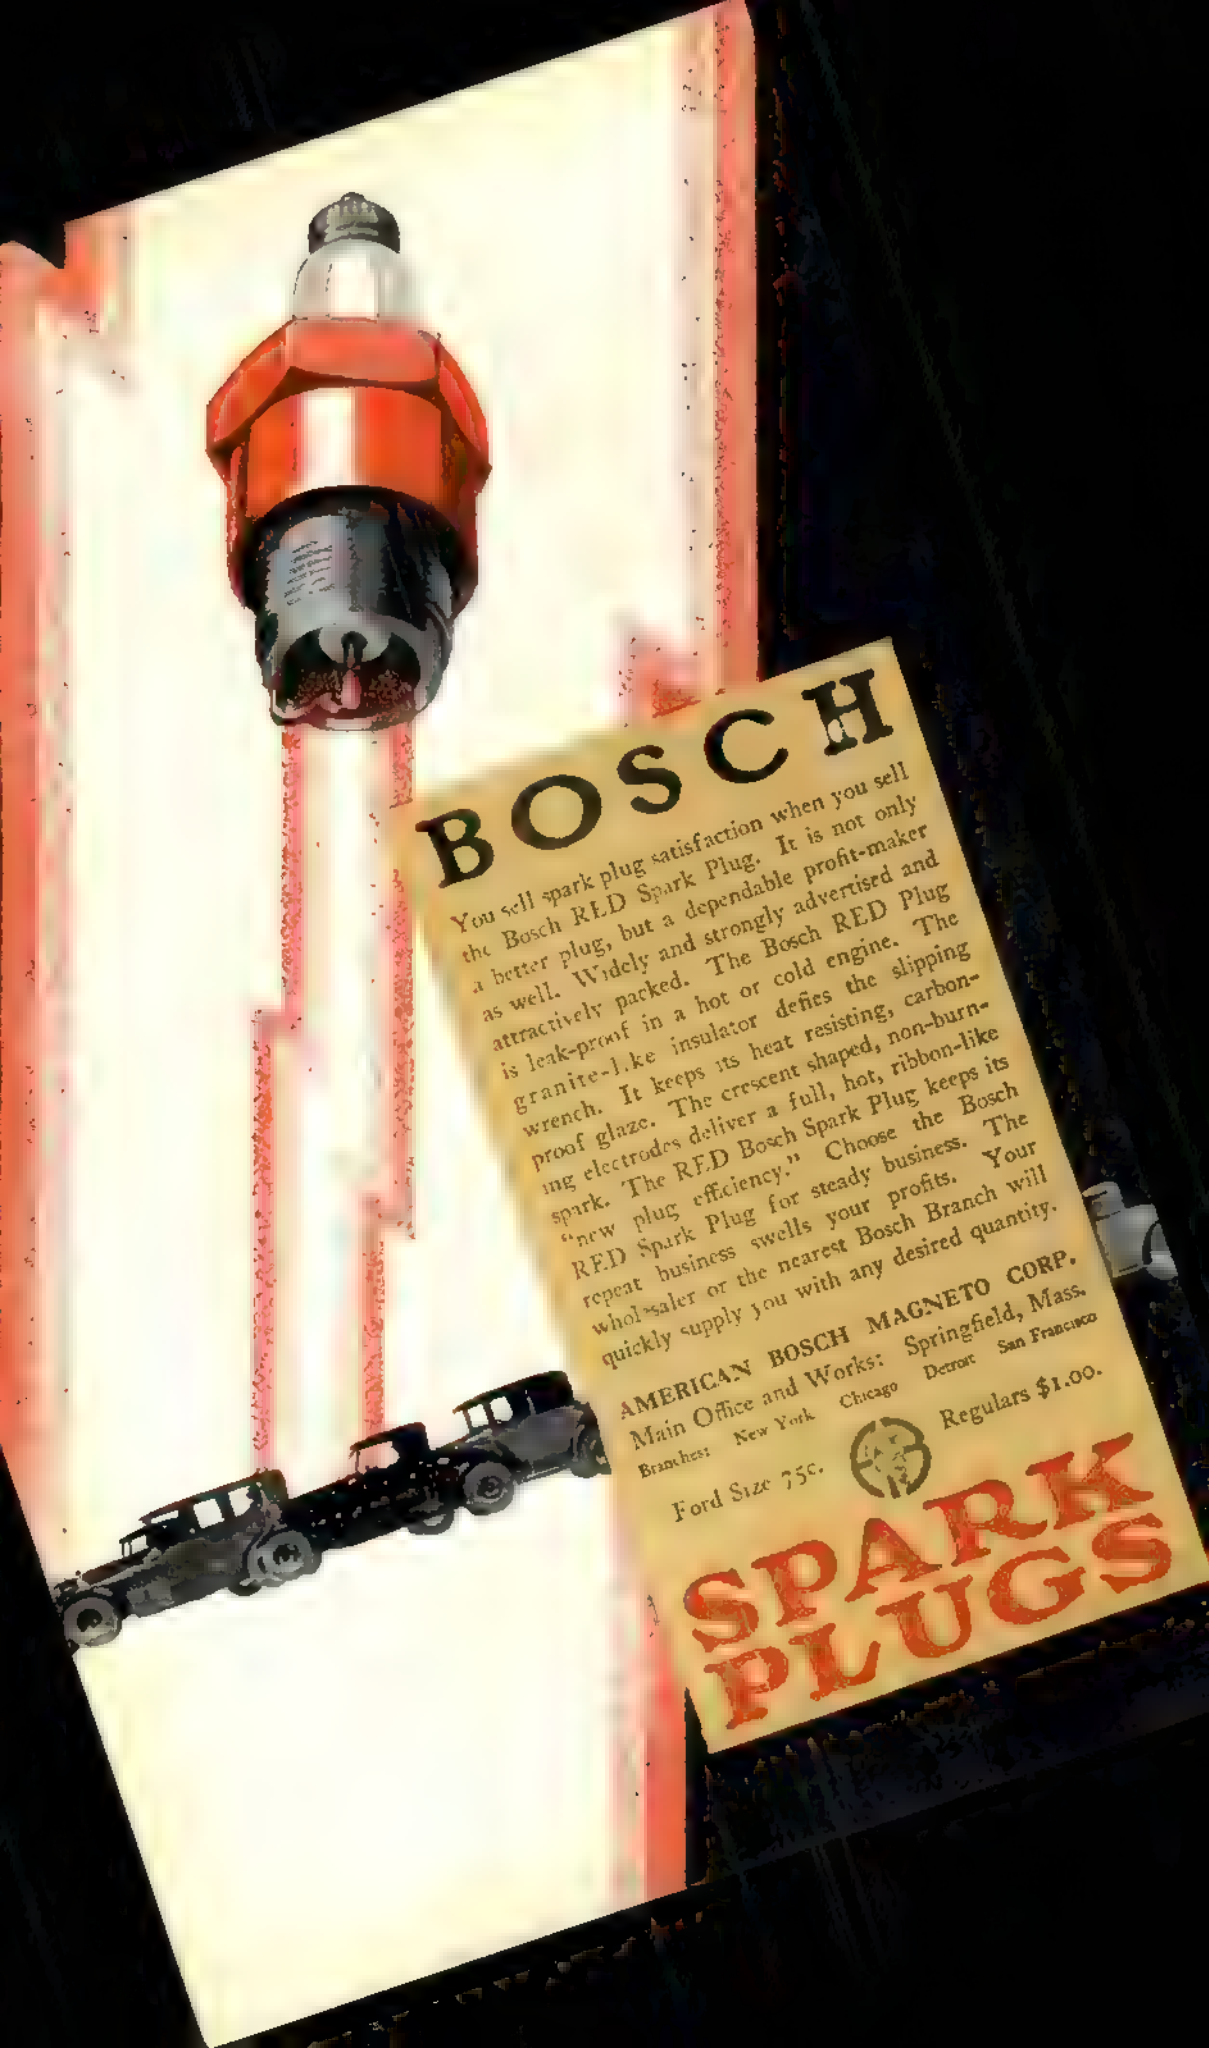
TYPE 600 BOSCH Ignition for FORDS



BOSCH
You sell spark plug satisfaction when you sell the Bosch RED Spark Plug. It is not only a better plug, but a dependable profit-maker as well. Widely and strongly advertised and attractively packed. The Bosch RED Plug is leak-proof in a hot or cold engine. The granite-like insulator defies the slipping wrench. It keeps its heat resisting, carbon-proof glaze. The crescent shaped, non-burning electrodes deliver a full, hot, ribbon-like spark. The RED Bosch Spark Plug keeps its "new plug efficiency." Choose the Bosch RED Spark Plug for steady business. The repeat business swells your profits. Your wholesaler or the nearest Bosch Branch will quickly supply you with any desired quantity.

Personality!

Some pumps are just glass, brass and steel—painted... But Bowser pumps have *personality*—the thing that attracts trade and helps bring it back!... Accurate; good-looking; well-proportioned; mechanically right; exceptionally fast; and, in addition, commanding attention and interest—that's an exact description of Bowser's new masterpiece, Square Visible... It has looks, guts and speed—personality plus!... For details as to delivery dates and exceptionally-low quality-prices, ask any Bowser man, or write the home office—Dept. 52, please.

Millions behind it
Millions ahead of it

Cadillac is one of the outstanding products in American industrial history—not only because of its high quality, but because of the continuity of its leadership among the fine cars of the world.

As a business institution it is stable, secure, safe—manufacturing a product which is in good repute and great demand.

The new 90-degree Cadillac has taken hold of the imagination of people from one end of America to the other. Today, more emphatically than ever, Cadillac is the Standard of the World.

Throughout its 24 years of continued success, Cadillac has been conservative and sound in its policies and progress.

Millions are invested in it. Gigantic factories with the finest of modern equipment; splendid group of skilled workmen—Cadillac craftsmen of years standing, and millions of dollars of new, bigger business are ahead of it.

Cadillac is distributed by stable, well-established, responsible distributors and dealers men who, in their communities, rank among the most substantial—and whose business is permanent and profitable.

All this is the result of a nation-wide, yes a world-wide, Good Will—in the minds of millions who believe in Cadillac and who want to own a Cadillac.

Everybody knows the future of the automobile. Cadillac, of course, will continue to be sound, secure, forward-going. It offers today very real opportunities for progressive men who can recognize in this great business a safe investment for their capital, and splendid development of their abilities.

Confidence

The most convincing proof of the solidarity of Chrysler and the certainty of Chrysler's future is the development within the Chrysler dealer organization.

New sales rooms and bigger service stations, all of them ranking with the finest in the industry, are made necessary by the marvelous increase in Chrysler business.

For Chrysler dealers everywhere have good reason for their faith in Walter P. Chrysler and in the new line of three great Chrysler cars reaching into every profitable price field —the super-valued "58", the sensational and famous "70" and the super-fine Imperial "80" —faith that the past and present success of this organization is just the beginning of a greater growth which will still more emphatically establish Chrysler leadership in every community.

Your inquiry will be treated in strictest confidence

Grebe Always Protects the Dealer

OUR policy, restated again and again, will be maintained as always: viz.,

1. We will not cut prices nor permit dealers to do so
2. We will not "unload", "dump", nor throw our sets on the market under any subterfuge

On this policy the dealer can depend: on it he can, with confidence, buy the Synchrophase and offer it to his customers.

The Synchrophase is a set of the first quality as to construction, reception and the resulting satisfaction that they guarantee. On the Synchrophase, therefore, the dealer can build sound business and reputation, and enjoy a steady profit for years to come

$29

West of the Rockies and tariff, to all prices

"If inexperienced in radio, be sure your first set is a Crosley"

It takes neither practice nor mechanical skill to tune in stations all over the country. Children and old people operate Crosley radios easily. They are fool proof.

They are inexpensive. They don't tie up a lot of money.

They have proven their efficiency over a period of years. Thousands of letters report remarkable demonstrations. Hundreds of thousands of sets sold substantiate all claims to excellence.

They are made by a reliable, well known and financially strong concern, that guarantees them . . . absolutely.

The easy operation, tone and volume of these four new Crosley sets delight, not only the expectant beginner they arouse the most confirmed radio lover to realization that Powel Crosley, Jr., has again made a revolutionary improvement in radio.

And the RFL sets possess *true* cascade amplification. For Crosley has utilized an entirely new patented circuit which achieves cumulative amplification, actually approaching the theoretical maximum efficiency per tube.

The Crescendon

In the 4-29 and the 5-38, the introduction of the Crescendon enables these two highly efficient radios to give almost unbelievable results and has lifted them away and beyond all competition.

The Crescendon is an exclusive Crosley device for increasing the weak signals of distant stations to full volume tones without distortion. Yet with these sets, loud nearby stations can always be softened practically to whispers.

Their striking beauty will please your eye, and your ear will introduce to you new qualities in radio, which you are sure to pronounce a revelation.

Write Dept. 131 for complete details of Powel Crosley, Jr.'s latest and greatest triumph and of the Crosley dealer franchise.

Crosley manufactures radio receiving sets which are licensed under Armstrong U. S. Patent No. 1,113,149 or under patent applications of Radio Frequency Laboratories, Inc.

- Better selectivity than has been offered
- Easy manipulation
- Maximum distance and volume for a given dollar
- More exquisite cabinet work and the utmost in technical efficiency

REALIZING that the demand this year is for better radio reception . . . knowing that your need is for a trouble-proof set, the Electrical Research Laboratories have joined forces with the finest scientific brains in the country to meet that demand

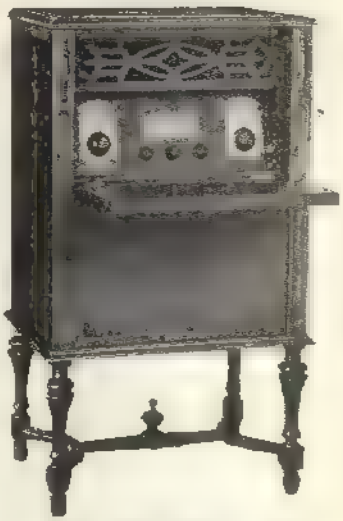
The new Erla (RFL) Monodic Receiver is the joint achievement of our own engineers and the world-famous Radio Frequency Laboratories of Boonton, N. J.

1. Squeals and howls completely done away with in tuning, automatically. No expert manipulation of knobs needed.

2. Radiation—annoying broadcasting of squeals into neighboring antennae eliminated

3. Harshness and fuzziness of tone, resulting from regeneration, eradicated, and reproduction of sound made entirely natural and undistorted.

4. Stations inaudible with most receivers—except when manipulated by experts—now brought in loud and clear by anyone. Vastly improved selectivity



Erla (RFL) Monodic S-50
De Luxe Console

Quartered and matched figured walnut panels. Supreme excellence in materials and construction. Built-in loud speaker.

Banishes squeals

The Erla (RFL) employs principles that are new and notably in advance of present standards. These new principles banish completely squealing, "blooping," and distortion. Other manufacturers have attempted this, but have never succeeded, save by sacrificing distance and volume. In the new Erla (RFL) there is positive gain in reception, and, equally important, an ease and certainty of operation that now puts distance, volume and selectivity at the command of every member of the family!

Four great improvements

Here, in detail, are the four great improvements which this master stroke of engineering accomplishes:

Other Erla (RFL) profit-makers

Omnitonic Speaker

Universal in range and pitch. Brings out both low and high notes with absolute fidelity of tone. To list at $17.50.

"Big Ten" "B" Unit

A positively hum-free "B" unit with a big safety factor. Will handle 10 tubes with perfect results. To retail at $45.00.

"Triple-Life" Tubes

Last fully three times as long as present style tubes. Also greater uniformity. Minimum of 9000 hours service at rated voltage. To sell at usual prices.

A fool-proof set

To you the most important feature of this amazing new set is that it is transportation-proof . . . and fool-proof when installed

It lets you devote your time to selling with no worries about the set itself. Send the new Erla (RFL) out in the original package. It will be found O. K.

In exquisite cabinets

The new Erla (RFL) Monodic Receiver is put up in the most artistic cabinets in Erla's history. These cabinets make the new Erla, in eye value as well as performance value, the outstanding profit opportunity on the market today.

Prices are materially under comparable competitive receivers. Our famous one-profit system of manufacture makes possible these extremely low retail prices, yet allows distributor and dealer adequate margins.

Send today for the full story

Don't sign up for any radio line, no matter how attractive the offer may seem, until you receive the new Erla (RFL) proposition. Send your name at once for complete information. Be in line for a franchise provided your territory is open. Just write your name and address on coupon, clip and mail.

New and More Beautiful
HUDSONS

The New Hudson Brougham

The Super-Six Greatly Improved in Chassis and New Bodies

These beautiful new Hudsons—the Sedan, Brougham and the Coach—overshadow all the great Super-Sixes of the past. New bodies—new colors—new beauty, performance and comfort.

Each is more striking and distinctive in appearance. Each is a triumph of body quality, comfort and price advantage. Each is mechanically at the height of its value and reliability.

For more than 11 years the patented Super-Six principle has given outstanding performance and reliability to over 850,000 owners.

These new Hudsons are commanding a greater attention than any preceding model because they far excel any previous achievement of our history.

Standard Equipment Includes: Automatic Windshield Cleaner, Rear-View Mirror, Transmission Lock (built in), Radiator Shutters, Moto-Meter, Combination Stop and Tail Light.

It's the Dealer's Reputation That's at Stake!

THE manufacturer covers the nation. A few dissatisfied families out of twenty million do not bother him much—he has thousands of satisfied set-owners to offset them.

The average dealer, however, works and lives in the neighborhood he serves. When HIS reputation is at stake HIS profits likewise are often in the balance.

Every dealer can enthusiastically exploit the merits of Trinity and associate his good name with Trinity performance, because the new Trinity line is the result of a full season's direct factory contact with dealers, studying and planning to build a line of receivers of unequaled value and seldom to need service a line that any dealer can stake his reputation on.

When we say Trinity values are unequaled we prove it by comparison with sets costing 30% to 50% more. Trinity low prices are possible only because Beacon is the Broadcast Receiver Division of the world's largest radio parts plant. No other manufacturer profits on Trinity parts. Beacon even makes its own cabinets and moulds its own bakelite.

If you would have a Trinity Dealer Franchise and represent one of the oldest and largest institutions of its kind in radio, let us have our nearest distributor call to see you.

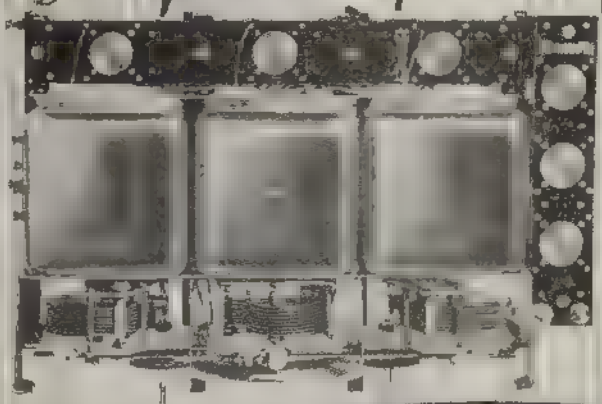
TRINITY
RADIO

KING RADIO 63

Six tubes. Two stages radio frequency detector three stages audio. Fully stabilized and completely double shielded. In console cabinet. Price $210. (Table model with same chassis, No. 62, $100.)

This Double Cell Shield 1926 greatest improvement



If you haven't a good radio — half the world is passing you by

Every Stage Completely Double-Shielded

1 This new King Double-Cell Shield is more than mere shield-partitioning. It is complete isolation from every other stage and from outside pick-up on the coils. Each cell is formed from a single piece of copper. Each is complete shielding for its stage. And when assembled, there is a double wall of copper between each coil. No radio we have ever seen, is so completely shielded. And none of similar capacity gives quite such clear reception and such great selectivity.

2. *Single Dial Station Selector.* The King 62 and 63 pick up the station with a single turn of a single knob—without sacrificing selectivity and volume. For distant stations, two verniers are provided, one to increase or decrease volume, the other governing selectivity. Weak or distant stations are thus brought in with ease.

3. *Cushioned Tube Mounting.* Tube socket panels are mounted on flexible phosphor bronze springs which prevent the tubes from "howling" caused by mechanical interaction.

4. *Rugged Mechanical Construction.* Rugged mechanical construction characterizes the construction. Tubes are equally spaced and supported by heavy steel and brass strips. Durability is an inbuilt feature.

5. *Pilot Light.* A small lamp drawing only one-tenth ampere is used as a pilot lamp to illuminate the wave length scale. Beside making readings easy, this pilot light also serves to tell when tubes are on and off. Set may be operated without light.

There is a King Set for Every Radio Taste and Almost Every purse. Priced from $65 to $210. Without Accessories. Ask for Dealer Proposition

Leading Automotive Jobbers Sell

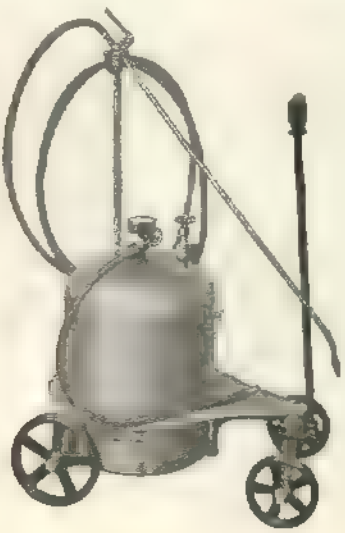
LYON AUTO PARTS CONTROL

COMPLETE STEEL STORAGE SYSTEMS FOR AUTOMOTIVE PARTS AND ACCESSORIES

Manley Chain Hoist Trestle

Manley Mfg. Co.
York, Pa.

THIS trestle has a clearance between the uprights of 7 ft. 6 in. and is made in two heights, 8ft. and 9 ft. The hook for the chain hoist is arranged so that it can be moved back and forth across the top member. The castors provided on the device enable it to be moved right to the job. Enough clearance is allowed between the uprights for the mechanic to have perfect freedom while working on any part of the car. Catalog No 85 trestle without chain-hoist, having a capacity of 4000 lbs., height of 8 ft. and weight of 247 lbs. is priced at $53. The catalog No 86 trestle without hoist having the same capacity with a 9 ft. height, and which weighs 313 lbs., is priced at $55.



Lipman Spring Lubricator

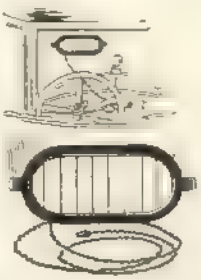
Lipman Pump Works
Rockford, Ill.

THIS is a portable penetrating oil unit for lubricating car springs. Air pressure is used to force the lubricant, which consists of a mixture of graphite and oil between the leaves of the spring. It consists of a 12 gal. steel tank mounted on a wheeled metal base provided with an agitator operating from the air pressure line. Air pressure is secured from any compressor source and the outfit includes valves for controlling the air pressure and a gauge for indicating its amount. List price $45. A special over-size unit with 21 gal. container sells for $50.

Canton Crane With Safety Brake

Canton Foundry & Mach. Co.
Canton, Ohio

THIS firm, which has long been engaged in the manufacture of portable cranes, is now offering a Safety Friction Load Brake, which is illustrated herewith. With this load brake on a crane the load is held at any point and cannot under any conditions, get away from the operator. It complies with Safety First laws throughout the country in the many states which are now demanding load brakes on all types of cranes. The brake operates on the friction principle by means of discs in connection with a helix and is so designed that the pawl is always engaged in the ratchet, making it necessary to wind the load down as well as to raise it. This unit is built not only for new portable cranes but is so designed that it can be installed in cranes now in service, so that all users of this make of equipment can very easily equip their present machines. The prices on cranes with brake attached, and the brake attachment only, may be secured from the manufacturers.



Bodin Windshield Heater

Bodin Mfg. Co.
Allentown, Pa.

THIS device consists of a glass enclosed electric heater element which is attached to the inside of the windshield. It serves to warm the glass and thus prevent the formation of frost, snow and ice. It is operated from the storage battery and is provided with a plug to fit the dash light socket. Current consumption is said to be very low.

Husky Wrench Additions

Husky Wrench Co.
Milwaukee, Wis.

THE above firm have recently announced additions to their line of wrenches including a new 20 in. heavy duty ratchet. They have also a complete line of square sockets from ⅜ to 1 in. and two new models of speeders with milled ends and swivel grips. The new wrenches with others are now supplied in an assortment display cabinet of attractive design

Permite Piston

Permite Piston Co.
Cincinnati

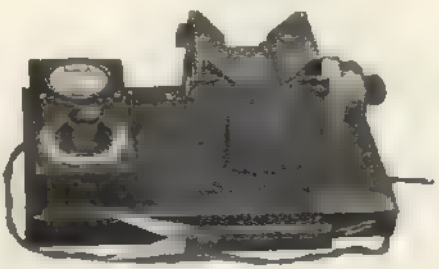
THE manufacturer states these pistons are exact duplicates of the alloy pistons used by various manufacturers as standard equipment. They are produced over permanent steel molds which produce close grained, accurate, uniform pistons.

NEW EQUIPMENT, PARTS & SUPPLIES

Automobile Rotary Lift

Automobile Rotary Lift Company
Memphis, Tenn

THIS device raises a complete motor vehicle to any height desired and enables it to be rotated through a complete circle. It consists of two 12 in. channel tracks 16 ft. long riveted to steel I beams, forming a supporting spider. This assembly is bolted to a steel casting anchored to the piston of the hydraulic lift mechanism. The car platform can be rotated easily by hand, either at the ground level or when elevated. The piston works in a cylinder 6 ft. long with 14 in. diameter which is buried under ground and encased in concrete. There are no outside tanks. The operation of a single throttle valve connected to any air compressor admits air under pressure to the oil chamber causing the piston to rise by hydraulic action. One of the special features of the device is the special spring oiling spray system which is an auxiliary tank built into the top of the piston. The spring oiling device uses the same method oil pressure as is used to raise the lift. The installation of the rotary lift requires a circular space 19 ft. 8 in. in diameter. The cost of installation varies according to the conditions of ground but can be kept well under $100 it is stated.



Miho Standard Growler

The Miho Company
Sycamore Street
Cincinnati, O.

THIS growler is equipped with a special winding designed to give accurate readings on small fractional armatures of all types of winding. It is also adapted for locating faults in appliance motor armatures. The meter is mounted in such a manner that it is not affected by the lines of magnetic flux when the current is on. The use of the meter eliminates the necessity of head-phones or a hacksaw blade or feeler. An indicating snap switch is mounted on the base for convenience of the operator. Complete instructions are furnished with each growler illustrating the manner of locating faults. Each growler is packed in a special carton. Price $20.

White Mule Towing Attachment

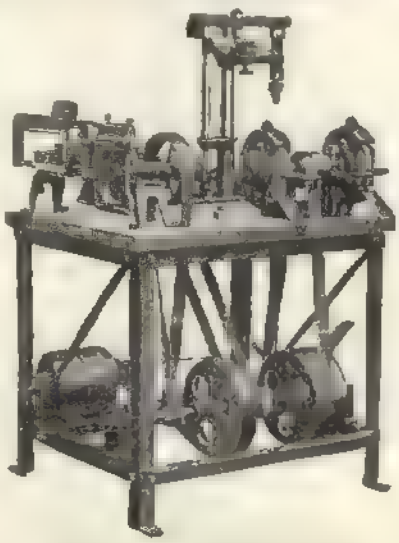
Marion Auto Devices Co.
Marion, Ind.

BY means of this device it is possible for one car to tow two cars at once. The manufacturer states the design in application is such that the device causes the second car to follow in the tracks of the first. It may be attached to the rear axle housing, spring shackles, bumper or any convenient connections on the leading car and to the front axle and tire rod of the car being towed. Clearance between cars may be adjusted by adding to or eliminating the middle section of tongue. List price $25.

Double Bar Bumper

Federal Pressed Steel Co.
Milwaukee, Wis.

A NEW double bar bumper has been added to the line of bumpers of this company called the Ambassador and has a double bar 1 in. wide by ⅝ in. thick, with a rolled edge and nickel plated bands through the center of the bar.



Manley Machine Shop Unit

Manley Mfg. Co., York, Pa.

THIS unit is a combination of three highly essential garage tools hack saw, grinder and drill press. The three tools are mounted on a wood table having thoroughly braced steel legs. The motor is mounted on the lower tie members of the bench. The shafting is supported by two self-centering bearings on the angle cross members. The pulleys are pinned to the shaft. Driving belts pass through slots in the table. Each machine is individually controlled. Motor is controlled by snap switch on top of table. The features pointed out for the combination unit are that it eliminates necessity for installation of line shafting, counter shafting, motor brackets, etc., which would be required by the installation of individual machines, as the unit comes completely assembled. No. 435 with 110 volt A. C. motor, ¾ hp., lists at $285 and weighs 550 lbs. No. [illegible] with 1 ph. C. motor, ¾ hp., lists at $295. Same weight.

"How to build the Stutz car for next year and the years to come —*build it just as it is!*"

is the recommendation of

W. J. Benson

President

BENSON MOTOR CO.
SAN FRANCISCO

WHEN an automobile man who has been a merchant and manufacturer for twenty years says, after five months' experience with the New Safety Stutz, "*continue to build it as it is*"—it sounds pretty good.

In fact, there could hardly be a more eloquent expression of a dealer's satisfaction with a car's mechanism than Mr. Benson's letter at the right.

One of the reasons why automobile merchants are finding the Stutz franchise such a money-maker lies in this absence of profit-killing service.

We invite correspondence from other good dealers who appreciate the money-making value of a car that is both new and sound.

STUTZ MOTOR CAR COMPANY
of AMERICA, Inc., *Indianapolis*

Stutz Motor Car Company of America, Inc.,
Indianapolis, Indiana

Dear Sirs

Of course you remember that I went to the factory just about a year ago to learn the plans of the Stutz Company, and you know the result. I went home and discontinued every other line that I was handling to concentrate on the Stutz Eight, Safety Chassis. However, I am going to say frankly to you, I did not look for as much sunshine as I have received. I really looked for a lot of clouds.

I am very pleased to say that you have less trouble in this automobile than a lot of others have in their cars because you have nothing chronic. I know a number of them who have. As the result, I am going to tell you how to build the Stutz car for next year, and the years to come. Build it just as it is and continue to build it as it is and be just as careful as you have been in the past.

I know the Straight Eight is right and I want to say you have the best Straight Eight in the market so leave it alone. Do not touch that motor. And the trans[illegible] you have right is the worm axle. Leave it alone. The transmission and clutch are right, and your steering is the best in the market. Your carburetor is giving one hundred per cent efficiency, and for goodness sake, do not change the chains on your motor.

The chains are noiseless and efficient and when I tell you that I have shipped a carload of motors back to the factory during my experience with timing gears, you can realize why I want you to continue on the chains. You have a great chassis—please leave it alone.

In the first five months of the year we have developed an account that is worth thousands of dollars to us and we have made a profit as well.

Yours very truly,

BENSON MOTOR COMPANY,

President

New SAFETY STUTZ

Still Another Source of

OAKLAND *presents the*

$895

PONTIAC SIX

Landau Sedan

A masterly combination of style, stamina and thrift . . . An ultra-smart Body by Fisher, finished in Sedge Green Duco . . . The spectacular power, speed and endurance that have established the Pontiac Six as the outstanding triumph of automotive history . . . And a price that could only be achieved by an organization enjoying the advantages of General Motors' gigantic purchasing power . . . In short, Oakland's answer to the demand for a low-cost enclosed six, combining the utmost in distinguished appearance and appointments with that quality construction which is now recognized as the outstanding characteristic of the Pontiac Six.

Pontiac Six Sedan or Coupe, $825. Oakland Six, companion to Pontiac Six, $1025 to $1295. All prices at factory. Easy to pay on the General Motors Time-Payment Plan

OAKLAND MOTOR CAR COMPANY, PONTIAC, MICHIGAN

The Pontiac Six Landau Sedan is finished in Sedge Green Duco on body, hood and wheels, contrasting with the Black upholstered top, bright nickel radiator shell, cowl lamps, cowl ventilator, bumpers, and other equipment items. Upholstery of superior wearing quality. Equipment items include nickel hub caps, nickel radiator cap, IV windshield with automatic cleaner, rear compartment dome light, sun visor, robe rail on rear compartment, nickel assist rail, high speed window regulators and invisible door checks.

Profit to Holders of the Double-Profit Franchise

With body types ranging in price from $825 to $1295, Oakland-Pontiac dealers, for months, have been selling to the largest quality car market in the world and scoring a success that is electrifying the automotive industry.

Now Oakland announces a new body type—the Pontiac Six Landau Sedan, a four-door enclosed car, with Body by Fisher, that is destined to meet with immediate favor and to prove another source of profit to holders of the Double-Profit Franchise.

This addition to the Oakland-Pontiac line has been made because the Oakland Motor Car Company is determined to spare no effort in making the Oakland-Pontiac Double-Profit Franchise the most valuable, profitable and desirable the industry affords.

It represents merely another new factor for you to consider when contemplating the selection of a franchise that carries greater assurance of profit and permanence than the one you now have.

In short, it strengthens the appeal of the liberal discounts, equitable dealings, generous advertising and merchandising cooperation that have impelled so many aggressive dealers to come beneath the Oakland-Pontiac banner and share a success that takes front rank among present day feats in successful motor car merchandising.

You can get all the facts about the Double-Profit Franchise and its availability in your territory, by writing or wiring for a factory representative. Address Department B.

Oldsmobile keeps faith with its public trust—

. . . returns to the public the benefits of manufacturing advantages and economies created by the greatest year in Oldsmobile history!

Today Oldsmobile presents *brilliant progress without basic change* in the car which has won its way to public preference by sheer surpassing merit—

. . . new features of known value—

. . . improvements of demonstrated worth—proved in tests on General Motors Proving Ground, to provide even livelier, smoother performance, even longer life, even greater operating economy, than already characterize Oldsmobile!

Consider the beauty and luxurious new appointments of its Fisher body—

. . . go over the car, point by point, study every new feature—

. . . know, as only study can tell you, what a truly great car this is!

The Oldsmobile franchise spells opportunity . . . and today is sought after more than ever before.

Important

to the

Bus and Truck Industry

To educate, to help, and to insure an adequate return on the investment will be the policy of "Operation & Maintenance."

An indication of the enormity of the bus and truck fleet business can be gained from the following estimate of sales in the commercial car field during 1926.

Motor Trucks and Buses		$475,000 000
Tires for Replacement		250,000 000
Gasoline		450 000 000
Lubricating Oils and Greases		52,000 000
Special Bodies		75 000,000
Replacement Parts and Supplies		145,000,000
Brake Lining	$17,000.000	
Batteries	13 000 000	
Bearings	22 000 000	
Piston Rings	9,000 000	
Pistons	14,000 000	
Radiators	12,000 000	
Springs	16 000.000	
Ignition Apparatus	14 000,000	
Miscellaneous	28,000,000	
	$145,000,000	
Special Equipment—Hoists, Winches, Cranes, etc.		25,000,000
Labor—Repairing and Overhauling		205,000,000
		$1,677,000,000

It is a great and wholesome market. And a very appreciable percentage of the market will be the subscriber audience of "Operation & Maintenance."

A circulation drive, now in progress, means placing a buying power of bus and truck fleet owners at the disposal of advertisers that is unusual—both in size and character.

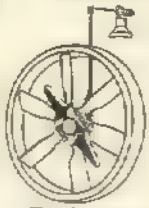
Favorites in the Automotive Field



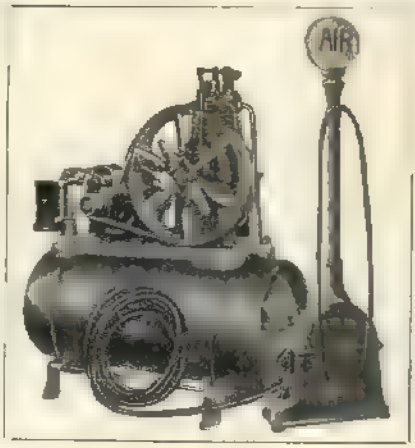
Curtis Positive Centrifugal Unloader

For the average garage or filling station, the Curtis Style "V" Automatic Type Compressor has proven a real favorite. Equipped with an automatic starter, it maintains correct pressure all the time. Positive Centrifugal Unloader prevents starting against a load

Curtis Column Type Air and Water Stand

Air and Water Stands

Curtis Combination Air and Water Stands are supplied in two styles, column and low type. They put air and water within handy reach of your customers. You will find that they will greatly improve the appearance of your station or garage. Full information on request. Use the coupon on this page.



No Premium for Quality

Despite the fact that Curtis Compressors are designed by recognized compressor engineers and honestly built of honest quality materials, they cost no more than a great many lighter outfits. This is not surprising when you consider that the great Curtis 17½ acre plant is equipped with every modern device for exhaustive research, rapid production and large volume. Like any other high grade product that is sold in large quantities, Curtis Compressors owe their low price to sales volume.

Curtis Compressors for tire inflation lines have become renowned in the automotive field because of their dependability and staunch construction. When you can buy quality and performance at no more cost than you'd have to pay for ordinary compressors, why should you accept anything but a Curtis? Let us tell you more about them. Mail the coupon below today.

Tone— makes this horn truly . . . "*The voice of the fine car*"

MUSICAL, yet positive in its warning—clear, vibrant, penetrating—the tone of the *Original* Bosch Horn is unlike that of any other warning signal.

The *Original* Bosch Horn is of the vibratory type. Its action is lastingly trouble-proof. No motor to wear out or give trouble. It is in every way up to the high standard of *Original* Bosch.

No wonder owners of fine motor cars are buying the *Original* Bosch Horn, not only to replace worn-out equipment but often to put on the new car in place of the horn they find there.

Our dealers everywhere are finding this horn a quick selling and profitable item. If you are not already carrying it, write us for details of selling plan. You have the opportunity to do a neat business if you act quickly. Address: Robert Bosch Magneto Company, Inc., 111c West 64th Street, New York. Chicago Branch: 1302 South Wabash Avenue.

NOTE

NO FINER tribute can be paid the *Original* Bosch Horn than the way it is being imitated. But remember the *Original* Bosch Horn owes its popularity to the high standard of materials and workmanship which characterize it and all *Original* Bosch products.

To give your customers this quality you must give them genuine *Original* Bosch products. Look for the name Robert Bosch and this trade-mark on every *Original* Bosch product. They are your guaranty of *Original* Bosch quality as known the world over since 1887.

14,580,000 People *welcome Whippet with greatest ovation ever given new automobile*

In 3 dramatic weeks, this revolutionary European-type high-speed light car became the most talked about automobile in America. Millons welcomed it. Thousands bought it.

† † †

ON SATURDAY, June 26th, America witnessed the greatest ovation ever given any new automobile.

Here are the high spots . . . facts and figures of vital interest to every motor car merchant in the country:—

In New York City, 57,452 people in two days thronged the streets and showrooms to see this amazing new-type car.

In Wayne County, Detroit, Mich., 213,000 people saw the New Overland Whippet in its first 3 days.

In Chicago, 62,176 in four days. In Milwaukee, 27,122. In Boston, 30,000. In Elmira, 15,000. From all over America came reports of overwhelming interest.

In many showrooms people were turned away at midnight. Thousands of orders were placed without even a demonstration.

The whole country was electrified by this new-type car that offered such amazing economy . . . such revolutionary performance.

Dramatically . . . the Whippet has become the topic of conversation everywhere. Overnight it took the spotlight of success.

† † †

The whole automobile situation in America has changed within the last 60 days.

Values have changed. Selling standards have changed. List prices do not mean the same today.

Resale values of less modern and less efficient cars than the Whippet are bound to suffer.

Dealers all over the country were quick to realize that a vital change was taking place . . . hundreds of them have already applied for the Willys-Overland franchise.

It will be much easier to sell the Whippet than to compete with it. Write or wire today for complete franchise details.

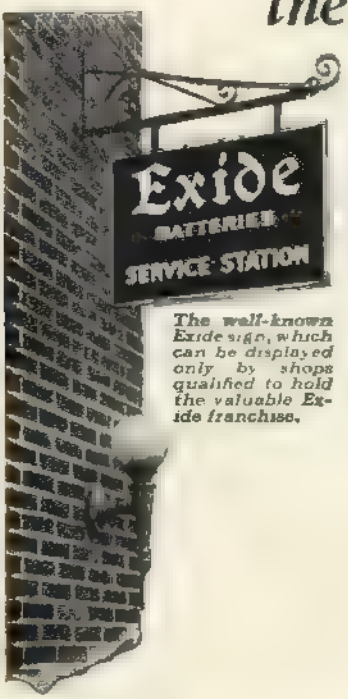
Franklin Tire & Battery Service, Decatur, Ill., one of the battery service stations that hold the Exide franchise.

You are talking a language the customer understands



The well-known Exide sign, which can be displayed only by shops qualified to hold the valuable Exide franchise.

when you say to him—

"GET AN EXIDE BATTERY"

Your customer will have a lot more confidence in your knowledge and judgment if you recommend accessories that he *knows* give good service.

Hence, when you say, "Buy an Exide Battery," you are talking a language he understands perfectly. He knows all about Exide Batteries, for more automobiles leave the factories equipped with the product of the Exide plant than with any other battery.

Or, if he hasn't actually used an Exide before, he is certain to be thoroughly familiar with the name because of the prominent national advertising.

In either case, he will have a greater respect for your judgment, and be willing to give you more of his business, if you recommend a battery he knows is good—an Exide.

THE ELECTRIC STORAGE BATTERY COMPANY, Philadelphia

Exide Batteries of Canada, Limited, 153 Dufferin Street, Toronto

Good bye, boys ~ I'm going into *Business* for *Myself!*

He was a star salesman! For a number of years he had made more money for his employer than any other salesman in the place. But he was *something more* than a salesman. He was ambitious. While he was working for an employer he gave to that employer everything that he had. But his eyes were on the future. By days he sold motor cars—building someone else's business. By night—he dreamed of the day when he, too, would have a business of his own

And because he was *something more* than a good salesman—that day came quicker than even he expected. He had saved his money. He had won and held the respect of his banker and of the business men in his community.

So he was ready when the opportunity came. It is true that opportunities like this come seldom. But in an organization as wide-spread as that of the Paige-Detroit Motor Car Company—there are bound to be openings from time to time for the right type of man to acquire a business of his own.

Not every man can get a Paige-Jewett franchise—even in those few localities where the franchise is open. Paige is particularly proud of its dealer organization. Paige dealers are sound and successful business men.

But seldom as this opportunity comes—it is open now in a few desirable cities. The right kind of men can have this franchise if they can meet the necessary qualifications.

Some capital is required—but the new Paige dealer finance plan solves most of the financial problems involved. The big thing that Paige is interested in—is the integrity, standing and reputation of the man. If you're such a man—write. Your city may be one of the few where this opportunity is open.

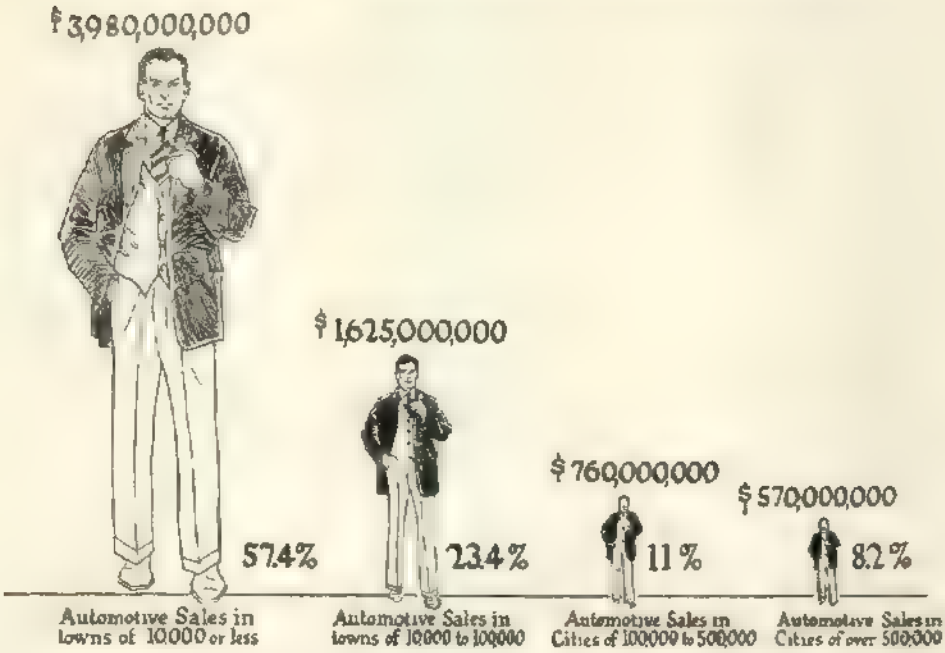
The BIG Small Town Market



It is head and shoulders above everything else, and the May issue of Automobile Trade Journal is going to put the high powered calcium on this Big Boy of the automotive trade. It will show thousands of dealers and garagemen throughout the small town market how to grow even bigger and stronger than they are today.

It will show them how to take better money-making advantage of their opportunities. On every page will be a message of constructive inspiration for those who must be depended upon to successfully sell an overwhelming percentage of your product.

You are invited to use this issue to effectively broadcast the merits of your merchandise and to show these thousands of aggressive dealers how you can help them to a realization of greater profits.

It Isn't Too Late Yet

The season is still young—the big business is just ahead.

But you will have to hurry if you are to skim the cream that will surely be the portion of those who are able to offer Rickenbacker super-performance to their customers.

If you haven't inspected the new line of Rickenbackers you have a surprise coming.

Just compare upholstery, hardware—all details of body construction and finish with the highest priced cars on the market and you will find here super-quality as well as super-performance.

And prices of this product, which conforms to the custom-built idea, are only a shade above those of ordinary mass-production cars.

It's going to be a great year for those dealers who get on and ride with Rickenbacker—and it isn't too late yet.

If interested write the Sales Manager.

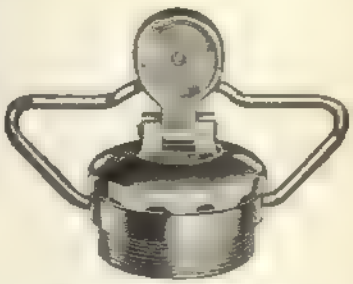
Splitdorf-Bethlehem Electrical Company

TRADE SPLITDORF MARK

Quick-filling Radiator Caps for all makes of cars

Bethlehem DeLuxe Cap

Improved design cap with decagon shaped bars. Specially designed hinge latch to keep cap closed. Theft-proof and leak-proof. Means also provided for locking motometer permanently in position. Depressing latch downward permits of opening cap toward rear. List price $5.00

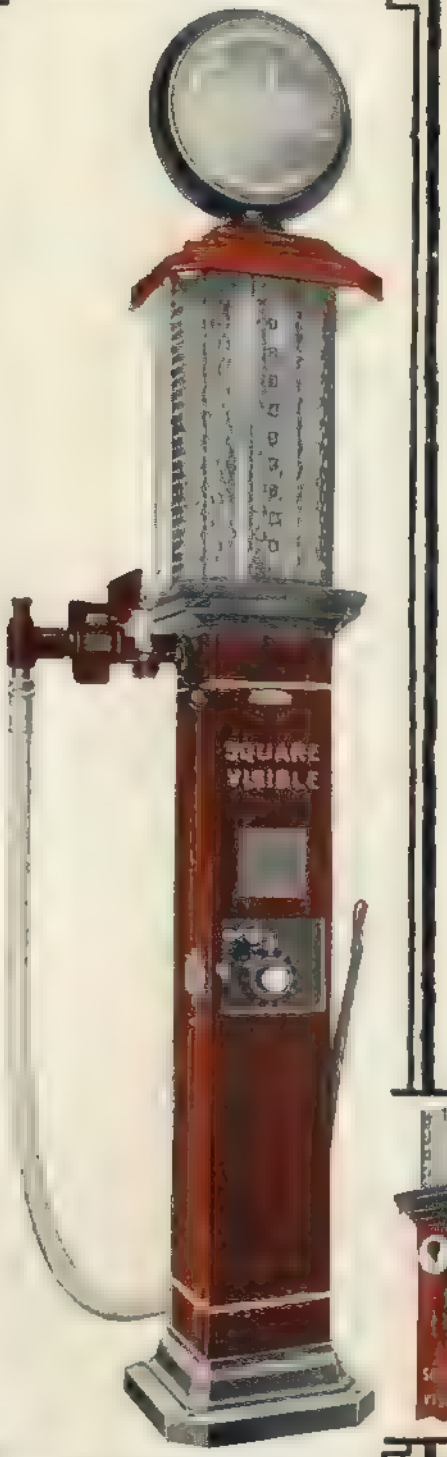


Bethlehem Utility Cap

A high-grade, leak-proof, dependable, quick-filling cap of new design and construction. Ornamental and well finished. Harmonizes with body lines of small cars. Locks securely to filler neck with set screw. Supplied in two types: No. 40 for Ford and Grey cars; No. 41 for Chevrolet, Essex 6, Oldsmobile 6, and Star Model 30. List price $1.60.

The Snappy Cap

A low-priced, quick-filling cap of great popularity. A pull of trigger causes cap to fly open. Pushing cap back clicks it shut. Three styles: Full black, $1.00 list; Black and nickel, $1.25; Full nickel, $1.50.



Looks, speed and stamina

This new masterpiece, Square Visible, with the new sight-glass and the Recorder as standard equipment, challenges careful comparison on every point:

LOOKS: The simple lines and effective design of Square Visible certainly do stop the passing motorists.

SPEED: Square Visible has 22% more speed; it's as fast as Square Sentry, the well-liked high-speed piston-type pump.

STAMINA: Square Visible has sturdy dependability, rugged strength, oversize bearings; it's *tough*, from base to dome!

Square Visible *stops* trade, *holds* trade, *builds* trade—the finest visible built! Goes well with the new Bowser "Fountain of Illuminated Oil," another asset for the dealer or garage owner who competes on gas and oil with nearby filling stations.

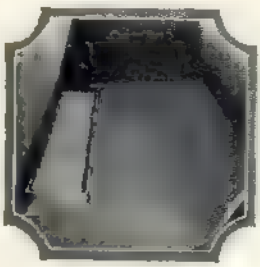
For illustrated circulars, write Dept. 52

S. F. BOWSER & COMPANY, Inc.
Dependable Pumps and Tanks
FORT WAYNE, INDIANA, U.S.A.

This shows the new flow-indicator, an integral part of every Square Visible. As an attention-attracter and trade-builder, it is absolutely the last word. For a visible pump, it's what the bell and the sight-glass are to Square Sentry! As you can see, the arrow tells your customer that he is indeed getting the gas he has ordered—a confidence-builder that pleases public, dealer and operator alike

A Revolutionary Advance in Motor Car Heating

Liberal Heat



at a Liberal Price

with a Liberal Profit for the Dealer

USING the HOT WATER that circulates round the Motor Block, the MOT-ACS takes about one-twentieth of that water and sends it (by simple hose connections) speeding through the Heater and thence back into circulation again.

Healthy, Clean, Dependable Warmth

This water, circulating through the MOT-ACS system at the rate of 5-feet-per-second, is constantly held at an even temperature, producing the healthiest and most comfortable character of heating—as smooth, steady, and dependable as the Gulf Stream.

Uniform Heat even at Low Speeds. Absolutely *NO* trouble. Heats up rapidly, and retains heat while car is parked and motor not running. Easily turned on or off.

No possibility of gas, odors, burning heat, or suffocating atmosphere.

Only Two Models to Carry

Quick, easy installation—45 to 75 minutes! Only two models for the Dealer to carry.

And *NO after service!* Simple construction. Positive operation. Nothing to adjust. No sticking valves, no carbon trouble, no springs, or moving parts. Positively *nothing* to get out of order.

Installation

Far easier and less expensive than for other heaters. No cutting out of floor boards. No cutting of exhaust pipe or pipe connections. Drill two ⅞" holes in floor boards, insert fitting in radiator hose, screw heater to floor, and installation is complete.

Department J

MOT-ACS, Inc., 42 Broadway, New York City

WARM AIR CAN BE JUST AS PURE AS COLD AIR

If you have no gas or odors or vitiating hot air coming into your car

If your heat comes from HOT WATER through radiation from a MOT-ACS nothing is added to or taken away from the air

It remains pure and full of life as well as warm and comfortable

STUDEBAKER'S
New Custom Sedans
—selling faster than our big One-Profit plants can make them

Never in motor car history has the public expressed its preference more quickly or more emphatically. In the first thirty days these Custom Sedans have more than doubled the sales of Studebaker Sedans for any previous month.

Never, until now, have custom lines, custom refinements and custom beauty been embodied in a car of Studebaker's fine performance and rugged durability at a price within reach of the great American family.

In five short days over a half million people flowed in and out of Studebaker sales rooms all over the United States to see these new Custom Sedans —and their vote and verdict were as one . . . here, at last, is custom car luxury without custom car cost—here, at last, is the final custom beauty of contour, color and complete appointments at a price only Studebaker One-Profit facilities could make possible.

No wonder this half million acclaimed the idea of a custom car at the price of a conventional car.

No wonder Studebaker dealers are today the envy of the industry. For in addition to the exclusive sales advantage of custom car luxury at conventional car cost, the Studebaker franchise offers these further advantages: ① One-Profit Value. ② Unit-Built Construction. ③ Always Kept Up-to-Date. ④ Used Car Pledge. ⑤ Low Time-Payment Rates.

If Studebaker is inadequately represented in your locality, or not represented at all, write us at once regarding the sales rights for these fast-selling Studebaker cars.

The NEW STUTZ

with Safety Chassis

in the smaller cities

by F. E. Moskovics

President

STUTZ MOTOR CAR COMPANY
OF AMERICA, Inc.
INDIANAPOLIS

IT WAS a prophecy of mine, that The NEW STUTZ would appeal to the better class of automobile merchants in the smaller cities. And I am glad to see this prophecy verified in our records of dealers who have taken STUTZ franchises in the past sixty days.

We are especially interested in securing such representation, because we feel that this body of dealers in small cities, towns, and communities constitutes the keystone of our dealer structure.

And, in The NEW STUTZ, I am confident that the well-established merchant in the small city has an automobile on which he can do a profitable business in the fine car field.

Fixed charges are not increased by taking on a car of this character. Sales are made readily and easily, without the burdensome overhead necessitated by the ordinary car, devoid of outstanding sales appeal.

We have always been particularly desirous of lifting such overhead from the dealer in small communities, and with The NEW STUTZ he can be assured of a profitable business even though the number of prospects in his territory be limited.

(Signed) F. E. Moskovics

STUTZ
SAFETY CHASSIS

First Automobile Wedding

BOSTON, Jan. 27.—Boston has had its first automobile wedding. All the guests that attended the wedding of Miss Mary Walsh, of Roxbury, to Charles E. O'Connor at the Mission church this week rode to and from the church in electric cabs and runabouts. It was a very picturesque exhibit along the street near the church door, and excited a great deal of comment by the passers.

—News Item, February 1, 1900

And now the whole country is wedded to the automobile. Over 20,000,000 motor vehicles are registered. Production figures are still breaking records. The minimum replacement market is bigger than the entire sales possibilities a few years back.

To meet present demands a daily capacity of 132,000 Timken Tapered Roller Bearings is required. Five Timken plants, embracing an entire self-contained Timken steel mill, are in operation in the United States, Canada, England and France. A total of 150,000,000 Timken Bearings has been put into use. 83% of American makes are Timken-equipped, and Timkens are widely used in Europe as well.

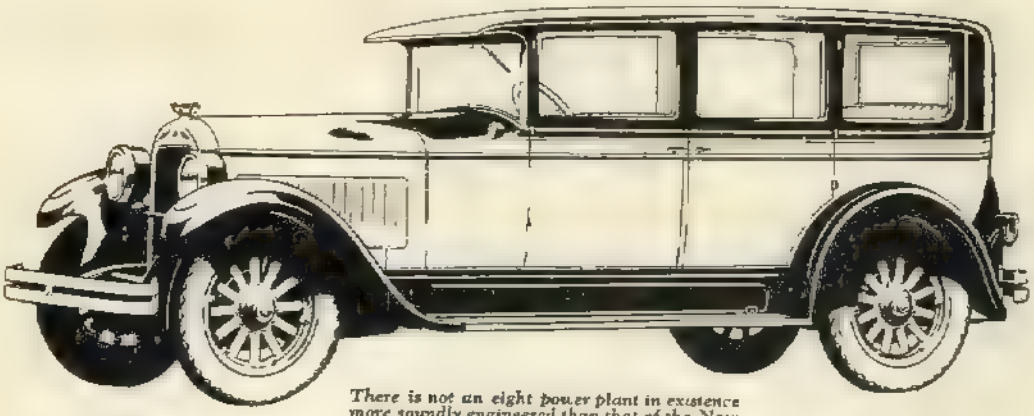
With Timkens so potent in automobile progress, and so widely accepted by car builders and buyers, it surely pays dealers to mention Timken Bearings.

THE TIMKEN ROLLER BEARING CO., CANTON, OHIO

TIMKEN

Tapered

ROLLER BEARINGS



There is not an eight power plant in existence more soundly engineered than that of the New Series Hupmobile Eight, nor a performance program which can surpass this record breaking car.

Helping You Sell More

Walden-Worcester Wrenches

A real merchandising help for the sale of Walden-Worcester Wrenches.

From this cabinet, handles and sockets may be sold separately to the individual car owner—just the combinations he is looking for.

This merchandiser is made of pressed metal standing 28" high, 22½" wide and 12" deep. Beautifully finished in olive-green with Walden-Worcester goldenrod lettering. A proven sales stimulator of the first rank.

Sockets are broached from solid chrome-nickel pieces—all handles have spring ball pressure clips assuring a playless fitting into sockets. All Walden-Worcester quality parts are double-plated, first by copper, then by nickel, which insures against rust and assures clean handling in selling over-the-counter.

The selling season is just starting. Lose no time, but come in with us for the biggest opportunity for wrench sales you will have this year.

Ask your jobber's salesman about this cabinet at once

WALDEN WORCESTER WRENCHES

WALDEN-WORCESTER

The original and largest exclusive manufacturers of All Steel, Socket Wrenches – in the World

475 SHREWSBURY ST., WORCESTER, MASS., U. S. A.

Simplify Your Tappet Work With this "SUPERRENCH" SET

Williams' Tappet Set No. 1063, shown above, contains six genuine Tappet "Superrenches" packed in roll case of heavy Olive Drab Twill, bound along the edges and equipped with strap and buckle.

With this set of six Williams' Tappet "Superrenches" you can adjust tappets on 80% of all cars or trucks. And you can adjust 'em more accurately —in less time—with less trouble.

Handy "Superrench" tappet wrenches are built extra thin and light. Their narrow, pointed jaws and 15° head angle make cramped quarters seem roomy. And their length—8 to 9 inches—prevents burning your hands on hot engine parts.

Forged from Chrome-Molybdenum steel, they're strong and tough—unbreakable. Every wrench in this time-saving automotive kit is absolutely guaranteed against breakage.

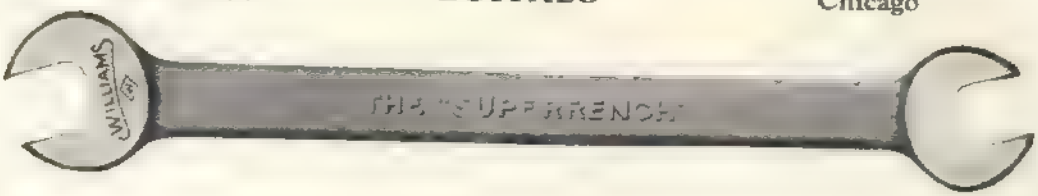
WILLIAMS

Your Jobber's Salesman Knows About this "Superrench" Tappet Set—Ask Him!

J. H. WILLIAMS & CO.

"The Wrench People"

New York BUFFALO Chicago



This sales board given free with wrench assortment it displays.

TAPPET adjustment must be done in cramped quarters, while the engine is hot. For such work a man needs a tool that's a help, not a hindrance.

He wants the *right* wrench—and it's The "Superrench."

The Tappet-Type "Superrench" is light, yet has ample length—8 to 9 inches—to prevent burned fingers. The 15° angle of the opening is the most efficient for tight places. And the thin pointed jaws get in a grip where no clumsy wrench *could* go.

Like all "Superrenches," it's made of Chrome-Molybdenum steel—the toughest metal in modern use. We guarantee it not to break under any use or abuse.

The *Right* Tappet Wrench is THE "SUPERRENCH"

Tappet "Superrenches" are also sold in sets, with or without attractive and durable roll case.

$935

OVERLAND
Four Sedan
$595

All automobiles naturally fall into but *four* great price groups . . .

1. The "pony" class, composed entirely of 4-cylinder cars selling under $700 (4-cylinder cars over $700 are now a rarity and by the end of 1926 they will be "antiques");

2. The second price-group is made up of so-called "light sixes", and embraces cars selling for from $800 to $1000;

3. The step next in order is the $1500 group, composed of 6-cylinder cars of 50-h.p. or better. In this group, the new "70" Willys-Knight Six is the outstanding leader;

4. The last step embraces the "quality group" selling for $2000 and over. Of this group, the Willys-Knight Great Six occupies front-rank position.

The New Improved

DAZEY CHURN

Patented *Removable* Strainer

of the new improved DAZEY enables the operator to make butter, pour in wash-water, and complete churning without once removing the top.

An exclusive DAZEY feature.

New-Style Jar

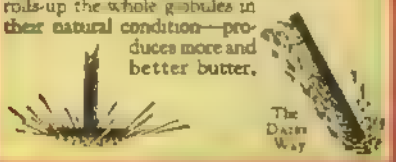
of the improved DAZEY has no sharp upper corners to collect cream that would remain unchurned. This improved Jar is far easier to clean, more attractive, and more durable

OLD

NEW

Patented DAZEY Dasher

The new improved Churn has the famous DAZEY patented dasher which does not strike the butter globules a direct blow but rolls up the whole globules in their natural condition—produces more and better butter.



Increase your DAZEY Churn sales by using this Display. It is beautifully lithographed in four colors, size over all, 27 in. high x 50 in. long. Dealers will be provided with this Display upon request, without charge; also other Dealer Sales Helps. The proper use of these Sales Helps will undoubtedly increase sales on DAZEY Churns.

Heavy clear glass jar with smooth finished neck and sloping rounded upper corners; heavily plated screw cap top; white maple dasher. Cast frame and gears finished with double coat of aluminum bronze; perforated removable strainer in cap.

The high-grade materials used and the care with which they are assembled and finished assures mechanical excellence and durability.

The New Improved

DAZEY CHURN

Balanced Fly-wheel

The new improved DAZEY Churn with its heavy flywheel makes turning far easier and smoother than Churns with only a crank handle.

Round Corners

The new improved DAZEY has a round-cornered and raised-bottom receptacle of improved design. No cream left unchurned in corners. Strong, sanitary; easily cleaned.

Strong, Rigid Frame

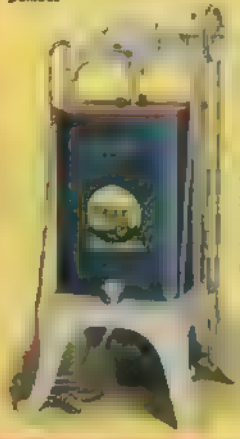
The new improved DAZEY frame made of iron and steel is exceptionally strong and rigid. Under severe tests, DAZEY frame stays square and "true."

Sanitary Faucet

The new improved DAZEY Metal Churns are equipped with a specially designed sanitary faucet for drawing off the buttermilk and the wash-water. This is a valuable feature.

* WHEN ORDERING

Specify for direct current, the voltage. For alternating current, voltage, cycles and phase.



Frame strong and rigidly constructed of steel and iron, and finished with double coat of pure aluminum bronze. Receptacle of triple plated charcoal dairy plate, enameled outside. Covers and dasher of hard white maple.

Remington Sheath Knives for Outdoor Service

THESE knives are beautifully finished—perfectly balanced—scientifically designed and built for hard service to meet the exacting requirements of the outdoor enthusiasts; sportsmen, guides, campers, fishermen, auto-tourists, woodsmen, surveyors and Scouts.

The blades and handle tangs are of one piece—extra heavy gauge, uniformly forged, hardened and tempered. Special attention is given to the blade shaping, grinding, sharpening and edge-setting. They possess strong, durable, keen-cutting edges. The laminated handles are specially designed to fit the natural, easy grasp of the hand. Made full length, with sure-grip, swelled center. Mounted with nickel-silver hilt; brass, colored fibre and genuine leather discs and correctly shaped, solid aluminum head (butt), permanently locked with countersunk brass nut.

Each knife is furnished with a sheath, made of selected oak-tanned leather, stitched and riveted, equipped with a loop and snap.

No. RH31 REMINGTON SHEATH KNIFE, 3⅜-in. blade, with No. S3 Sheath . . . . Each $2 50
Length over all, 7¾ inches. Wt. knife and sheath, 6 oz. Packed one in a box. ½ dozen in carton.

No. RH32 REMINGTON SHEATH KNIFE, 4½-in. blade, with No. S3 Sheath..... Each $2.75
Length over all, 8½ inches. Wt. knife and sheath, 8 oz. Packed one in a box. ½ dozen in carton.

A New "V" Shaped Coaster Wagon

This new and practical wagon will add life to the wheel goods department of any store.
The first feature to strike the eye is the V-shaped body—narrower in front than in the rear. This shape, moreover, is just right to fit the rider. The boy coasting straddles the wagon with the brake handy to his left hand.

Mr. Merchant, this is really new, and you will like its mechanical idea as well as do the boys—it is absolutely non-tipping. The handle is so designed that it may loop the V-shaped body to permit the boy to lock the bow against the rubber grips attached to sides of wagon.

CADILLAC Electric Washing Machine

The only washing machine equipped with a **DISAPPEARING WRINGER** which swings and locks in any desired position on wash day and which can be folded within cabinet when not in use. This exclusive feature protects the wringer, tub and mechanism from soot and dust and adds years to the life of the washer

Cadillac closed with wringer folded down inside cabinet, where it is protected from dust and dirt

The CADILLAC is of the approved oscillating type. No heavy cylinder to be lifted in or out.

Full 8 sheet capacity self-locking COPPER TUB.

ALL PARTS ENCLOSED IN FULL CABINET which is finished in cream white, trimmed with blue. Door in side of cabinet gives access to threaded drain cock for drainage purposes.

Cadillac has no belts to slip or break and no springs to wear out. Construction of washer so simple that there is nothing to get out of order.

Two levers, placed conveniently where hands naturally rest, give operator perfect control over tub and wringer. Size is convenient—24 by 27 inches by 38 inches high. Weighs only 232 pounds. **No operating noise.** Operates from any light socket. Specify current when ordering.

Washer ready for use with wringer in one of its several working positions.

The Cadillac is the only Washing Machine equipped with a Disappearing Wringer—a wringer which swings to any desired position when in use, and which folds down within the cabinet when not in use.

It is absolutely noiseless in operation and free from vibration, for it is equipped with ball bearings, and all gears are enclosed in casings and run in grease.

It is easy to operate, both wringer and tub controls being placed just where the operator's hands naturally rest when using the machine.

It is more compactly built than any other machine of similar capacity—8 sheets.

It washes thoroughly, but gently—no wear and tear on clothes. The large copper tub is so designed that satisfying results are obtained whether a single handkerchief or a tub full of clothes are put through at one time.

Remember, a washing machine is used only one day in seven. **The Cadillac**, with its Disappearing Wringer, is a sightly article of furniture six days when not in use, and a thoroughly efficient and dependable machine on wash day.

Safety Wringer Release
12" Rubber Rolls
Wringer Control lever
Tub control lever on opposite side
Wringer Lock Release for swinging to different positions
¼ H. P. Westinghouse motor
Gear case packed with grease
Large Double Roll Casters
Tension Screw
Polished aluminum Wringer Frame
Aluminum sliding Drain Board
Copper Tub—eight sheet capacity
Threaded Drain Cock
Automatic Tub Lock

Cadillac without side panels showing its superior mechanical construction.

Ad-Lee 1-2-3 Penny Ball Gum Machine

Ad-Lee 1-2-3 Ball Gum Vending Machine. This is something entirely new, the alternating delivery plan gives it an earning power for above the ordinary vending machine. Operates as follows: First penny delivers one ball of gum; second, two balls; third, one ball; fourth, two balls, fifth, three balls; in other words, nine balls of gum for every five pennies. Machine is made of cast iron, finished in bright red enamel, nickel plated trim. The heavy glass globe holds 1200 balls of gum, coin box in rear can be easily emptied without moving machine.

A big profit maker, because this vending machine empties very quickly and, therefore, the turnover is much greater.

No. A7925. Each..... 15.00

FORM 716

CARBIC PORTABLE LIGHTS AND CARBIC CAKES

STANDARD NO. 2 CARBIC LIGHT

USES NO. 20 CARBIC CAKES

For general all around requirements, this light is considered the most adaptable. Its light operating weight, making it readily portable, and the fact that it can be charged in less than three minutes to burn continuously for twelve hours without any attention have earned for it a genuine popularity with contractors, railroads and others everywhere.

NO. 1 CARBIC LIGHT

USES NO. 20 CARBIC CAKES

The burner and reflector equipment on this unit is identical to that of our standard No. 2 light. The volume and distribution of light, therefore, are the same. Those not requiring more than six hours burning period often prefer this light to the No. 2, because of its lighter weight.

NO. 3 CARBIC LIGHT

USES NO. 20 CARBIC CAKES

The principal features of this light are the double burner arrangement, permitting the use of one or two burners at a time, and the extra volume of light, which is obtainable from this single unit. The burners and reflectors are the same as on lights Nos. 1 and 2.

CARBIC "CADET" LIGHT

USES NO. 5 CARBIC CAKES

This light is extensively used by fire departments, railroad wrecking crews, mines and many others requiring extreme portability. It is easily carried by one man and is equipped with water-tight cover to prevent splashing of the water from the tank.

CARBIC CAKES

FOR USE IN CARBIC LIGHTS

Carbic Cakes are made from highest grade carbide treated and compressed into briquet form by a special process and represent not only the most efficient and economical means of supplying gas for portable lights, but by far the safest. The method of generating, coupled with the special composition of the cake, insures a clear, white, smokless flame of great illuminating power.

100 lb Drum
40 Cakes
No. 20 Size

Each cake contains a guaranteed gas yield according to its size, thus eliminating guess work in charging. There is no waste of cake and the light can be used intermittently.

75 lb. Drum
(110 Cakes)
No. 5 Size

Carbic Cakes are packed in strict accordance with Fire Underwriters' rules in sheet steel drums and will last indefinitely. Each cake is wrapped separately in paper, making it convenient and easily handled.

Carbic is a standardized product,—several thousand tons being shipped each year for consumption exclusively in Carbic apparatus.

CARBIC LIGHTS IN ACTION

Carbic lights represent the highest development in portable lighting equipment and have proven, by practical use on thousands of construction and emergency operations at all points of the compass and under varying climatic conditions, that they fill every exacting requirement of a powerful, portable light, the essential qualities of which are efficiency, portability, economy and simplicity, coupled with absolute safety.

All Carbic lights consist of but three parts. They cannot be wrongly assembled.

Charging may be done by even the most inexperienced labor and requires only a few minutes time.

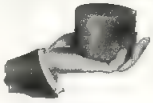
Carbic lights are equipped with all metal, storm-proof burners, also with special swing joints, permitting the adjustment of the reflector to any angle without moving the light itself.

Carbic lights are listed as standard by the Fire Underwriters' Laboratories.

CARBIC CAKES

"THE HEART OF THE CARBIC LIGHT"

Carbic cakes are the most economical, reliable and time saving means of producing powerful light for portable uses.



These solid, compact "bricks" slip quickly and easily into the light and burn long and efficiently. No fuss, no muss, no waste

GRAND DOLL ASSORTMENT

FOR A QUICK, LOW COST, SATISFACTORY OVERHAUL JOB!

Eliminate the necessity and expense of reboring slightly out of round cylinders. Stop oil pumping, piston slapping, knocking and kindred engine troubles —cheaply, quickly—*and permanently.*

Restore power, speed, silence and economical operation by installing a set of G-H Tension Rings behind the regular rings.

The G-H Tension Ring, as its name implies, is a tension ring — not merely a shim. They are made from the highest grade alloy steel obtainable and *tempered in oil*, by a pioneer in the manufacture of this type of ring. Their original resiliency and tension is retained under the most severe working conditions.

Easy to install and profitable. Three sizes fit 90% of the cars in operation.

An attractive carton containing an assortment of 300 G-H Tension Rings is put up for the convenience of the dealer and repairman.

Get genuine G-H Tension Rings from your Jobber or write direct.

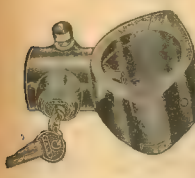
H. R. STEER-POST LOCK

For all makes of cars except Ford, Dodge, Stearns and 1920 to 25 Overland—4 Cars



Prevents car from being either steered or towed, locks automatically by pressing button, key being used only to unlock.

Permanently and rigidly attached to steering post of car, about 4 in. below the wheel. When device is locked steel plunger penetrates both outer and inner steering post, making it impossible to turn steering wheel.

Bronze casting, highly nickeled with all working parts of steel, case hardened.

Furnished complete with 2 keys and detailed instructions for attaching, approved by the Underwriters' Laboratories. W't each 3 lbs.

Give model, year and name of car when ordering.

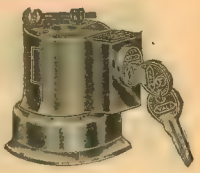
H. R. "NEUTRALOCK"



The H. R. Neutralock is made of steel and contains a Yale lock, it is attached to the gear shift lever, locking it in neutral position, by a single press of the hand or foot. It cannot be unlocked with a master key, does not interfere with action of lever, or prevent car from being moved by hand in case of emergency. Does not prevent motor from running idle, but the car cannot be moved under its own power until the lock is released.

Instructions for attaching accompany each lock.

No. F7206—Will fit:

Apperson	1915-up-to-1923

WINDSHIELD WEATHERSTRIP.

This type of strip is made to fit all standard windshields; it is designed for use between the upper and lower sections of windshields, closing the gap between the two sections. This is a molded strip, running uniform as to size and quality; of high grade, black, non-blooming stock.

Each

No. A-136—Windshield Weatherstrip; put up in 39-inch lengths **$0.64**

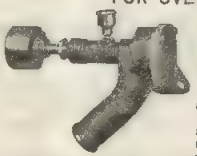
Designed especially to fit offset windshields such as are used on Ford cars. This type is also a molded, smooth finish strip of high grade stock.

Each

No. A-137—Windshield Weatherstrip; put up in 37-inch lengths .**$0.64**

WATER CIRCULATOR.

FOR OVERLAND "4".



The Milwaukee circulating pump for the Overland "4" car provides a positive force feed water circulating system which rushes the water through a great deal faster than the regular Overland "4" system, thereby providing much more efficient cooling without in any way interfering with the other system. Bracket of pump is bolted securely to motor; will not vibrate or wobble. Fitted with best grade bronze bushings which will last indefinitely. Easily and quickly installed. Comes complete with high grade fabric fan belt and full instructions for installation.

Each

No. A-801—Milwaukee Water Circulator for Overland "4" Car; weight each, 7½ lbs.. ..... **$9.75**

FOR ESSEX "6".

Constructed especially for Essex "6" cars. Body made of one piece "T" shape heavy gray iron casting. Shaft is ½-inch cold rolled steel with two-blade impeller. Bearings are oil treated end grain hard maple, brass encased, self-lubricating. Finished in two coats red enamel.

Each

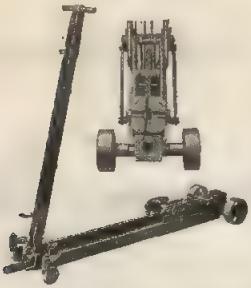
No. A-E6—Universal Water Circulator for Essex "6" car; complete with belt, flanged pulley and studs to attach; weight each, 8 lbs.....**$7.50**

Six in a case.

GARAGE JACKS.

MARQUETTE.

BALLOON JACK.



A new powerful lifting multiple stroke jack that goes under the lowest axle on cars with deflated balloon tires, lifts car with a few short easy strokes.

Handle adjustable to 3 positions for lifting. Will stand in upright position out of aisle. Handle folds back flat on jack when not in use. Handle clears trunks, bumpers, spare tires, etc.

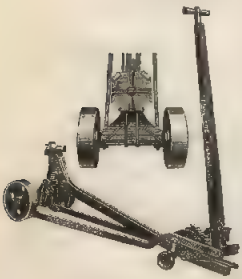
Very simple reversing mechanism; anyone can operate it without instructions.

Extra large swivel cap with large center hole for drain plug of differential housing and grooved to accommodate truss rods. Durable steel construction.

Each

No. A-1M—Marquette Balloon Jack; capacity, 5000 lbs.; length, 58 inches; minimum height, 5¾ inches; raises up to 20 inches; weight each, 135 lbs. **$68.00**

LEVERAGE JACK.



One stroke raises or lowers a car. This feature alone saves a lot of valuable time. The extra powerful leverage enables raising or releasing the load quickly and with surprising ease.

Hinged handle that can be kept out of the way at all times. This feature permits leaning the handle straight up, out of the aisle, where cars can't run over it. It folds back flat when not in use, so that the jack can be shoved under a bench or out of the way.

Quickly placed in position regardless of projections such as trunks, spare tires, etc. The swivel cap is adjusted to the proper height simply by "breaking" handle and pressing it down.

Extra large swivel cap with large center hole for drain plug of differential housing and grooved to accommodate truss rods. The load cannot slip as the swivel cap is in a level position at any height.

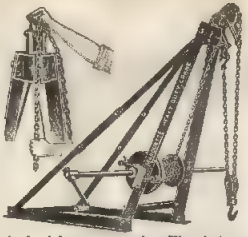
Steel construction of all working parts insure the utmost strength, long life and freedom from trouble.

Each

No. A-2M—Marquette Leverage Jack; length, 62 inches; minimum height, 8¼ inches; raises up to 13¾ inches; weight each, 124 lbs. **$59.00**

SERVICE CRANES.

MARQUETTE HEAVY DUTY.



The most powerful and simplest crane made.

A new type of full floating roller bearing winch is used with an epicycle gear fashioned from two heavy gears entirely enclosed, which gives the tremendous leverage ratio of 174 to 1 and always keeps the load under control, a great elimination of friction with ease of operation. This gearing is safe, 12 teeth are always in mesh instead of two.

The full universal swivel head provides for grabbing the load from any angle. The chain can be dropped through the swivel head in just a jiffy for a direct pull off the drum with no extra attachments or expense.

The boom is adjustable to several different heights for any desired degree of overhang. A knob adjustment on the drum permits rapid spooling or unspooling of the chain. A positive spring lock on the drum prohibits the load from slipping or dropping when being raised or towed, besides acting as a safety factor against impact shock.

A one-man crane. Easy and convenient to operate from the ground and from either side of service car, is allowed by the winch being mounted low on the boom with shaft extending on both sides.

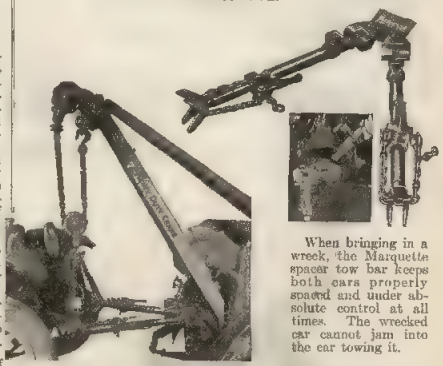
Steel construction, large safety allowances, no weakening bends, great rigidity, all possible stresses and strains safe guarded.

Each

No. A-3M Marquette Heavy Duty Crane; lifting capacity, 5000 lbs.; size base, 42x32 inches; height of boom in upright position, 61½ inches; height of boom in lowest position, 50½ inches; height of winch from base of crane, 16 inches; length of crank shaft, 60 inches; shipping weight, 400 lbs. **$175.00**

SPACER TOW BARS.

MARQUETTE.



When bringing in a wreck, the Marquette spacer tow bar keeps both cars properly spaced and under absolute control at all times. The wrecked car cannot jam into the car towing it.

Makes two cars travel as a unit, no jerks or side sway. Allows towing wreck lower down. Has 33-inch arms consisting of steel pipes telescoped together, which can be extended to 43 inches. Bars fit in "T" slots, quickly put on or removed. Full universal swivel. A necessity in wrecking equipment.

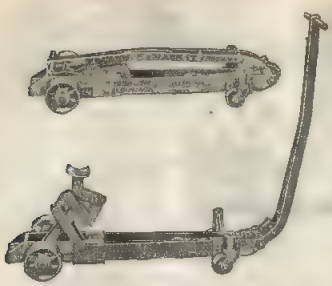
Each

No. A-4M—Marquette Spacer Tow Bars; extended length of arm, 43 inches; contracted length of arm, 33 inches; range of adjustment, 10 inches; shipping weight, 52 lbs. **$40.00**

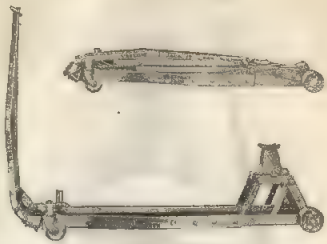
GARAGE JACKS.

YELLOW JACK-IT.

HIGH-LOW BALLOON JACK.



BUS-JACK.



This new model High-Low balloon jack is designed to handle any car with balloon tires. It has a remarkable lifting range of from 6 inches when lowered to 16 inches at its maximum height. So many cars have extreme low axles which combined with balloon tires (when deflated) will not permit the use of any ordinary garage jack. Another feature is its length of 43½ inches. There are many cars with rear tank, tire carrier and rear bumper, giving an overhang that makes it difficult to reach the axle with a shorter jack.

The handle is 42 inches long. Ratchet mechanism is simple and in close quarters such as between cars or close to the wall it permits raising the load by short strokes, holding the handle at any angle desired.

Specifications.

	Ins		Ins.
Length of jack	43½	Axle in large wheels	1¼
Length of handle	42	Lift	8¼
Diameter of wheels	6	Minimum height	6
Face of wheels	2½	Maximum height	16½
Diameter of casters	3⅝	Roller bearings throughout.	

The last word in garage jack construction. As a labor and time saver it is certain to pay big dividends on the investment.

Each

No. A-4—Yellow Jack-It; capacity, 5000 lbs.; weight each, 134 lbs. **$78.00**

No. A-4FB—Equipped with solid fibre wheels for use on tile and show room floors **102.00**

The new model No. A-6 Yellow Jack-It bus-jack is designed to meet a long felt want in the bus field. It is low enough at its minimum height of 6 inches to go under the axle of any bus built. The jack, with its continuous lift of 7¼ inches, raises high enough to enable the operator to do his work with ease and safety.

For high axles the height adjustment post gives an additional height of 6 inches and when used with the lift gives a maximum height of 20¼ inches. The body length of 72 inches with the 52-inch handle gives a total length of 124 inches, long enough for the operator to easily reach the axle from the rear. This is a great advantage as most buses have a long over-hang.

The ratchet mechanism with chain lift is simple and a proven principle as it enables the operator to raise the load easily on heavy work by taking short strokes from the waist down. Lowering is done in the same manner and is safe and sure.

Specifications.

	Ins		Ins.
Length of jack	72	Axle in large wheels	1¼
Length of handle	32	Roller bearings	Hyatt
Diameter of wheels	6	Lift	7¼
Face of wheels	2¾	Height adjustment	6
Diameter of caster wheels	4½	Maximum height	20¼

Each

No. A-6—Yellow Jack-It; capacity, 15000 lbs; weight each, 325 lbs. **$170.00**

WALKER ROLL-A-TRUCK.

A Six-Ton Roller for Moving and Lifting Buses and Trucks

The Walker Roll-A-Truck is designed to carry the maximum load required in lifting and moving heavy buses and trucks. The extremely low lift, the high raise, the long handle with short stroke, have all been worked out by Walker engineers to meet every requirement of a jack for this purpose. The great leverage, compounded through gears, makes it possible for one man to make the heaviest lifts. A simple reverse mechanism controls the raising and lowering of the jack and the jointed handle can be set in any position.

The construction of all parts is massive. The wheels are on roller bearings and the pivot bearings are bushed. Steel, malleable iron and forgings are used in their proper places, with the idea of having a jack that will withstand continued and severe service.

Each

No. A-745—Walker Roll-A-Truck; capacity, 12000 lbs.; length, 68 inches; low point, 5½ inches; high point, 16¾ inches; weight each, 240 lbs. **$250.00**

CHRISTY SAFETY RAZOR WITH MASSAGE BAR

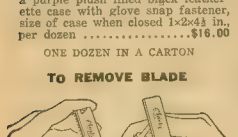
CHRISTY RAZORS AND BLADES ARE MADE BY THE MAKERS OF THE CELEBRATED ENDERS RAZORS AND BLADES WHICH HAVE ENJOYED IMMENSE POPULARITY FOR MANY YEARS

The Christy Double-Action Safety Razor is the improved product of over 23 years experience in manufacturing Safety Razors. It is mechanically perfect, gives the correct shaving angle, teeth of comb guard are set accurately in relation to the edge of blade. The stationary massage bar, exclusive to the Christy, is a wonderful invention and performs a remarkable function. It smooths and draws the skin immediately in advance of the blade edge, giving a taut surface for the blade when it comes in contact with the beard.

No. C325—Christy Double-Action Safety Razor with Stationary massage Bar, contains: highly polished nickel silver-head, comb guard with stationary massage bar, handle is made of special steel and is nicely knurled and nickel plated, six Christy Blades, put up in a purple plush lined black leatherette case with glove snap fastener, size of case when closed 1×2×4½ in., per dozen $16.00

ONE DOZEN IN A CARTON

TO REMOVE BLADE



Grasp razor by handle as illustrated. With thumb and forefinger of other hand take hold of ends of ears of comb guard. Then simply pull apart and lift off blade.

CARE OF RAZOR

The life of a razor and blades depends on the care given them. Be sure to wipe and dry your razor after using. Strop blade with stropper or on palm of hand.

CHRISTY EXTRA BLADES

THIS PACKAGE CONTAINS FIVE HAND FINISHED AND TESTED BLADES
TRADE Christy MARK
SAFETY RAZOR
BLADES
Made by THE ERIE CITY COMPANY Titusville, Pa.

CHRISTY BLADES WILL FIT THE ENDERS RAZOR

Christy Blades are tested and inspected by every known device to make sure every blade leaving the factory will give the finest and smoothest shave possible.

No. C300—Christy Extra Blades, are carefully put up, first, in rust proof booklet to prevent the edges coming in contact with each other, then in paper sheath and finally in sealed envelope to assure the user he is getting the blades just as they left the factory, 5 **Blades in a Package,** per dozen packages $5.50

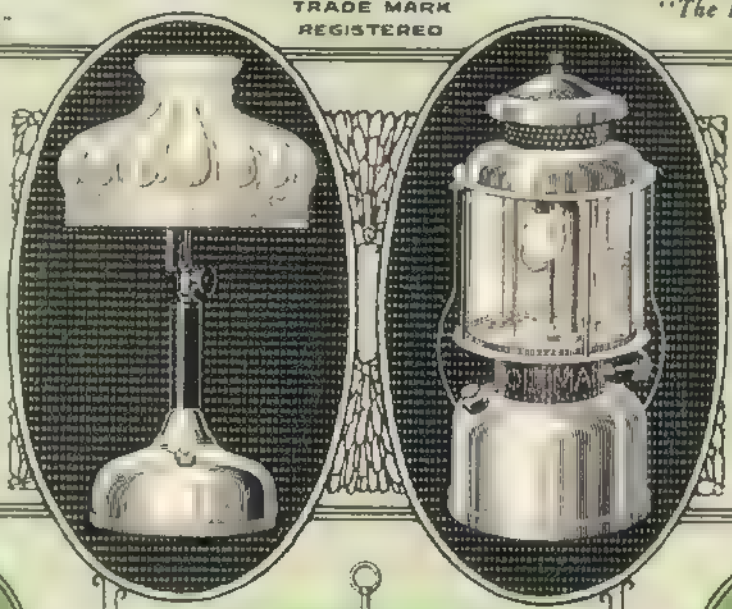
Coleman Quick-Lite Lamps and Lanterns

"The Sunshine of the Night" TRADE MARK REGISTERED "The Light of a Thousand Uses"

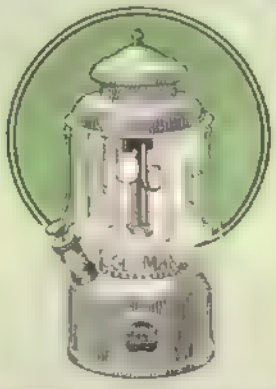


No. C 329 Lamp — This is the Standard Model Quick Lite Lamp—a handsome, practical lamp for general home use. Lights with matches. Makes its own gas from common motor gasoline. Gives the beautiful light for which the Quick-Lite is so famous. Fount holds three pints of fuel—enough for 15 to 18 hours of brilliant service. It is a safe lamp—can't spill even if tipped over—can't be filled while lighted. Equipped with white opal paneled shade of exclusive Coleman design. The weight and quality of Coleman glassware used reduce breakage to a minimum.

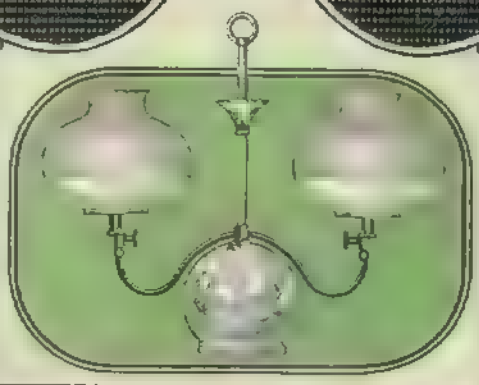
One lamp in carton complete with shade, 2 mantles, pump, wrench, hanger, cleaning pick and extra generator. Shipping weight 10 lbs. **Each** **$12.50**

No. L 327 Lantern — This Quick-Lite Lantern is a most popular seller. A dependable outdoor light that can be used in hundreds of places where the ordinary lantern is useless. Gives more light than 20 old style or lanterns. Keeps right on shining anywhere, any night, in any kind of weather. Metal chimney makes it windproof, storm-proof, bug-proof. Like the Quick-Lite Lamp this L327 Lantern is easy to keep ready for use—no wicks to trim, no chimneys to clean. Fount holds two pints of gasoline which gives from 12 to 15 hours of brilliant lighting service.

One lantern in carton complete with chimney, 2 mantles, pump, wrench, cleaning pick and extra generator. Shipping weight 6 lbs. **Each** **$10.50**



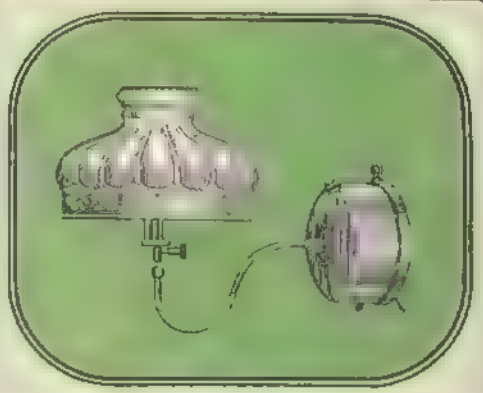
No. L 427 The New Built-in Pump Lantern. Same as the L327 Quick-Lite Lantern, but with added improvement of Built-in Pump and Hand operated Filler Plug. One lantern in carton complete with chimney, 2 mantles, wrench, cleaning pick and extra generator. Shipping weight 6 lbs. **Each** **$12.00**



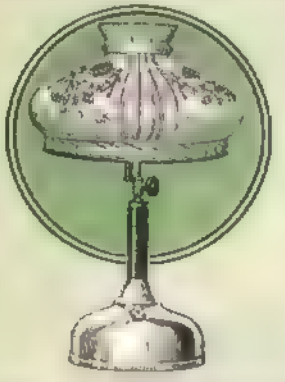
No. P 321 A Quick-Lite Chandelier that is just the thing for use in large rooms, schools, halls, churches and stores. Has three-quarter frosted, bug-proof globes. One in carton complete with globes, 4 mantles, pump, wrench, cleaning pick and two extra generators. Shipping weight 19 lbs. **Each** **$25.00**

No. E 20 Jumbo Gas Lantern. For heavy duty service. Used in henhouses to increase winter egg production. Same general specifications as L327 Quick-Lite Lantern but has four quart fuel tank. One in carton with same extras as L327. Shipping weight 14 lbs. **Each** **$15.00**

No. C 333—A Quick-Lite Lamp with asbestos coated wire screen that protects the mantles from flying insects. For outdoor use. Shipped complete with shade, pump, mantles, screen, wrench, hanger, cleaning pick, extra generator. Shipping weight 11 lbs. **Each** **$14.00**



No. B 329 —This is a Quick-Lite Wall Lamp for use over desks, in bath rooms, kitchens or rooms with low ceilings. Can also be used as a table lamp. One in carton complete with a No. 329 shade, mantles, pump, wrench, pick and extra generator. Shipping weight 15 lbs. **Each** **$13.50**



No. C 318 This Quick-Lite has a ten tinted shade with pink and green floral decorations. Shipped with regular lamp equipment. Weight 11 lbs. **Each** **$14.00**

No. C 324 Same as above with green tinted shade. **Each** **$14.00**

℗ **No. M38M—Extra Magazine** for No. CM38 **1 50**

COLT POCKET MODEL, HAMMER

Blued; .38 Caliber

Dependable arm of the pocket type; offers the desirable combination of light weight with accuracy and extreme power; equipped with Colt automatic grip safety.

Full blued finish steel frame; checkered hard rubber stocks.

Each

No. CP38—Shoots .38 caliber rimless, smokeless cartridges; magazine capacity 7 shots; length barrel 4½ inches; length over all 7½ inches; weight 32 ozs **$67 40**

No. P38M—Extra Magazine for No. CP38. . . . **1 50**

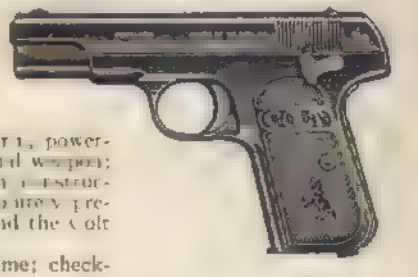
Each in a cardboard box

Numbers marked ℗ shipped from factory only

AUTOMATIC PISTOLS

COLT POCKET MODEL, HAMMERLESS

Blued; .32 and .380 Caliber



A popular well balanced arm, powerful and convenient as a personal weapon; hammerless with solid breech construction, accidental discharge absolutely prevented by thumb safe lock and the Colt automatic grip safety.

Full blued finish steel frame; checkered walnut stocks.

Each

No. C32—Shoots .32 caliber rimless, smokeless cartridges, magazine capacity 8 shots; length barrel 3¾ inches; length over all 6¾ inches; weight 25 ozs **$32 70**

No. 32M—Extra Magazine for No. C32 **1 50**

No. C380—Shoots .380 caliber rimless smokeless cartridges; magazine capacity 7 shots; length barrel 3¾ inches; length over all 6¾ inches, weight 25 ozs **32 70**

No. 380M—Extra Magazine for No. C380. . . . . **1 50**

Note—Nickel plated finish can be furnished from factory at same price as blued.

COLT POCKET MODEL, HAMMERLESS

Blued; .25 Caliber

A pistol combining extra light weight and very small size with the essential features of practical and efficient operation. Absolute safety provided by slide lock and automatic grip safety.

Full blued finish steel frame; case hardened trigger; checkered walnut stocks

Each

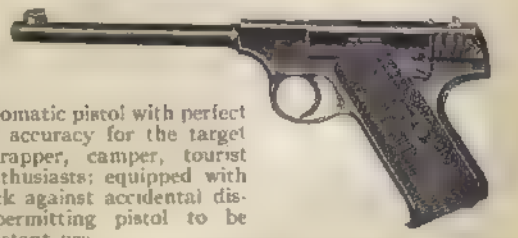
No. C25—Shoots .25 caliber rimless, smokeless cartridges; magazine capacity 6 shots; length barrel 2 inches; length over all 4½ inches; weight 13 ozs **$27 20**

No. 25M—Extra Magazine for No. C25 **1 30**

Note—Nickel plated finish can be furnished from factory at same price as blued.

COLT TARGET MODEL, HAMMERLESS

Blued; .22 Caliber



A high grade automatic pistol with perfect balance, range and accuracy for the target shooter, hunter, trapper, camper, tourist and all fire-arm enthusiasts; equipped with a perfect safety lock against accidental discharge and yet permitting pistol to be carried ready for instant use.

Full blued finish steel frame, checkered walnut stock, target front sight, adjustable for elevation; rear sight with adjusting screw, adjustable for windage.

Each

No. C2210—Shoots .22 caliber long rifle, rim fire, lesmok or semi-smokeless cartridges; magazine capacity 10 shots; length barrel 6½ inches; length over all 10½ inches; weight 28 ozs **$52 20**

CREEK CHUB.

THE NEW PIKIE.

This new nature lure so closely imitates the pike minnow in shape, color and movement that the combativeness of the bass is aroused and they strike to kill.

It's a near surface wiggler, or by turning up the screw-eye a few turns and reversing the mouthpiece you have a surface splatter

Slim body 4½ inches long; weight, ¾ ounce; rust-proof, bronze hooks to blend with color of body; all hooks including the tail hooks set in sockets to hold same away from the body.

	Per Dozen
No. S-700—Natural Pikie, scale finish	$16.00
No. S-702—White with red head	16.00
No. S-704—Golden shiner, beautiful, light golden sides	16.00

THE BABY PIKIE.

Patents pending.

This neat little ½ ounce lure, 3¼ inches long, is in answer to the demand for a smaller bait than the now famous Pikie Minnow, which has been making the record catches of game fish in every part of the country. It has a wicked wiggle and all the good qualities of the larger lure. A light, strong killer.

	Per Dozen
No. S-900—Natural Pikie, scale finish	$15.20
No. S-902—White with red head	15.20
No. S-904—Golden shiner	15.20

MIDGET (¼-oz.) PIKIE.

This little rascal waggles like the rickens and is especially for the caster who uses light tackle and for stream fishing. Floats when cast and is made strong enough to hold big fish.

	Per Dozen
No. S-2200—Natural Pikie, scale finish	$13.60
No. S-2202—White with red head, scale finish	13.60
No. S-2204—Golden shiner, scale finish	13.60

CREEK CHUB WIGGLERS.

3½ inches long. A creek chub has always been considered the king of live baits. Exact in appearance and movement to the creek chub minnow is the Creek Chub Wiggler. Weighs only one ounce.

	Per Dozen
No. S-100—Natural creek chub, scale finish	$15.20
No. S-101—Natural perch, scale finish	15.20
No. S-105—Red side minnow, scale finish	15.20
No. S-102—White with red head	15.20

BABY CHUB.

Has all the features of the Creek Chub Wiggler except that it is smaller in size and therefore does not run so deep. Length of body, 2¾ inches; weight, ½ ounce

	Per Dozen
No. S-200—Natural creek chub, scale finish	$15.20
No. S-201—Natural perch, scale finish	15.20
No. S-204—Yellow shiner, dark gold, scale finish	15.20

CRAWDAD WIGGLER.

Shell finish and nearest to the live crab in looks and movement. Natural shaped body and tail, black bead eyes, rubber legs and bronze hooks.

Floats when not going. Tail guards hooks.

	Per Dozen
No. S-300 Length of body, 2¾ inches; weight, ¾ ounce	$15.20
No. S-415—New Baby Crab; body, 2½ inches; weight, ½ ounce; natural shell finish; wonderful tail movement; gets the small mouth bass when other baits fail	15.20
No. S-302—New Albino Crab; takes the place of the spoon and pork rind and spinner and does not sink; more flash than the spoon; more wiggle than the pork rind; body, white; tail, nickel plate; eyes, red; 8 rubber wiggling legs	15.20

HUSKY MUSKY.

Husky Chub minnow for musky fishing. Length, 5 inches; weight, 1½ ounces. Large strong hooks, heavy yet light enough to cast. When reeled slowly makes a bug swirl on the surface. Has big wiggle below surface. Is good for muskies and other large fish

	Per Dozen
No. S-602—Husky-Musky; white, red head	$20.00
No. S-601—Husky-Musky; natural perch, scale finish	20.00

FLAT SIDE CHUB.

A great surface bait. Acts like a crippled or wounded minnow. Fish will always take a lure which they believe to be in trouble and easy to catch. Spinners have a buzzing vibration which is very attractive. This bait is a great killer on the surface. Length of body, 3¾ inches; weight, nearly ¾ ounce; color, a beautiful blend of dark green, silver and red, in large scale finish. Per Dozen

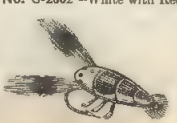
No. S-1505—Flat Side Chub $16.00

NEW CREEK DARTER.

The Creek Darter, a rather slim lure, 3¾ inches long and weighing a little over one-half ounce, is as its name indicates a bait which when going through the water darts about near the surface in a life-like manner.

	Per Dozen
No. S-2000—Frog Coloration	$12.00
No. S-2002—White with Red Head	12.00

FLY ROD CRAWDAD.



A light little lure with body about an inch long, squirrel tail, claws, feather legs and tail. No. 1/0 O'Shaughnessy hook. Made to float and for use with split shot.

	Per Dozen
No. S-F-50—Natural crab color	$12.00
No. S-F-51—Tan	12.00

CREEK CHUB.

NEW FIN TAIL SHINER.

Absolutely the nearest lure to a live minnow in looks and action. Floats when cast. Wiggles when pulled through the water. Flat sided like a shiner. Fins of durable and bendable material. Weight, ¾ ounce. Made to fool the big old wise guys.

	Per Dozen
No. S-2105—Red side shiner	$20.00
No. S-2103—Silver shiner	20.00
No. S-2104—Golden shiner	20.00
No. S-2101—Yellow perch	20.00
No. S-2102—White and red	20.00

WIGGLE SPOON.

Made of heavy brass with nickel finish, stamped with large scale finish. No matter how fast it is pulled through the water it never revolves and twists the line. It has a very fast wiggling movement. Treble hooks attached with swivels to the body insure hooking of the fish when the bait is struck. Is made with upward slanting plane at the head so that by reeling fast the lure will come very close to the surface and if reeled very fast, will come to the surface. Casts very easy. Bass like it and pike and pickerel eat it up. Wiggles a pork rind something awful.

Length of body, 2¾ inches; weight each, ¾ ounces.

	Per Dozen
No. S-1—Equipped with feathered treble at end	$16.00
No. S-2—Equipped with hook for attaching pork rind	16.00

CREEK CHUB.

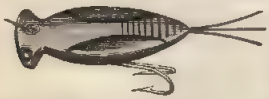
NEW FEATHER CASTING MINNOW.

A Mighty Good Fish Getter.

Loose vibration spinner makes feathers wiggle like pork rind. Hook drops in slot behind body, making same more weedless and a better hooker. Weight, ⅜ ounce. Length of body, 1⅝ inches; Total length, 4½ inches.

	Per Dozen
No. S-F12—White and red; use either with or without pork rind	$13.60

THE BIG CREEK BUG WIGGLER.



The biggest old bass has never seen such a lively life-like bug, and when he gets his eye on it, it's all off with him. The big, strong reversible hooks stand out from the body as the bait goes through the water, wiggling and darting about, and we guarantee that they will get all the fair strikes. The double hooks can be reversed by one-half turn of screw-eye and bait is then very weedless and nearly as effective in hooking the fish. Will be furnished with one hook when so ordered. Length of body, 2½ inches; weight, about ½ ounce.

	Per Dozen
No. S-1400—Bug finish	$12.00

OSPREY.

DARDEVLE.

Stamped from solid brass and copper. All these baits are very easy to cast and will catch all kinds of fish including muscallonge, lake trout, black bass, rock bass, crappies and pickerel. The black and white combination has proved very successful. All kinds of fish strike any of the color combinations, but the most consistent catches have been made as follows: No. 11 has proved a great mid-day bait. Nos. 2 and 16 seem to get them any old time.

The white stripe represents a pork strip and the white chunk a chunk of pork. Baits have a peculiar wiggle which cannot be produced with the real article. These baits are now in common demand and the demand for them is constantly increasing.

Length, 3½ inches; width, 1⅛ inches; weight, 1 ounce.

	Per Dozen
No. S-OD1—Nickel; reverse side black with white chunk	$14.00
No. S-OD2—Nickel; reverse side black with white stripe	14.00
No. S-OD9—Copper; reverse side red with white stripe	14.00
No. S-OD11—Nickel; reverse side green with white stripe	14.00
No. S-OD15—Nickel; reverse side red with white chunk	14.00
No. S-OD16—Nickel; reverse side red with white stripe	14.00
No. S-OD22—Nickel; both sides	14.00
No. S-OD23—Brass; both sides	14.00
No. S-OD24—Copper; both sides	14.00
No. S-OD31—Copper; reverse side nickel	14.00

DARDEVLET.

Length, 2⅛ inches; width, 1⅛ inches; weight, 3/8 ounce.

	Per Dozen
No. S-OD101—Nickel; reverse side black with white chunk	$12.50
No. S-OD102—Nickel; reverse side black with white stripe	12.50
No. S-OD109—Copper; reverse side red with white stripe	12.50
No. S-OD111—Nickel; reverse side green with white stripe	12.50
No. S-OD115—Nickel; reverse side red with white chunk	12.50
No. S-OD116—Nickel; reverse side red with white stripe	12.50

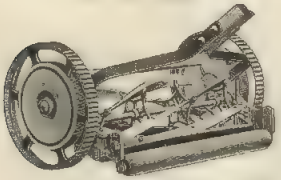
DARDEVLE IMP.

Length, 2⅛ inches; width, ¾ inches; weight, ½ ounce.

	Per Dozen
No. S-202—Nickel; reverse side black with white stripe	$11.00
No. S-209—Copper; reverse side red with white stripe	11.00
No. S-215—Nickel; reverse side red with white chunk	11.00
No. S-216—Nickel; reverse side red with white stripe	11.00
No. S-227—Nickel; reverse, yellow, black spots, red chunk	11.00

LAWN MOWERS

NEW AMERICUS



One of the finest and best constructed ball-bearing mowers ever placed on the market. All parts machined to accuracy and interchangeable. All knives are of best quality crucible steel, hardened and given a cold chisel temper. Both revolving and stationary knives are self-sharpening.

Ball Bearings are self-adjusting, never require attention of any kind. Geared on both sides. Extra large flat steel ratchets and fine cut gears.

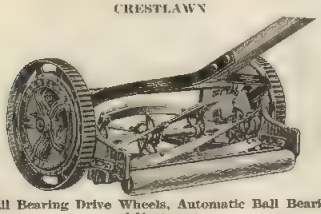
Drive Wheels 10¾ in. in Diameter, Reel 6 in. in Diameter with Five Cutting Blades, Solid ⅝ in. Shaft Extending Full Length of Reel. Hardwood Roller, Varnished Maple Handle.

Handsomely decorated in gold and silver bronze and attractive colors.

Width of Cut, In.	16	18	20
Weight Each, Lbs.	60	63	66
Each	$18 00	19 00	20.00

One in a Box

CRESTLAWN



Ball Bearing Drive Wheels, Automatic Ball Bearing Adjustment

Has the strongest frame construction of any mower made. Cutter bar is secured to the four-squared rigid frame by a patented interlocking adjustment that is absolutely impossible to be knocked or twisted out of alignment. The self-adjusting ball bearings in the revolving cylinder take up the wear instantly, without any attention on the part of operator.

Blades are of razor steel, tempered in oil and self sharpening. A ⅝ inch reel shaft and double riveted end spiders prevent the reel from being sprung and add increased momentum.

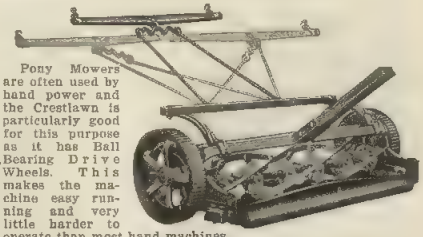
Drive wheels 11 inches in diameter, Reel 6 inches in diameter with Five Cutting Blades.

Decorations in attractive colors of gold and silver bronze and empire red.

Width of Cut, In.	16	18	20
Weight Each, Lbs.	66	68	71
Each	$23.00	24.00	25.00

One in a Box

CRESTLAWN PONY (Horse Power)



Pony Mowers are often used by hand power and the Crestlawn is particularly good for this purpose as it has Ball Bearing Drive Wheels. This makes the machine easy running and very little harder to operate than most hand machines.

All parts lathe turned and cast bed plate machined into side plates, forming an automatic interlocking adjustment which cannot be jarred nor twisted out of alignment.

Steel Bed Knife made with upturned lip which adds to rigidity.

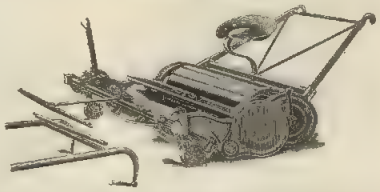
Five Revolving Knives of finest crucible steel, self-sharpening. 11 in. drive wheels, diameter of reel 6 in.

Patent Adjustable Horse Power Attachment avoids disagreeable "tipping up" of rear of machine.

An equal or central draft is maintained at all times.

	Width of Cut 30 inches. Each
Crestlawn Pony—Beautifully Finished in Light Green and Gold with Red Decorations, Complete	$72 00

FENDEN HORSE



Frame reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with raising and lowering device.

Demountable bottom knife and reel.

Fitted with a train of three gears and durable triple pawl ratchets. Diameter of drive rollers 15 in. 8 in. diameter reel is quickly adjusted to the stationary or bottom knife. Adjusting screws easily accessible.

Four Revolving Blades, ¼ in. in thickness and made of best knife steel obtainable. Vanadium crucible analysis, oil tempered, double riveted malleable reel braces throughout.

Complete with Driver's Seat, Shafts and Sidedraft Attachment.

Width of Cut, In.	30	35	40
Each	$190.00	200.00	210.00

LAWN TRIMMER AND EDGER

CAPITOL

Finishes the work always left undone by a lawn mower. Trims and edges lawns and plow forms a drain in gravel walks and driveways. Fast and accurate.

Stationary knife is hung from the side plates and is adjustable toward or away from the cylinder wall by means of screws. Flower guard for added protection when trimming garden border. Edging attachment is high grade steel disc with knife edge.

	Each
Capitol 5 in. Diameter Cylinder with Four Knives, 8¼ in. Diameter Wheel with Extra Wide Grooved Tread, 1½ in. Face	$14.25

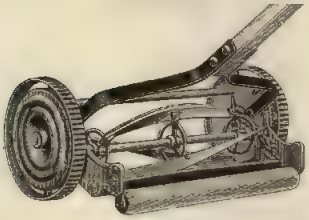
LAWN MOWERS

F. & N.

The reel bearings on all our ball-bearing mowers are equipped with a **New Patented Automatic Adjustment.** Consists of a case-hardened steel spring working against a self-contracting sleeve, around the shaft and inside the cone. At the instant all looseness is taken up by the spring, the sleeve grips the shaft, thus preventing any further pressure than is required for the most delicate adjustment, permitting the reel to revolve with perfect freedom

Throughout the life of the mower this adjustment continues to accommodate itself to conditions, keeping the bearings always adjusted to a nicety, without the slightest attention from the operator, the sleeve instantly releasing when looseness occurs from any cause and again tightening over the shaft the moment all wear is taken up by the spring

CLOVERLEAF



Screw adjustments throughout and popular because of its lightness of draft. All parts are machined and fitted to insure accurate construction, reel shaft is made of machinery steel and has adjustable brass bushings for taking up wear.

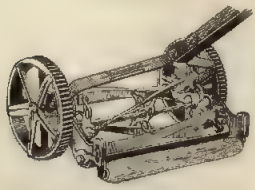
Revolving reel has three knives of high grade blade steel, carefully tempered and spirally formed.

8 in. Drive Wheels, 5½ in. Diameter Reel

Size of Cut, Inches	**14**	**16**
Weight Each, Lbs.	40	42
Each	**$8.50**	**9.00**

One in a Box

FAIRMONT



Graceful in appearance, light and easy running. Drive wheels turn on steel bearings. Four reel blades of highest grade crucible steel, spirallly formed and positively self-sharpening.

Reel runs on brass bearings so that wear can be easily taken up and the mower kept in perfect adjustment at all times. Attractively finished in gold and light green.

9 in. Drive Wheels, 5¼ in. Diameter Reel

Size of Cut, Inches	**14**	**16**

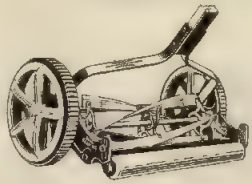
DIRECTOR



Perfectly machined and fitted and parts are interchangeable. Screw adjusting cutter bar, ball bearing cones of best quality tool steel and tempered, automatically adjusted. Cutting knives are attached to the reel shaft by means of malleable iron spiders, shaft is made of cold rolled machinery steel.

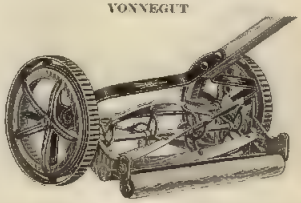
5½ in. diameter revolving reel with four knives of highest grade crucible steel, self-sharpening. Beautifully finished.

9 in. Diameter Drive Wheels Turning on Steel Bearings

Size of Cut, Inches	**14**	**16**
Weight Each, Lbs.	43	45
Each	**$12.80**	**13.30**

One in a Box.

VONNEGUT



A strictly high grade mower and one of the most beautiful and graceful designs ever produced. A ⅝ in. solid steel shafting extends full length of mower through the side plates and forms both shrub rod and steel axle for driving wheels. Reel shaft is made of best cold rolled steel shafting, Ball Bearing Parts are fully guaranteed, and the cones are so hardened that they will never show the slightest wear Accurately fitted and adjusted throughout. Screw adjusting.

10½ in. diameter Drive Wheels on Steel Bearings, 6 in. diameter Reel, Four Knives of highest grade Crucible Steel. Oil Tempered and Self-Sharpening. All wood parts of carefully selected stock. Handsomely finished in attractive colors and bronzes.

CURTIS SINGLE AND TWO-STAGE AIR COMPRESSORS

"AN ORIGINAL DESIGN"

PURE AIR means better service, because oil ruins tires, and AIR FREE FROM OIL means fewer blowouts—fewer punctures—greater tire mileage—less repairs; saves them many dollars upkeep every month.

Better Service Means More Customers

1. CONTROLLED SPLASH SELF-OILING SYSTEM, with cylinder oiling permanently regulated. No oil gets into the tires to rot them.

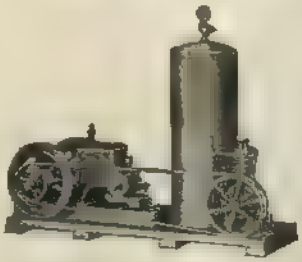
GASOLINE ENGINE DRIVEN OUTFITS



Engine with 1½ brake horse power, hopper cooled, fuel supply tank in base, auxiliary gasoline tank for starting purposes where kerosene or distillate is used, throttling governor, high tension magneto (i. e., jump spark, not make and break ignition), with switch by which ignition can be quickly cut off, stopping the engine without closing the throttling valve, all necessary oil cups and starting crank included.

Our outfit can be easily started by hand since the compressor is supplied with a hand unloader.

PRICES AND DATA, SINGLE OR TWO-STAGE

Z-3-AG Single-Stage Outfit, 2½x3 inch compressor, 500 R.P.M., 4.26 cubic feet displacement; 1½ H. P. hopper-cooled engine, high tension magneto; 16x36 inches, 150 pounds, 32-gallon tank $352.50

Z-4-BG, same outfit, with 3x3½ inch compressor, 320 R P.M., 4.58 cubic feet displacement, 18x48 inches, 53-gallon tank $412.50

Z-40-AG, same outfit, with Curtis TWO-STAGE Compressor, 363 R.P.M., 4.43 cubic feet displacement 16x36 inches, 32-gallon tank $420.00

Z-40-BG Two-Stage Outfit, but with 18x48 inches, 53-gallon tank $465.00

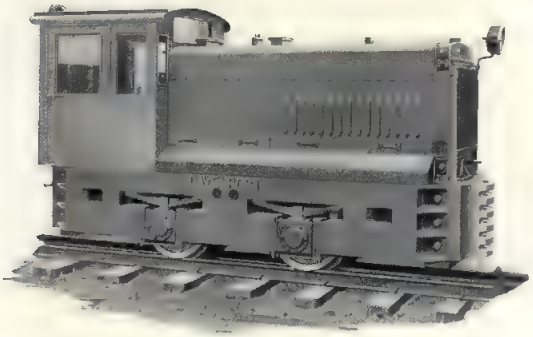
Automatic pressure stopping device to automatically stop either outfit at 135 to 150 pounds (not automatic starting), extra . . . . . $ 27.00

Automatic low pressure alarm set at any desired pressure including bell and wiring, no batteries (two dry cells required) . . . . . $ 7.50

Chicago, Detroit or California tanks extra, quoted on application

DAVENPORT GASOLINE LOCOMOTIVES

4 SPEEDS FORWARD AND 4 SPEEDS REVERSE



TYPE "D" GEAR DRIVE FOUR SPEED DAVENPORT GASOLINE LOCOMOTIVES

Type "D" Gasoline Locomotive embraces all the best features in the present makes of gasoline locomotives, and numerous added improvements have been made to increase its superior qualities.

The locomotive is built throughout of great strength, durability and simplicity of design, together with skillful and accurate workmanship. Every part is made from the best material obtainable, and as heavy and strong as consistent with its practical use.

Nothing has been spared to make the locomotive powerful, durable, smooth running, easily operated, and convenient and comfortable for the operator. It has four speeds forward and four reverse, forced oil feed and Alemite lubrication; roller bearings throughout; hardened two-step jaw clutches; heavy chrome nickel steel gears, semi-elliptic driving springs with cross equalizer; rolled steel driving wheels, or steel tires; steel cab, with controls conveniently placed and easily operated. Every part of the locomotive is easily accessible for adjustment and repair

Type "D" locomotive is built in sizes from 6 to 20 Tons and for any gauge of track. To fill the demand for a small size, we build a four-ton locomotive, using a Fordson power plant.

Complete descriptive catalogs furnished on request.

ENGINE. The best gasoline engines obtainable are used, having sufficient power to pull the maximum loads in second speed. They are equipped with force feed lubrication, high tension ignition, and speed governors. Electric starting and lighting systems, and air cleaners are regular equipment.

RADIATOR. Sectional core radiators of ample cooling surface. A heavy grating protects the front from injury.

CLUTCH. The clutch is of the multiple disc heavy duty type.

FUEL. The use of a fair grade of gasoline is advisable, although kerosene can be successfully used. A special cylinder head is furnished when kerosene is to be used.

TRANSMISSION. Geared type, with hardened two-step jaw clutches controlling speed change gears and reversing gears. Gears are cut from chrome-nickel steel. All shafts are carried in Timken roller bearings.

DRIVE CHAINS. Heavy roller type.

GASOLINE TANK. Elevated to give positive gravity feed.

LUBRICATION. Engines have forced oil feed; journal bearings are equipped with Alemite fittings; transmission parts are flooded by geared oil pump inside of case.

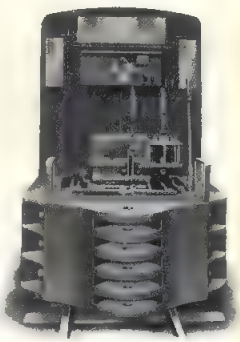
BRAKE. Stevens type brakes, perfectly equalized, are used, operated by hand lever in cab.

SANDERS. One forward and one rear sander box is used to give nearly vertical flow of sand to front or rear of drivers

SIGNAL. Exhaust whistle or motor horn.

FRAME. Massive side frames, held rigidly by cast bumpers

COUPLERS. Link and pin, or automatic M. C. B. if specified.



Rear View, Cab Removed

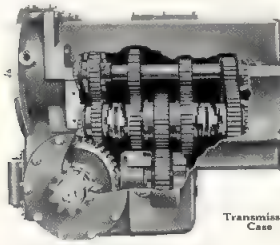
DAVENPORT GASOLINE LOCOMOTIVES

DRIVING WHEELS. Either rolled steel or cast wheel centers with rolled steel tires.

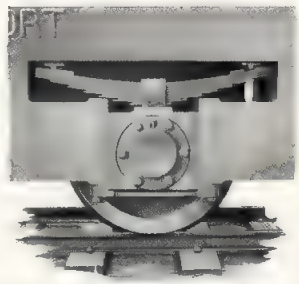
AXLES. Turned from S. A. E. 1035 steel forgings.

SPROCKETS. Cut from steel forgings, heat treated and hardened.

JOURNAL BEARINGS. Hyatt roller bearings provided with Alemite fittings for lubrication.



Transmission Case



JOURNAL BOXES. Have wide faces, working in pedestal jaws fitted with steel shoes to give long wear, and to provide easy means of taking up slack in driving chains.

DRIVER SPRINGS. Flexible semi-elliptic steel springs with cross equalizer between front ends of forward springs.

CAB. All steel, with wide side doors, wire glass windows in front, back and sides.

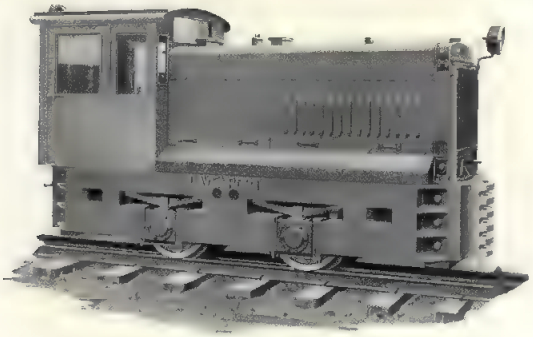
DAVENPORT GASOLINE LOCOMOTIVES

4 SPEEDS FORWARD AND 4 SPEEDS REVERSE



TYPE "D" GEAR DRIVE FOUR SPEED DAVENPORT GASOLINE LOCOMOTIVES

Type "D" Gasoline Locomotive embraces all the best features in the present makes of gasoline locomotives, and numerous added improvements have been made to increase its superior qualities.

The locomotive is built throughout of great strength, durability and simplicity of design, together with skillful and accurate workmanship. Every part is made from the best material obtainable, and as heavy and strong as consistent with its practical use.

Nothing has been spared to make the locomotive powerful, durable, smooth running, easily operated, and convenient and comfortable for the operator. It has four speeds forward and four reverse, forced oil feed and Alemite lubrication; roller bearings throughout; hardened two-step jaw clutches; heavy chrome nickel steel gears, semi-elliptic driving springs with cross equalizer; rolled steel driving wheels, or steel tires; steel cab, with controls conveniently placed and easily operated. Every part of the locomotive is easily accessible for adjustment and repair

Type "D" locomotive is built in sizes from 6 to 20 Tons and for any gauge of track. To fill the demand for a small size, we build a four-ton locomotive, using a Fordson power plant.

Complete descriptive catalogs furnished on request.

ENGINE. The best gasoline engines obtainable are used, having sufficient power to pull the maximum loads in second speed. They are equipped with force feed lubrication, high tension ignition, and speed governors. Electric starting and lighting systems, and air cleaners are regular equipment.

RADIATOR. Sectional core radiators of ample cooling surface. A heavy grating protects the front from injury.

CLUTCH. The clutch is of the multiple disc heavy duty type.

FUEL. The use of a fair grade of gasoline is advisable, although kerosene can be successfully used. A special cylinder head is furnished when kerosene is to be used.

TRANSMISSION. Geared type, with hardened two-step jaw clutches controlling speed change gears and reversing gears. Gears are cut from chrome-nickel steel. All shafts are carried in Timken roller bearings.

DRIVE CHAINS. Heavy roller type.

GASOLINE TANK. Elevated to give positive gravity feed.

LUBRICATION. Engines have forced oil feed; journal bearings are equipped with Alemite fittings; transmission parts are flooded by geared oil pump inside of case.

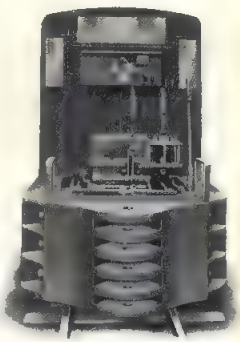
BRAKE. Stevens type brakes, perfectly equalized, are used, operated by hand lever in cab.

SANDERS. One forward and one rear sander box is used to give nearly vertical flow of sand to front or rear of drivers

SIGNAL. Exhaust whistle or motor horn.

FRAME. Massive side frames, held rigidly by cast bumpers

COUPLERS. Link and pin, or automatic M. C. B. if specified.



Rear View, Cab Removed

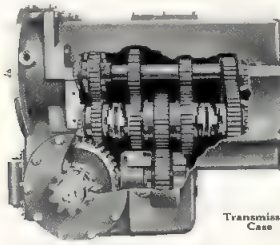
DAVENPORT GASOLINE LOCOMOTIVES

DRIVING WHEELS. Either rolled steel or cast wheel centers with rolled steel tires.

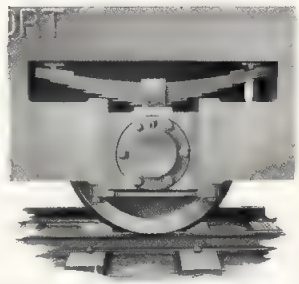
AXLES. Turned from S. A. E. 1035 steel forgings.

SPROCKETS. Cut from steel forgings, heat treated and hardened.

JOURNAL BEARINGS. Hyatt roller bearings provided with Alemite fittings for lubrication.



Transmission Case



JOURNAL BOXES. Have wide faces, working in pedestal jaws fitted with steel shoes to give long wear, and to provide easy means of taking up slack in driving chains.

DRIVER SPRINGS. Flexible semi-elliptic steel springs with cross equalizer between front ends of forward springs.

CAB. All steel, with wide side doors, wire glass windows in front, back and sides.

THE DAZEY PRINCIPLE

Butter-Making Properties of Cream—The principle butter-making property of cream is butterfat, which is an oil contained in a tissue or skin known as fat globules and best compared to a soft shell egg. There are millions of these tiny globules in a single drop of cream

Old Method—The principle of the ordinary churn is to break these globules, allowing the fat to rise and gather at the surface of the cream resulting in salvy butter, therefore it stands to reason that the more scientific way would be to remove these globules in their natural state. Dazey Churns were constructed with this object in view.

The Dazey Method—The powerful Dazey turbine dasher in conjunction with the square receptacle produces a thorough and scientific agitation which builds up into dry uniform grains about the size of rice, all the butter making properties of the cream without disturbing their natural state. This method produces more and better butter in six to fifteen minutes time

Sanitary Features—The receptacles are non-absorbent no cracks to harbor the cream and become rancid as with a great many churns, therefore perfectly sanitary. The receptacles are light and as easily washed as any kitchen utensil May be sunned without warping or the seams opening up.

Time and Labor Saving Features—Dazey Churns turn easy and will positively produce the highest grade of butter in six to fifteen minutes Eliminates the necessity of working the butter for the reason that during the building up of the grains the milk is squeezed to the surface and when the grains have been washed in the churn as per directions (included with each churn) the butter is then ready to salt and mould.

The receptacle and dasher are easily removed from the churn and may be taken to any convenient place for washing or sunning

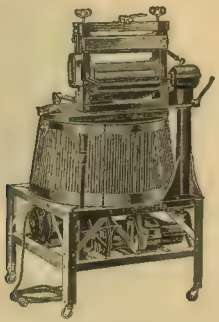
Hibbard COPPER TUB ELECTRIC WASHERS



DOLLY TYPE

All parts made of highest quality material and workmanship, perfectly fitted and exceptionally strong. Equipped with accurately cut gears completely enclosed and operating in hard oil which insures smooth running and prevents wearing. Tub constructed of extra heavy copper, tinned on inside and is equipped with non-leak brass drain cock, threaded for hose attachment, fitted on bottom of tub so that water may be drained without tipping machine. All power mechanism is under frame and out of way, insuring perfect safety and preventing operator's clothes from coming in contact with any part of machinery.

SIMPLE IN OPERATION. Nothing to get out of order. Clothes placed in tub with sufficient quantity of boiling water so that they will float. Use enough soap to make a good suds. Action of agitator does not rub clothes against sides or bottom of tub but operating as it does at a good speed forces boiling suds back and forth through the very fibre of clothes, thus loosening all dirt without wearing out clothes or injuring them in any way.

FRAME OR STANDARD made of high grade angle steel reinforced and braced on all corners with all sections securely riveted together. Fitted with easy rolling steel casters that can not bind and permit machine to be readily moved from place to place.

STEEL TUB EXTENSIONS for holding three extra tubs are hinged to sides of main frame and provides substantial support for tubs. When not in use extensions are folded up close against tub.

THE MOTOR is splash proof type specially designed for this machine and with excess power to more than take care of heavy load on both washer and wringer. Equipped with an adjustable motor base so that operator may tighten or loosen the belt by simply turning adjusting knob. Regularly equipped with motors for use on alternating current, 110 volt, 60 cycle electric systems. Machine can be furnished, with motor to be used in connection with any other voltage system. Specify on all orders the current, voltage and cycles.

BALL BEARING SWINGING WRINGER. Reversible wringer with special 12-inch power electric rolls. Mounted on substantial supporting post that is securely bolted to steel frame. Equipped with special lever that permits swinging and locking of wringer in any desired position. Shifting lever starts, stops and reverses rolls, operates so freely and easily that only slight pressure of finger shifts it from one position to another regardless of load. Extra wide reversible drain board prevents water from running over on floor. Quick safety release instantly relieves all pressure on rolls should clothes become bunched when running through or operator accidently catch her finger. Size of tub, bottom 24 in., top 21 in., height 12½ in., height from floor to under side of wringer 35½ in.

No. F40—Without tub extensions, w't 272 lbs.★ ..... each $128.00
No. F42—With tub extensions, w't 265 lbs.★ ..... each 134.00
No. F141—Without motor, equipped for **gasoline power,** w't 297 lbs.★ ..... each 102.50

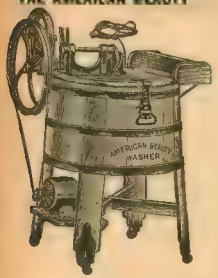
ELECTRIC WASHING MACHINES
THE AMERICAN BEAUTY



Furnished with ¼ H. P. Standard motor 110 volt, either alternating or direct current. Cypress tub corrugated throughout. Geared to give the dolly 85 full ¾ turns per minute. Ball bearing casters and 10 ft. cord with separable attachment plug, brass drain faucet.

With each machine an emergency lever is furnished, with which to operate it in an easy way if power for the moment is not available.

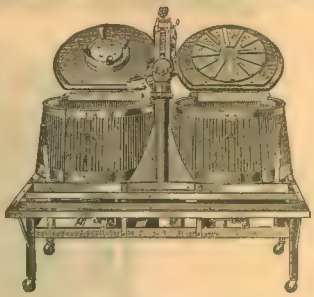
No. W17—Without wringer, w't crated 125 lbs.....each $67.50

HAND POWER WASHING MACHINES

ADVANCE, kiln dried Arkansas cottonwood, height 24 in., length 33 in., width 21 in., galvanized iron bottom, with removable hardwood corrugated slats, hardwood cylinder and handle, galvanized iron socket guides, four hardwood bolted legs, w't per doz. 480 lbs.

No. W15—Ear Movement, each $9.90
No. W16—Ball Movement, each $9.90

THE IMPROVED DOUBLE TUB Hibbard WASHING MACHINES



The improved Hibbard Double Tub Electric Washing Machine excels all others. All parts entering into its construction are made of the highest quality material and workmanship, perfectly fitted, exceptionally strong and with proper care will last for many years. It is equipped with accurately cut gears, completely enclosed, and operating in hard oil which insures smooth running and prevents wear. This machine will do the work in just half the time of the single machine. Two batches of clothes can be washed at the same time or, if desired, one tub can be used for washing and the other for rinsing. Tubs operate independently of each other.

The wringer is mounted on a substantial post that is securely bolted to steel frame, is equipped with special lever that permits swinging and locking of wringer in any desired position.

The motor is splash proof type, especially designed for this machine, is full ½ horse power which insures ample power to operate both tubs and wringer at the same time.

Machine is equipped with two wood dollies and one disk which are interchangeable. We recommend the disk for washing the finer pieces and the dolly for the heavier garments.

Each machine is furnished with folding bench for two extra tubs. When not in use the bench can be folded down entirely out of the way.

Illustration shows electric model, can also be furnished with flat faced pulley so that machine can be used in connection with gasoline engine.

No. F50—Electric, copper tub, w't 423 lbs.★ .....each $187.00
No. F149—Gasoline, copper tub, w't 419 lbs.★.....each 159.00

Our reputation founded on over seventy-one years' business stands back of the Hibbard brand.

All goods branded Hibbard are guaranteed to be of highest quality material and workmanship and free from imperfections.

In selling Hibbard articles there is a profit for you and satisfaction to your customers.

BLASTING POWDER.

Great care and attention have been given to the manufacture of this powder, and it is as perfect as skill can produce or money can buy. We carry it in stock in five different sizes, which are illustrated in the following cuts. Packed 25 lbs. in a metal keg

Each.

No. S-BM—CC, C, F, FF, FFF; kegs, 25 pounds each, F. O. B. Minnesota Transfer.....

No. S-BB—CC, C, F, FF, FFF; kegs, 25 pounds each, F. O. B Bismarck, N. D. (Hercules only.).....

DYNAMITE.

DUPONT AND HERCULES.

For mining, well boring, railroad construction, stump blasting, etc. The cartridges are 8x1¼ inches and weigh 8 ounces. 25 and 50 pounds in a case.

Per 100 Pounds

No. S-3—30 per cent nitro-glycerine; for coal mining, etc..$

No. S-2—40 per cent nitro-glycerine; for medium hard rock, stumps, etc .....

No. S-1½—50 per cent nitro-glycerine, for hard rock .....

No. S-1—60 per cent nitro-glycerine; for very hard rock, iron and copper ore.....

No. S-75—75 per cent nitro-glycerine.....

We do not sell less than a box of 25 pounds.

STUMPING POWDER.

DUPONT AND HERCULES.

LOW FREEZING.

A low freezing powder especially adapted for stump blasting. Absolutely guaranteed by the powder companies for the work for which it is intended—blasting stumps. Comes packed in a one style package only, 50-pound cases each containing five 10-pound cartons, one size of cartridge 1¼x8 inches. Best results can only be obtained with this powder by using a No. 6 cap.

Per 100 Pounds

No. S-SP—Stumping Powder. .....$

50 pounds in a case.

FARM POWDER.

DUPONT AND HERCULES.

LOW FREEZING.

A low strength powder made especially for farm work. Recommended for subsoiling, tree planting, earth excavating, etc.

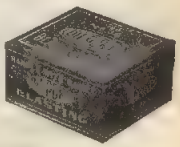
Per 100 Pounds

No. S-FP—Farm Powder......$

50 pounds in a case

BLASTING OR DYNAMITE CAPS.

Blasting Caps are small copper cylinders closed at one end containing a sensitive and highly explosive compound. They must be handled carefully and kept away from heat and sparks. They should never be stored or carried with dynamite.



Per 1000

No. S-6—Blasting Caps, Dupont or Hercules Brand... **$26.10@.**

5,000 lots **24.64@**

10,000 lots **23.90@.**

Per 1,000

5,000 lots **40.46@.**

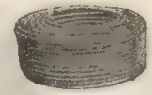
10,000 lots **39.28@.**

100 in a tin case; 1,000 in a case.

Blasting Caps are always shipped separate from Dynamite.

NOTE—Dynamite, Stumping, Farm Powder and Blasting Caps can be shipped by freight only.

FUSE.



Per 1000 feet

No. S-FB—Beaver Brand, for use in damp work and agricultural purposes..... $7.14

No. F-CB—Clover Brand, for use in very wet work..... 7.85

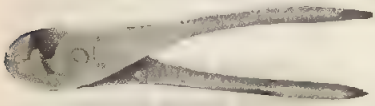
No. F-C—Crescent, for use on very wet work. This is a standard mining fuse..... 8.33

No. S-DT—Double Tape, for use in wet work..... 8.33

6,000 ft. in a case.

Average weight per case, 130 pounds.

CAP CRIMPERS AND FUSE CUTTERS.



The Du Pont No. 2 Cap Crimper; 7 inches long, is nickel plated and in addition to having the punch, screw driver and crimp jaws, is provided with an efficient fuse cutter protected by two over-lapping projections which prevent the fuse cutting feature from being used accidentally.

Each

No. S-2—Cap Crimper and Fuse Cutter $2.00

In bulk.

ELECTRIC EXPLODERS.

WITH COPPER WIRES.

These exploders are No. 6 strength copper wire and are superior to all others for exploding any make of dynamite or blasting powder. Equal to double quintuple force. All tested and warranted

No. S-100—Electric Exploders.

Length	Per 100	Length	Per 100
4 foot wires	$6 47	12 foot wires	$ 9 71
6 foot wires	7 30	16 foot wires	11 37
8 foot wires	8 35	20 foot wires	13.00
10 foot wires	8.93		

Up to and inc. 16 foot, 50 in a box; 20 foot, 25 in a box.

ELECTRIC SQUIBS.

COPPER WIRES.

Contain no loose powder which may become shaken out in handling. Similar to Electric Blasting Caps (fuses) except that the charge is a powder composition that does not detonate but merely shoots out a strong flame. The shell is paper and is open at one end. They are used for firing charges of blasting powder electrically.

Nos.	S-4	S-6	S-8	S-10	S-12

DYNAMITE, FARM AND STUMPING POWDERS

Prices on Application.

DUPONT

No. F11.

No. F50DX.

A NEW FARM DYNAMITE

Dumorite is a gun cotton nitroglycerine dynamite with the slow, heaving action of 20% dynamite and the strength of 40% dynamite. Its fumes will not produce a headache and it is non-freezing at any temperature. Dumorite is the most effective and economical explosive yet produced for land clearing, boulder blasting and tree-planting. It runs 135 sticks to a box, while the ordinary dynamite contains only 100 sticks to a box. This means approximately ⅓ more work for every dollar invested, because stick for stick, Dumorite is the equivalent of any agricultural explosive up to 40%.

No. F11—Dumorite★ .....per hundred pounds $.....
ONE HUNDRED AND THIRTY-FIVE STICKS IN A BOX

No. F1DX—DuPont Red Cross Farm Powder—For use in sub-soiling, tree planting and stump blasting on the denser soil, made only in 1¼×8 in. cartridges, ½ lb., per 100 lbs.★ .....$.....

No. F50DX—DuPont Red Cross Extra.

Best dynamite for general use, does not freeze. Especially valuable for agricultural uses, such as stump and boulder blasting, tree planting, sub-soil blasting and road making. Very insensitive and should not be detonated with anything weaker than a No. 6 cap. Red Cross Extra 40 per cent strength is generally used, except for tree planting and sub-soiling. For these latter uses the 30 per cent grade is recommended. Packed in strong wooden boxes of 25 lbs. and 50 lbs. weight. Standard size cartridges are 1¼×8 in., weighing approximately ½ lb. although special sizes can be furnished if necessary.

Strength, per cent	20	30	40	50	60
Per 100 lbs. ..$.....	.....	.....	.....	.....	.....

No. F40DX—DuPont Straight Nitroglycerin.

A dynamite of great shattering power and high water resistance which is used for blasting hard rock in quarries or other open work and in the 50% to 60% strength for ditching in wet soil by the propagation method.

Strength, per cent ...	30	40	50	60
Per 100 lbs. .....$.....	.....	.....	.....	.....

No. F20DX—DuPont Gelatin.

A dense, plastic, highly water resisting explosive designed for heavy quarry blasting, underground ore mining, tunnel driving and submarine work.

Strength, per cent	30	40	50	60
Per 100 lbs. .....$.....	.....	.....	.....	.....

PACKED IN 25 AND 50 LB. CASES

HERCULES

No. F50AX.

No. F1AX—Hercules Farm Powder—Recommended for sub-soiling, tree planting and ordinary blasting about the farm, made only in 1¼×8 in. cartridges, ½ lb., per 100 lbs.★ .....$.....

No. F50AX—Hercules Standard, Low Freezing.

For use in cold weather, as well as in spring and fall when alternate freezing and thawing makes blasting with ordinary explosives somewhat uncertain. Most effective and convenient for blasting stumps, breaking boulders, digging wells, quarrying work, etc.

Does not require thawing when the temperature is 30 degree Fahrenheit or above.

Strength, per cent	20	30	40	50	60
Per 100 lbs. ..$.....	.....	.....	.....	.....	.....

No. F40AX—Hercules Low Freezing Nitroglycerin.

Slower than either dynamite or gelatin, very useful for blasting clay, stumps and stone that is rather soft and seamy, where a pushing, lifting action rather than a shattering effect is desired.

Does not stand exposure to water as well as either gelatin or regular dynamite.

Strength, per cent ...	30	40	50	60
Per 100 lbs. .....$.....	.....	.....	.....	.....

No. F20AX—Hercules Gelatin (Low Freezing) or Hercules Standard Ammonia Gelatin (Low Freezing).

In gelatin dynamite, gun cotton is substituted for a portion of the nitroglycerine. Has many advantages in that it is practically water proof, is more dense and makes much less smoke and fumes. Used a good deal for underground mining. Preferred by quarry men because it will get out rock better than other dynamite.

Strength, per cent	30	40	50	60
Per 100 lbs. .....$.....	.....	.....	.....	.....

PACKED IN 25 AND 50 LB. CASES

Dynamite, Caps and Powder cannot be shipped with other goods, neither can they be sent by express, but will be shipped direct from nearest magazine. Each must be shipped separately, except 100 only caps may be sent with each 100 feet of safety fuse up to 500 caps and 500 feet of safety fuse. No more than 500 caps may be shipped with any larger amount of safety fuse. Dynamite is packed in cases containing 25 or 50 lbs., net, in cartridges 1¼×8 in.

No. F1Q—Pound Cans—24 in case—FFFG, FFG and FG★ ..... each *$1.12*

Celebrated for its strength, velocity, cleanliness, quickness of ignition and freedom from dense, foul smoke. Unequaled for general field work, especially adapted to trap and rapid wing shooting. A great prize winner, and the delight of sportsmen. The very best black powder made.

SEMI-SMOKELESS SPORTING, KING'S

No. F2½SS—Kegs, 25 lbs.—bulk—FFFG, FFG, FG and CG★ ..... each *$23.00*

F1½SS—Half Kegs, 12½ lbs.—bulk—FFFG, FFG, FG and CG★ ..... each *$12.00*

F6½SS—Quarter Kegs, 6¼ lbs.—bulk—FFFG, FFG, FG and CG★ ..... each *$6.30*

F1SS—Pound Cans—bulk—FFFG, FFG, FG and CG, each★ *$1.20*

King's Semi-Smokeless, all shipments from factory, F. O. B. Kings Mills, Ohio

Combines all the best qualities of black powder with the best qualities of nitro powder. Gives the highest velocity of nitro powder with the low bursting strain of black powder. Produces very little smoke and no offensive odor, leaves but the slightest deposit, does not cake or cause leading, pitting or discoloration of gun. Gives a fine pattern, is quick, strong, penetrating, far reaching, always accurate and reliable, and is as safe as any black powder.

Requires no priming and nothing better than the ordinary shell, primer and wadding for the highest efficiency. A great powder for field and trap, and especially gratifying to those desiring a better article than black powder and less expensive than nitro powder.

Equal to the best for shot guns, but excels anything yet discovered for rifles and pistols. Suited equally to all calibers, all sizes and kinds of metallic ammunition, attention to size of grain only being necessary in order to secure best results. It gives to the ball great velocity, range, penetration, accuracy and very slight trajectory, at the same time leaving the gun almost absolutely free from fouling. Though having a muzzle velocity of nearly 1,700 ft., it does not strip the ordinary lead ball, or cause leading or wild and unaccountable shots.

The grains are hard and resemble those of black powder, with a density of weight somewhat less. After months of storing in ordinary powder kegs, in ordinary magazines and in all temperatures, with frequent tests on instruments, there has not been discovered the slightest trace of deterioration, or any material variation in results.

BLASTING POWDERS—ACTUAL SIZE

FFF

For mining very soft or Seamy coal.

FF

For mining soft coal and breaking stone.

F

For mining hard coal and general blasting.

DUCK BOATS.

LADY OF THE LAKE.

The Lady of the Lake hunting skiffs need no recommendation to those who have seen them. No effort is spared in their careful construction and selection of materials.

The hunting skiff is so designed as to combine the light weight and ease in handling of a canoe and the safety of a row boat. It has a one piece bottom and is smooth built, being made up of narrow strips with half round joints. The planking is made of selected southern cypress and the frame work of selected white oak.

The fine, careful construction of this craft makes it possible to store it indefinitely without danger of shrinking and splitting of the hull.

Each

No. S-13½—Length, 13½ feet; beam, 37 inches; depth amidship, 10½ inches; size of cockpit, 28 inches x 8 feet; weight, 100 lbs. **$93.50**

F. O. B. factory Alexandria, Minn.

The above price includes one pair painted and leathered oars, one pair oar locks.

MULLINS, GET THERE.

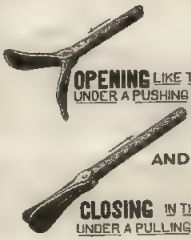
PUSH POLE HEAD.

COLLAPSABLE.



This head has galvanized, pressed steel blades with aluminum socket. It is very strong, but light weighing only 14 ounces. Poling a boat is an easy matter when using a pole equipped with one of these heads as the blades are wide having a spread of 13 inches when open, giving a good footing. It is non-fouling and never sticks in the mud like the old style rigid fork that would either pull you back or off the end of the boat.

Each

No. S-PPH—Weight each, 14 ounces less pole. **$2.50**

ASH POLES.

Each

No. S-10—10 foot ash pole for above with knob on top end. . **$2.20**

BILGE PUMPS.

For pumping water from row boats, launches, etc. Will throw more water than any other pump of its size. Small and compact, can be stored in a locker.

Each

No. S-1W—Pump of all brass; heavy detachable rubber hose; height, 17 inches; diameter of pump, 1⅞ inches; length of hose, 5 feet; capacity per minute, 12 gallons. . **$6.40**

No. S-2W—Same as No. S-1W, but larger; diameter, 1½ inches. **7.50**

Weight each, 2½ lbs.

CANOE GLUE.

No canoeist should be without a can of this glue; it is invaluable for quick repairs on either canvas, cedar or steel canoes or boats.

Any puncture or leak in boat or canoe can be repaired in five minutes.

We recommend the Black Glue as superior for all purposes. Unless otherwise instructed Black Glue will be sent on all orders. Canoe glue does not dry up nor deteriorate in the can

Per Dozen

No. S-35—Canoe Glue **$6.50**

SHELL LAKE.

An improved duck boat, comprising all the good features of the Shell Lake Still Hunter and the Racine Muskegon Hunter; is the last word in duck boats.

The boat has flat bottom of white pine, finished smooth on the outside and ¾-inch thick, making a bottom that is indestructible and dispensing with clattering and dirt collecting floor racks. The sides are of cedar, full ⅝-inch thick and clinker construction. The ribs, coaming, deck beams, etc., are of oak. The deck lining is cedar covered with canvas. Anchor tubes pass through both decks. Each boat is complete with two removable seats and one paddle.

F. O. B. Shell Lake, Wis.

No.	Length. Feet	Beam, Inches	Length Cockpit, Feet	Each
S-D1	12	36	7½	$56.00
S-D2	14	36	8½	65.00

Oars fitted with pin locks, if wanted, $4.70 extra.

MALLARD QUEEN.

The Stiffest, Strongest, Lightest Hunting Boat Made.

After you get to the hunting grounds, its light weight, flat floor and great carrying capacity enable you to pass over bogs that no other boat has attempted. Being canvas covered you know the boat is always dry. This is a boat designed by hunters for hunters. All the practical suggestions received from hunters, trappers and fishermen for 20 years are incorporated in this boat. One man states that he successfully fly fished a stream that could not be bank fished or waded.

Ribs of cedar spaced two inches apart. Planking of cedar fastened to ribs with copper clout nails, with every nail clinched on the inside. The entire outside of the boat is covered with an extra close weave of 14 ounce double filled canvas, which, in addition to two coats of paint, is given two coats of our special silicate filler, the whole making an outside skin as tough as leather and as hard as granite. The stems and coaming are of oak, the balance of the boat being cedar. Each boat is complete with two seats and two paddles.

No. S-MQ—Length, 146 inches; beam, 41 inches; length cock pit, 90 inches, width cock pit, 26 inches; depth under cock pit, 9 inches; length deck, 28 inches; weight each, 54 lbs. ..... Each $75.00

F. O. B. Shell Lake, Wis.

EAU CLAIRE.

Interior View.

Bottom and planking is made from selected cedar or white oak. Thickness of bottom ⅜ inch, planking ⅜ inch, which consists of four strakes on each side. Ribs are ⅞-inch x ⅞-inch spaced 6-inch center, securely fastened through bottom and planking with clout nails.

In connection with the bent ribs, each boat is provided with three sawed oak frames ⅞-inch x 1-inch. Decks and covering boards are of ⅜-inch selected cedar. Coaming is of selected oak extending 3 inches above the decks. Each boat is provided with a galvanized anchor tube through each deck.

Complete with one push paddle, one seat and one pair of oars.

Nos.	S-45SH	S-46SH
Length, feet	12	14
Beam, inches	34	34
Length cockpit, feet	6½	8¼
Approx. weight each, lbs.	75	85
Each	$67.00	$72.00

F. O. B. Eau Claire, Wis.

DUCK BOATS.

LADY OF THE LAKE.

The Lady of the Lake hunting skiffs need no recommendation to those who have seen them. No effort is spared in their careful construction and selection of materials.

The hunting skiff is so designed as to combine the light weight and ease in handling of a canoe and the safety of a row boat. It has a one piece bottom and is smooth built, being made up of narrow strips with half round joints. The planking is made of selected southern cypress and the frame work of selected white oak.

The fine, careful construction of this craft makes it possible to store it indefinitely without danger of shrinking and splitting of the hull.

Each

No. S-13½—Length, 13½ feet; beam, 37 inches; depth amidship, 10½ inches; size of cockpit, 28 inches x 8 feet; weight, 100 lbs. **$93.50**

F. O. B. factory Alexandria, Minn.

The above price includes one pair painted and leathered oars, one pair oar locks.

MULLINS, GET THERE.

STAMPED SHEET STEEL.

F. O. B. Salem, O.

One of the most popular duck boats ever placed on the market. Fitted front and back with air chambers; strong and safe. Painted dead grass color.

Each

No. S-Get There—Galvanized steel, securely braced by steel ribs; length, 14 feet; beam, 36 inches; height to top of deck, 11 inches, to top of comb, 14 inches; cockpit, 9 feet x 30 inches; net weight, 100 lbs.; complete with seat, bottom slat, short or long paddle and one pair oars; shipping weight, 130 lbs. **$96.50**

Shipping weight, 130 lbs.

BUSTLE.

F. O. B. Salem, O.

This boat is similar to the S-Get There, except wider at the beam and fitted with side air chambers, which adds to its buoyancy.

Each

No. S-Bustle—Galvanized steel; width, 46 inches; net weight, 120 lbs.; otherwise same as S-Get There; with the same equipment; shipping weight, 150 lbs. **$125.00**

PUSH PADDLES.

Each

No. S-PP—9½ feet long; selected Northern fir; copper tipped, with handle hold; weight each, 9 lbs. **$5.00**

Prices on Elgin Watches are Subject to Discount

People find the Elgin "The Professional Time-keeper." It is the natural reaction of carrying a time-piece of authority. An Elgin watch may be the plainest of practical time-pieces or it may be encased in the finest example of the gold and platinum smith's art. But it is always true to the one and only thing a watch is for—to tell time and tell it right.

This EMPIRE *Moving Display Moves Your Stock of Empire Toys*

Empire Engines Are Patented and Exclusive. Empire Ranges Are Practical Stoves

B-31
Vertical Engine

B-26
Single Oven Range

PUT an Empire Revolving Display Stand in your window—and sales on all Empire Electric Engines and Ranges will increase.

Empire Engines are genuine steam engines heated by electricity; no danger of fire. They have a steam whistle, throttle, water gauge and seamless copper boiler. They are safe toys for boys.

The ranges are practical stoves that cook and bake just like mother's. They teach girls the domestic arts at the same time they are having real fun.

These toys sell rapidly. Many dealers suffered loss of substantial profits last year because they failed to order a sufficient quantity of Empire Ranges and Engines to meet their requirements.

Send for catalog. See the full line of Empire toys. Then order.

Profit by last year's experience of hundreds of dealers by ordering enough of these Empire Electric Ranges and Steam Engines now.

EMPIRE EDUCATIONAL TOYS
FOR GIRLS AND BOYS

Are You Prepared?

The rocking motion is controlled by the child in the GO-PONY steadily forward. The feet of the moving legs are rubber padded to prevent marring floors. 3 colors tan, red and white

ARE you prepared to take care of this child's plea, "Daddy, buy me a Go-Pony?"

Here is something new and different—a rocking pony that gallops.

Every child wants GO-PONY. Parents realize its safety and healthful exercise features.

Go-Pony is popular—selling big. Most of the large department stores throughout the country display it in their show windows and have it in their play-rooms. Now is the time to order to assure your supply for the big Christmas demand.

SPECIAL CHRISTMAS PROPOSITION

We will enable you to have a GO-PONY for demonstrating purposes on your floor or in your play-room without cost, in connection with orders placed with us for Xmas. Write for our proposition. Profits are liberal. Sales are big. Be prepared.

GO-PONY

PAT. PENDING

GALLOPS AS IT ROCKS

ADVERTISING CO-OPERATION FOR YOU

In addition to free demonstrator and the benefit you derive from our intensive advertising in Child Life, Junior Home and Popular Health, we provide you with literature, Moving Picture Book Novelties, electros or mats of GO-PONY for use in your newspaper advertising and literature.

35 Leading Jobbers Carry GO-PONY

Write us now for name of jobber nearest you. Let us tell you about GO-PONY and our Special Free Demonstrator.
Be prepared for the Christmas rush. Write now!

Go-Pony is fully protected. Infringements will be rigorously prosecuted

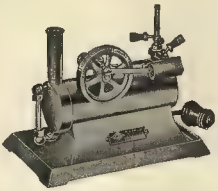
149 Wooster Street, New York



EMPIRE ENGINES AND RANGES, make holiday sales yield more profit

This is a Line That Cannot be Duplicated

THE Empire line of educational electric steam engines not only yields a splendid profit to dealers, but is made up of the kind of engines all boys want.

B-31—*Vertical Engine*

Empire Steam Engines are genuine in every detail; heated electrically, all danger of fire eliminated. Steam whistle, seamless copper boiler; throttle for varying speeds, and water gauge.

They are furnished in five models—Horizontal, Vertical, Twin Cylinder, Turbine, Hot Air. They develop astounding power and speed.

Girls love to play with Empire practical miniature ranges.

B-26—*Single Oven Range*

Empire kitchen ranges cook and bake just like mother's. They are practical stoves, educational and instructive. They are furnished in two models; one with two side ovens, and the other with large single oven.

These toys bring children to your toy department — and profits to your store. Last year many dealers suffered costly losses because they neglected or delayed to stock a large enough quantity of this quick-sale line. Send for illustrated catalog at once.

BUCKET PUMPS

WEAVER VALVELESS

For Engine Oils and Heavy Greases, "Three-Way" Feature, Self-Measuring

Each

No. WE10—Capacity 25 Lbs. of Grease, Heavy Sheet Iron Body, 2 in. Diameter, 18 Gauge Brass Tubing Cylinder with Plunger which will Not Leak and is Impervious to the Action of Grease and Oil, Complete with $\frac{5}{8}$ in Flexible Steel Hose.... **$14 50**

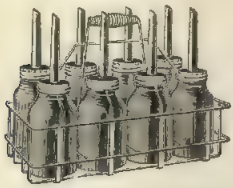
Weight Each 25 Pounds

One great advantage of the Weaver Bucket-Pump is the fact that the valveless construction permits lubricants to be handled in "three-ways."

First—The lubricant can be forced out of the bucket and into the desired receptacle. Second—Grease or oils can be sucked out of the differential or transmission housing, etc. Third—The barrel or chamber of the bucket may be sucked full of foreign lubricant and discharged again through the hose into a third receptacle without disturbing the contents of the bucket

OIL SERVICE OUTFITS

EQUIPTO QUICK SERVICE



Assure Clean Oil, Correct Measure and Quick Service

Jars are of heavy white glass and special design. When filled to the ring they hold an accurate liquid quart.

Tapered 5 in. spouts equipped with non-leakable washers, easily attached

Heavy Gauge Steel Wire Basket, Rust-proof Heavy Tin Plate finish. Electrically Welded Joints.

Finger placed on a vent hole regulates discharge of oil. Jars may be filled through spout.

Each

No. WBA—Consists of Wire Basket, Eight 1 Qt. Jars and 8 Spouts.....**$6.50**

No. GJ—Glass Quart Jars .....**.25**

No. SO—Oil Spouts .....**.20**

Shipping Weight Complete Outfit 30 Pounds.

OIL MEASURES

DOVER HEAVY WEIGHT

These measures are extra heavy, well made, all seams soldered oil-tight, and have bosses in handles on the two and four quart sizes. They are of correct capacity and approved by the sealers of the various states

Heavily Copper-plated and Lacquered

With Back Handle.

F·O·K·C·

COLD BLAST.

Absolutely wind proof; gives bright light; has an inside lift that cannot get out of order.

The fluted globe plate prevents the wind from striking the flame, which burns without flickering.

It is our aim to furnish the trade a line that will give the best light possible to be had from kerosene, best in brilliancy and best in withstanding the wind.

Our lanterns have our **F. O. K. & Co.** trade mark and the number of the lantern stamped in the fount, and the **F. O. K. & Co.** blown in the globe.

F. O. K. & Co. lanterns are made by a factory whose goods have been favorably known for the past ten years, through the construction of the ONE PIECE TOP and FLUTED GLOBE PLATE

F. O. K. & Co. lanterns are fitted with the **latest lifts, larger oil founts and extra large fillers and flush filler screw caps** and in their construction only the best grade of tin plate, wire, burners and globes are used.

BURNERS are high grade tinned steel with brass wick tubes

Per Dozen

No. 2—Fount holds oil enough to burn 23 hours; takes a No. 2 cold blast burner; 1 inch wick; cold blast globe.....$20.00

One half dozen in a case, weight per case, 25 pounds.

No. 200—Fount holds oil enough to burn 50 hours; takes No. 2 cold blast burner; 1 inch wick; cold blast globe..... 22 00

One half dozen in a case, weight per case, 30 pounds.

No. 20SF—Same as No. 2 but with brass fount..... 28 00

HOT BLAST.

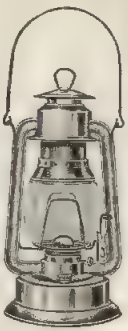
Per Dozen

No. OHB—Has the new patent inside lift to raise and lower the globe. Oil fount drawn from one piece and holds oil enough to burn 23 hours. Takes a No. 1 burner; ⅝-inch wick and No. 0 globe.....$12.50

One dozen in a case; weight per case, 35 lbs.

TRIUMPH.

The leading features of Triumph lanterns are: absolute wind proof construction as cone is securely fastened to globe plate which prevents wind from blowing down globe holder. Has new patent standing bail. Made from heavy tin throughout; inside lift is heavy tin iron. Fitted with short cold blast globe.



Per Dozen

No. 2T—Tin Fount, holds enough oil to burn 30 hours; 1 inch wick; No. 2 burner; short cold blast globe; height over all, 14¾ inches; weight per dozen, 40 lbs.....$20 00

Half dozen in a case.

No. 200T Tin Fount; holds enough oil to burn for 45 hours; height over all, 15 inches; weight per dozen; 42 lbs.; otherwise same as No. 2T..... 22.00

Half dozen in a case.

No. 2BF — Brass Fount, holds enough oil to burn 30 hours; 1 inch wick; No. 2 burner; short cold blast globe; weight per dozen, 29 lbs.... 28.00

Half dozen in a case.

SWITCHMAN'S.

ADALAKE.

Wood Bail.

An extra strong lantern, built to withstand hard use.

Wires and frame are dipped in molten tin which makes them absolutely rigid. Fount is drawn from one piece of tin and is removable from frame being held in place by two brass springs. Equipped with No. 2 brass signal oil burner, and No. 39 globe of best quality.

Bail is rigid wood type, always upright, makes control of signal easy; also gives firmer grip.

Per Dozen.

No. 90—Adalake Switchman's Lantern, height 15 ins.; length of handle 8½ ins; weight per dozen, 24 lbs.....$48.00

In bulk.

RAILROAD.

In lots of 5 dozen or more deduct y% from current catalogue price.

A strong, durable conductors railroad lantern; has heavy wire globe guard held stationary by protected spring under hood.

Made of heavy brass, handsomely nickel plated. Mounted on concave base with rolled rim.

Per Dozen

No. 39—Conductors Lanterns; size of wick, ⅝ inches; height with bail down, 10¾ inches; diameter of base, 6½ inches; weight per dozen, about 50 lbs.....$23 30

One dozen in a case.

NOTE—For Gasoline Pressure Lanterns see Page 1518.

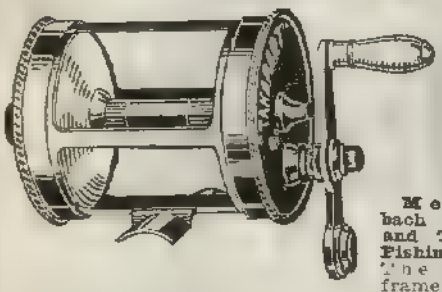
MEISSELBACH Fishing Reels of Quality



Meisselbach Takapart and Tripart Fishing Reels. The entire frame including the reel seat, is made of one piece tubing. There are no screws or rivets to work loose. Fitted with an adjusting cap on the left side with which a friction of almost imperceptible degrees of fineness can be applied to prevent backlashing in casting. Can be taken apart instantly by unscrewing one of the knurled bands, very free and smooth running. Highly nickel finished. Tripart Reels are 60 yards size with an 80 yard capacity. Takapart Reels are 80 yards size with 100 yard capacity. Quadruple Multiplying. Each in box.

No. 16R16. Tripart Reels. Each..... 3.92

Flexible Flyer

The only sled boys and girls know and ask for by name!

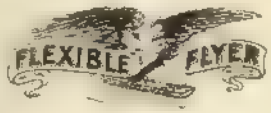
For 25 years Flexible Flyer has been the leading sled in America. The *only* sled boys and girls know and ask for by name. The sled that practically sells itself.

For years, powerful national advertising has kept the name Flexible Flyer before the American public—building an ever larger business for wholesaler and retailer.

The Flexible Flyer trademark is an identification which sled-buyers look for. It is a compliment to Flexible Flyer quality that during the last few years many sleds imitating it have been put on the market. But the public will not be fooled. They insist upon Flexible Flyers bearing the genuine trademark. And the business continues to grow.

It pays to carry the sled everybody knows —Flexible Flyers, the strongest, safest, speediest sled made.

S. L. ALLEN & CO., Inc.
Dept. 55 PHILADELPHIA



This trademark is on every genuine Flexible Flyer Sled
The public looks for it and will accept no substitute.

The sled that really steers

GIBBS TOYS

The Toys that sell the year round

No. 8 TEETER KIDS TOY

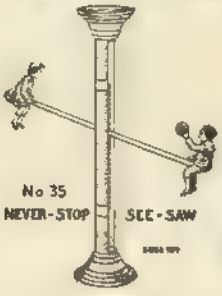
A TOY WITH LOTS OF ACTION

NEVER-STOP HUMMING TOP

No. 28 BUTTERFLY PUSH TOY

No. 45 "DICK & DUKE" PUSH AND PULL TOY

No. 39 HURDLE RIDER



No. 35 NEVER-STOP SEE-SAW

There never was a more attractive toy with so much action.

Beautifully ornamented in ten bright colors.

When drawn along, first one horse leaps the fence and then the other, the jockeys rise in their saddles with natural movement of arms and legs, making a most animated and life-like toy.

Length, 10¼ inches. Height, 10 inches. Packed set up complete with pull cord attached, ½ dozen in box.

No. 58 STEEPLE CHASERS

It will be to your interest to have our 1926 Catalog showing 42 Gibbs Toys in natural colors. Write for it today.

The GIBBS MFG. CO., Canton, Ohio

NEW YORK AGENTS Geo. Borgfeldt & Co. The Owens-Kreiser Co. Strobel-Wilken Co., Inc. Baker & Bennett Co.

No. 80 GIBBS FILLING STATION

An exact copy in miniature of the regular grown-up filling station, in every detail—hose, pump, gauge, and all.

The Station is in imitation stucco with red tile roof.

Strongly constructed of metal and wood, and attractively ornamented in seven colors.

Length, 15 inches. Width, 9 inches. Height, 7 inches. Packed set up, one toy in box.

Every child whose parents own an automobile, and there are millions of them, will want a Gibbs Filling Station as soon as they see it.

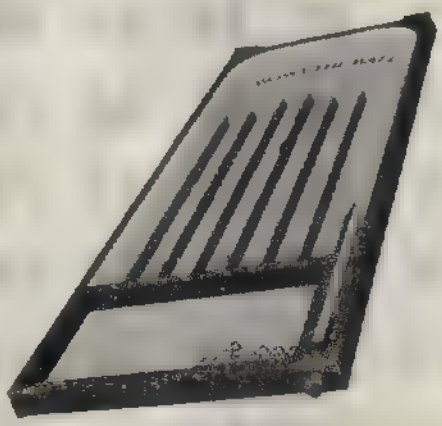
New Games of Skill

BOWL THE BALL



This outfit is made on the same order as our Light the Light Game, except that it does not carry the clown faces, and is not wired for lights. Stars are used in placed of lights. Full instructions with each outfit.

No. H562. Per outfit complete.. ..... **10.00**

LIGHT THE LIGHT

This is a game of skill and very interesting to play. There is nothing faster. No numbers to count, no explanations to give, no arguments, nothing to set up or take down, and no parts to get out of order. Operators sell 3 marbles at 10 cents, which customers shoot by means of a spring shooter, attempting to light one or more lights. The average player usually lights one light, occasionally two lights repeatedly attempting to get three lights. The game is constructed of kiln-dried pine veneer 20 inches wide 4 feet long and wired for any light circuit. Game complete, with three ⅝ inch steel balls and full instructions to operate. Lights not included packed in crate.

No. H654. Complete outfit..... .. . . **25.00**

DOG AND CAT BALL THROWING GAME

An automatic ball game that is a winner. Life size, painted in natural colors. House made of 2-inch hardwood. Dog and cat made of rubber. Hit the bull dog—if he runs and chases cat on roof. Knock the cat off the roof and out comes the dog. This game will surely get the play. Size of game 24x36 inches. No ropes or cords needed to adjust figures; works automatically.

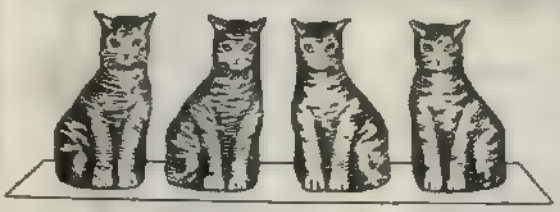
No. H654. Complete..... ..... **27.50**

THE COPPER AND THE CROOK BALL THROWING GAME

A new automatic base ball game, the first time ever shown. Hit the Copper and he disappears, and a Crook appears in the window below. Then hit the Crook and the Copper reappears. Always ready, no ropes or resetting required. Just take in the money. Will pay for itself the first few hours played. 2 feet wide by 4½ feet high, made of hard wood.

No. H655. Per outfit complete..... **32.50**

Stuffed Cats for Racks etc.



New Stuffed Cats. These cats are extremely popular and a rack made up with them is very appealing and is sure to bring in handsome returns. They are made of heavy 10 oz. duck, thoroughly waterproofed and double seamed, 13 inches high and stuffed with wood wool. Very securely mounted on 2 in. maple blocks, 4 in. across and 7½ in. wide, double strength bottom, painted in lifelike manner alike on both sides. A rack easily constructed as it is only necessary to put up a framework and a few hinges. Will give you one of the most up-to-date and popular racks it is possible to obtain. They are exceeding well made and very durable. The finish and appearance is of the best. They are very popular and our cats are the best to be had regardless of price.

No. H585. Each..... 1.50

Two Good Popular Games

H581

H584

Dutch Kid, a Prize Throw, consists of a one-piece panel of semi-hardwood, reinforced on back by two strong hardwood cross-cleats well nailed on, cut in outline of and painted in colors characteristic of a big Dutch Kid, 13 inches wide by 27½ inches high, bloomer pants, red hair, open mouth, 2x2½ inches, behind which is a colored muslin pocket and in stomach is another opening 3½x5 inches, behind which is colored muslin pocket for receiving balls when thrown at openings, the thrower to receive a prize for each ball pocketed in this way, a large prize usually being given for throwing through the smaller opening. Hard rubber balls about 1½ inches diameter being used.

No. H581. Price..... 2.75

Aunt Sally. An old Virginian Darkey who smokes a corn cob pipe which the player endeavors to ring with cane rings. 30 inches high, 12 inches wide. Made of one piece of semi-hardwood, thoroughly reinforced. Wears a yellow dress with red dots, white apron and red bonnet. The idea is very appealing and represents vividly an oldtime Virginian darkey. She will attract attention anywhere and is bound to get the money.

No. H584. Each..... 2.75

Wooden Cane Rings. Made of highly seasoned kiln dried crack-proof hardwood. French cherry finish.

Five Grains in Row Wins

Tango or Corn Game has proven one of the most popular concession games available.

The card or board is 5x7 inches, are made 6-ply, glazed finish, printed in red and black. A combination of numbered boards are sold 10 cents each. On these cards are 24 numbers with one free space; corresponding numbers are arranged on blocks which are drawn from box as pickout by one of the operators. Grains of corn are furnished the players, and as operator draws forth each numbered block, call numbers, each player having the number called, places a grain of corn until some player gets five grains of corn in a row, which player is then declared the winner. After the winner has been declared, the blocks are placed back in the box, the cards resold and you are ready for another drawing.

No. H620. "Tango" a new 75 card game.

The Gardner Baby Midget, illustrated on the left, is the original compact composition board. Since its introduction only a short time back, it has won the approval of salesboard users everywhere.

It is but ⅛ the size of the regular midget board and yet sacrifices none of the advantages of the larger style. It is free punching, of thorough construction and will stand up under the heaviest usage. Ample advertising space is provided.

Carried in stock in all sizes indicated.

Checker fronts furnished, where desired, in all sizes from 200 holes up ..... 7½c each extra.

Gardner Regular Midget Boards are still the popular favorite where the user desires a board of larger dimensions than the baby line. Its excellent proportions, attractive appearance and generally satisfactory playing qualities are unsurpassed.

Carried in stock in all sizes indicated.

USE Your Windows!

—and you'll make BIG MONEY Selling "PIONEER" Vehicles!

COMPLETE LINE: Automobiles, Speed Wagons, Scooters, Sidewalk Cycles, Tot-Bikes, Velocipedes, Coasters, Doll Carriages, etc.

NOBODY ever built a wheel goods business that amounted to a "hill of beans" without liberal use of his windows. It is very easy to understand why.

In selling wheel goods the BIG MONEY goes to the dealer who MERCHANDISES. Use your windows! Cram them full of brilliantly painted children's vehicles—PIONEER Vehicles. Then watch the sales. There's nothing bigger or more interesting for window merchandising than "PIONEER" Vehicles. There's nothing more profitable to sell!

Use the FREE Gendron Advertising Service —it makes sales!

The Gendron cut and copy service and attractive window display material is supplied free to all Gendron dealers.

The "Pioneer Kids" in your window, tied up with your newspaper advertising, will make your store known as headquarters for the famous PIONEER Line.

Relative to Protection

AMERICAN PATENT PROTECTION CORPORATION
INCORPORATED UNDER THE LAWS OF THE STATE OF NEW YORK

PATENTS PROTECTED FROM INFRINGEMENT

CONTRACTS GUARANTEED BY ASSETS OF $ 6 000 000

MANUFACTURERS PROTECTED AGAINST LOSS OF ADVERTISEMENT

25 BROAD STREET
NEW YORK

November 24, 1926.

Century Doll Company,
62 West 14th Street,
New York City.

Gentlemen:

We enclose herewith our Defensive Contract No. D-2003, which obligates our Corporation to defend you and all of your jobbers and dealers against any claims of patent infringement up to the amount of the contract; pay all costs, legal or otherwise, in defending such claims, and to pay any judgment for damages which may be rendered against you or your jobbers or dealers because of the sale or use of the Drinking Arm Doll, known as the "BOOTIE BABY" sold by you, and which is described in the contract enclosed.

We have issued this contract to you after first making an exhaustive search in the United States Patent Office, at Washington, D. C.

We shall be glad to write to any of your jobbers or dealers, advising them that the contract which we have issued covers them as well as yourselves.

Very truly yours,

Relative to Interference

PATENT AND TRADE-MARK CAUSES A SPECIALTY

LAW OFFICE
ROBERT B. KILLGORE
38 NASSAU STREET
NEW YORK

TELEPHONE NO.
JOHN 1212

New York, Nov. 18, 1926.

Century Doll Co.,
62 W. 14th Street,
New York City.

Gentlemen -

On November 16th, 1926 the Commissioner of Patents declared an interference between Paul Seidel's pending application for patent on drinking arm for dolls and the patent No. 1,595,840 to Leon Wallach.

This interference proceeding is for the purpose of officially determining whether Seidel or Wallach is the real inventor of the drinking arm for dolls claimed by them and to determine which of the two is legally entitled to the patent therefor.

You are Seidel's sole licensees for the United States and all your drinking arm dolls are made and sold under the protection of this license.

Should the interference be decided in favor of Seidel you will be the only manufacturers in the United States authorized to make and sell dolls containing the drinking arm involved in the interference.

Very truly yours,

Robert B. Killgore

Do People Like These Come Into Your Store?

Then Profits on These Come Into Your Store—

THE complete phonograph for the nursery. Plays any record up to 10". Bright green enamel with brightly colored nursery pictures. Built to stand abuse.

FOR children a little older—the De Luxe Cabinet. Cream enamel with story-book pictures in color. 22¾" high. Plays disc records of all sizes. Full, clear tone.

FULL table size phonograph with same motor as in high priced machines. Plays any disc records. Beautiful mahogany finish. Full clear tone. Sold as above or in compact traveling case.

THERE'S a General Phonograph for every age, every member of the family. All so moderate in price that anyone can afford them, yet all attractive, soundly built, and with full clear, musical tone.

People must and will have music all year 'round and General Phonographs are the way to sell it to them Write for samples, and facts about how other merchants sell and profit every day, every month the whole year through.

Are You Ready, Mr. Santa Claus?

THE great national question these days is, *"What shall we give the children for Christmas?"* Wide-awake merchants are supplying the answer—General Phonographs.

Here's a gift that parents appreciate. A *General* keeps their children busy and happy all year 'round, it helps children amuse themselves out of parents' way, and it's made to stand the kind of hard use children give it.

Thousands of parents would welcome the chance to get such a gift for children. Are you giving them that chance? Do you have *Generals* on your floor? Do you keep them playing? Are you telling these families in your advertising that yours is the store where they can get this gift they are going to buy?

If so, fine—you'll get the business. If not, write or wire us *now*, and we'll get busy with you. There will be profit this year in playing Santa Claus with *General Phonographs*. Get your share.

No. 28 BUTTERFLY PUSH TOY

No. 45 "DICK & DUKE" PUSH AND PULL TOY

There never was a more attractive toy with so much action.

Beautifully ornamented in ten bright colors.

When drawn along, first one horse leaps the fence and then the other, the jockeys rise in their saddles with natural movement of arms and legs, making a most animated and life-like toy.

Length 10¼ inches. Height, 10 inches. Packed set up complete, with pull cord attached; ¾ dozen in box.

It will be to your interest to have our 1926 Catalog showing 42 Gibbs Toys in natural colors. Write for it today.

The GIBBS MFG. CO., Canton, Ohio

NEW YORK AGENTS Geo. Borgfeldt & Co. Strobel-Wilken Co., Inc. The Owens-Kreiser Co. Baker & Bennett Co.

No. 80 GIBBS FILLING STATION

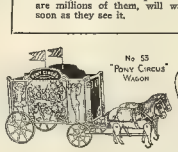
An exact copy in miniature of the regular grown-up filling station, in every detail—hose, pump, gauge, and all.

The Station is in imitation stucco with red tile roof.

Strongly constructed of metal and wood, and attractively ornamented in seven colors.

Length, 18 inches. Width, 9 inches. Height, 7 inches. Packed set up, one toy in box.

Every child whose parents own an automobile, and there are millions of them, will want a Gibbs Filling Station as soon as they see it.



Dances to its own music —a fast selling novelty.

POST AND BRACKET GLOBE SIGNS

No. 103—$33.60.

GLOBE BRACKET SIGN

This unique bracket watch sign in double-faced furnished complete with flashing device, all wired ready to set up. Globe is 18 in. in diameter, made of heavy semi-translucent glass. Bracket supports globe 16 in. from building. Additional Length of Bracket can be furnished at $2.00 per foot extra.

No. 103—$33.60

GLOBE SIGN

A very practical, inexpensive electric sign, suitable to hang over the entrance to store. Globe is of heavy white glass, 18 in. in diameter, with a watch dial on both sides. The globe is supported by a steel bracket and two galvanized chains 24 inches from building.

No. 101
$27.20

No. 101—$27.20.

JEWELER'S 8-FT. DOUBLE FACED GLOBE SIGNS

If you want a sign that will attract customers to your store, both day and night, we recommend this sign to you. It is furnished complete as shown in cut, all wired ready to hang, with a large 18 in. diameter opalescent glass globe which can be lettered to your order without extra charge, and seven 8 in. diameter round globes which read "JEWELER" from both sides.

No. 129.

Each of these seven globes has a socket for one lamp and burn steady while the large 18 in. diam. globe has one socket which is controlled by an automatic electric flashing device. The globe proper is supported about 18 in. from the building wall and extends about 8 ft. over the sidewalk. We can furnish any sign lettering as above, in two lines, and will gladly quote you prices.

No. 129
$94.40

No. 116.

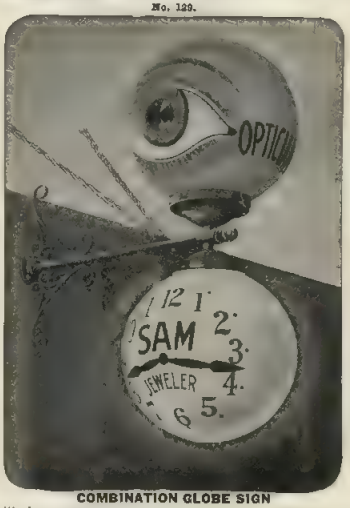
Note Price of globe sign includes extra lettering of one word on both sides of clock globe. Extra words at $1.40 each for each side.

The ornamental post is 10 ft. high, 11 inches square at base, 6 in. in diameter at neck, and made entirely of metal of an artistic Corinthian design.

POST SIGN
No. 116
$64.00

Thermometer Globe Post Sign with 18-inch globe thermometer lettered to your order, complete ready to set up.

No. 112. Same as above, but without thermometer, $56.00.



COMBINATION GLOBE SIGN

We can positively assure you that this is the most brilliant and attractive of all signs. The two large 18 in. diam. round globes are made of extra heavy glass and will withstand ordinary abuse. The **Clock Globe**, made of opaque glass, burns steady, illuminating your entire store front, while the **Eye Globe** is flesh color all over and has two natural colored eyes on the inside, crystal glass on the outside and can be cleaned without fear of affecting the eyes. The **Eye Globe** flashes on and off automatically, giving the appearance of a winking eye. Sign is furnished complete as shown, but not lettered, with a steel bracket supporting globe 30 inches from building. Additional length of bracket can be furnished at $2.00 per foot extra.

No. 108—$70.40

PRICES LESS 6 PER CENT CASH DISCOUNT

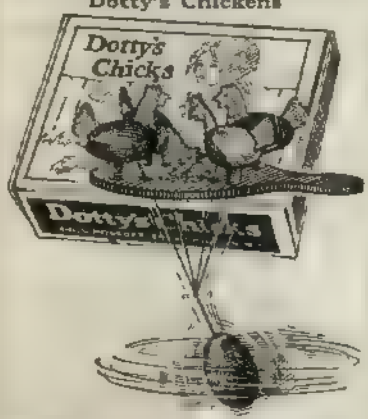
Dotty's Chickens



This is the well made American set. Chickens' bodies made of nicely turned hardwood, all assorted colors—stained (not painted). Fibre heads beautifully die cut to show comb, bill, wattles, etc. Chickens stand on heavy fibre board platform with handle 5 3/16 inches diameter. By oscillating the platform the ball underneath swings about causing chickens to pick at platform in very lifelike manner. Each set in cardboard box lithographed in colors.

No. 38N61. Per dozen..... 1.95

Big Doll House, made of heavy cardboard lithographed in colors. Sets up 16x8x9 inches with wings protruding, sun porch and many other features that sell it on sight. Packed one gross in strong carton

No. 38N72.
Per gross. 14.25 | Per dozen. 1.20

Bunkum Monkey

Bunkum Monkey. Body made of true-to-life hairy cloth. Head shaped exactly like monkey's. Every feature identical. Glass eyes. Slip on over the hand like a mitt, insert your little finger and thumb in the arms and the third finger in the opening in the head. Conceal lower part of moneky with arm and thumb by manipulating fingers all of the life-like cut movements can be imitated. One dozen in box.

No. 38N11. Per dozen..... 3.60

Hand Monkey works just like the above but made of better grade material and much fuller. An exceptionally good item and a big value. Packed 1 dozen in box

No. 38N12. Per dozen. ... 6.00

Humpty Dumpty Wrestlers

Humpty Dumpty Wrestlers. With tin legs. The old reliable brand that always gives satisfaction. These are two wooden manikins with loosely jointed legs, with bushy fur heads, connected with tin arms. Attach a string in the center. They may be manipulated so they appear to be fighting vigorously; very comical and enjoyable, laughable novelty. Instructions wrapped around each set. 100 in box.

No. 2N19.
Per 1000. 30.00 | Per 100... 3.10

Andy Gump

Sid Smith's World Famous Andy Gump. The most popular cartoon of the day. This will prove to be a greater seller than the movie pig, which the manufacturer has discontinued to make way for Andy. What makes Andy's ears, eyes and nose move? A real mystery your friends will never know what makes Andy wiggle so. It's a secret—lift one end of the stick tape and put in a live fly. The fly causes the movement. Made of heavy cardboard and lithographed in bright colors, 4½ inches wide.

No. 38N56.
Per gross 8.00 | Per dozen.. .70

Realistic Cat and Dog Fight

Wood cat and dog cut out with great precision, to resemble a cat and dog in the characteristic fighting attitude.

These animals are attached to 10¾ inch wood platform. Underneath hangs a wood ball attached by cords to heads and tails of animals. A slight oscillation of this ball causes both heads and both tails to move up and down violently. All that is needed is the bark to have all the thrills of a fight. One-third dozen in box.

No. N10626.

WATER AND BEVERAGE COOLERS

Prices do not Include Bottle.

"XXTH CENTURY"

Sectional View.

A—Metal ice container, or body with ice.
B—Cooling jar which holds water.
C—Faucet and stem connecting with cooling jar.
D—Waste Water Faucet for melting ice.
E—Demijohn partly filled with water.
F—Rubber gasket supporting demijohn and protecting jar.
G—Removable container cover.

FIBRE

Body or ice container is seamless, made of fibre molded in one piece; absolutely waterproof; and rust proof, and being a non-conducter, is a great ice saver. Cooling jar is a sanitary white crock, carafe shape. Cover of cooler is entirely removable for icing, being in two interchangeable halves. Body rests on tray which serves to catch any moisture collecting on cooler body.

Improved push faucet, self-closing, "C&H" faucet-simple, strong and reliable. ¼ in. flow, filling an 8 oz. glass in three seconds.

Equipped with stand for office or factory use, white stoneware drip tray enameled, metal bucket for waste water, ice cap. about 15 lbs., height (without bottle) 39 in., triangular space for stand 18 in., each way, shipping w't about 33 lbs.

COOLERS HOLDING 3 OR 5 GAL. STANDARD BOTTLES

No. TH55—Mahogany ..... each $25.50
No. TH555—All white, striped ..... each 27.00

METAL

Heavily constructed, and **entirely galvanized,** treated over all with special rust proof preparation, and attractively enameled. Maximum insulator assured thru packing of ground cork between double wall of body.

Feature of this Cooler is fact that body is absolutely **seamless** inside and out, inner and outer shell each being drawn up in **one piece,** eliminating all question of leakage. Cover is entirely removable for icing, being in two interchangeable halves. Cooling jar is a sanitary white crock, carafe shaped. Body rests on tray, which serves to catch any moisture collecting on cooler body.

Improved push faucet, self-closing, "C&H" faucet-simple, strong and reliable. ¼ in. flow, filling an 8 oz. glass in three seconds.

Equipped with stand for office or factory use; white stoneware drip tray enameled; galvanized bucket for waste water.

Coolers Holding 3 or 5 Gal. Standard Bottles.

Ice cap. about 15 lbs., height (without bottle) 39 in., triangular space for stand 18 in. each way, shipping w't about 36 lbs.

No. TH65—Art green ..... each $26.30
No. TH655—All white ..... each 27.50

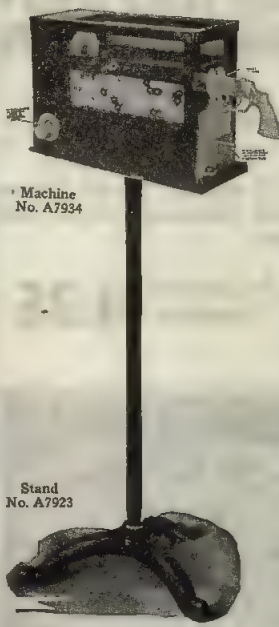
Target Practice and Ball Gum Vender
A Money Making Machine



Machine No. A7934

Stand No. A7923

One Ball Gum Given for Every Cent in Slot

THIS Target Practice and Ball Gum Machine is the most attractive and efficient vender ever put on the market. The mechanism of this machine is very simple, as it slides into a groove which runs the full length of the cabinet. No screws are used and it takes only a few seconds to remove this mechanism.

To play the Target Machine Ball Gum Vender, simply insert a penny in the pistol, aim at the Bull's Eye, and pull the trigger. If Bull's Eye is scored, penny is returned thru cup on side of machine. Gum delivery mechanism is made of metal. By pushing lever at front of machine, ball of gum is delivered for each penny that drops into machine. When pennies drop into machine, no gum is delivered unless the lever is pushed. Gum is attractively displayed thru glass top and sides.

Pistol is made of aluminum with brushed velvet finish and shoots penny only.

The cabinet is substantially made from ¾ inch seasoned wood, finished in beautiful mahogany. Size is 7 in. x 12⅜ in. x 17¼ in. Weight 14 lbs. Holds 700 balls of gum and has plenty of room for 700 pennies.

No. A7934. Each	23.50

HALF DOZEN IN A BOX

HIGHEST QUALITY IMPORTED BARBERS' RAZORS

Made in Germany

S. R. DROESCHER'S FAMOUS "SWEEP" RAZORS are unequalled in quality, finish and workmanship, and are guaranteed to give entire satisfaction.

They are made of the best quality English steel and are twice hand forged to prevent overheating.

Ground by hand by expert grinders after the old approved system. The blades thus remain perfectly cool and retain the original quality of the steel, which is an impossible achievement in machine-ground razors. Every razor is tested and set ready for use. Unequalled for private as well as barbers' use.

No. C206½—½ in. blade, square point, full hollow ground, white ivoride handle .....per dozen **$54.00**

Libbey Safedge GLASSWARE

"Beaded Edge" *Prevents Chipping*

Positively chip-proof. Made with the famous beaded edge. It is thin and beautiful, yet very durable. It combines new beauty with new strength. Sudden changes from freezing cold to boiling heat have absolutely no effect upon it. It is the sensation of the century in the tumbler line and is made by America's foremost glassware manufacturer.

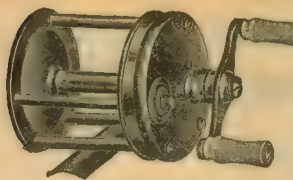
FISHING REELS



HEDDON'S CASTING

Designed with the front bar left out to facilitate removing back lashes.

The handle is also of new design which fits fingers properly, throwing the hand into the correct, natural position, and contributing against slipping.

No. C3-15—Made of the best, tested, hard-drawn, watch nickel stud, shaft, pivots, and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size; gears made from our special, hard-drawn phosphor bronze; has improved helical spiral gears, insuring strength, power, and smoothness of action otherwise unobtainable; quadruple multiplier, outside diameter, 2 in., length of spool 1⅞ in., diam. of spool head 17-16 in., w't 8 oz., capacity 100 yards, 15 lb. Heddon line; equipped with Heddon design double handle with one in. radius, 2⅜ in. long, which completely overcomes crank vibration and insures better grasp in playing fish; single handle substituted if specially desired, very durable smooth velvet finish .....each *$20.00*

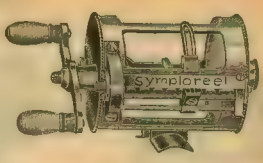
ONE IN A BOX

HEDDON'S LEVEL WINDING

Full quadruple multiplying, with exactly the correct ratio of speed between the spool and line carriage to produce that criss-cross or "kite winding" of the line which so effectually presents back-lashing Spiral gears, of a special hard drawn phosphor bronze are so novelly arranged that they are much stronger than are ordinarily used, and also make it possible to avoid the objectionable construction of placing the spool off the center of the reel. Smaller in size, lighter in weight, it nevertheless has a spool capacity of 100 yards of 15 pound test line. Smooth velvet finish that is practically indestructible. Equipped with Heddon designed double handle. Heddon's oiling system, completely oiling the reel without taking it down.

No. C3-35LW—Made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size *$35.00*

ONE IN A LEATHER CASE WITH OIL CAN, BOTTLE REEL OIL AND TUBE OF VASALINE



SYMPLOREEL

LEVEL WINDING

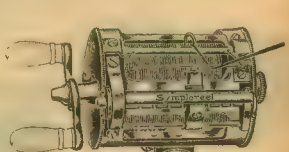
The light, smooth delicate action of this reel will please the most sensitive touch; its sturdy simple construction will withstand the roughest usage.

The frame is made of special hard drawn metal; quadruple nickel plate; spool flanges of nickel silver are accurately turned and the spool trued to a perfect balance. Phosphor bronze bearings with capillary oil well lubrication eliminates wear; the rear plate end bearing is adjustable; click spring is made of high-grade tool steel.

The level winding feature is well and strongly designed and of positive operation.

No. C252—Capacity 100 yards .....each *$12.50*

ONE IN AN INDIVIDUAL ANTI-TARNISH JEWELERS' BAG



SYMPLOREEL

ANTI-BACK LASH LEVEL WINDING

Non Back Lash, Level Winder, double handle. A casting reel that combines simplicity and strength with the swift, silent running qualities of the plain reel. The only level winding reel with adjustable reciprocating shaft bearing, improved adjustable Non-Back-Lash feature, which prevents a snarled reel and makes it especially desirable for night fishing, the simplest take down reel made, quadruple nickel plated frame, nickel silver spool, phosphor bronze bearings with capillary oil well lubrication, balanced double handle. All beautifully finished and packed in special anti-tarnish jeweler's bag.

No. C257—Capacity 100 yards .....each *$15.00*

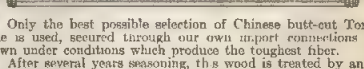
HEDDON'S SPLIT BAMBOO FLY.

NEW MODELS.



Only the best possible selection of Chinese butt-cut Tonkin cane is used, secured through our own import connections and grown under conditions which produce the toughest fiber.

After several years seasoning, this wood is treated by an exclusive Heddon process which gives that much desired "backbone" or "kick" to the rod. The brown toned finish of bamboo in these rods contrasts beautifully with the silk windings.

The Heddon fly-rods are built in the regular three-piece construction, extra tip, by the most skillful workmen. Guides and tops are tungsten, except the first or butt guide which is genuine agate, all other metal solid nickel silver. The tapered split ferrules are hand fitted to insure a velvet smoothness. The rod is equipped with a high grade partitioned cloth bag and nickel screw-cap aluminum case.

Each

No. S-35-9—Length, 9 feet; weight, 4½ to 4¾ ozs..... **$46.66**

No. S-35-9½—Length, 9½ feet; weight, 5¼ to 5½ ozs... **46.66**

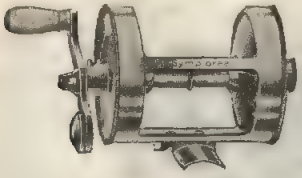
GRANGER.

Each

No. S-GF—Granger Fly Rods; represent a supreme effort in rod building; their action, balance, power, workmanship, materials and beautiful finish command constant admiration; each section of the rod is built from the same piece of cane, carefully selected, which produces uniform strength and resiliency; a rod so made possesses a delicate sensitiveness that can not be had by any other form of construction; the bamboo in these rods is treated by a special process, through this process the bamboo becomes a golden brown color, which with wrappings of jasper and gold becomes a most pleasing color combination; made in three joints and extra tip; mounted with solid cork grip; extra hard drawn nickel silver mountings; Tungsten steel butt guide and tip tops, snake line guides; rod tips put up in aluminum case; 9½-foot weight, 5¾ to 6 ozs. **$60.00**

QUADRUPLE MULTIPLYING.

SYMPLO REELS.



You can take it apart in three seconds. Size of spool, 1 5/8 x 1 5/8 inches. Capacity, 80 to 100 yards.

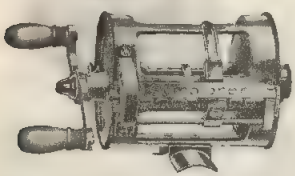
The Symplo reel has tubular frame, German silver spool, hard nickel-steel pivot and pinion and best quality of material and workmanship throughout. The side plates are satin finish, the frame bright nickel.

Each

No. S-251—Symplo Reel; plain spool; single handle.....**$8.90**

No. S-254—Symplo Reel; free spool; single handle.....**11.52**

SYMPLO LEVEL WINDING.



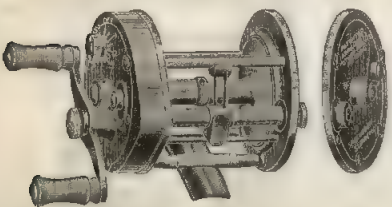
Each

No. S-252—Symplo Reel; level wind; double handle.....**$16.00**

All Symplo reels are packed in brown anti-tarnish jewelers bags

PFLUEGER-SUPREME.

Level Winding and Anti-Back-Lash.



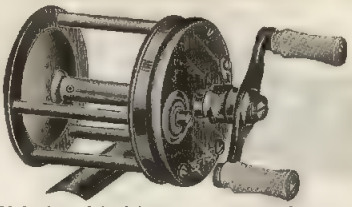
Made of nickalum, a metal very light in weight, but strong as steel. It is rust-proof and make is plain, but it is the strongest, lightest and smoothest running level winding anti-back-lash reel on the market. The anti-back-lash feature is contained within the reel and works automatically. Gears are made of tempered phosphor bronze with spiral gears.

Each

No. S-1573—1⅞-inch pillar; 2¼-inch disk; capacity, 60 to 100 yards according to size of line; packed one in a chamois bag.....**$31.50**

HEDDON.

Completely Oiled Without Taking Down.

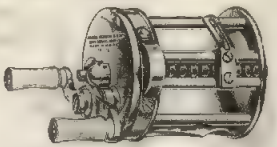


Made of tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size. Gears made from our special, hard drawn, phosphor bronze rod.

Improved helical spiral gears, insuring strength, power and smoothness of action. Equipped with Heddon design double handle with one-inch radius. Quadruple multiplier. Outside diameter, 2 inches; length of spool, 1⅝ inches; diameter of spool head, 1⅛ inches; capacity, 130 yards.

Each

No. S-3-15—Heddon Reels.....$26.66

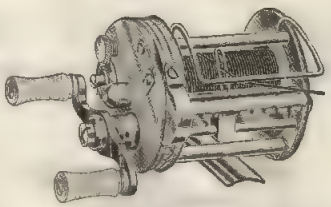


Heddon new non-rusting level winding fish reel with level winding device including Heddon's new double steady bar; otherwise same in construction and size as No. S-3-15.

Each

No. S-3-25—Heddon Reels.....$33.32

HEDDON LEVEL WINDING.



No 3-35ABL.

The steady bar, removing wear, strain and friction from the winding screw and forever preventing all possibility of halting, premature reversing or jamming during the whole life of the reel.

Each

No. S-3-35H -Reel capacity, 100 yards light line.....**$46.68**

A. B. L. REELS.

This is the regular No. 3-35 Heddon level winding reel, but equipped with Heddon's new improved anti-back lash device.

The level winding mechanism always insures an even spool and the anti-back lash device does away with the necessity of thumbing. There is no possibility of a back-lash, "bird's nest" or snarl, the bane of all anglers, and which even the most experienced frequently encounter. Oiling equipment same as No. 3-35.

This reel fully guaranteed by Heddon.

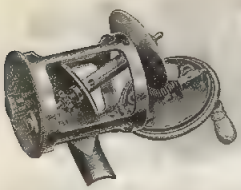
Each

No. S-3-35ABL—Heddon Reel; each packed in a heavy russet leather case.....**$53.32**

QUADRUPLE MULTIPLYING.

SAMSON.

With Removable Spool.



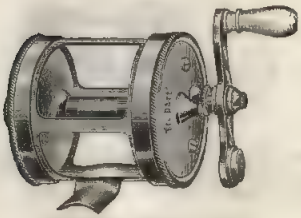
A high grade bait casting reel, nickel plated, quadruple multiplying, with removable spool. End of reel where handle and gears are attached is fastened to frame with a hinge which eliminates the possibility of losing this part.

Each

No. S-500—Samson Reel; capacity, 40 to 80 yards.....$5.50

MEISSELBACH.

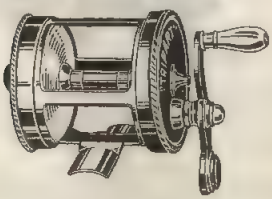
TRI-PART.



The frame, including reel seat, is drawn from one piece of plate brass; spool is silver alloy and the bearings are steel and bronze. A patent friction device prevents back lashing and with it all wear on the axle may be taken up.

Made in one size only, 80 yards, but on account of its tubular frame construction, is no larger than the ordinary 60 yard reel.

TAKE-DOWN.



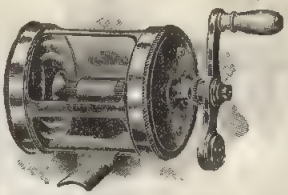
Each

No. S-5-80—Tri-Part; silver alloy spool; 80 yards; width of spool, 1⅝ inches; diameter of spool, 1¾ inches; weight, 6¼ ounces; regular click; quadruple action.....$8.00

No. S-5-81—Tri-part; silver alloy spool; 80 yards with Free Spool; regular click; quadruple action; weight each, 7 oz..... 10.66

MEISSELBACH.

TAKE-A-PART.



WIDE-SPOOL.

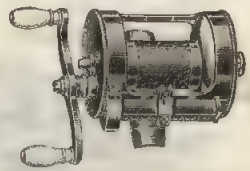
This is similar to No 5-80 described above. No rivets, screws or cross pieces to jar loose On account of the tubular frame it will hold more line than any other reel of similar size.

Each

No. S-4-80—80 yards.....$9.32
No. S-4-81—Same as No. 4-80 except has free spool..... 12.00
No. S-4-82—Same as No. 4-80 but has double handle.....10.00

LEVEL WINDING.

THE OKEH.



Made by the manufacturers of the Tripart and Takapart reels. They combine all of the popular features found in other level wind reels, also the addition of the takapart feature.

Bearings are phosphorous bronze drawing metal. The cork arbor gives a straight arbor for the level wind mechanism to work with.

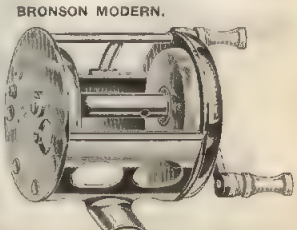
The level wind mechanism only operates when winding in the line and when making a cast there is only the spool revolving. The housing is made of specially selected seamless brass tubing, nickel plated and highly polished. The cross bar is so arranged to allow plenty of opening at the top so that there is no line interference when casting.

Each

No. S-625—Level wind reel with cork arbor and double handle.....$13.00@
No. S-620—Level wind reel, free spool, with single handle and cork arbor..... 17.00@

BRONSON MODERN.

Plate Frame Supports.



Nickel finish with scribed panels in head and tail plates. Equipped with perfectly balanced crank handle with two ivoroid grips; tempered gears; transverse screw and line carriage of a special alloy; bushings of both screw and spool made of metals best suited for this purpose. Slightly more than quadruple multiplying. Click and drag combined in one member.

Each

No. S-100—Bronson Modern; capacity, 100 yards of average size silk casting line; length of spool, 1⅞ inches; diameter of spool, 1¾ inches; weight, 7¼ ozs.; packed in display box..... $5.50

WOODEN MINNOWS

Heddon

The "Basser"

Darts and swims in an irregular way; will run from one to three feet below the surface when retrieved; floats when at rest; three treble hooks; length over all 4¼ inches; weight ¾ oz.

	Per Dozen
No. 8501—Rainbow	$13 60
No. 8502—White body, red head and tail	13 60
No. 8509D—Green scale	13 60
No. 8509L—Yellow perch scale	13 60
No. 8500—Shiner scale	13 60

One in a box; weight per dozen 1 lb.

The "Game Fisher"

Floats while at rest, draws below the surface in a zig-zagging motion; sturdily built to withstand the most savage attacks; flexible body; two treble hooks; length of body 4¾ inches; weight ¾ oz.

	Per Dozen

Hibbard All Steel Racers

STRONG - STURDY - SPEEDY

Body—Extra heavy steel with ¾ in. roll around top and wide panel around bottom of removable box. Two iron cleats across bottom with hook attachments on sides makes this the simplest and best device used for detaching box from bottom. This is a distinctive and exclusive **Hibbard** Feature.

Gear—Arched Channel Steel, supported by strong iron braces, making this a very rigid construction. Cold rolled steel axles.

Wheels—10 in. Double Disc, Roller Bearing, with Corrugated rubber tires.

Handle—Tubular Steel, curved and equipped with loop grip.

Finish—Box in bright red enamel, stenciled in gold. Bottom in baked black enamel. Gear in black enamel. Wheels red and striped in yellow.

SPECIAL FEATURES—THREE-PLY STEEL — no riveting — no welding. SELF CONTAINED roller bearings — double spacer. TIRES held securely in deep groove. SMOOTH SURFACE avoids rim cutting of tires. EXTRA LARGE HUB. HEAVY METAL DISCS. HEAVY PANEL around bottom. SLIDING CLEATS to detach box from bottom. LARGE ROLL around top. CATCHES RETAIN cleats and reinforce inside of box. STEEL CLEATS reinforce bottom.

Extra Wide and Deep Removable Body.

No. NM500—Body 14½x33½ in., 10 in. wheel, black enamel handle, 1 in. balloon tires, shipping w't 38 lbs. ..... each **$10.00**

No. F500—In lots of 36 or more, we will stencil dealer's private brand on wagons,★ each **$10.00**

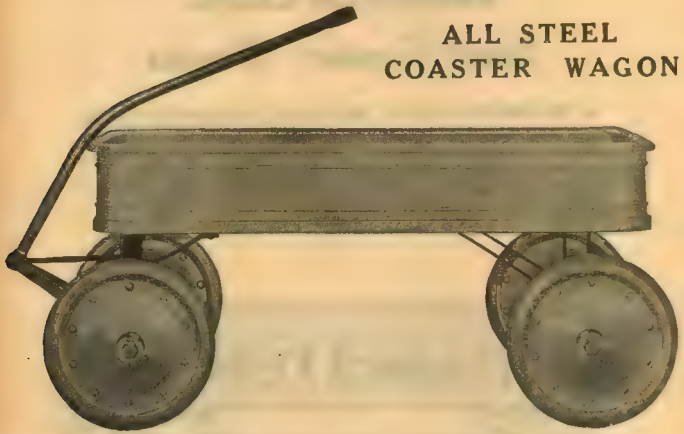
Hibbard Hustler

ALL STEEL COASTER WAGON



This All Steel Coaster Wagon Is:

The first choice of discriminating people, because they recognize in it a maintenance of the same high quality of design, material and workmanship that characterize the other products in our line of juvenile wheel goods.

Hibbard Hustler Coaster Wagons are built entirely of stamped steel. They are so engineered that by means of stiffening and beading an unusually staunch and sturdy wagon is produced without excessive weight. Their trim and pleasing design makes an instant appeal to all children.

Some of the features in design and construction which make these Wagons a product for service are: **WAGON BOX**—Heavy stamped steel beaded to obtain maximum stiffness. **ROUNDED CORNERS AND LOCK SEAM BOTTOMS**—Cannot come apart and will stand excessive hard usage **WHEELS**—Double disc. Heavy steel type discs rigidly riveted together **ROLLER BEARINGS**—Self-contained hardened roller bearings, free of friction and a guarantee of service and easy running. **RUBBER TIRES**—Of highest grade rubber wired on the wheel in a deep channel to prevent them from rolling off at sharp turns. **HUB CAPS**—Automobile style put on with special hub cap wrench which is furnished with each wagon. **HOUND**—The hound is stamped of heavy steel and is placed to withstand severe jolts. It extends sufficiently in front of the wagon to enable a comfortable position for the rider to steer with the handle when coasting. **FINISH**—All parts are of an attractive enamel finish and are baked at a temperature to procure the best results. **PACKING**—Each coaster is packed in a certified dustproof carton keeping wagon clean and fresh looking at all times

Hibbard STAINLESS SPORTMAN'S KNIFE
WITH FISH HOOK DISGORGER

Should be in every fishermans, hunters and sportsmans kit. Knife will not stain, spot, rust or discolor in any way or under any conditions.

The long slender blade is ideally suited for sticking and skinning, cutting bait, cleaning, slitting or scaling fish and for innumerable other purposes a knife is put to while fishing, hunting or camping. As a rule, ordinary knives when thrown into the fishing kit at the end of the season are not properly dried and oiled to prevent rusting, consequently same must be replaced at the beginning of the next season on account of blades and springs being so badly rusted as to make same worthless. This is something that cannot happen to the Hibbard SPORTSMAN, for regardless how careless the Hibbard SPORTSMAN is taken care of, it is always nice and bright the next time same is put to use.

The fish hook disgorger comes in mightly handy for dislodging the hook swallowed by the hungry fish. A dandy knife too, for any farmer, carpenter or mechanic.

No. C2948P—Hibbard Stainless Steel Sportsman, has one long slender but substantial blade, nicely finished, stag handle, brass lined, nickel silver bolster, nickel silver slotted and grooved cap which acts as a fish hook disgorger, nickel silver shield is shaped like a fish, stainless steel lining, nickel silver rivets, length when closed 5 in.....per dozen $21.50

HALF DOZEN IN A BOX

A very attractive easel display card free with an order for these knives. BE SURE TO ENTER ON YOUR ORDERS.

Telling the World About Hohner Harmonicas

From every city, town and village in America, and from practically every nation in the World, people are journeying, by hundreds of thousands, to the Sesqui-Centennial International Exposition at Philadelphia.

Judging by the enthusiastic comments of the visitors as well as by the daily news dispatches, the Sesqui-Centennial is playing an important part in "telling the world" about Hohner Harmonicas.

The Hohner Exhibit, shown above, which is located in the Palace of Liberal Arts and Manufactures, is but a single factor in the illuminating program of Harmonica activity.

Not only are the visitors to the Exposition enabled to view the greatest collection of "The World's Best" Harmonicas ever assembled, but they are privileged to hear and enjoy the finest musical concerts imagineable by the famous Sesqui-Centennial Harmonica Band, directed by one of the leading musical instructors of America.

Naturally, the harmonicas which are *played* as well as exhibited at the Sesqui-Centennial are *Hohner* Harmonicas, for Hohner Harmonicas have been exhibited, played and awarded highest honors at leading expositions during the past seventy years.

All of which is merely to suggest to you, Mr. Dealer, that while we are busy *telling* the World about Hohner Harmonicas you should be busy *selling* the World Hohner Harmonicas.

BONNIE BABE

REG. U. S. PAT. OFF.

CREATED BY MADAME GEORGENE AVERILL

THE NEW ONE YEAR OLD "K & K" BABY DOLL

A dainty lovable one-year-old baby. From all indications it will be one of the outstanding doll successes this holiday season.

Wonderfully modeled head and modeled arms and legs. Bisque head, with dimpled cheeks, and glass moving eyes. Moving tongue and two pearly lower teeth.

Cuddly soft body that nestles snugly in your arms. Natural mama voice.

Dressed in pink and blue chambre rompers or in fine white organdie baby dresses. Bonnets with lace and ribbon trimmings.

Removable shoes and stockings.

15 PIECE CEREAL SETS

Imported Sets of Light Weight, European Semi-Porcelain

Every time you sell a cereal set you add at least $5.00 to the day's sales—and it does not require many $5.00 sales to make your business show a nice increase. Women buy these sets for themselves because they're a practical kitchen utility. They buy them for gifts to others because they are decorative as well as practical. Order half a dozen sets and put them out where they can be seen—you will soon be re-ordering!

R1429—15 piece set, "Windmill" design, good quality white semi-porcelain, light weight, 5 windmill scenes in blue on three sides, black lettered names. New pattern with tight fitting covers, useful bottles with spout for pouring, all pieces with loop handles. 1 set in carton. Terms Cash SET (15 pcs)

Horsman Dolls

COPYRIGHTED, 1925
E. I. HORSMAN CO., INC.

A new idea in doll manufacture means nothing if it cannot be translated into a tangible sales value—and even then, that sales value is always questionable if it is not backed by a quality which is above question.

The "House of Horsman" presents their dolls with a confidence in their sales value backed by years of experience, and backs them with the entire weight of a reputation which has stood the test of time.

SOLE MANUFACTURERS **Established 1872** **PHILADELPHIA, PENNA., U. S. A.**

COIL WATER COOLERS

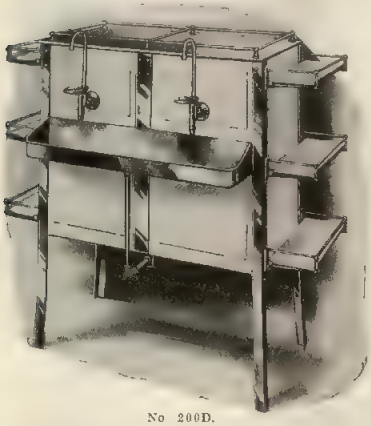
ALLEN INSTANTANEOUS

For Cafeterias, Restaurants and Hotels

This type was first built for the benefit of the many smaller eating places of the Cafeteria style and have proven so satisfactory that in order to meet the demand of the larger places they have been increased in size and capacity

The general construction embodies all of the features which have made the Allen Instantaneous Coil Coolers for factory, store and office so popular See preceding page for complete and detailed description covering general construction, patented coil, method of cleaning, etc

The value of cleanliness can be fully achieved in using this cooler On the inside wall can be readily seen the slogan "Keep Me Clean," stenciled in one inch black letters and every time the cover is removed it can be seen.



No 200D.

Salt is not necessary and should not be put in Allen Coolers as the water will freeze and split the coil

Regularly furnished with ⅝ in. O. D. brass tubing coil tinned inside and out.

Water inlet connection is threaded for ⅜ in. iron pipe, water outlet for ⅝ in. and waste outlet for ½ in.

Supplied with Push Down Glass Fillers, which means no leaky outlet, no broken glasses, a rapid fill and 100 per cent sanitary. Made entirely of brass, polished, heavily plated. Distance between outlet and floor of glass holder 5 in. This filler is more fully described on pages following.

No. 200 D Type

Holds 200 lbs. ice in one piece, length of coil 60 ft., total height 48 in., size of box 18x36x18 in.

Floor space required 36x18 in. with additional allowance of 7 in. on each side for shelves and 7 in. in front for drip tray.

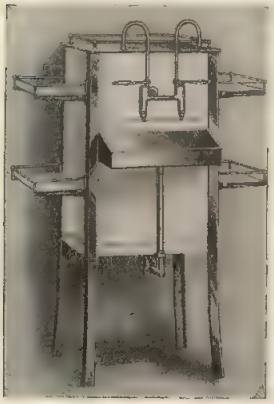
Shipped set up, shelves detached.

Each

No. 200D—With 2 No. 1 P D (Push Down) Glass Fillers and 6 Shelves, Outside Finish Consists of White Porcelain Enamel Plates Held in Place by Brass Nickel Plated Legs, Nicely Silver Drip Pan and Cover, Nickel Plated Brass Shelf Rails, Cover Rail and Waste Connection, Weight Complete 350 Lbs. **$210 00**

No. 100N Type

Holds 100 lbs ice in one piece, length of coil 40 ft, total height 48 in., size of box 16x16x26 in floor space 19x19 in. Not including 7 inches for drip tray and 7 inches for regular shelves.



No. 100N.

Each

No. 100N—With No. 2PD (Push Down) Double Glass Filler and 4 Shelves, White Porcelain Enameled Plates Held in Place by Brass Nickel Plated Legs, Nickel Silver Drip Pan and Cover, Nickel Plated Brass Shelf Rails, Cover Rail and Waste Connection, Weight Complete 180 Lbs **$119 50**

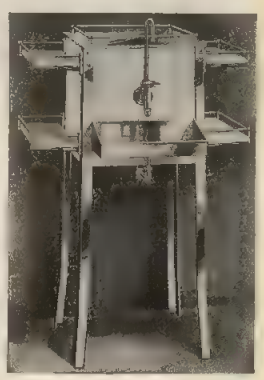
No. 50Q Type

Holds 50 lbs. ice in one piece, length of coil 20 ft., height 42 in., size of box 16x16x16 in., floor space 19x19 in. not including 7 in. for drip tray and 7 in. for shelves.

Each

No. 50Q—With No. 1 PD (Push Down) Single Glass Filler and 4 Shelves, White Porcelain Enameled Plates, Brass Nickel Plated Legs, Nickel Silver Drip Pan and Cover, Nickel Plated Brass Shelf Rails, Cover Rail and Waste Connection, Weight Each 125 Lbs. **$91.50**

All of the above Nos. shipped set up, shelves detached



No. 50Q.

REFRIGERATOR BEVERAGE DISPENSERS

ALLEN SELL-MORE

Quadruple insulation of cork filling and plates which deflect heat White sanitary earthenware container. Non-leaker construction

Uses less ice than any other dispenser as there is no chopping, takes one solid piece. As the ice melts the ice cold water circulates around the container which helps to accomplish a quicker and more thorough chilling of the contents. **Agitator Always Supplied for Buttermilk Unless Otherwise Ordered.** Room Underneath for Glasses of all sizes, saving counter space.

Ground joint lever handle faucets, ice water drip cock in center.

No 1

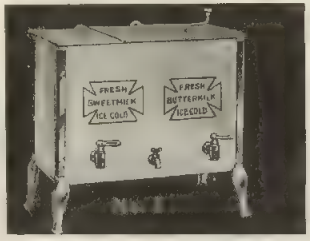
LETTERING

Lettered regularly for Butter Milk and Sweet Milk in Royal Blue on Double Coolers.

Lettered regularly for Butter Milk in Royal Blue on Single Coolers.

Hanging Signs are provided for other popular drinks and are hung by a brass nickel plated Chain to the plain front panel of the dispensers. These signs are 5x2½ in., finished in white glass enameled with wording burned in in a Royal Blue. Can be furnished as follows.

Fresh Buttermilk, Fresh Sweet Milk, Sweet Apple Cider, Wild Cherry, Raspberry, Loganberry, Iced Tea. Fresh Cream, Grape Juice, Lemonade, Orangeade, Ice Water.



Nos. 3 and 6.

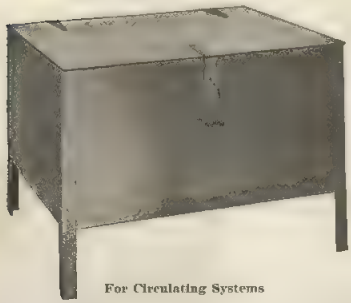
COIL WATER COOLERS

ALLEN INSTANTANEOUS



For Circulating Systems

Heavy Galvanized Iron Double Walls with Cork Insulation. Water Outlet Near Top on Left Side. Waste Outlet Arranged so Coil is Submerged in Melted Ice Water, Threaded for ½ in. Iron Pipe; Inlet Threaded for ⅜ in. Iron Pipe.

60 Foot Coil

	Each
No. 200—Size 25x30x24 in High Including 3 in. Angle Iron Legs, Capacity 200 Lbs. Ice, Weight Each 150 Lbs.	$75.00

Several concerns are now using the Pedestal Fountain in connection with this large cooler to bring the cold water to the men.

One in a Crate.

BUBBLING FOUNTAINS

ALLEN PEDESTAL

Made with oscillating handle faucet, self-closing, and regulator. Height of the bubble should not be more than 2 in.

Inlet threaded for ⅜ in. iron pipe and connection can run from the wall or up from the floor.

Supply valve should be in the line near the bubbler bowl. Outlet for waste is through the body, the base being threaded for 1½ in. pipe

9 in. Vitreous China Bowl

	Each
No. 11—40 in. High, Finish of Rust-proof Paint and Two Coats of Grey Air Drying Enamel, Wt. Each 50 Lbs.	$14.00

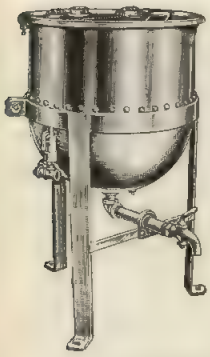
One in a Crate.

Eighty per cent of the time wasted by workers, going to the water cooler can be saved by piping the water to the men.

The cost of installing an up-to-date system of bubbling fountains and coil coolers can be saved by any factory in one summer.

*STEAM JACKETED KETTLES

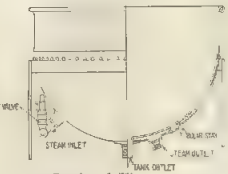
"WEAR-EVER", ALUMINUM



Type No. 3

Made of Two Aluminum Plates. Tank Jacketed Two-thirds of the Way Up. Fitted with Aluminum Finished Iron Stand Ready to Install.

These Kettles are designed to be used on a line carrying not more than forty pounds steam pressure per square inch. This pressure or even considerably less, will accomplish maximum results, each Kettle is thoroughly tested and is fitted with a safety valve to protect it.



Sectional View.

The Cover is so constructed that any drippings from it, while closed or open, will return to the Kettle. The cover fits sufficiently tight to prevent vapors from escaping readily into the kitchen. It is securely fastened to the Kettle by three Clamps. By loosening the set screw on these Clamps, the Cover can be shifted around the Kettle to any point. This is an advantage where the Cover is to be set in some particular relation to the Spigot or to the Steam Fittings. By loosening these Clamps, the Cover can be easily removed from the Kettle.

The Handle, the Hinges, the Collar for the Vapor Duct and the Clamps on the Cover are all made of Aluminum. Screw Threads are provided on the Inside of the Collar for the Vapor Duct to accommodate the Vapor Pipe. This makes a solid and substantial connection and is not liable to be loosened by any vibration of the Kettle when in use. The Hinge is so constructed that the Cover cannot go back too far and dent the Vapor Pipe.

Fitted with an Aluminum Strainer which is easily removed. It has an extension which fits down into the through outlet and keeps the Strainer in place.

Complete with Iron Stand, Safety Valve, Hinged Cover, Strainer, Nickel Plated Brass Draw-off Spigot, with Aluminum Connecting Pipes and Other Necessary Fittings

Note—In Case your Steam Line carries a pressure of more than forty pounds, a Reducing Valve should be used. Information concerning price of Reducing Valves given on request

When ordering a Kettle, always specify whether Collar for the Vapor Pipe and the Collar for the Inlet Pipe are required. These are not included in the Cover unless they are called for.

In addition to the Collar for the Vapor Pipe, we can furnish a half-inch Collar for an Inlet Water Pipe.

Plain Covers, without Hinges can also be furnished

*Not Carried in Stock, but Shipped Direct from Factory.

POTATO MASHERS

STERLING

Will Mash a Hopper Full of Potatoes in ¼ to ½ minute

The "Sterling" Masher first grates the Potatoes and then sweeps them through the finely perforated disc at the bottom of the container. In this way all hard pieces are thoroughly broken up, and the Potatoes come through in riced form, free from lumps and light and fluffy.

Strongly constructed, yet easily taken apart and can be quickly cleaned.

All parts coming in contact with food are Aluminum or heavily plated.

Black Enameled, Gold Striping Each

No. 22—Capacity of Hopper 1 Peck, 20x24 in. Floor Space Required, Shipping Weight Each 95 Lbs. ... **$35.00**

One in a Case.

PEELERS

STERLING, ELECTRIC

Removes Skins from Potatoes, Turnips, Carrots and Other Vegetables in a Clean and Quick Manner

The principle of this Peeler is simple. The Disc in the bottom of the Cylinder revolves at a speed of 200 to 350 R. P. M., and the Potatoes or other vegetables, spin over the Disc and around the Cylinder Walls, both of which are covered with a hard, sharp, rough coating. In this way the skins of the vegetables are removed with a minimum of wastage. A stream of water washes the vegetables as they are being peeled, and carries off the refuse.

Easily and Quickly Cleaned.

LIBERTY SEALED FIVE

Selection of a Liberty Sealed Five Receiving Set Is Not Shadowed by the Possibility of Regrets Later On

Ease of Tuning

Pure Tone with Volume

Stations You Want To Hear—Nominal Battery Consumption Selectivity—Consistent Performance—Nominal Cost Due To Simplicity

Many engineers have been working in the belief that additional tubes are required to obtain distance and selectivity. Liberty engineers have been eliminating all excess parts and improving the circuit to the extent that the 1926 Liberty Model at this popular price is not equalled in performance and quality in any other five-tube set. The Liberty set is designed to use any type of radio tubes both "power" tubes and "standard."

Every Liberty Sealed Five Receiving Set is sold under the irrevocable guarantee that any defective part or any faulty workmanship will be replaced if the set is returned to the Manufacturer within 60 days from date of purchase—delivery charges prepaid—seal unbroken.

The Manufacturer has placed himself on record; he has shown his confidence in his product—his implicit faith in his ability to please the buyer.

He has firmly established a tangible degree of merit and of value. For his own protection he MUST protect you.

When you purchase a Liberty Sealed Five Receiving Set you buy QUALITY and you obtain SATISFACTORY RESULTS. You are protected. You know in advance of purchase that you will obtain quality operation. Your appreciation of beauty dictates selection of a Radio Receiving Set of artistic and refined appearance. Liberty's rich elegance of design and finish, combined with moderate cost and ever efficient operation staunchly backed by the Liberty Seal guarantee supply your every want, meet your every demand, provide a clear cut definite gauge of worth. Possibility of regret is eliminated through insurance of absolute satisfaction

Crystal-like Clarity; Pure, Natural Tone; Full Volume; Remarkable Distance-Getting Ability; Ease and Simplicity of Control.

JUVENILE American VEHICLES

The Line Beautiful

No. 194

Still Better For 1927!

How could it be otherwise? Closing the best year of our history—with the demand for and appreciation of "The Line Beautiful" more pronounced than ever—we have every incentive to maintain and increase, if possible, American leadership in the Juvenile Vehicle field.

As in the past, buyers will find in the American Line for 1927 the new features, colors, styles and items to which they have been accustomed. While our production department has been busy maintaining prompt American service, our development department has been busy preparing 1927 ideas that will put still more pep in Juvenile Vehicle sales.

We desire to extend to our many friends our thanks and appreciation for their splendid support of the past and to assure them that for 1927 and the years to follow we will continue to "step on the gas" in our efforts to supply the fastest moving merchandise it is possible to build.

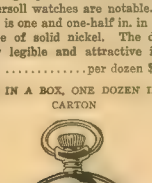
Ingersoll JEWELED MODELS

THE IDEAL DRESS, GIFT AND PRESENTATION WATCHES

MIDGET PLAIN

No. C307—Miget Plain—6 size, a small watch which appeals to women and girls and to men who are accustomed to small, thin-model jeweled watches. It has the time-keeping qualities for which all Ingersoll watches are notable. The case is one and one-half in. in diam., made of solid nickel. The dial is very legible and attractive in design .....per dozen $55.90

ONE IN A BOX, ONE DOZEN IN A CARTON



MIDGET RADIOLITE

No. C308—Midget Radiolite—6 size, this is the same movement and case style as the Midget Plain, but is equipped with a luminous dial and hands. Radiolite is the radiant material used which retains its luminositiy throughout the life of the watch. The case is solid polished nickel .....per dozen $67 90

ONE IN A BOX, ONE DOZEN IN A CARTON

WATERBURY PLAIN DIAL

No. C310—Waterbury Plain—4 jewels, 12 size, bridge model, solid nickel case, enameled dial, beautifully designed, although jeweled is nearly as sturdy as the unjeweled Ingersoll. A dressy watch, per dozen $88.10

ONE IN A BOX, ONE DOZEN IN A CARTON

RELIANCE NICKEL CASE

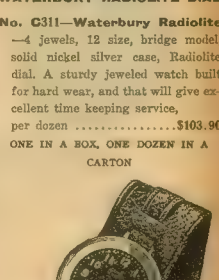
No. C313—Reliance Nickel—7 jewel, 16 size, bridge model, solid nickel screw case. Thinnest 7 jewel watch made in America. Beautifully designed enameled dial, per dozen $120.00

ONE IN A BOX, ONE DOZEN IN A CARTON

WATERBURY RADIOLITE DIAL

No. C311—Waterbury Radiolite—4 jewels, 12 size, bridge model, solid nickel silver case, Radiolite dial. A sturdy jeweled watch built for hard wear, and that will give excellent time keeping service, per dozen $103.90

ONE IN A BOX, ONE DOZEN IN A CARTON



No. C309—Midget Wrist Radiolite—Fitted with a neatly finished, comfortable wrist strap. The movement is not easily affected by jolts and jars and, therefore, this wristwatch equals in timekeeping qualities many very much higher priced models. The case style and dial same as the Midget Radiolite, with soft, strong, durable wrist strap, per dozen $72.00

ONE IN A BOX, ONE DOZEN IN A CARTON

JEWEL

ELECTRIC VACUUM CLEANER

A Regular $55.00 Value

WHICH DEALERS CAN NOW

Sell for Only $39.75!

Complete Attachments Retail at $5.00

The **JEWEL** is equal in every respect to machines selling at 15 to 20 dollars higher.

It is made by a manufacturer who has been building fine cleaners for 15 years. It is fully **guaranteed for two years** instead of the customary one year, proving that it is **built up** to a standard of quality, not **down** to a price.

The Bigger— Better Cleaner

Guaranteed for Two Years!

Complete Attachments

The handiest set made. No useless, awkward parts. Simply join the 8-foot, flexible Hose (A) to cleaner by means of Hose Connection (B), attach Furniture Nozzle (C) to end of Hose—and you are ready to clean drapes, overstuffed furniture, mattresses, etc. When Brush (D) is desired, clamp over lips of the Furniture Nozzle.

Check These JEWEL Features!

Every One is VITAL. Yet NO OTHER CLEANER Selling at Anywhere Near the NEW JEWEL PRICE Has Them.

Oversize 1/5 H. P. Motor, air cooled—ample reserve power.

Non-cramping Pistol Grip handle with convenient Push Button Switch

Double Row Soft Bristle Brush for picking up lint, threads, etc., can be instantly attached to the nozzle. Cleaner can be used either with or without brush.

Full 14-inch Streamline Aluminum nozzle.

Finest of Aluminum castings.

Special adjustment on Rear Roller to raise or lower nozzle for different rug nap thicknesses.

Long nozzle points get into corners and out-of-the-way places.

Hinge Clip at top of Dust Bag permits instant emptying and prevents leakage of dust.

All plugs and fittings used throughout are Standard and are **approved by the Underwriters' Laboratories.**

Jewel Electric Vacuum Cleaner, without attachments **$28.45**

Extra Attachments..... **3.72**

FLOATING.

Very Best Material and Workmanship.

FAMOUS.

Galvanized.

Galvanized iron bucket; no cover; perforated metal inset, solid at bottom to hold enough water to transfer, perforated, hinged, self-locking cover; plain galvanized with blue striping.

Per Dozen

No. S-708—Capacity, 8 quarts; size, 9½x7⅝ inches; weight per dozen, 42 lbs..... **$27.00**

GRAND.

Galvanized.

Round; floating; galvanized iron bucket, no cover; inset of galvanized wire, solid at bottom to hold enough water to transfer; hinged, perforated, self-locking cover; plain galvanized, finished in blue striping.

Per Dozen

No. S-310—Capacity, 10 quarts; diameter, 9½ inches; height, 9½ inches; weight per dozen, 42 lbs **$30.00**

AERO.

Galvanized.

The accompanying cut-open illustration shows the patent cone shaped construction of inset bottom. When inset is submerged there will be noticed a continual stream of air bubbles emerging from a small hole in the pinnacle of the cone, which are caused by atmospheric pressure, thus indicating that there is a continual flow of air through the water. Frequent passing of air tends to cool the water, keeping it charged with oxygen for the fish to breathe and preventing stagnation. A bucket thus aerated cools the water perceptibly in time and if ordinary precaution is taken by the fisherman in shading his bucket, keeping it away from the direct rays of the sun, he will be able to prolong the life and liveliness of the minnows indefinitely.

Round floating; galvanized iron bucket; no cover; inset of galvanized wire, solid at bottom to hold enough water to transfer; hinged, perforated, self-locking cover; plain galvanized, finished in blue striping.

Per Dozen

No. S-410—Capacity, 10 quarts; diameter, 9½ inches, height 9⅛ inches; weight per dozen, 42 lbs... **$40.00**

IRON HORSE.

Galvanized.

These pails are better than the ordinary and are made for those who want a minnow pail to last more than one or two years. They are built of heavy galvanized metal, have a smooth inside surface and the lower half is liberally perforated to within one inch of the bottom to allow for quick drainage. There are no sharp projections to kill minnows. They are the best floating pail made today. A first shipment will convince you of that fact.

Per Dozen

No. S-250—Round; 10-quart capacity; weight each, 4 lbs **$40.00**
No. S-272—Oval; 12-quart capacity; weight each, 4½ lbs **52.00**

JONES' ACQUARIUM.

Consists of an outer receptacle of galvanized sheet steel, inside of which is a galvanized wire inset provided at its top with an oval air chamber, strongly braced on the inside, fitted with a valve to receive an ordinary bicycle pump by means of which enough compressed air is supplied to furnish a constant stream of air bubbles through the water from four to six hours. At one end of the cage the wire netting made funnel shaped, the end of the funnel coming even with the opening of the float. Each pail beautifully finished in green and gold

Per Dozen

No. S-300—Size 6x10x15 inches, capacity 12 quarts; weight each, 8 pounds..... **$86.00**

MINNOW FLOAT.

Meets all the requirements of the most scrupulous fisherman. Being pointed at both ends, this bucket rides the wake of a boat at an even keel at all times. The ends of this bucket, being air chambers causes it to be submerged at all times up to the air courses which is within one-quarter inch of the top of the bucket. When it is desired to remove the minnow, the simple operation of raising the lid brings the minnow to the top of the water. When this lid is released, the screen drops and the bucket is locked. This bucket is so constructed that it permits permanent circulation of fresh air in water.

Per Dozen

No. S-260—Minnow Bucket and Float... **$48.00**

MINNOW FLOAT.

The only device that can be relied upon to keep minnows alive; it can be pulled easily through lily pads, rushes, rice beds and weeds. It has conical ends and a cylindrical body, the forepart of which serves as a still water chamber. In this chamber the minnows are protected from the lashing of the water. The rear of body is perforated all around to allow a constant flow of fresh water, the air chamber allowing a supply of fresh air to enter at the same time. A ballast at the bottom keeps it right side up. It also has a handle which you hold in one hand while with the other you operate the noiseless sliding cover and take out minnow for bait with ease. The most noiseless and easiest running float ever put in use.

Each

No. S-160M—Minnow Float; galvanized iron; 30 inches long; weigh, 1¾ lbs. $3.00

MINNOW TRAPS.

GETZ'EM.

CANT BREAK.

Won't break, won't rust and won't come apart. Weight, 15 ounces. All transparent parts of the Getz'em traps are made of Pyralin, which is as clear as glass and flexible as rubber. All metal parts are galvanized. Joints are riveted. The float at end of suspending cord is merely to locate the trap, in case of accident, and not intended to sustain the trap, which of course should go to the bottom.

Directions for setting trap. The door to be placed up stream when used in running water. For bait, use cracker crumbs or small particles of bread, etc., which put in funnel end. See that no air remains in trap when sinking.

Each

No. S-G Getz'em Minnow Trap $4.00

SURE CATCH.

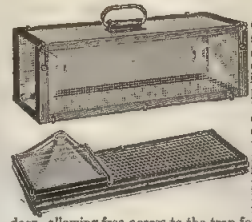
The most ingenious device ever invented for catching minnows. Guaranteed to do the work. Made of best screen wire, 1/5-inch mesh and sheet steel, galvanized and practically indestructible. The two halves nest together when not in use and, therefore, they ship compactly.

Per Dozen

No. S-20—Sure Catch; 18 inches long; 10 inches greatest diameter; weight each, 2½ lbs. $19.00

MINNOW TRAPS.

JONES FOLDING.



A delight to fishermen Cage is made in four sections of galvanized steel wire, each section securely hemmed on all sides with galvanized steel strips. Has transparent funnel ends. The front and back sections of cage are equipped at the ends with grooves, into which the funnels slide when it is desired to set trap up for use. Funnels, after being placed in grooves, hold trap in firm position, permitting top section to be used like a door, allowing free access to the trap for minnows. Takes up little space in suitcase or traveling bag.

Each

No. S-165—Size set up, 6x6x15 inches; weight, 2½ lbs. $3.30

FROG BOXES.

TONKA.

Heavy galvanized iron with galvanized wire cloth on three sides. Hinged cover; very compact and durable.

Each

No. S-30—4¾ inches high; 6 inches deep; 9 inches long; weight each, 1 lb. $1.30

ANCHORS.

MUSHROOM.

The most satisfactory type of anchor made. Will hold row boats of any size in the roughest weather and are also suitable for small gasoline launches.

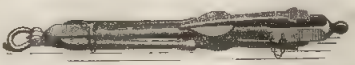
Has holes in base to allow for drainage.

Each

No. S-M15—Weight, 15 lbs. $1.70

No. S-M20—Weight, 20 lbs. 2.00

DIRIGO FOLDING.



Galvanized iron, folds compactly as shown and firm holding.

Nos.	S-6	S-10	S-16
Weight each, lbs	6	10	16
Each	$4.30	7.20	9.80

GROMMETS.

Per Dozen

KENNEDY TACKLE BOXES

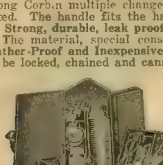
The All-Steel Boxes That Wont Wear Out.

Made of light weight steel, and are reinforced at all points of strain so that they will stand the hardest usuage. Electrically welded, not soldered, and the ends are double seamed and cemented, to make them water tight.

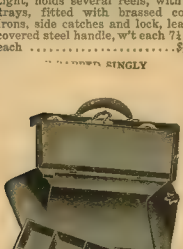
Finished in the durable Kennedy-brown enamel—**baked on** in order to keep it from rubbing off or scratching easily. Strong Corbin multiple change lock, is made with a loop-catch, which keeps the Box from falling open even when unlocked. The handle fits the hand, and is made of leather reinforced with a steel core.

Strong, durable, leak proof will give years of service.

The material, special construction and overlapping features makes them **Water-Proof, Wear-Proof, Fire-Proof, Weather-Proof and Inexpensive.** They will not soak up, warp, rot or go to pieces. They are also **Thief-Proof,** for they can be locked, chained and cannot be cut open.



No. C614—14 in. long × 7 in. wide, 9 in. high, leather brown baked enamel finish, light weight but strong grade steel, double seamed electric welded and reinforced throughout, waterproof and water-tight, holds several reels, with two trays, fitted with brassed corner irons, side catches and lock, leather covered steel handle, w't each 7¼ lbs., each *$6.00*



This style is shaped like a leather bag and equipped with tray divided into small compartments for carrying full casting equipment. Tray is made of light weight steel 1¾ in. deep and rests on ledges at top of case. Contents cannot spill out if box is loaded, as flat bottom will prevent overturning.

Nos.	C114	C116	C118	C120
Length, in.	14	16	18	20
Height, in.	9	11	13	13
Width, in.	7	9	10	11
W't each, lbs.	5½	6½	7½	8½
Each	*$5.25*	*5.50*	*5.75*	*6.00*

Combination Rod-Kit and Tackle-Case especially designed for the fisherman who wants a good substantial box in which he can carry full casting equipment, including rods. Equipped with two trays, suitable for carrying at least nine plugs or artifical baits. Ample space for snelled hooks, lines, sinkers, etc., in the tray. Bottom of the Box is divided to accommodate two reels in separate compartments, as well as space for rods, landing net, bottle bait, etc. Side catches, and a strong Corbin multiple-change lock. Finished in a durable brown baked enamel which cannot chip or easily scratch off.

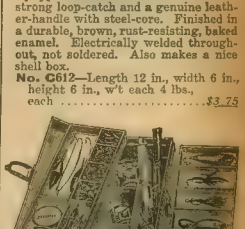
No. C621—Length 21 in., width 6 in., height 6 in., w't each 6½ lbs., each *$6.00*

Combination Rod Kit and Tackle Case electrically welded throughout. Lower tray flush to upper tray which is flush to lid. Finished in brown, rust resisting, baked enamel, water-tight and very durable.

No. C624—Length 24½ in., width 6 in., height 6 in., w't each 11 lbs., each *$6.75*

Made of steel practical design, having plenty of compartments in the two trays for artificial bait, snelled hooks, lines and sinkers, two compartments in the bottom for reels, bottled bait and other equipment. Watertight and is equipped with a first class lock with strong loop-catch and a genuine leather-handle with steel-core. Finished in a durable, brown, rust-resisting, baked enamel. Electrically welded throughout, not soldered. Also makes a nice shell box.

No. C612—Length 12 in., width 6 in., height 6 in., w't each 4 lbs., each *$3.75*



This style box is for the fishermen who desire a box in which they can carry short casting rods, in addition to their other equipment.

The two trays fit flush so that there is no danger of the contents spilling. They are so divided that there is plenty of room for plugs, or other artificial bait, hooks, lines, sinkers.

There are two divisions in the bottom of box for reels with ample space, short casting rods, landing net, etc.

No. C616—Length 16 in., width 6 in., height 6 in., equipped with a corbin multiple-change lock, leather handle with steel core, w't each 4 lbs., each *$4.75*

Millions of Purchasers WAITING

ALL over America millions of children—and millions of parents—are now reading about Kingsbury Motor-driven Toys. They are seeing lifelike pictures and being fascinated by the description of the *fun* of playing with Kingsbury Toys.

Out of these millions of readers a big percentage are *ready* to buy Kingsbury Toys if they can find them near at hand

Where do YOU want the purchasers who *live near you* to buy Kingsbury Toys?

Kingsbury advertisements in the fall and holiday gift-buying campaign are appearing in the following publications

CHILD LIFE
JUNIOR HOME
JOHN MARTIN'S BOOK
YOUTHS' COMPANION
POPULAR MECHANICS

These popular magazines print each month more than a million copies. At a highly conservative estimate each copy is read by approximately five persons making the size of the audience to which we are telling the Kingsbury story total 5,000,000

These magazines as you know, have great reader influence and reader loyalty. The advertising pages are as interesting to these readers as are the text pages. Because the young reader is anxious to see, examine and own the articles advertised in his magazine. That is why these millions of readers comprise the most profitable field that can be cultivated.

AN ADDITIONAL 25,000,000

ON November 28th a tab page advertisement will appear in Sunday newspapers reaching 25 million readers in five cities. It will feature Kingsbury Toys and contain names and addresses of local dealers who sell them. If you now carry Kingsbury Toys your name may be listed. If not, write us so you may be in time, even now, to have your name in this ad and to reap the profits it will bring.

WRITE FOR INTERESTING TOY PROPOSITION

Write, either direct to the factory or to our New York agents, Riemann-Seabrey Co., for full information about an economical quick method of stocking Kingsbury Toys and securing the Kingsbury Demonstration Table which makes these toys sell fast. Write today and lose not a minute in getting ready for Christmas

De Luxe Model

DeLuxe Model Carburetors for Fords are made of high grade materials. The utmost care and precision methods are employed in its manufacture. It is constructed throughout of a special carburetor brass, highly polished and includes as an integral part of its assembly the steering column control which operates directly in connection with the needle valve, affording the driver (from driving position) a full 90 degree operation of the fuel regulating needle valve, and represents the very latest improvement and convenience in carburetion for Ford Cars. Highly finished. Will increase power and give more miles from each gallon of gasoline.

No. C5470—Complete with steering column, w't 4 lbs. ....each $11.20

ONE IN A BOX

FOOT ACCELERATORS

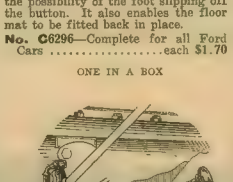
BULL-DOG

Permits simple, easy and positive foot control of the throttle. Works independently of the hand throttle. Positive in action; feed can be held uniform even on rough roads.

Carefully constructed of high quality materials, neat in appearance and design. The pedal is equipped with a rubber button. With each accelerator is furnished a foot rest eliminating the possibility of the foot slipping off the button. It also enables the floor mat to be fitted back in place.

No. C6296—Complete for all Ford Cars .....each $1.70

ONE IN A BOX



APCO

No parts of engine are removed and by taking out one Crank Case Bolt and replacing it with Apco Unit, job is practically finished.

ALL IN ONE PIECE. No small parts to get lost. No stampings to get bent. It works as smooth as though on ball bearings. This is exact result, accomplished by use of a double ball joint operating through two die cast aluminum bell cranks. Installation is positively rigid and will stay.

Pedal cap of heavy tough rubber, which prevents foot from slipping.

No. C6293—63—W't each 10 oz., each $2.20

ONE IN A CARTON

PEDAL PANTS FOR FORDS

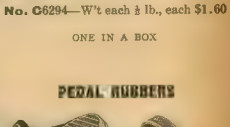
Fits over the pedals and brake, closing the open spaces in the floor boards around the pedals, keeping out the cold and dust. The floor mat is put back in its regular position and the only part of the air break visible is the pants part that extends part way up the pedals and brake.

Made of heavy dark grey water and oil-proof material with snap fasteners at the top of the pants part so it can be fastened around the pedals.

No. C6294—W't each ½ lb., each $1.60

ONE IN A BOX

PEDAL RUBBERS



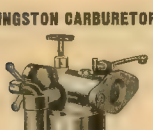
Each pedal pad constructed from high grade rubber securely fastened in heavy steel. The guard at side prevents the foot from slipping and the extra width given the pedal insures a firm foothold. Easily installed. Only one screw to tighten.

No. C6295—W't per set ½ lb., per set $1.70

SET OF THREE PADS IN A BOX

ACCESSORIES FOR FORD CARS

KINGSTON CARBURETORS



FOR FORD CARS AND TRUCKS

This model is the same as the model L4 Carburetor, and which is used as standard equipment on Ford Cars and trucks, being made of cast iron has a fuel cleaner attachment. This cleaner insures removal of all foreign matter from the fuel and a greater power range.

No. C5471—L4K—W't each 2½ lbs., each $6.90

No. 60W179. Each. 3.75

Knickerbocker No. 5 Combination Swing Cut-off and Ripping Machine with Tool Attachment

A machine that will perform more operations of more different kinds than any other piece of equipment on the job. Here's what it will do in a positive, workmanlike manner—cross-cut, rip, mitre, joint, plane, bore, groove, rabbet, sand, and grind tools—ten machines in one.

The Universal Tool Unit is an exclusive Knickerbocker feature, fully protected by patents. It will not be found on any other make of woodworker.

It is independent of the saw rig, to which it can be quickly attached by four bolts. The tool unit is connected to the operating mechanism by the simple swinging of a lever, which locks in position when unit is to be used. (See illustration to the right.) When it is desired to use the swing action of the saw in cross-cutting, the tool unit is disconnected by reversing position of the lever, allowing the saw arbor to swing freely.

Like all Knickerbocker equipment, the Universal Tool Unit is well made, carefully machined, accurate, and long lived. By displacing hand labor, it makes possible more and better work each day.

Illustration (4) shows Tool Unit, which is easily attached to the No. 5 Saw Rig by four bolts.

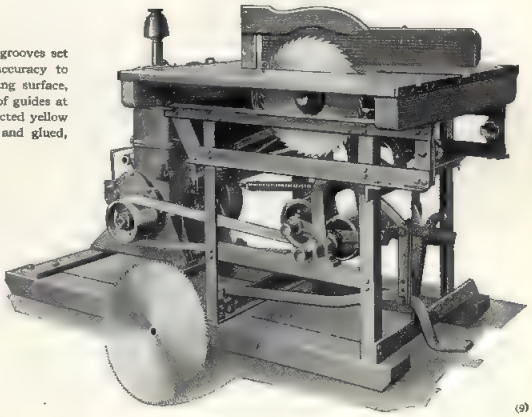
Illustration (5) shows Tool Unit connected to the swing frame of the No. 5 Saw Rig.

Illustration (6) shows Tool Unit disconnected from the swing frame of the No. 5 Saw Rig.

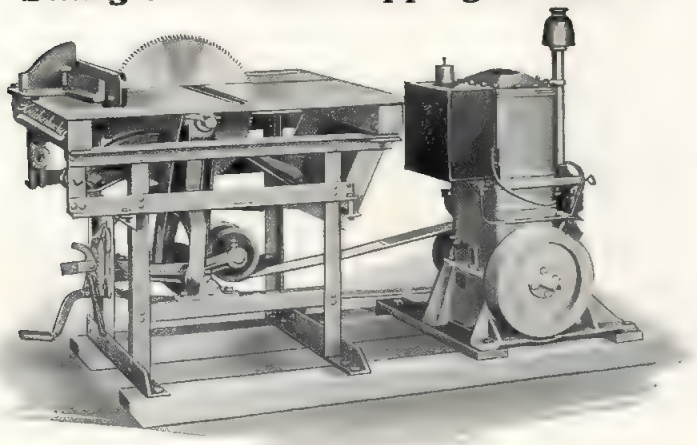
No. 5 in position for Ripping

Guides and gauges slide in steel grooves set in the table with exceptional accuracy to obtain a perfectly smooth working surface, and to assure correct alignment of guides at all times. Table top built of selected yellow pine strips $1\frac{1}{8}$" thick, tongued and glued, reinforced by steel strips.

For stationary arbor Woodworker with LeRoi engine built in under the table, send for circular showing No. 424 Knickerbocker Woodworker.



Knickerbocker No. 5 Combination Swing Cut-off and Ripping Machine

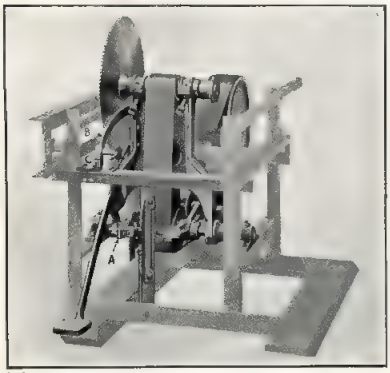


The Knickerbocker No. 5 Saw Rig, with its swinging arbor, provides at once the fastest and safest method for cross-cutting. The material to be cut remains stationary, firmly lodged against gauges on top and at rear of table, while the saw is swung forward through the material by means of a foot lever, leaving the operator's hands free. The operator cuts more material with less effort, especially the larger and longer pieces, than is possible on a machine with stationary arbor. Saws of sufficient size for the larger timbers may be used. This is not possible on most combination woodworkers.

In ripping, the swing frame is locked in a stationary position and held absolutely rigid. In this position the operations of grooving, rabbeting and grinding are also performed. Table adapted for any depth of ripping.

The long life of the Knickerbocker is made possible by its steel angle frame construction the strongest and lightest for building portable machinery.

The illustration below shows how sturdy the Knickerbocker is built, and how simple the mechanism.



The swing frame is cast in one piece, pivoted on a $1\frac{7}{16}$-inch cold rolled stationary shaft, held in place by wide brackets with set screws. All wearing parts lubricated by compression grease cups.

Every adjustment is in handy reach of operator. For instance, notice how the belt can be kept at just the right tension by operation of the lever A.

All pulleys balanced to reduce vibration.

By the arrangement of pulleys shown, a speed of 2400 r. p. m. is obtained.

The Knickerbocker Saw Rig is carefully machined and finely finished for turning out a large volume of work of the most exacting character.

An abundance of power is steadily and smoothly delivered by the 8 h. p. 2-cylinder hopper-cooled Le Roi automobile type engine; equipped with high tension magneto.

General Dimensions and Specifications of No. 5

Height	$38\frac{1}{2}$″
Length of Table	42″
Width of Table	36″
Length of Engine Skids	6′ 0″
Shipping Weight gross, 950 lbs.; net, 900 lbs

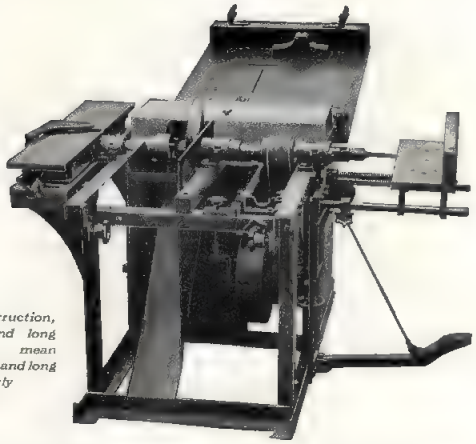
Ripping Capacity	4″ Lumber
Quantity and Size of Cross Cut Saw	One 20″
Cross-Cutting Capacity—1″ x 15″; 2″ x 14″; 3″ x 13″; 4″ x 12″; 5″ x 11″; 6″ x 9″.	

Knickerbocker Stationary Arbor Woodworker

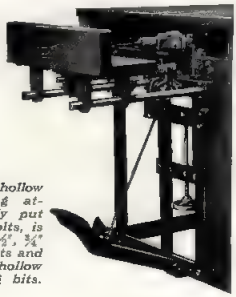


The sturdy construction, short arbors, and long bearings that mean smooth operation and long life are here clearly revealed.

THE Knickerbocker Stationary Arbor Woodworker is a saw rig to be used right on the job—one that can be moved through doors and up stairways wherever there is work to be done.

By turning out all the lighter mill work as needed, it saves time carpenters would otherwise have to spend in bench work, and so speeds up the job and cuts costs.

Standard equipment consists of a cross-cut saw 14 inches in diameter and a rip-saw 12 inches in diameter, with capacities of 3½" and 2½" respectively, together with gauges for cross-cutting, ripping, mitering, bevel sawing and bevel jointing. Saws up to 16-inch diameter can be used, and enable this machine to handle lumber sizes up to 4½". Note this point—that this is a right hand sawing machine.



This boring and hollow chisel mortising attachment, easily put on with four bolts, is equipped with ½", ¾" and 1" boring bits and ¾", ½" and ⅝" hollow chisel mortising bits.

Attachments for jointing, mortising, rabbeting, boring, grinding, grooving, sanding and making mouldings, which are easily put on at any time, fit this one machine to handle all the lighter mill work on a house-building job at a saving of time, material and labor.

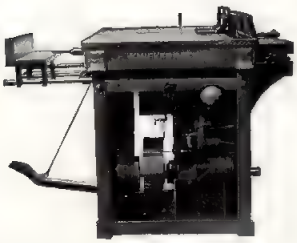
The jointer attachment, which may be attached and detached at any time, operates on the left hand side of the machine and is a right hand jointer. (So many portable saw rigs have the jointer on right hand side which is unhandy for the operator, as it necessitates operating jointer left handed.) It can be operated only when needed, as it operates on its own arbor and not on the saw arbor—the jointer arbor connects with main arbor by clutch.

Both jointer table beds are adjustable and the jointer head, which is a safety head with three knives, has a bearing on each side to eliminate chattering.

The boring and hollow-chisel mortising attachment goes on the right hand side and is driven by the saw arbor. The sander, dado head, emery wheel and moulding head are also operated on the saw arbor.

An abundance of power is furnished by a built-in 4 horsepower, one-cylinder Le Roi engine, equipped with high

Knickerbocker Stationary Arbor Woodworker



With all attachments in place as here, the machine measures 60 inches in over-all width—attachments easily removed—machine then goes through a 2 ft. 8 inch door.

tension magneto. Engine is housed within the frame under sheet steel panels that keep out all dirt.

Construction is exceptionally sturdy throughout. The frame is of ¼ x 2 x 2 inch steel angles, electric welded at every point. Arbors are short and are carried in long bearings of close-grained babbitt.

Guides and gauges slide in steel grooves set in the table with exceptional accuracy to obtain a perfectly smooth working surface, and to assure correct alignment of guides at all times. Table top built of selected yellow pine strips 1⅛" thick, tongued and glued, reinforced by steel strips.

Attachments

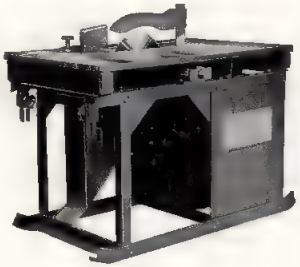
12, 14 or 16-inch rip or cross-cut saws
9-inch dado or groover
10-inch disc sander
6-inch jointer
8-inch emery wheel
Huther moulding head

Boring and mortising attachment with ½", ¾" and 1" boring bits and ⅜", ½" and ⅝" hollow mortising chisel bits.

General Dimensions

Height, 34¾", width of table, 30", length of table 50½", over-all width with all attachments on, 60" -designed to go through a 2 ft. 8 inch door with attachments removed-

Weight with engine and all attachments, 980 pounds; weight with engine and saws only, 740 pounds. Weight of engine, 325 pounds.



The cross-cut gauge is adjustable up to 45° for use in mitering.

ICE DECOYS.

KOHLER'S.

Per Dozen

No. S-KDM—Silver finish, with red gills and red around fins; length, 6½ inches; weight, 2½ ounces..... **$12.00**

DOWAGIAC ICE DECOY.

Has adjustable feature so the minnow may be held in different positions.

Per Dozen

No. S-YP—Yellow perch; length over all, 5¼ inches; weight, 2½ ounces..... **$24.00**

No. S-GB—Green back, otherwise same as No. S-YP..... **24.00**

MINNOWS.

RUSH'S TANGO SWIMMING MINNOW.

IDEAL FOR TROLLING AND CASTING.

Has all the dip, dive, wiggle and swimming motion of a live minnow in action. It darts and dives in various directions, always wiggling and zig-zagging like a fast swimming minnow. When not in action, the bait comes to the surface. Hooks being behind the body of bait, it is practically a weedless bait.

Finished in brilliant colors in high grade baked enamel. Packed in individual boxes, in cartons containing one dozen boxes.

Per Dozen

No. S-2—Tango Minnow, white, red head..... **$12.00**

No. S-4—Tango Minnow, white, red and green, mottled back . **12.00**

No. S-5—Tango Minnow, yellow, red head.. **12.00**

No. S-8—Tango Minnow, red body, white head . **12.00**

YELLOW KID.

A floater and surface bait, made of red cedar heavily coated with waterproof, porcelain enamel, fitted with three nickel plated treble hooks which can be instantly detached. Polished spinner is securely fastened to the head of the bait and revolves very freely on a brass bearing. This bait is a killer for bass, either for river or lake fishing. Creates a big disturbance on top of the water and attracts fish from a considerable distance.

Per Dozen

No. S-YK—Yellow Kid; yellow with gold spots; weight per dozen, 2 lbs..... **$8.00**

MINNOWS.

CREEK CHUB.

NEW WIGGLE FISH.

The aristocrat of all wigglers. All Creek Chub nature lures are noted for their wonderful movements, but in this new double jointed lure with its wagging, fluted, nickeled tail and patented mouth piece, there is a fast, flexible, swimming movement not found in any other lure. As its name indicates, the New Wiggle Fish looks like a fish, swims like a fish, floats, dives and wiggles its way along just below the surface, or deeper if pulled faster. A guaranteed getter of bass, pickerel, pike and muskies.

Length of body, 3½ inches; weight, ¾ oz.

Per Dozen

No. S-2405—Red side, scale finish **$20.00**

No. S-2403—Silver shiner, scale finish **20.00**

No. S-2404—Golden shiner, scale finish... ..... **20.00**

No. S-2401—Perch, scale finish **20.00**

No. S-2402—White and red head **20.00**

BABY WIGGLE FISH.

For Those Who Prefer Lighter Tackle.

With the same flashy movement as its larger namesake, the Baby Wiggle Fish has but one treble hook, all that is necessary because of the size of the lure and the placing of the hook. If desired, it will be furnished with single or double hook, when so ordered. And like its big brother, it's a wiggling, wicked killer of all kinds of game fish.

Length of body, 2½ inches; weight, ½ oz.

Per Dozen

No. S-2505—Red side, scale finish. **$18.00**

No. S-2503—Silver shiner, scale finish **18.00**

No. S-2504—Golden shiner, scale finish..... **18.00**

No. S-2502—White and red. **18.00**

JOINTED PIKIE.

This new Jointed Pikie has a beautiful wiggling movement, flexible and sensuous, which we believe makes it a still better fish getter than our famous Pikie minnow No. S-700. It is a very easy caster and does not run quite so deep as the No. S-700.

Length, 4¼ inches; weight each, ¾-ounce.

Per Dozen

No. S-2600—Natural pike, scale finish..... **$20.00**

No. S-2602—White with red head..... **20.00**

No. S-2604—Natural golden shiner, scale finish..... **20.00**

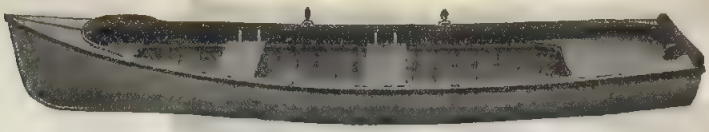
No. 12W32. Convertible Wrist Watch. 10½ ligne, 10 year Napoleon green gold filled case, fitted with a 6-jewel lever movement, extension self-adjusting bracelet. Each 6.55

ROW BOATS.

SPECIAL OUTBOARD MOTOR.



Made especially for use with detachable row boat motors. Entire construction is very substantial. The wide transom and almost flat stern section together with the straight key line allows for added weight of motor and operator and keeps the entire length of boat on water. Large stern seat allowing operator sufficient room to handle steering device on engine. The dimensions of frame work and general construction reduce the vibration of motor to a minimum.

These boats are considerable heavier than the ordinary standard row boat on the market, but the increased weight adds to the strength and safety and makes it especially adapted for family use. The added weight of the boat does not decrease its speed as its under body is so designed that it glides on the top of the water instead of displacing it.

Frame, keel, stem, transom, stern post and ribs are made from clear selected white oak.

Planking is made from selected air dried cedar. Each plank in one length fastened to ribs with galvanized fastenings.

Decks, coaming and gunwale, selected white oak, screw fastened. Seats and floor boards, selected cedar or spruce.

Painting and finish. Entire boat is thoroughly smoothed and sand papered and all seams caulked with seine twine. Screw and nail holes are filled flush with a special cement and entire boat painted with three coats best marine paint. Decks, gunwales and seats are finished natural with three coats spar varnish. Inside of boat painted green and outside white.

Nos.	S-199	S-100
Length, feet	16	18
Beam, inches	48	50
Depth at bow, inches	26	28
Depth at stern, inches	23	24

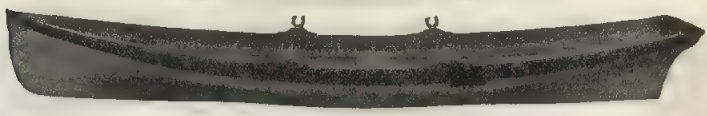
Transom, inches	1½	1½
Gunwales, inches	⅝-1⅛	⅝-1⅛
Shipping weight, lbs	240	325
Each	$164.00	$190.00

Complete With One Pair Oars.

CLINKER BUILT.



A substantially constructed row boat, very graceful appearance combined with easy rowing qualities. Hundreds of these boats are in use throughout the U. S. An ideal family boat and a good boat for summer resorts and liveries.

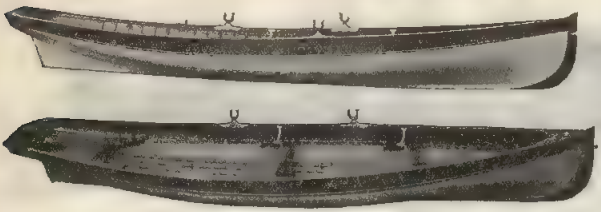
All boats are painted three coats, white outside and green inside. Gunwales and decks finished natural. Top strake painted bright red. Complete with one pair oars.

Nos.	S-B2214	S-B2216
Length over all, feet	14	16
Beam, inches	44	46
Depth forward, inches	23	24
Depth amid ship, inches	14½	15½
Depth aft, inches	20	21
Planking cut to shape, inches	⅝	⅝
Each	$100.00	$112.00

NOTE—Prices include oars.

ROW BOATS.

LADY OF THE LAKE.



Square Stern.

Beautiful in outline and finish. Thoroughly well made.

This is the handsomest and finest boat that skilled labor can produce. It is a smooth built boat, being made up of narrow strips 1⅜ inches wide by ½ inch thick with half-round joints (see cut). This makes a strong and durable boat. The strips are nailed together with galvanized nails. The half-round fender on outside of boat is not nailed on as usually done by other builders, but is a solid piece of oak built in when planking is put on and therefore cannot come off, as is often the case where it is put on after boat is finished.

After the boat is planked, it is planed and sanded to a smooth finish. Then it is clamped and drawn together with chains every thirty inches, under several thousand pounds pressure. Then the ribs are fastened in place, which holds the planking firm. This is what keeps our boats from leaking.

Grade A—Keel stem stern, gunwales and ribs of selected white oak, planking selected cedar. The false bottom is fastened down with buttons and can be taken out, which makes it very convenient in cleaning or repairing the boat. Finished inside and out with three coats best grade spar varnish. Removable false bottom, adjustable foot braces, two pair oar locks, one pair taper handle spruce oars, copper tipped, leathered and varnished.

Grade B—Same material as Grade A, but painted inside and outside, except seats, seat fenders, gunwales and shear streak, including half-round fenders, which are finished in natural wood with three coats best grade spar varnish. Removable false bottom, adjustable foot braces, two pair oar locks, one pair 7½ foot taper handle spruce oars, copper tipped, leathered and varnished.

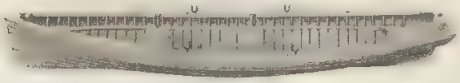
There are so many calls for a row boat suitable for the detachable row boat motors that we are building all the Lady of the Lake style boats so they may be used for this purpose. The stern is reinforced and quite wide so as to stand the strain and extra weight of motor.

	Each
No. S-102—Length 16½ feet, beam 46 inches, depth 16 inches; weight, 170 pounds	$150.00
No. S-104—Length 15½ feet, beam 46 inches, depth 15 inches; weight, 170 pounds	140.00

F. O. B. Alexandria, Minn

Note—Row boats take four times first class freight

SHELL LAKE.



The special square stern row boat, which we illustrate above, is our leader and we have hardly been able to supply the demand for them. It is the ideal boat for a boat livery, hotel or summer resort. We call attention to the liberal depth and width, the fine entrance and clearance, of the easy graceful lines, the easy deadrise and good shoulders, a good flat floor carried well fore and aft, all lending towards a graceful, safe and steady boat.

Grade C—The entire frame of selected white oak, planking white cedar, hardwood trimmings, galvanized fittings, steel stem band and painter rig, one pair of straight spruce oars, leathered and varnished and copper tipped. The seats, gunwales and breast hooks are finished in the natural wood in spar varnish. The balance of the boat is painted with three coats of best marine paint.

Grade B—Same specifications as above, except that the three top strakes, in addition to the gunwales, are finished in the natural wood in spar varnish.

F. O. B. Shell Lake, Wis.

Model No.	Length, Feet	Beam, Inches	Depth Forward Inches	Depth Amidship, Inches	Depth Aft, Inches	Weight, Lbs.	Grade B Each	Grade C Each
S-1	14	42	23	14½	20	135	$89.00	$86.00
S-2	15	42	24	15	20	150	96.00	91.00
S-3	16	46	25	16	21	175	107.00	100.00
S-4	16	48	25	16	21	180	107.00	100.00

Any of the above boats, 15 feet or over in length, fitted for motors for $4.70 extra. This is not a make-shift arrangement, but the heavy double nailed transom and extra large stern seat are built in and are part of the boat.

HATCHETS

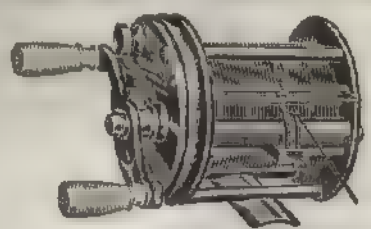
Highest Grade Level Winding Fishing Reels

ORENO
LEVEL-WINDING ANTI-BACK-LASH REEL



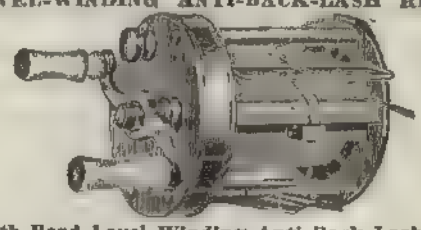
ORENO Level Winding Anti-Back-Lash Reel. This reel is the same in every respect insofar as action and operation are concerned, as the South Bend Level-Winding Anti-Back-Lash

Thumbing and spooling are entirely eliminated. It cannot back-lash, snarl or tangle, and it automatically spools itself, winding the line smooth and even. By a very simple adjustment can be converted into a straight level-winding reel

Highly silvered finish with double grip. Quadruple multiplying gear. Capacity 100 yards 15 to 30 pound test silk casting line. Spool diameter is 1¼ inches and 1⅛ inches wide. One in a box. Weight 9 ounces.

No. 16R42. Each..... 5.56

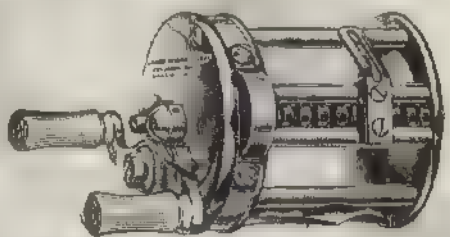
SOUTH BEND
LEVEL-WINDING ANTI-BACK-LASH REEL



South Bend Level-Winding Anti-Back-Lash Reel. intended to make every cast a perfect cast so as to throw your bait and line accurately without a back-lash, snarl or tangle, agate jeweled spool caps with adjustable spring tension grip, easily screwed off to permit oiling. Gearing is quadruple multiplying; crank has double grips of white ivoroid. Level-winding attachment winds the line evenly and closely upon the spool. Capacity 100 yards. Each in box complete with genuine leather case and practice casting weight.

No. 16R24. Each 10.78

HEDDON'S 3-25 NEW DOUBLE STEADY BAR REEL



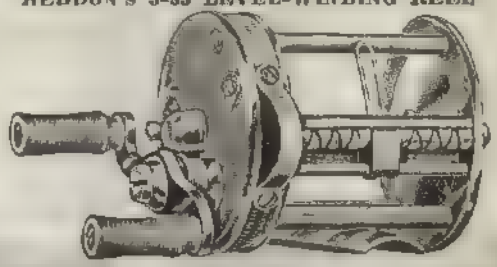
No. 3-25 New Double Steady Bar Reel. This new reel is of the same general construction and same fine material as the No. 3-35 Level-Winding Reel. Made of nickel silver, circle finished. Also No. 3 size spool, with full line capacity of 100 yards of 15-lb test line.

The Double steady bar construction adds long life to the level-winding mechanism. Note how sturdy its construction and the unique way in which the line carriage is held in place. This eliminates all friction of the line carriage and transversely threaded shaft.

Also, of vast importance, especially to the Salt Water fisherman the entire level-winding device is made of non-rusting materials.

No. 16R43. Each..... 16.34

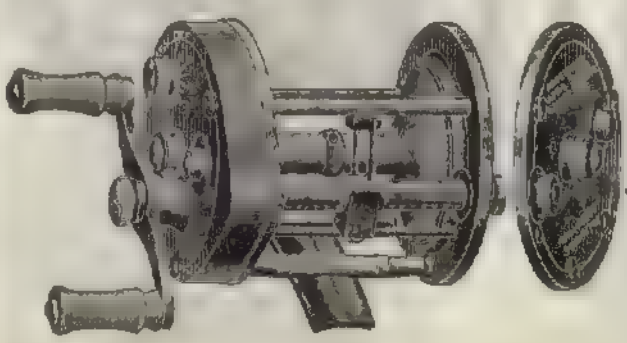
HEDDON'S 3-35 LEVEL-WINDING REEL



Heddon's Level-Winding Reel, is up to recognized high standard of quality in every respect. Is made of the best, tested, hard drawn watch nickel, stud shaft, pivots, and pinion are of Stubbs drill rod hardened, oil tempered, ground to size and highly polished. Full quadruple multiplying with exactly the correct ratio of speed between the spool and line carriage to produce enough of that criss-cross of the line which prevents back lashing. The spiral gears are of a special hard drawn phosphor bronze and are much stronger than are ordinarily used. Has a capacity of 100 yards of 15 pound test line. Equipped with Heddon designed double handle. Weight 9 ounces. Each reel furnished with one drop oil can bottle reel oil and tube of high grade vaseline. In genuine leather reel case

No. 16R28. Each..... 22.86

PFLUEGER SUPREME FISHING REEL



Level-Winding Anti-Back-Lash

Pflueger Supreme Fishing Reel. Level-winding anti-back-lash quadruple multiplying, generated spiral tooth gears, steel pivots, tempered and polished. Phosphor bronze bearings adjustable back sliding click, fancy balanced double handle crank

Anti-Back-Lash mechanism, contained within the reel automatically thumbs the spool and stops the same instant the bait strikes the water, thus preventing all possibilities of back-lashing

The Adjusting Screw with dial regulator so constructed that any tension desired can be secured by turning the adjusting screw, and can be thrown off altogether, thereby making an open level-winding reel. Will hold from 75 to 100 yards of line, according to size of line used. A booklet describing and also giving instructions how to operate reel is inclosed.

No. 16R39. Each..... 16.34

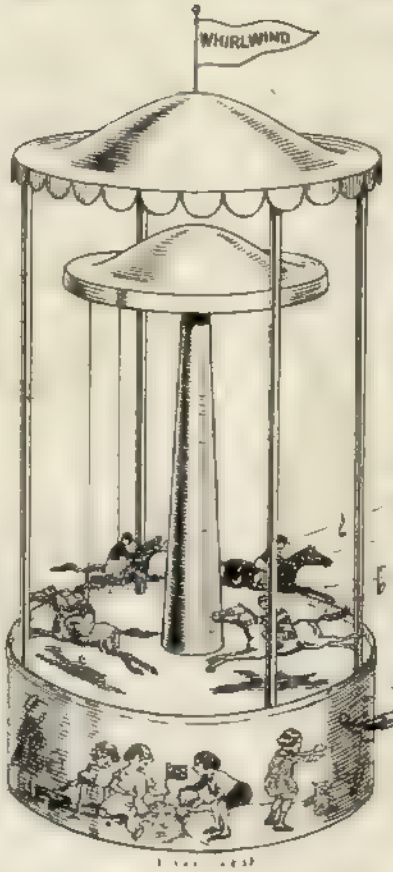
Toys Run By Air!

So Simple a Two-Year-Old Child Can Operate

Size:
11" High
6" Diameter



Just Press The Bulb

and

Away They Race—Round and Round Merrily —All the While

PLAYING LIVELY MUSIC

No Springs to Break—No Keys to Lose—for these ingenious Whirlwind Toys are run and run fast by a power never yet applied to mechanical toys—AIR!

Here's The Bulb

A slight pressure starts the mechanism running fast or slow at will. A really startling development in toy construction.

Beautiful Appearance—Fascinating Action!

Whirlwind Toys are highly ornamental, handsomely designed and brilliantly finished; but, withal, wonderfully durable. And their system of air motive power fascinates everyone instantly. Don't say there's nothing new in Toydom until you see Whirlwind Toys.

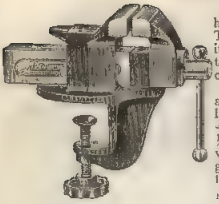
PATENTED

Whirlwind Toys & Novelties, Inc., 1404 Ave. U., B'klyn, N. Y.

LUTHER.



Made with extra large and heavy bronze feed screw nut. This is the heart of a vise and its wearing qualities are many times that of the usual cast iron construction.

Tool steel feed screw, accurately machined from solid stock; larger and longer than used in similar vises; extra wide jaws, 1/8 to 3/8 inch wider than most vises. Wide opening of jaws greatly increases their utility; the slide bar is panelled which practically doubles its strength.

Nos.	V91½	V92	V92½	V93
Width jaws, ins.	1½	2¼	2¾	3¼
Opening jaws, ins.	1½	2¼	2¾	3½

Macdonald Smith

Drivers, Brassies, Spoons

Macdonald Smith, considered one of the world's most brilliant players, has made two sensational bids for the British Open Championship, won the Metropolitan Open in 1924 and 1926 and tied with his brother for the U. S. Open in 1910.

Macdonald Smith Autographed Drivers, Brassies and Spoons are the exact duplicates of this championship's own clubs. They have broad, deep faces with slight bulge and fairly large heads. Hammered steel driving face. Bell top, link olive green grips. Made with finest select hickory shafts or Wilson enameled steel finish shafts.

Hickory Shaft

No. 11R265.	Driver.	Each	5.65

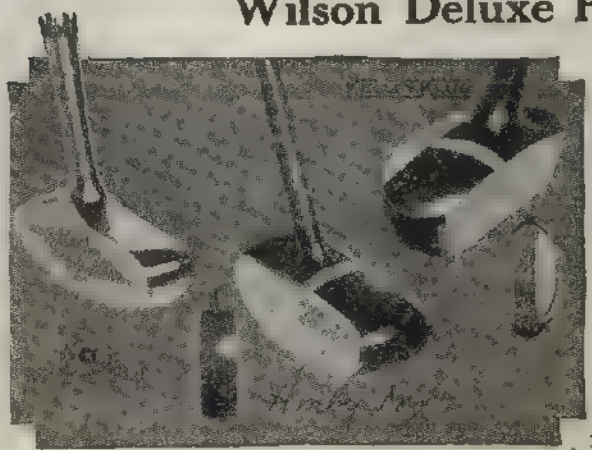
Per dozen boxes 1.80
No. 11R65Y. (Yellow).
Per dozen boxes..... 1.80

Wilson Deluxe Putters



The Wilson Sharpshooter Putter is considered one of the most attractive putters made. The head of this model is of highly polished Alumo Metal and the dual faces are inlaid with solid brass. Great accuracy is made possible through the use of this club as it is constructed on the center shafted principle which makes for perfect balance and easy and confident handling. Can be used by right or left hand player.

No. 11R271. Sharpshooter (Hickory Shaft). Each 4.35

The Kelley-Klub is ideal for putting. It has a "feel"—an indefinable balance which inspires confidence in sinking the long as well as the short ones. This club has achieved unusual popularity. Can be supplied in right hand model only.
No. 11R272. Each.. 4.75

The Amby-Dex Putter is a center-shafted wood head club with dual faces of brass. It is exceptionally well balanced. Can be used by right or left hand player.

No. 11R273. Each.. 4.75

AMERICAN DOLLS

Highest Quality MADE IN AMERICA

A most representative line containing the widest variety to be found anywhere. Butler Brothers have always been leaders in dolls and have justly earned their reputation as "Doll Headquarters" for American merchants. We call particular attention to the many new styles and types—excellent offerings in twin baby doll sets and such well known brands as "Ideal," "F & B," Averill's "Madam Hendren" and the more popular than ever "Bye Lo" babies.

BABY DOLLS—Crying Voices

These lovable dolls were the sensation of the 1935 Holiday Season. This year the demand will be even greater and to enable you to meet it we offer this carefully selected line of baby dolls to sell at popular prices.

Remington hunting knives are built for the rough, hard usage and service for which knives of this class are intended. They possess weight, strength, and solidity of construction. They are designed to meet every emergency of the hunter, trapper, fisherman, sportsman, camper and out-doors man.

Please note that all prices include solid flexible oak tanned leather belting sheaths of the very best quality. Nickel silver guard, hilt, cast aluminum thread butt, blade and tang forged from one piece steel; handle made of leather, brass and colored fibre discs, permanently locked with countersunk brass nut; edge set ready for use.

Furnished with No. S2 oak leather sheath.

Per Dozen

No. S-RH33—Hunting Knife; length blade, 4¼ inches; length over all, 9 inches; weight with sheath, 10 ozs. . . . **$48.00**

Furnished with No. S2 oak leather sheath.

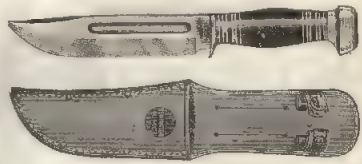
Per Dozen

No. S-RH35—Hunting Knife; length blade, 5¼ inches; length over all, 9¾ inches; weight with sheath, 11¼ ozs **$60.00**

Furnished with No. S2 oak leather sheath.

Per Dozen

No. S-RH34—Hunting Knife; length blade, 5 inches; length over all, 9 inches; weight with sheath, 11 ozs. . **$56.00**



Furnished with No. S1 oak leather sheath.

Per Dozen

No. S-RH36—Hunting Knife; length blade, 6¼ inches, length over all, 10¾ inches; weight with sheath, 12 ozs **$64.00**

Packed one in a box, six in a carton.

MARBLE'S GAME GETTER.

TWO GUNS IN ONE—ONE GUN FOR ALL GAME.

Two combinations, with barrels 12, 15 or 18 inches. Upper barrel .22 caliber, rifled, chambered for short, long and long rifle cartridges. Lower barrel, smooth bore for .44 caliber and .410 gauge 12 m-m 2 inch brass or paper shot shells, also .41 and .410 ball cartridges not conical bullet. Do not use IXL cartridges in smooth bores.

Upper barrel .22 caliber. Lower barrel for .410 gauge 2½ inch only paper shot or ball cartridges.

A more accurate .22 cannot be found. The shot cartridges for small furred and feathered game almost equal 28 gauge. The .41 ball is very accurate and powerful at medium range. Smokeless powder may be used with perfect safety and slight recoil.

Single trigger striker is adjustable to either barrel instantly. Hammer rebounds to safety notch after firing. Receiver lock trigger guard is pulled back to open breech. Ejector partially ejects from both barrels at same time. Folding stock is held rigidly in position by sliding lock. Rear sight has stationary buckhorn with large U notch, also leaf with small U notch, and folding peep with .32-inch aperture. Front sight, bar 1/16-inch gold bead. Frame, drop forged. Finish, blued. Stock, formed from sheet steel nickeled. Grip plates, walnut. Holster, finest strap leather.

Each

No. S-M21-12—12-inch barrels; complete with holster **$41.28**
No. S-M21-15—15-inch barrels; complete with holster **43.86**
No. S-M21-18—18-inch barrels; complete with holster **46.44**

Marlin

FOR over 50 years Marlin Firearms have been made by the same Marlin guild of master gunsmiths—same original methods, same high standards, same manufacturing plant.

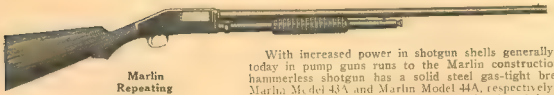
Today as always the name Marlin stands for design, materials and gunsmithing as fine as American science, craftsmanship and high purpose can put into rifles and shotguns.

Devoid of frills, unique for practical mechanical simplicity, distinguished by handsome appearance and perfection of balance, unsurpassed in performance—the line of dependable popularity.

Marlin Shotguns

For over 20 years Marlin Repeating Shotguns have been known for their exceptional shooting qualities—qualities that have won national and international championships. In all parts of America, they are the choice of leading shooters at the traps and in the field.

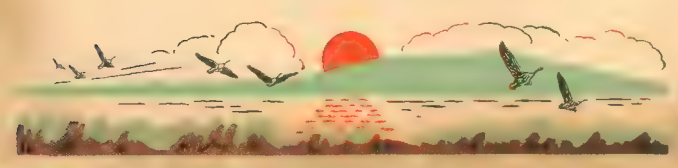
All Marlin Shotguns have the most modern safety features, and are bored in strictest adherence to the famous Marlin system, insuring the utmost in pattern and penetration. The top of the barrel is finely matted, doing away with annoying light reflections.



Marlin Repeating Shotgun No. C28 Model 43A

With increased power in shotgun shells generally, the demand today in pump guns runs to the Marlin construction. No other hammerless shotgun has a solid steel gas-tight breech like the Marlin Model 43A and Marlin Model 44A, respectively 12 gauge and 20 gauge. Both of these Marlins are chambered for the powerful 2¾-inch shells, and of course handle the shorter standard shells as well.

The Marlin Model 42A, with visible hammer and made in 12 gauge, still a great favorite with shooters preferring this type, also handles both standard and 2¾-inch shells. In addition to the standard barrel lengths, this model can be supplied with 20-inch cylinder-bore barrel for riot use.



Marlin

"Famous for Accuracy and Hard Hitting"

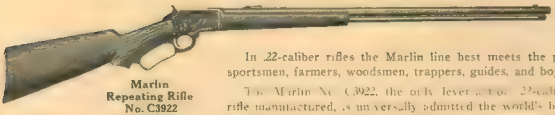
THE PROGRESSIVE, independent dealer always has found Marlin Firearms one of the most satisfactory of all sporting goods lines to handle.

The Marlin line is standard, complete, modern in all essentials, in steady demand. It simplifies handling firearms. Your investment is low, your turn-over quick, and your profits are worth while.

Marlin Rifles

For more than 50 years Marlin has been the exclusive user of the deep, clean-cut Ballard rifling—originated by J. M. Marlin—which gives greatest accuracy and power. The fame of this rifling, and its practical value in the rifles you sell, is a trade asset of distinct importance.

More than 30 years ago, Marlin originated the solid-top, side-ejection construction in repeating rifles, affording greatest safety to the shooter. Though extensively imitated, the Marlin construction, being the first of its kind, has never been equalled.



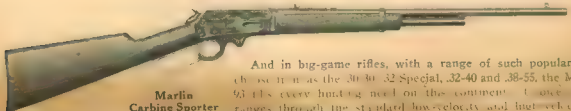
Marlin
Repeating Rifle
No. C3922
Model 39

In .22-caliber rifles the Marlin line best meets the preferences of sportsmen, farmers, woodsmen, trappers, guides, and boys.

The Marlin No. C3922, the only lever action .22-caliber repeating rifle manufactured, is universally admitted the world's best all-round .22—a marked competitive advantage for you.

In the slide-action .22 calibers the Marlin No. C3722 with exposed hammer, and the Marlin No. C3822 hammerless, each is rated the best looking, best handling, best shooting rifle in its class.

The Marlin C. F. Nos. C2725 and C2732, with slide action, meet the demand for medium power, with the popular .25-20 and .32-20 cartridges.



Marlin
Carbine Sporter
No. C9630
Model 93

And in big-game rifles, with a range of such popular calibers as the .30-30, .32 Special, .32-40 and .38-55, the Marlin Model 93 fits every hunting need on this continent. It covers the cartridge ranges through the standard low-velocity and high-velocity loads to and including the latest in super speed and power.

Made in America
American Flyer
"The Train with the Guarantee" MINIATURE RAILROADS Registered U.S. Patent Office

Electric Line

All "American Flyer" Electric Trains possess features that appeal to the boy. They are trains he can actually "do things with." Some of these features are: The automatic reverse, lighted Pullman cars, cars that couple up auto-mat-ically, sliding doors on baggage car, and a Mail Bag Catcher that will pick up the Mail Pouch as the train roars past the station. These, with many other features, comprise the make-up of a "lifelike" train.

Train No. 1102. Has new Electric Type Locomotive No. 1096 with headlight, length 8¾ inches. Two No. 1120 Pullman Cars; length, 5½ inches each. Length of train 21 inches. 8 pieces of track, including track terminal and track binding clips. Length of track, 82 inches. Each in box.

No. 39N124. Each..... 3.92

No. 1250. New "American Flyer," air-cooled ½-volt step Transformer. 110-volt, 60-cycle, 75 watts. Recommended for all No. "O" gauge Electric Outfits with accessories. Will also operate Wide Gauge Trains. Each in box.

No. 39N127. Each..... 2.48

Regular equipment on this model includes one-piece windshield, walnut door panels with Circassian inlay, walnut garnish moldings, vanity case, dome light, robe rail, foot rest, cowl lamps, automatic windshield cleaner, rear view mirror, sun visor, double bar front bumper and rear bumperettes, nickeled radiator shell, Moto-Meter and bar cap, extra tire and cover, stoplight in combination with tail-light, natural finish wood wheels and balloon tires.

New Marmon Speedster Offered

A new four-passenger open model known as the speedster and listing at $3295, has been added to the Marmon line. It is finished in a two-tone combination and the upholstery is hand-buffed leather. There are two tonneau lights with integral switches in the back of the front seat and an indirect light for the instrument boards. The steering wheel is walnut while the instrument panel and garnish mouldings on the doors are walnut finish.

Equipment includes fender mirrors, nickel-plated windshield wings, double rear view mirror, top boot and irons, cowl ventilator, combination tail, stop and backing light, cigar lighter and handy lamp. The folding top has natural finish wood bows with nickel-plated slat irons. The car is fairly close-coupled giving ample space between tire carrier and back of body for a trunk.

Improvements Made in Reo Speed Wagons

In the new series of Reo 1¼ ton Speed Wagons several improvements designed to enhance the general appearance, provide greater comfort for the driver, especially with regard to steering, and lowering of the body height to facilitate loading are now incorporated. The wheelbase has been increased from 128 to 130 inches. In conjunction with these changes prices have been increased $55 on both four and six cylinder models, the former now listing at $1090 and the six at $1240. On the larger 2½ ton Speed Wagon there have been no mechanical changes and the price remains unaltered at $1985.

The appearance of the lighter Speed Wagon has been enhanced by giving greater length to the hood, the adoption of a cowl, an improved radiator suggestive of passenger car design, redesigned cab and lower bodies, and new type front fenders. The outstanding detail of the new models is the improved steering gear which employs an intermediate gear in a pinion and sector type steering mechanism, the entire unit being enclosed in a grease and dust proof housing. The steering column is adjustable and can be moved three inches forward at the upper end.

The gasoline tank is now placed under the driver's seat and now has a capacity of 19 gallons. Fuel is fed to the carburetor by a Stewart vacuum tank bolted on the inside of the dash.

The cabs are provided with one piece windshields, sun visors and cowl ventilators. Windows in the doors are operated by crank type handles and the curtains covering the opening in the rear may be drawn up from inside of the cab.

FISHER BODIES

Fisher body-craft—and all that it means in sound, lasting construction; in beauty, advanced design and good taste—is available to buyers of cars in all price classes. And at every price, from high to low, the emblem Body by Fisher signifies unequaled body-value

Tell 'em "*Two-fifty!*"

When a car owner picks up the Neva-Lost Wing Cap on its metal counter stand—say this:

"Isn't that worth two-fifty?"

From then on he's yours. He's already admired the graceful form of the Neva-Lost. He's interested in the husky bayonet catch.

He'll buy—because he's already guessed the price to be twice as big.

So begin with *"Two-fifty!"*

ONE IN A CASE

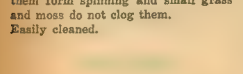
MINNOWS

FLAT SIDE CHUB

Represents an injured minnow which is laying on its side about all in, but still able to make a little fuss on the surface and should be pulled in a series of small slow jerks or very slowly to properly imitate a struggling minnow. Bass will instantly take a lure which they believe to be a minnow in trouble and therefore easy to catch.

Loose vibration spinners give to strike or weeds, etc., and are superior to rigid kind. When pulled through water they spin just right and have a buzzing vibration which is very attractive. Bending of shaft will not stop them form spinning and small grass and moss do not clog them. Easily cleaned.



No. C1505—Red side scale finish, length of body 3¾ in., w't ⅜ oz., per dozen *$12.00*

BABY

Looks like a nice little meal for the fish. Has two double hooks which can be reversed so hooks point up and when so used gives a bait that can be pulled over the surface weeds and pads without fouling.

No. C1605—Red side scale finish, length of body 3¾ in., w't ⅛ oz., per dozen *$11.40*

"WALTON" FEATHER-TAIL

This new feather tail lure is a sure getter a sporting killer bound to awaken the unstinted praise of any angler. Sinks rapidly and the combination of spinner and feather is very effective. Practically weedless, it is ideal for use in lily pads and weeds where the big ones lie.

Equipped with No. 3/0 'OShaungnessy hook, length of body 3 in. over all, length of feather tail, 2½ in., w't ⅛ oz.

No. C42—Red and white, per dozen *$12.00*

No. C49G—Black body, orange tail, per dozen *$12.00*

No. C49P—Shiner scale, gray tail, per dozen *$12.00*

No. C49M—Pike scale, green and yellow tail .....per dozen *$12.00*

NEW HEDDON "GAME FISHER"

Flexible, triple acting body-liveliness that out-natures nature. Floats while at rest, runs deep when retrieved, casts easily. This lure is sturdily built to withstand the most savage attacks of large game fish.

Equipped with two trebles, length of body, 4¾ in. w't ⅜ oz.

No. C5501—Rainbow, per dozen *$15.00*

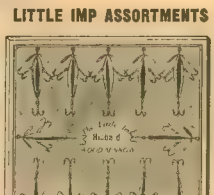
No. C5502—White body, red head and tail .....per dozen *$15.00*

No. C5509D—Green scale, per dozen *$15.00*

No. C5509M—Pike scale, per dozen *$15.00*

No. C5509P—Shiner scale, per dozen *$15.00*

LITTLE IMP ASSORTMENTS



No. C33X Hibbard—Assorted green back, yellow belly and green back, white belly, three treble hooks, wood body 2¼ in. long, w't about 1 oz. each minnow, 12 on a card, per card **$4.00**

PHANTOM

Made of extra strong waterproof rubber cloth, made especially for their manufacture. Blended with oil colors, guaranteed not to crack, peel or fade. Mounted on Gut Shafts and Gangs, with treble hooks, bronzed.

SOUTH BEND MINNOWS

HOP-ORENO

BASS SIZE

An imitation grasshopper lure that has made an enviable reputation for itself. A wonderful 'bass getter' that can be depended upon at all times to get the gamey ones. A perfectly made lure, true to pattern, mounted on 1/0 hooks, one dozen in assorted colors, brown, green and yellow.

No. C332—One dozen assorted, per assortment *$6.00*

ONE ON A CARD, 12 CARDS CONNECTED, ONE DOZEN IN A BOX

TROUT SIZE

Same pattern and construction as the Bass Size but mounted on No. 8 hook. Can be depended upon for Trout when all others fail. Also excellent for pan-fish. One dozen assorted colors; brown, green and yellow.

No. C330—One dozen assorted, per asortment *$6.00*

ONE ON A CARD, 12 CARDS CONNECTED, ONE DOZEN IN A BOX

STRIKE-ORENO ASSORTMENTS

Contains one each of the six standard patterns above enumerated. Beacuse of their new design and gay colors, makes a wonderfully attractive display.

No. C317—Half dozen assorted, per assortment *$5.10*

ONE ON A CARD, 6 CARDS CONNECTED, HALF DOZEN IN A BOX

STRIKE-ORENO

Of similar design to the Feath-Oreno Minnow, only in larger proportion and of the underwater type. Consists of gay feathers and hackle, tied on weedless single hook, with body of sufficient weight for ideal casting. Ben Winchell design throughout. Hook size is 5/0 special high grade construction.

A most attractive lure, on which already has numerous bass and other game fish catches to its credit, and one which is radically different from anything now on the market.

No. C1—Red Ibis ..per dozen *$10.20*

No. C2—Royal Coachman, per dozen *$10.20*

No. C3—Gray Hackle, per dozen *$10.20*

No. C5—The Cole ..per dozen *$10.20*

No. C8—Brown Hackle, per dozen *$10.20*

No. C11—The Oriole, per doz. *$10.20*

THE IMPROVED

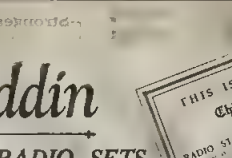
New Aladdin

RADIO SETS

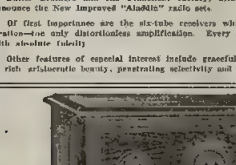
Buller Brothers and the Pfanstiehl factory, after months of experiment and preparation, announce the New Improved "Aladdin" radio sets.

Of first importance are the six-tube receivers which employ resistance coupled with amplification—not only distortionless amplification. Every note, high or low in pitch, is reproduced with absolute fidelity.

Other features of especial interest include graceful new cabinet designs, etched metal panels of rich aristocratic beauty, penetrating selectivity and connections for using the new power tubes.



Middle West Hears Europe on the "ALADDIN"



NEW "ALADDIN" 5 TUBE SET

3-Dial Tuning Control

SPECIFICATIONS—Enclosed in a walnut finish cabinet with 5-ply genuine walnut veneer top, 12x28½x9¾ in. Metal panel with

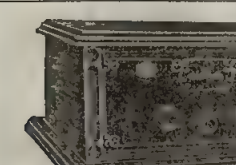
Special Tube Equipment

3H1398—5 perfectly matched and fully guaranteed Sonatron radio tubes to take the place of tubes as follows:
4 Sonatron tubes type 201-A
1 Sonatron tube type 240-A (Power detector).
SET (5 pcs) **$7.00**



NEW "ALADDIN" 6 TUBE SET

2-Dial Tuning Control

Tone quality supreme! Utilizes two stages of resistance coupled amplification—**the only** [illegible] amplification [illegible]

SPECIFICATIONS—[illegible] genuine walnut veneer [illegible] 11¾ in. Metal panel with silver plated etched [illegible] Resistance coupled circuit covered by the Pfanstiehl patents, and new type audio amplifier [illegible] selectivity, low-loss throughout. Foil-Hostilor detector socket. Stations are evenly spaced on the wave [illegible] scales visible through small windows in panel. High resistance volume control permits fine adjustment and the finest tone known to radio is produced by the resistance coupled amplification. Battery cable with [illegible] for extra battery to be used with power tube if greater volume is desired. Each in carton.

3H1401—Each in carton. Suggested retail price $100.00. Set **$60.00**

See suggested list of equipment below

NEW "ALADDIN" CONSOLE OUTFIT

5-Tube Set—3 Dial Tuning Control

A specially arranged combination that enables you to compete successfully with higher priced console sets offered by other manufacturers.

SPECIFICATIONS

Finished in hand polished walnut. Radio set is the same as 3H1400 shown at left. Table has drop leaf for long speaker which may be pushed out of sight when not in use. Compartment open in back, sufficiently large to accommodate all batteries and charger.

3H1137A—Each in crate. Suggested retail price $95.00.

Each **$54.75**

See suggested list of equipment at left

NEW "ALADDIN" CONSOLE SET

6 Tubes—Single Dial Tuning Control—Built-in Speaker

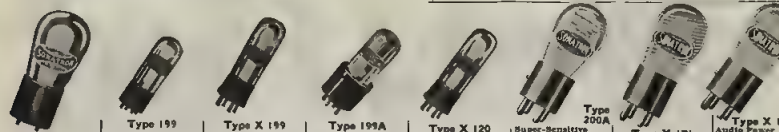
Turn one dial to the wave [illegible] the station you want to hear [illegible] and you hear it! The [illegible] matched to the [illegible] of the set a feature of utmost importance as it brings out the full, rich golden tone of resistance amplification.

SPECIFICATIONS

Lacquer finish console cabinet 14¾x22¾x36 in., built-in speaker and compartments for complete battery or battery eliminator equipment. Metal panel with silver plated etched [illegible] Inductively [illegible] Illuminated [illegible] Resistance coupled [illegible] Foil-Hostilor detector socket. High resistance [illegible] low loss throughout. Full-finger detector control by the Pfanstiehl patents, and new type [illegible] A [illegible] [illegible] [illegible]

"SONATRON" RADIO TUBES

Strongest Tube Guarantee Ever Made!
Any "Sonatron" tube that is unsatisfactory will be replaced FREE with a new tube, providing filament lights. Your customer is the sole judge!



Type X 201A
Detector or Amplifier

Plate voltage—(+B" battery) up to 135
Current consumption —.25 amp.
Base—Standard
3H2820—Each in carton.
Each $1.00
5 or more, Each $0.95
Suggested retail price $2.00.

Type 199
Detector or Amplifier
Filament voltage—3.
Plate voltage ("B" battery)—up to 90.
Current consumption —.06 amp.
Base — Regular 199 type
3H6994 Each in carton.
Each $1.12½
5 or more, Each $1.07
Suggested retail price $2.25.

Type X 199
Detector or Amplifier
Filament voltage—3.
Plate voltage ("B" battery)—up to 90.
Current consumption —.06 amp.
Base—Small X type.
3H6091—Each in carton.
Each $1.12½
5 or more Each $1.07
Suggested retail price $2.25.

Type 199A
Detector or Amplifier
Filament voltage—3.
Plate voltage ("B" battery)—up to 90.
Current consumption —.06 amp.
Base—Standard, same as on storage battery tubes
3H8709—Each in carton.
Each $1.12½
5 or more Each $1.07
Suggested retail price $2.25.

Type X 120
Audio Power Amplifier
Filament voltage—3.
Plate voltage ("B" battery)—135.
Base—Small "X" type
For last audio stage only. Provides greatly increased volume. Requires "G" battery of 22½ volts.
3H6092—Each in carton
Each $1.25
5 or more Each $1.19
Suggested retail price $2.50.

Type 200A
Super-Sensitive Detector
Filament voltage—5.
Plate voltage—22½ to 45.
Current consumption —.5 amp.
Base—Standard.
Replaces type 99 or 201A tube in detector socket giving greater volume and clearer reception. Operates on dry batteries or wiring required.
3H4086—Each in carton.
Each $2.50
5 or more
Each $2.37½
Size retail price $5.00

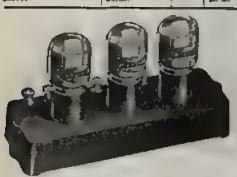
FREE Window Sign with 5 or more Adapters for 5c

Type X 171
Audio Power Amplifier
Filament voltage—5.
Plate voltage ("B" battery)—90 to 180.
Current consumption —.5 amp.
Base—Standard
For last audio stage only. Provides greatly increased volume. Requires "C" battery of —4½ to —9 volts.
3H6091 Each in carton
Each $3.00
5 or more
Each $2.85
Suggested retail price $6.00

Type X 112
Audio Power Amplifier
Filament voltage—5.
Plate voltage ("B" battery) 90 to 180.
Current consumption —.5 amp.
Base—Standard.
In last audio stage provides greatly increased volume. Requires "C" battery of —4½ to —9 volts. Also may be used as detector or radio amplifier.
3H6094 Each in carton
Each $3.25
5 or more
Each $3.09
Suggested retail price $6.50

Free Sample and Why—"Sonatron" Amplifier

Resistance Coupled Supreme in Tone Quality—Complete with 3 Tubes



OUR FREE SAMPLE PROPOSITION: Order one sample "Sonatron" Amplifier No 3H1937. Your order will be recorded on our ledger as 3H1 NET MARCH 1927. If by that date you have purchased 2 additional amplifiers at special for them according to our regular terms, we will send you a credit memo covering the price of the original sample.

Resistance coupled amplification is the only distortionless amplification—for highest notes as well as low notes are faultlessly reproduced. This 3-stage amplifier attaches to any radio, even a crystal receiver. Requires only one connection to set.

Extra Tubes for Resistance Amplifiers
Extra set of 3 red, white, and blue high-Mu tubes for resistance amplification. Each set in display box. Suggested retail price, $14.00.
3HL975—For 5-volt storage battery operation.
3H5976—For 6-volt dry cell operation.
SET (3 pcs) $6.25

Mounted on black bakelite base 9x3x1¼ in., which contains specially designed resistances and leaks. Each unit packed in box complete with 3 red, white, and blue special high-Mu tubes, and full directions.
3H5977—Suggested retail price, $20.00

Each **$12.00**

State whether you want tubes for dry battery or storage battery operation.

"DE FOREST" RADIO TUBES—Nationally Advertised and Guaranteed

"De Forest" is one of the most significant names in the radio industry. Dr. De Forest invented the audion tube, and the De Forest company, through constant research work, has developed a line of radio tubes of unquestioned superior quality and performance.

RCA "Radiotron" Tubes

Made for the RADIO CORPORATION OF AMERICA by the General Electric Co. and Westinghouse Lamp Co.

IMPORTANT
Tubes tested before shipment, and we will not accept "Radiotron" tubes returned without our consent. Should you receive a tube which lights but does not oscillate, and which you consider defective, write us. We will test the tube, and if defective we will replace it with a perfect tube; otherwise we will return it to you. All tubes must be tested as soon as you receive them and any claim must be made within 5 days. We will accept only tubes contained in original cartons. This is the established policy of the manufacturer.

Per doz. **15.00**

On this and the following pages we are showing the Cream of the Doll Market. These dolls are especially selected to meet the demand of the trade. Those who have used dolls in the past know that this class of merchandise has outlived all others for pulling power. To those who have not used dolls before, we only ask that they give them a trial because they are sure to realize that dolls are real money makers. Our line this year is most complete. There is a doll for all ages—the old, as well as the young.

WIZARD CUTTING TOOLS

The tools of Thousand uses—indispensable for removing stickers, paint letters, varnish and dirt from windows. Removes grease, gum, rust, clips paper—rips seams in garments—removes that painful corn—scrapes cement from dentist's slab—can be used for innumerable other uses. The friends of the housewife, farmer, painter, sign writer, machinist, mechanic, repairman, janitor, artist, tailor, dressmaker, clerk, book-keeper, automobilist, hotelman, dentist, chiropodist, druggist, doctor, nurse, furrier, milliner and many others. Strongly made. Simple to operate. Any used or discarded Gillette or Durham Duplex blade can be used, when one side is worn, blade can be reversed. When not in use knife edge is protected by guard with screw driver point, which can be used when changing blades. These tools can be carried in pocket or hand bag with perfect safety. The screws and lugs hold the blade absolutely firm, eliminating the slipping of blade when pressure is required

Should prove ready sellers on account of low and attractive price.

New Paige brougham on 115 inch wheelbase chassis at $1295

New Paige Body *on* Shorter Chassis

A SPECIAL Paige chassis of 115 in. wheelbase with a new two-door brougham body listing at $1295 has been introduced by the Paige-Detroit Motor Car Co. to provide their dealers with a car midway in size and price between the New-Day Jewett and the standard Paige introduced recently. This model represents the lowest priced Paige car ever offered.

While the chassis is ten inches shorter than the present Paige and modifications have been made in the frame, tires, springs and axles, the new model follows the practice of the 125 in. car and employs the same engine, clutch and transmission and also the same four-wheel hydraulic braking system.

The appearance of the brougham body, the radiator and the rest of the car follows the style adopted on the larger edition and the range of equipment is the same. Two tones of lacquer, Arizona gray above the belt line and Pueblo gray below with ivory stripes completes the color scheme of the newcomer. Doors of 36 in. width allow the rear passengers to enter without disturbing those in the front seats and the door latches are operated with the remote type of handles.

With the reduction in the size and weight of the car there have been necessarily some mechanical changes. Tires on this model are 31 by 5.25 and the brake drum diameters are 12 in. with the width of the lining 1¾ in. Lengths of the springs have been reduced two and three inches respectively, for the front and rear, the dimensions now being front 36 by 2 in. and 58 by 2 in. at the rear. The weights of both axles have been materially reduced and except for a slight change in the bearing layout in the rear axle the design remains the same. The gear ratio, however, has been changed from 4.81 to 4.54 to 1. Finally, the frame depth and stock has been cut from 7 in. deep to 6 in. deep and the stock thickness is 1/32 in. less.

Standard equipment includes shock absorbers on the front, thermostat control air cleaner and heat indicator for the engine, dash gasoline gage, automatic wind shield cleaner, mirror, stop light and a coincidental lock for the ignition and steering.

Wills Ste. Claire Reduces Prices on Sixes

Prices on its six cylinder line have been reduced by Wills Ste. Claire, Inc., effective immediately. The new price on the traveler and roadster models is $2,700; the five-passenger sedan $3,150, and on the limousine $3,350.

Peerless' New Sport Models

Peerless Motor Car Co. will get into production in the near future on two new sport models in its 72 line. The roadster will have a rumble seat and a compartment in the side for golf clubs. Deliveries have started on two new Peerless sport models on the 80/6-cylinder chassis, the phaeton priced at $1395 and the roadster at $1495.

Not Too Late to Win Greater Profits!

1926 already presents every assurance of greatly increased business and profits for Chrysler dealers.

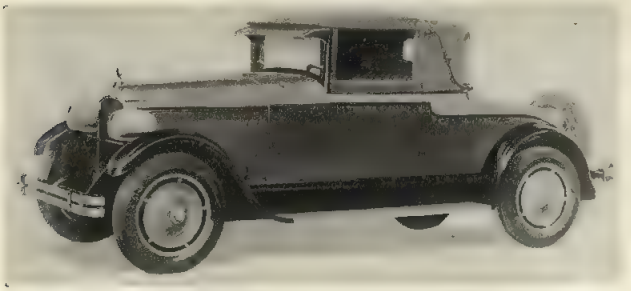
Retail deliveries of Chrysler models are 25% ahead of the same period a year ago and 12% ahead of the top-most record in the whole history of Chrysler's phenomenal success.

This unprecedented public preference is proof that Chrysler, this year, is to be a more important factor than ever in the motor car industry.

It is not too late to share in this marvelous Chrysler success. Your inquiry will be held in strictest confidence.

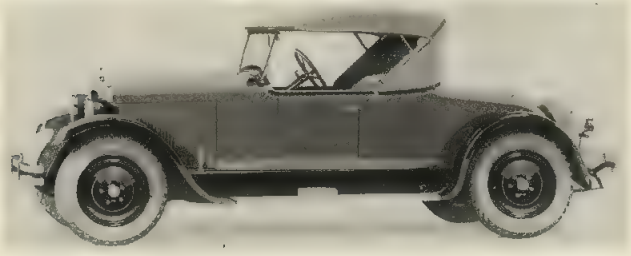
CHRYSLER SALES CORPORATION, DETROIT, MICHIGAN
CHRYSLER CORPORATION OF CANADA, LIMITED, WINDSOR, ONT.

CHRYSLER



New Paige cabriolet on 6-72 chassis at $2295

The tan colored top is collapsible and rumble seats are provided, so that this new car may be used either as a roadster or coupe. Doors are of the closed car type with the regulation window lifters. When the top is down the upper frame of the door folds flush across the window sill giving the appearance of a custom-built roadster. A sun visor is built integral with the frame supporting the one piece windshield and this arrangement insures a snug fit of the top and door frame when the car is used as a cabriolet. One person can convert the car from one type to the other in a few minutes and the rear deck can be opened from a latch inside the front compartment. The interior upholstery including the seats in the rear deck is in Spanish leather with a decorative design embossed in the surface while the interior hardwood trim has a unique inlaid design. Exterior colors are sea fog gray and ocean blue lacquer with the darker shade below the belt line. Nickeled bullet type headlights to match the radiator and changes in the contour of the belt line give the car a pleasing appearance. Bumpers in the front with bumperettes at the rear, cowl lights, automatic windshield cleaner, stop light and rear view mirror are included in the equipment



Dodge new sports roadster listing at $880

The collapsible top is tan colored with genuine upholstery to match. New bullet type headlights are included in addition to special equipment in the form of bumpers, front and rear, nickel plated radiator shell, and special body colors.

Olds Using Chromium Plating

Chromium plating featured by its permanency of luster and ability to withstand corrosive action of salt water is now being applied to several parts on the Oldsmobile of current model. Radiator shells have been finished by this process for some time and its use is now being widened to include such parts as bumper bars, starting crank hole covers, radiator caps and filler necks, lamp lock rings, etc. It is claimed that in addition to being five times as hard as nickel plate it has four times the resistance to salt spray. The finish requires no polishing but is returned to its original luster by mere washing. In tests where the chromium plated part was subjected to high pressure salt spray its ability to withstand the corrosive action indicates it ability to stand up in actual service for at least ten years.

While chromium plating development has been greatly advanced during the past two years its commercial application as used by Oldsmobile is attributed to Mr. W. M. Phillips of the General Motors advisory staff.

No. **1031**—Size 2; width cut 3⅝ inches; weight per dozen 25 lbs. **$10.80**

Half dozen in a box

COMBINATION HAMMER, HATCHET AND ADZE

Three-in-One Tool

Forged from highest grade tool steel; black finished with polished head and cutting edge; fitted with second growth hickory, black ebonized handle.

As evenly balanced as a claw hammer. Blade is equipped with nail pulling slit that will pull anything from a pin to the largest nail; its adze blade and cutting edge is more preferable than a hatchet for lathing, shingling, fence work and numerous other jobs.

Per Dozen

No. **777**—Width cut 2 inches; length of head 5¾ inches; length handle 13 inches; weight head 1¼ lbs. **$24 00**

Half dozen in a box; weight per dozen 21½ lbs

HANDLED HAMMERS

ATTRACTIVE ELECTRIC SIGNS

Improve Your Store Front

Increase Your Sales---Now---Don't Wait

THEY FLASH

On and Off Automatically Making Sign Especially Attractive at Night

AN EXACT REPRODUCTION OF A MODERN WATCH

This Sign exclusive of bracket is 40 inches high, 30 inches wide and weighs about 50 pounds. The "GIFTS THAT LAST" panel is flat, non-illuminative, lettered on both sides in gold leaf on black background.

No. 442. Plain Non-Illuminative Sign with convex metal dials..... **$46.50**

No. 443. Electric Flashing Sign with lamp in center of each metal dial..... **$54.00**

No. 444. Electric Flashing Sign with convex glass dial, illuminated from the inside by two flashing lamps **$66.00**

Other lettering tha "GIFTS THAT LAST" on both sides of panel can be furnished for $4.00 extra.

SPECIFICATIONS

Signs are furnished as shown in cut with your name, or any special lettering on both dials, complete with 36-inch chain pipe bracket electric flashing device, all wired ready for installation. Frame of watch 25 inches in diameter—of strong cast metal in one piece—hollow and rust-proof—finished with XXX goldleaf—dials are either (1) swelled metal zinc with black hands and numerals on white background or (2) double strength glass bent in the shape of a watch crystal, illuminated from the inside by flashing lamps.

Any of these signs can be furnished in a larger size—46 inches high, 30 inches wide—for $30.00 extra.

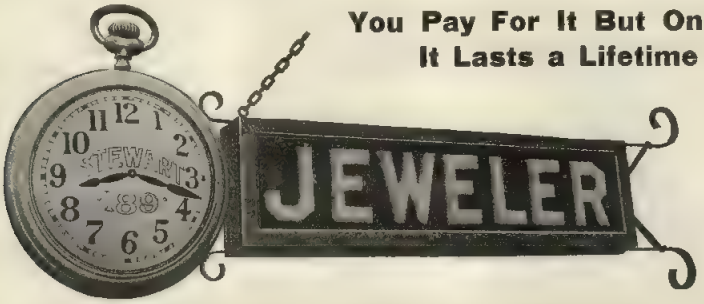
This Sign exclusive of bracket is 40 inches high, 36 inches wide and weighs about 70 pounds. The "GIFTS THAT LAST" panel is 36 inches long, hollow made of metal and has two glass faces which are illuminated from the inside by two lamps which burn steadily.

No. 554. Electric Flashing Sign with lamp in center of each metal dial, complete with illuminated panel..... **$72.00**

No. 555. Electric Flashing Sign and illuminated panel with convex glass dial illuminated from the inside by two flashing lamps. **$79.00**

WHO IS THE LEADING JEWELER IN YOUR TOWN

Why? Your business efficiency can be increased if you feature something distinctive that will hold the public eye and in that way attract attention to your store and windows. An ELABORATE, DISTINCTIVE, and OUT OF THE ORDINARY SIGN like this is a business getter. It safeguards you against loss of trade because it keeps your message before the public at all times. It will strengthen your hold upon old customers and will add many new ones. It is economical and a most effective out-door publicity.



You Pay For It But Once—It Lasts a Lifetime

No. 17-D. "JEWELER" In Raised Glass Letters $189.00

No. 17-A "Jeweler" In Gold Leaf on flat non-illuminated panel . . **$93.50**

No. 17-B "Jeweler" painted on back of glass face in colors . **$167.00**

No. 17-C "Jeweler" in flat glass letters **$181.00**

Box part showing the word "Jeweler" is 15x72 inches of galvanized iron, steel braced, double faced, and hollow. FACES are of metal with RAISED GLASS LETTERS on both sides, illuminated from the inside. The WATCH PART is 25 inches in diameter, 24 inches high, made in one piece of cast metal finished in 22 Carat Gold Leaf and guaranteed. The DIALS are of double strength convex glass, bent like a watch crystal the hands and numerals are on an etched background on the back side of glass, illuminated from the inside by lamps that flash on and off automatically. Complete SIGN is 8 feet over-all, supported 18 inches from building by three heavy galvanized chains, extending 9½ feet over sidewalk, and furnished all wired, complete, ready to install, with your name or any special lettering on both dials.

MADE TO ORDER SIGNS

This style of SIGN is without doubt the most elaborate Jewelers Sign to be had at any price and can be furnished in many different designs as shown below. We will promptly quote you on any design or combination of designs that may interest you, and there will be no delay in filling your order.

We show five designs, No. 12, 13, 14, 15, 16 and 17; each made in two sizes, and with four different kinds of Box-Parts, "A" flat, non-illuminated; "B" glass faces painted on back side in colors; "C" flat glass, illuminated, letters; "D" raised glass, illuminated letters.

No. 7C6. Each..... **6.85**

Sensationally low list price, yet an exceptionally good margin of profit for the dealer on every sale—quick turnover.

BEE-VAC
ELECTRIC CLEANER

Satisfactory and profitable to handle because it is trouble proof—STAYS SOLD and leads to other sales.

New and Improved Type "Model G"

Why BEE-VAC Leads in Quality

1—Equipped with a BIRCO 1/6 H. P. universal motor—horizontal and air cooled. Made especially for vacuum cleaner use.
2—Super-Suction, developed by perfectly balanced motor and fan, acts through narrow nozzle, extracting ALL ground-in germ laden dust and nap cutting grit.
3—Hinged self-cleaning double brush removes all clinging surface litter. When stubborn lint is removed brush is easily released and swings to rear of nozzle out of the way, but ready for instant use.
4—Dust bag, attached to exhaust by simple bayonet bag ring, easily emptied through large patented opening device at top of the bag.
5—Improved type ball and socket handle knob, relieves wrist strain and conforms automatically to changing position of operator's hand.
6—Rubber tired composition wheels placed outside and back of nozzle prevents breakage and permits thorough cleaning along entire length of fourteen inch nozzle and in corners.
7—Hose terminal easily connected to center of fan casing making attachments unusually effective.
8—Handle locking device, simple and positive, prevents stooping.
9—Entire casing made of highly polished cast aluminum—more durable than steel and rust proof.
10—The BEE-VAC, made with every thought for maximum service and efficiency, is built by specialists with thirteen years experience in manufacturing electric vacuum cleaners and vacuum cleaner motors.

An illustrated booklet goes with each cleaner, showing how to care for it and how to use it for all different kinds of work.

ALUMINUM SALESBOARDS

Every slip is printed on engraved safety paper. These protected winners are well scattered and no two boards are filled alike.

These boards can be refilled. If six or more of these salesboards are returned to us at once, charges prepaid, we will refill them and charge you the prices listed below. We cannot under any circumstances, refill less than six boards at one time, and the time required to refill boards is ten days to two weeks. We cannot accept any boards returned to us to be refilled for **Credit** or **Exchange** for other sizes.

No. A1180.

These boards are made in the following sizes only:

Number of holes	Sizes of boards	Size of heading space	Price of new boards	Price for refilling
1000	3¼ x 5⅛	3 x5⅛	1.20	.79
1600	5⅛ x 5⅛	3 x5⅛	1.79	1.23

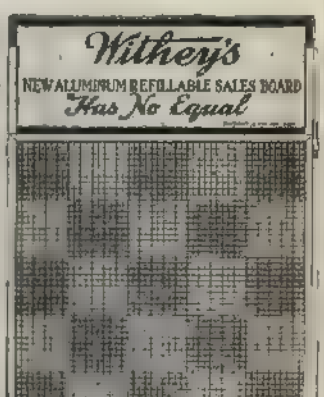
3000	5⅝ x 6¾	3½x6¾	3.35	2.25
3600	6¾ x 6¾	3½x7½	3.89	2.65
4080	6¾ x 7⅝	3½x7½	4.25	2.98
5040	7½x10½	3½x7½	5.15	3.68
7056	10½x10½	2 x10½	7.20	5.35



Withey's Cigar Box Sales Board needs no explanation. When cover is closed it has the appearance of ordinary Cigar Box. The Board fits inside of the Box, which has no bottom, and when slips are punched they fall on show case inside of box. This prevents loss of slips when punched.

The inside cover of Box furnishes a large and convenient space for labels and description of Premiums if desired.

Cigar Box Checker Boards are Made in the Following Sizes Only:

No. A1181.

Number of holes	Size of Board	Price per Cigar Box Complete	Price for Refilling Boxes net Incl.
1600	5⅛ x 5⅛	2.03	1.23
2000	5¼ x 6¼	2.60	1.48
3000	5⅝ x 6¾	3.74	2.25
3600	6¾ x 6¾	4.28	2.65
4080	6¾ x 7⅝	4.64	2.98
6040	7½x10½	5.54	3.68

The Assurance of a Better Score

Judge this improved Pinehurst from every standpoint and it will measure up to the standard of the World's most expert golfers. It will give consistently more yards per drive ever known. It is dead on the green and no truer ball for putting has ever been made. A new Pinehurst in a new handy package, a longer ball, a truer ball—of distinguished appearance and marking—a Wilson. Play it and know the joys of greater distance and positive accuracy. The Pinehurst and Wilson V Balls are marked in four different colors for ease in identification.

ONE DOZEN IN A BOX

. . . . quarter of a million mothers are reached by the 1926 ADVERTISING CAMPAIGN to produce sales for Row-Cycle Dealers !

Here is your chance to capitalize on an advertising campaign that has reached a quarter of a million mothers and at least a half million boys and girls! Children's magazines have created children's interest in the ROW-CYCLE and have shown parents the health-building advantages of this unique vehicle that is more than a plaything.

Here are some of the outstanding facts about Row-Cycle that no dealer can afford to overlook:—

Operates with the motion of rowing a boat
Ruggedly built with no parts to come loose
Swift, noiseless, perfect control
Disc wheels with 1-inch balloon tires
Roller bearing—cast steel frame
Universal joint metal steering gear
Nickel radiator cap—select wood throughout
Two sizes retailing for $15.00 and $16.50 F.O.B. Minneapolis.

Put one of these handsome little vehicles on your floor and watch the youngsters gather round!

Link up now with this effective advertising campaign.

Send for a supply of Row-Cycle folders in two colors for your counters, and to slip in with your monthly statements or letters.

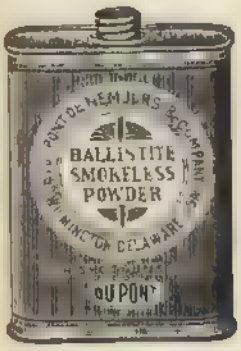
SMOKELESS POWDER

DU-PONT

For Shot Guns

	Each
½ lb. Canister	$1.15
1 lb. Keg	21 00



BALLISTITE

A perfect dense smokeless powder for shot guns, giving high velocity and better and more even patterns; it is not effected by extreme heat, cold, dryness or dampness.

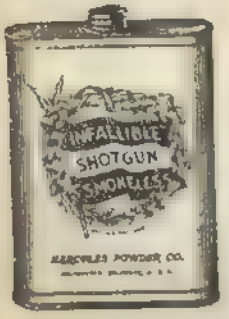
	Each
½ lb. Canister	$1.70

HERCULES E. C.

A bulk smokeless shotgun Powder

Three drams of E. C. make an ideal trap load.

	Each
½ lb. Canister	$1 15
3 lb. Keg	6 25
6 lb Keg	12 25
12 lb. Keg	25 00
25 lb. Drum	50 00



HERCULES INFALLIBLE

A dense smokeless shotgun powder. Twenty-four grains or 1⅗ drams of it give ballistic results equal to 3 drams of black or bulk smokeless. For this reason it should always be loaded in shells adapted to dense smokeless powder, as other shells have too much powder space.

This powder is absolutely water and moisture-proof.

Proper loads to use are specified on each canister.

	Each
½ lb. Canister	$ 1.70
3 lb. Keg	9.50
15 lb. Keg	45 00

STUMPING POWDER

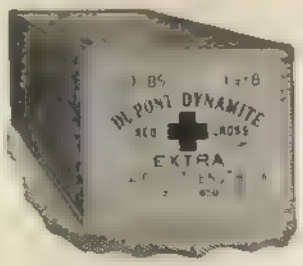
Hercules

Hercules stumping powder is a [illegible]% low freezing dynamite which we especially recommend for farm work.

Hercules—1¼x8 inch cartridges
50 lbs. in a case

DYNAMITE

DU-PONT RED CROSS



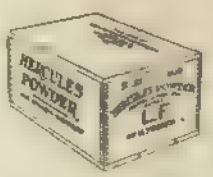
Low Freezing

For stump and boulder blasting, tree planting, digging ditches, grading roads, excavating, etc.; will not freeze until water freezes; will thaw when ice melts; less sensitive, therefore safer to handle than Nitroglycerin Dynamite, thus requiring a stronger cap to properly explode.

	Per Pound
60 per cent strength; for extra hard rock, breaking castings, etc.	$..
50 per cent strength; for extra hard rock, breaking castings, etc	
40 per cent strength; for hard rock, ores, stumps and boulders; for soft rock boulders	

In 25 and 50 lb. cases

HERCULES EXTRA AMMONIA



Hercules Extra Ammonia Dynamite is made in strengths from 15% to 60%. It is less expensive than the Gelatin or Straight Nitroglycerin Dynamite and is recommended for mining, quarrying, digging wells, road and railroad construction, clay blasting, mudcapping and land-clearing. It is not as waterproof as Gelatin or Straight Nitroglycerin Dynamites, but this defect is largely overcome by double dipping in paraffin.

60 per cent strength	$....
50 per cent strength	
40 per cent strength	
35 per cent strength	

50 lbs. in a case

HERCULES SPECIAL No. 1

Because of its high cartridge count and low cost per cartridge Hercules Special No. 1 is more economical on work for which it is suited than ordinary dynamite. There are about ⅓ more cartridges of Special No. 1 in a box than there are of ordinary dynamite in the same size cartridges. Hercules Special No. 1 frequently replaces 4 % dynamite, cartridge for cartridge, at a saving of approximately 25 per cent. Special No. 1 is a "bulky" explosive, hence not as good as gelatin where a concentrated charge is desired, as in tunnel driving in hard tight rock; however for quarrying, open pit mining, road building and some underground work it is both effective and economical.

	Per Pound
No. 1—Hercules Special	$....

50 lbs. in a case

HERCULES SPECIAL No. 2

Hercules Special No. 2 is similar to Special No. 1, but is not quite as strong. Special No. 2 is usually more economical for blasting gypsum, clay, shale, and some of the easier-breaking rock formations. It is also well suited for nearly all agricultural blasting. It has the same high cartridge count as Special No. 1 but costs less per pound and per cartridge. On work for which it is suited, no high explosive on the market is more economical than Hercules Special No. 2.

	Per Pound
No. 2—Hercules Special	$....

No. FF—Fine, quite fast and standard of speed	
No. FFF—Very fine and fast	

SPECIAL NOTICE

Owing to a strict ruling of the Interstate Commerce Commission ALL SMOKELESS AND BLACK POWDER AND DYNAMITE CANNOT be packed or shipped with any hardware or other goods, nor can it be sent by express. Orders for these two items CAN ONLY BE SHIPPED BY FREIGHT DIRECT FROM THE MAGAZINES.

Furthermore, because of the high freight rate on powder we urgently request our customers are requested to order as large a quantity as they can possibly use and be benefited by the Per Pound rate.

...$.

FRUIT PRESSES

The Brownee

Cylinder constructed of specially selected oak slats held together by heavy metal bands at top and bottom, base is made of acid-resisting aluminum and other metal parts are heavily tinned; the fruit juices come in contact with wood and aluminum only.

Each

No. B8—Capacity 5 quarts; diameter cylinder 8½ ins.; height 9 ins.; base 10 ins.; weight each 11½ lbs..... **$8 00**
One in a carton

Juicy Fruit

A wonderful press for fruits, grapes, lard, jellies, etc.

Outside solid and inside perforated cylinders made of 24 gauge tin plate reinforced at top and bottom with heavy rims; inside cylinder is riveted, lock-seamed and soldered, making it doubly strong; steel base tinned with pure block tin; steel screw with coarse pitch giving quick action to handle.

Each

No. 63—Capacity 3 quarts; size inside bowl 6¼x6 inches; outside bowl 6¼x7 inches; height over all 15 inches; weight each 14 lbs..... **$6 50**

No 06—Capacity 6 quarts; size inside bowl 8x7½ inches; outside bowl 8x8½ inches; height over all 18 inches; weight each 18 lbs..... **8 00**
One in a carton

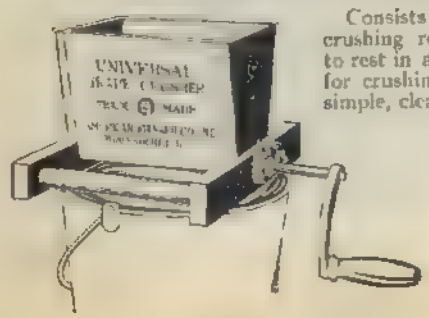
With Legs

Equipped with three steel legs 12 inches high and three steel feet for table use

Each

No. 012—Capacity 12 quarts; size inside bowl 8x10½ inches, outside bowl 8x12 inches, height over all 28 inches, weight each 36 lbs..... **$11 50**
One in a carton

FRUIT CRUSHERS



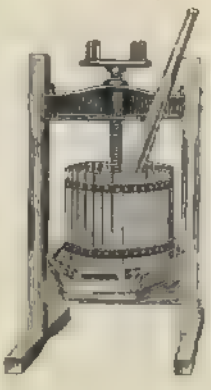
Consists of two grooved hard maple crushing rolls, geared together; made to rest in a pail with suitable hopper for crushing grapes and other fruits; simple, clean and easy to operate.

Per Dozen

No. 1—Universal; lgth. 14 ins.; width 9 ins. height 9 ins., size hopper at top 7⅜x8¼ ins.; bottom 7⅜x3 ins.; weight per dozen 64 lbs.... **$60 00**
Half dozen in a case

FRUIT PRESSES

Red Cross



Red Cross fruit presses have heavy iron cross-heads. The press screws are heavy cold rolled steel with accurately cut threads. The follower and hand wheel are iron. Frames are heavy and strongly bolted together. Troughs are wide and deep; tubs are capacious

Nos.	1	2	3
Height legs, inches	36	40	46
Size tub, inches	10x12	12x14	14x17

Weight each, lbs.	72	100	168
Each	**$21 20**	**27 70**	**40 00**

One in a crate

CIDER MILLS

Red Cross

Frames are made of tough hardwood. Troughs are made of poplar which gives off no odor or taint to affect the taste of fruit juices. Grinders are of improved type.

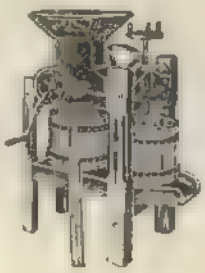
The cutting roll tears and slices the fruit, feeding it into the grinding rolls which thoroughly crush every particle.

Shafts and press screws are of cold rolled steel. The press screw with machine cut threads operates through a heavy iron cross-head. Great pressure can be exerted, threads will not strip. Wood parts are neatly striped and varnished. All metal parts are painted gray, trimmed in gold.

Self Feed

Each

No. SF—Capacity 5 to 7 bushels of apples per hour, height legs 40 inches; tub 12x14 inches; press screw 1⅜x24½ inches; weight each 130 lbs..... **$33 00**
One in a crate



Junior and Medium

Write for this manual containing specifications and list prices of timing chains for all motors—oldest and newest —and for address of nearest Duckworth distributor.

Duckworth Chain & Mfg. Co., Springfield, Mass.

Measure Them All

No other garage jack can come up to the RELIABLE HYDRAULIC No. 50 for strength, simplicity ease of operation, safety and ability to function in cramped quarters.

These are the reasons every garage wants one.

No. 50 slides under any low hung differential like a snake. 5¾ inches of clearance will do. Visualize what this means with the rule

ONE INCH of handle swing and you can lift any car with any type of tires, TEN INCHES into the air as easily as you open a door.

No. 50 harnesses hydraulic force and makes it do the back-breaking work. Just pull the handle back and forth—one inch will do—or pull it all the way down if you have the room and the heaviest car is hoisted, pronto and with ease

Rough floors do not bother it for there's ample clearance. Roller bearings on all wheels. At the side of the handle is a handy release valve. The load may be lowered at once or by degrees. No backing handle to shoot you through the back wall. No levers, ratchets dogs chains, toggles or tricks.

THE CAR IS ALWAYS UNDER PERFECT CONTROL AND THE OPERATOR SAFE

Our jack line is the most complete in the country. A jack for every purse and purpose. Our sturdy balloon tire jacks are great sellers. No. 7, double lift, retails at $7 00 No. 15, long handle control, retails at $5 00.

RELIABLE BALLOON TIRE JACKS

RELIABLE ROLLING STORE LADDERS

Made of carefully selected kiln dried oak, handsomely finished and equipped with perfectly constructed fixtures fulfill every requirement. Roll easily, cannot jump the track, do not bind and are perfectly noiseless. Each ladder step grooved into the stiles and fastened with 4 screws. At every fourth step a stay rod is bolted through both stiles for additional strength. Well finished.

Made of non-breakable malleable iron and steel in black enamel finish. Steel case hard fibre track wheels with perfectly grooved tread, runs smoothly and easily with no side friction.

Enameled round steel track will not warp, twist or sag. Extra strong, high carbon, round or tubular in shape, with slot in the rear allowing the insertion of malleable iron track brackets which may be spaced to suit any requirements.

INSTRUCTIONS IN ORDERING

In Ordering Straight or Bent Side Ladders, give heights from base shelf to center of track, height from floor to base shelf, projection of base shelf, and mention the number of uprights dividing the shelving into compartments. Wooden dowels to make perfect joints between lengths of tracks are furnished. **If there is no projecting base shelf,** the only measurement in height required is the distance from floor to center of track. If there is any variation give measurements at both ends and center of shelving.

In ordering **base shelf ladders,** give same measurements as desired when ordering straight or bent side ladders, and follow the same suggestions in regard to location of track, but arrange to space track brackets not farther than 3 feet apart. With this track the brackets are regularly furnished for 2 foot spacing.

In ordering **Overhead Ladders** always give height from floor to ceiling.

No. 80—STRAIGHT SIDE LADDER

The most popular style and the one we recommend particularly wherever shelving permits. Occupies less floor space and throws practically all weight on the floor instead of shelving or ceiling. Needs no track on the floor.

If desired at an extra charge can be equipped with special upper fixtures suitable for turning corners on curved track, but we recommend for the most satisfactory service that ladders operate on straight runs.

Top fixture self-adjusting, with a perfect bearing on the track; allowing ladder to roll easily whether perpendicular or at an angle, to pass over uneven places in the floor and to be placed close to the shelving when not in use.

Two large floor wheels are rubber tired making ladder perfectly noiseless and easy running.

No. 80—Oak Straight Side Ladder, Complete with Fixtures ..... Each, **$30.00**

No. 1L—Round Steel Track for Straight or Bent Side Ladders, Complete with Brackets...Per 100 Ft., **19 00**

No. 82—Upper Fixtures for Straight or Bent Side Ladders ..... Per Set, **7.50**

No. 83—Lower Fixtures for Straight or Bent Side Ladders ..... Per Set, **4.50**

No. 84—Rubber Tires for Floor Wheels....Per Pair, **.75**

In ordering Tires, mention Casting Number of Wheels.

SEE NEXT PAGE FOR THE
RELIABLE OVERHEAD LADDER

No. 85—BENT SIDE LADDER

Similar to No. 80 but with a bend. Intended for use where projection of the base shelf is too great to take our straight side ladder satisfactorily, but where height from base shelf or counter ledge to track is 6 ft. or more, and projection of base shelf is not over 16 in., the straight side ladder is generally preferable, for it is easier to ascend and descend, and occupies very little more space.

We suggest that track be attached to shelving about 3 ft. below highest point at which goods are stored, that the track be run level with one line of shelves, and that track brackets be spaced not more that 4 ft. apart. With this track the brackets are regularly furnished for 3 ft. spacing.

If entire track for side ladders is to run along one line of shelves, shelf brackets as well as upright brackets can be used, making it unnecessary to give distances between uprights, but we recommend for stability of the track that as many upright brackets as possible be used.

For the best appearances, as well as the most satisfactory operation of the ladders, there should be about 12 in. of clear space above the track, which headroom, however, may be reduced if necessary to about 7 in., this should be mentioned in ordering.

No. 85—Oak Bent Side Ladder, Complete with Fixtures ..... Each, **$33 00**

No. 1L—Round Steel Track for Straight or Bent Side Ladders, Complete with Brackets...Per 100 Ft., **19.00**

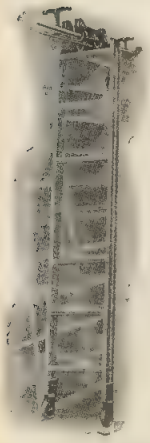
No. 82—Upper Fixtures for Straight or Bent Side Ladders ..... Per Set, **7.50**

No. 83—Lower Fixtures for Straight or Bent Side Ladders ..... Per Set, **4.50**

No. 84—Rubber Tires for Floor Wheels....Per Pair, **.75**

RELIABLE ROLLING STORE LADDERS

OVERHEAD LADDERS



For use with unusually high shelving where side ladders will not meet the requirements.

The self-adjusting upper fixtures are made carefully of malleable iron and provided with four steel cased wheels with hard fibre thread, an equipment which operates easily, noiselessly and cannot jump the track. Floor wheels have durable fibre tread.

Double track is applied with ceiling brackets which may be spaced as desired. Brackets regularly furnished for 2 ft. spacing

One razor in a box, half dozen in a carton, weight per dozen 2 lbs

REMMEL MIXRITE.

The New Chainless Beltless Drive, With Locking, Tilting Mechanism.

The Remmel Mixrite is built entirely of metal. This prevents spreading or shrinking out of alignment and assures long life, low upkeep and replacement costs. Cannot rot or burn.

The new Remmel chainless beltless drive engages the rack at the bottom of the mixing drum through a reducing train of gears connected directly to the engine crank shaft. It eliminates slack or slipping belts, belt and cham idlers, chains, belt and chain replacement and the bother and time loss inherent with the old style drive. It reduces friction and lost motion, as the gears run freely and not under high tension as is the case with belts. It is not effected by moisture and does away with the danger of getting caught in belts, chains or sprockets. Gears are made from highest grade gray iron, carefully machined and fitted to assure smooth operation. Gear train is enclosed in a metal guard to protect it against damage from cement gravel or sand and to elminate all danger to the operator and workmen.

Tilting of the drum is accomplished by means of a fly-wheel with hand grip which operates the tilting gear through a small pinion cast into the wheel. The gear ratio is 1 to 5, in other words 5 complete revolutions of the fly-wheel would bring about one complete revolution of the drum hanger shaft. Two complete revolutions of the fly-wheel will tilt the drum from a vertical position to the tilting position. The drum can be locked in any position either right or left by means of a sliding stud, which when pulled out engages a notch in the periphery of the fly-wheel This stud has guide pins to prevent it from releasing the wheel through shaking. The notches in the wheel are so spaced that the drum can be locked in almost any position with 1-inch variations in pitch, thus releasing the operation during the interval between loading and discharging. The fact that the drum tilts in both directions and can be locked on other side makes it possible to load from one side and discharge from the other. This makes it possible to set the mixer close to the material pile without interfering with the handling of either raw material or finished batches.

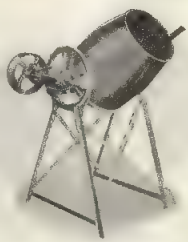
MOUNTED ON FRAME.

Without side gear drive; hand tilting mechanism; belt drive.

Each

No. 7C—Mixrite; capacity wet, 2 cubic feet; length, 3½ feet; width, 3½ feet; height of drum, 22 inches; width of drum, 22 inches; opening of drum, 15 inches; shoveling height, 3 feet 4 inches; weight, 225 lbs. **$74.00**

MOUNTED ON FRAME.



With side gear drive; hand tilting mechanism; belt drive.

Each

No. 6C—Mixrite; capacity wet, 2 cubic feet; length, 3½ feet; width, 3½ feet; height of drum, 22 inches; width of drum, 22 inches; opening of drum, 15 inches; shoveling height, 3 feet 4 inches; weight each, 240 lbs. **$90.00**

MOUNTED ON PNEUMATIC TIRED TRAILER TRUCK.

Mounted on pneumatic tired trailer truck with engine and housing; gear drive; locking, tilting mechanism. Similar to, but smaller than No. 20C. A quick worker and a speedy traveler. Large enough for the average job, yet light enough to easily and quickly move.

Each

No. 16C—Mixrite; capacity wet, 3 cubic feet; length, 6 feet; width, 56 inches; height of drum, 26 inches; width of drum, 26 inches; opening of drum, 17 inches; shoveling height, 3 feet 4 inches; engine, 1½ H P.; size tire, 30×3 inches; size frame, 3x3x¼ inch; weight each, 1100 lbs **$480.00**

MOUNTED ON TRUCK.

Mounted on truck with engine and housing; gear drive; locking, tilting mechanism. A half bag mixer especially designed for mason sidewalk, carpenter and for townships. The various improvements make this machine especially desirable from a standpoint of safety, convenience and uninterrupted service.

Each

No. 20C—Mixrite; capacity wet, 4½ cubic feet; length, 7 feet; width, 53 inches; height of drum, 34 inches; width of drum, 34 inches; opening of drum, 19 inches; shoveling height, 3 feet 8 inches; engine, 1½ H. P.; size truck wheels inches, front 16x4. rear 22x4; size frame, 3½x 3½x¼ inches; weight each, 1500 lbs. **$580.00**

STEEL GAME TRAPS

VICTOR

Well made, light in construction. Crucible steel springs have just the right strength and elasticity, are of superior quality and temper.

Jaws are made of rolled steel to give them great strength and lightness

All are provided with steel wire chain, ring and staple

Each pan is pierced with a "V" to identify the genuine "Victor".

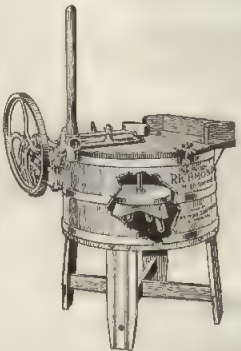
Open Stock

WASHING MACHINES

RICHMOND HIGH SPEED



The mechanical principle of this machine is positive in its action—the segment lever directly drives the dolly pinion and all gears are incased in accident-proof covers, reducing danger to a minimum.

All gears are cut. The mechanism does not get out of gear when cover is raised.

The well balanced flywheel runs on 10 roller bearings and is geared direct with the cut tooth gears so as to produce a mechanism with no dead center.

The lever socket is designed with two different positions to permit the operator to change the angle of the lever and so assist in lightening the laundry work.

Hardwood legs are securely braced and well bolted to the machine.

Combined Pump Handle and Upright Lever Washer, Roller Bearing Fly Wheel

Each

No. 20—Family Size, Virginia White Cedar Tub, Corrugated Sides and Bottom, Four-Peg Dolly, Reinforced Lid, Bolted Legs, Finished in Mahogany Stain and Varnished, Weight Each Crated 115 Lbs. $23.50

TRADE WINNERS.

COPY SALES AND WINDOW TRIM.

Our Advertising Department can assist with your advertising problems. We will help you prepare copy for newspaper advertisements, booklets or circulars.

On the following pages we list some of the movie slides, prepared advertisements and electrotypes which we furnish FREE. We also have numerous store signs and hangers, posters, factory catalogs, etc.

We can furnish facsimile type written letters at a nominal figure, and for a charge to cover cost will make duplicates of any cut in this catalog.

If you wish to put on a special sale, contest or advertising campaign, we will be glad to help you plan it.

Window display suggestions will be furnished upon request, accompanied by diagram showing height, width and depth of window or windows; lighting facilities (gas or electricity) and background; the direction in which the window faces, and advice as to the kind of merchandise to be displayed.

MOVIE SLIDES.

HOW TO ORDER MOVIE SLIDES.

Pick out the slides which you prefer and order by number as shown under each reproduction. Typewrite or print lettering you wish to appear on slide in space for dealer's name. The slides will be sent to you postpaid all ready to run.

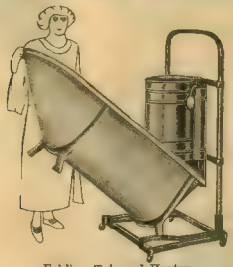
ROBERT'S METALLIC PORTABLE AND FOLDING TUBS WITH HEATER

FOR HOMES WITHOUT RUNNING WATER

PORTABLE AND FOLDING TUBS AND OUTFITS



Folding Tub and Heater.
Partly Open.
With ordinary care, it is practically indestructible.

Bath Tub Body—Made of 24 gauge galvanized steel and the ends are 26 gauge. The joints are double seamed, which absolutely guarantee against any leakage.

Rim—Is 2¼ in. in width and is of extra thickness galvanized steel, being of 18 gauge and soldered to the body of the tub at every point which not only makes the entire rim and tub perfectly rigid but adds strength and durability to the entire outfit. Another important advantage in having the rim completely soldered to the body, is the prevention of any water splashing up under the rim and running down the outside of the tub on the floor. The entire rim has the added appearance of being in one piece and gives the bath tub qualities of graceful and proportionate lines.

Legs—Are made of cast iron. They cover the seams at every point, which not only strengthen and support the tub, but they materially add to the general appearance of the tub, by not exposing the seams to view.

Waste and Overflow—Is made in one piece and nickel plated, threaded for 1-inch iron pipe. Bath cock or supply pipes not included.

Enamel—Used is pure white inside and out and is the highest grade obtainable for purposes of this kind. It is exceptionally hard and durable besides having a very high gloss.

Portable Tub—Without overflow or holes for hot and cold water pipes has the same quality of construction and finish. It is equipped with tail-piece on the bottom for draining tub through rubber hose.

Weight of Tub—Average shipping, 90 lbs.

Heater—Wickless Kerosene Oil burner.

Tank—Galvanized iron, nickloid and plated, capacity 12 gallons, holds enough water for two persons without refilling.

Frame—Has ball bearing casters.

Outfit—When folded takes but 22×30 in. floor space.

Weight of Tank and Heater—35 lbs.

PORTABLE BATH TUBS ONLY

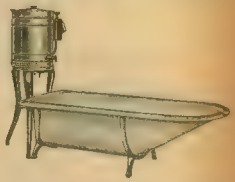
Nos.	F369	F370	F371	F372
Length, ft.	4½	5	5½	6
Each	$24.40★	25.00★	25.60★	27.00★

Complete with waste and overflow, brass tail pipe, coupling nuts, rubber plug, and top and bottom aluminum strainers.

FOLDING BATH TUB WITH HEATER

No. F350—Length of tub 6 ft., w't complete with heater 165 lbs., each $78.80

PORTABLE TUB WITH STOVE



Bathtub, stove and hot water tank are separate and can be moved about independently. All these are light and easily handled. When not in use the tub can be lifted up and stood on end, in some convenient corner or closet where it will be out of the way, and the stove and heater moved into the kitchen and placed alongside of the sink.

An ideal bathroom outfit for farm homes, summer cottages and small town residences not equipped with running water. No plumbing necessary.

No. F357—Tub enameled 5½ ft. × 28 in., 24 ga. galv. steel, ends 26 ga., 2¼ in. varnished oak rim, double seamed joints, which is an absolute guarantee against leakage, cast iron legs, which cover the seams at every point, 6 ft. hose to let water run outdoors, Nickeled Hot water tank, cap. 12 gallons, wickless Kerosene Oil stove cast iron, nickel plated, shipping w't complete 185 lbs., each★ $60.00

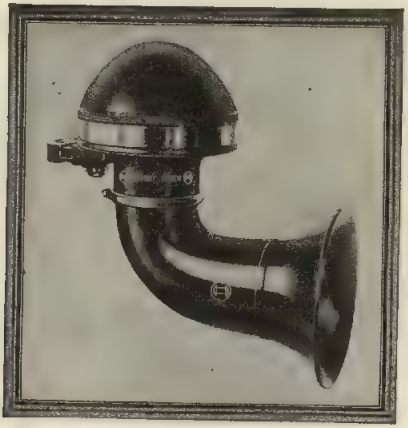
HARDWARE for HARD WEAR

★ Items Marked Thus ★ Are Shipped From Factory Only.



Original Bosch Automotive Equipment is identified by the trade mark shown above and the full name, "Robert Bosch." Be sure to specify "Robert Bosch" when ordering. Only then can you be sure of getting *original* and genuine Bosch quality as known the world over since 1887.

There is more than just "money profit" for you

in selling the Original Bosch Horn

The progressive automotive merchant is constantly on the watch for quality products that will net him good profits and, at the same time, help him build up a quality reputation in his town.

That is why dealers everywhere have been quick to receive the Robert Bosch Horn and to offer it to their trade.

The Robert Bosch Horn (an *original* Bosch product), is already on thousands of fine motor cars. The musical, penetrating tone of this new high-frequency warning signal compels attention whether in crowded thoroughfares or on country roads.

It is suited, alike, to fine motor cars, motor busses, commercial cars, taxicabs and motor boats. Write for price schedules and agency details for selling Robert Bosch Automotive Equipment.

NEW PRICES

The Robert Bosch Horn is made in three sizes—one quality.

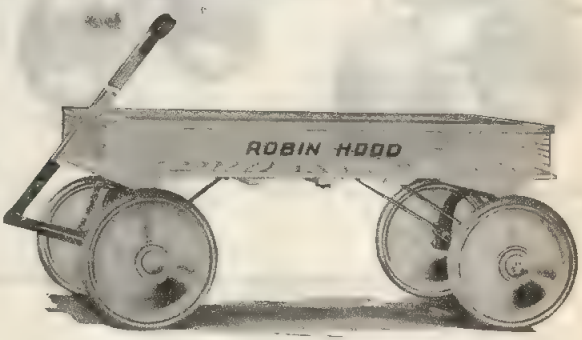
Robin Hood Coaster Wagon.

Automobile Disc Wheels. Rubber Tires.

High Speed Roller Bearings.

Natural Ash Finish. Green Trim and Wheels.

NO COMPETITION CAN TOUCH IT.



The cuts can't begin to show you what a splendid wagon this really is for the money. We can't very well send samples, so you'll have to take our word. It's a knockout.

Steel bolstered coaster wagon with retained roller bearing rubber tired disc wheels.

Box and Platform—Built from clear hardwood box ends mortised into sides, platform held together with heavy hardwood cleats, thoroughly nailed with cement coated nails. Box is removable from platform.

Bolsters—Heavy channel steel bolsters front and back. Front one has fifth wheel riveted upon the lower section as well as the upper section. Heavy front brace to front bolster and heavy hound brace. Back bolster of heavy steel properly braced. ½-inch cold rolled axles used.

Wheels—Double disc wheels equipped with roller bearings that won't fall out when wheel is removed. Corrugated rubber tires.

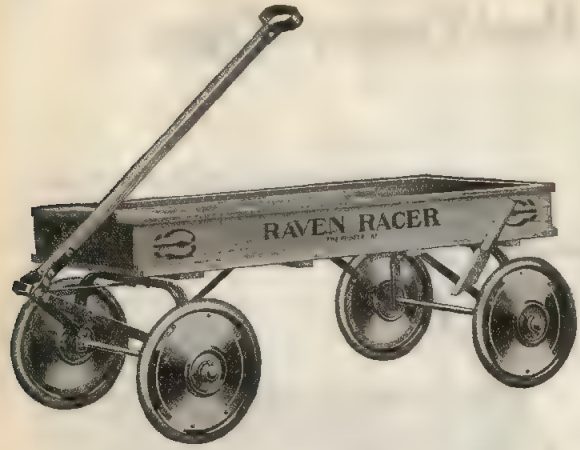
Finish—All steel parts black enameled. Bed and body are finished with weather-resisting varnish, natural color. Platform and box are trimmed in green and the wheels are green enamel, making a very attractive, neat looking wagon.

	Each
No. S8-RH—Robin Hood Coaster Wagon; size of box, 16x36 inches; size wheels, 10 inches, size tires, 1 inch, size axles, ½-inch; weight each, 35 lbs.	$9.80
No. S8-RHW—Extra wheels for above complete with rubber tires	1.20

One in a carton.

COASTER WAGONS.

RACER.



Box—Made of hardwood lumber, with four cleats under bottom; full rail around top. Bottom attached with screws. Brake on right side.

Gear—Indestructible channel steel. Draw bar from tongue iron to king bolt. Rear gear has double brace to body as shown. One-half inch bright drawn axles.

Wheels—10-inch double disc wheels, retained roller bearings, with 1-inch corrugated rubber tires.

Finish—Body, natural finish, varnished. Top rails, light blue. Decorations on side printed in red. Gear, black enameled. Wheels, orange enamel.

Each

No. S8-43—Raven Racer; in one size only, 16x36 inches; weight each, 36 lbs..... **$8.30**

One in a carton.

KELLEY KAR.

DE LUXE MODELS WITH SEMI-PNEUMATIC BALLOON CORD TIRES.

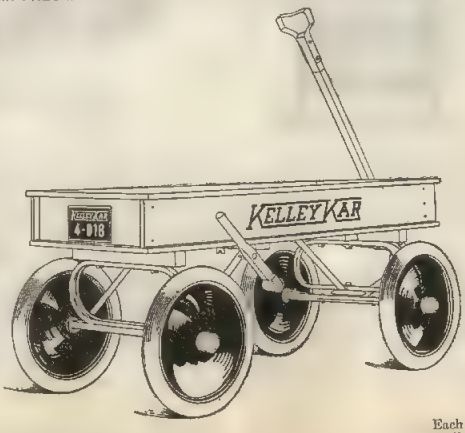
The new Kelley Kars, De Luxe Models, have everything a boy wants. They keep in step with the latest motor car developments. They are now equipped with semi-pneumatic balloon cord tires and individual registered license number plates. The tires have the appearance of pneumatics, being much larger than those ordinarily found on wagons of this type.

The channel steel chassis gives surplus strength, and is handsomely enameled in vermillion.

The platform and body are built from white ash, selected for strength and color. Rounded trim on body—no sharp edges—ends are mortised into sides and nailed with cement covered nails. Platform boards are tongued and grooved and are held together with extra heavy cleats, striped in pullman green and given three coats of weather-proof varnish.

Individual license number plates are on the rear of every Kelley Kar De Luxe. By this number, ownership can be registered.

The exclusive Kelley Kar wheel with its high speed, large size, non-friction ball bearings has stood the most severe road and strength tests without a part giving out. Bearings travel on a hard steel sleeve which in turn is securely attached to the axle. Same has no rivets that will pull out, and is so constructed that it must turn on the extra large, high polished steel balls.



Each

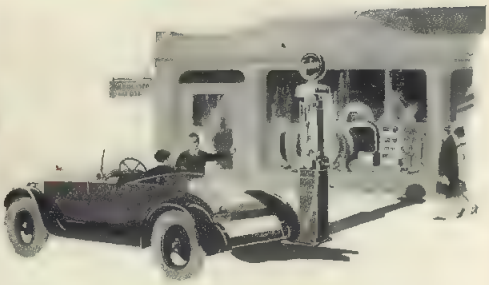
BOWSER



Meet them at the pump

A little chat with folks, as they buy gas and oil, and you can sell them tubes, grease guns, spotlights, tire valves, road maps—all those long-profit lines on which you make the real money.

To remind people to buy consistently at your pump, to help you "meet them at the pump," there's nothing quite so good as the Bowser match books.

Furnished with your name and address, of course, and supplied at the same wholesale price we ourselves pay.

Sample of the match book, together with our four unique sales helps will be sent on request, free! Ask any Bowser man, or write Dept. 52, at the Fort Wayne office.

Car Dealers Are Pushing SAFE-T-STAT

SAFE-T-STAT
Premier
$7.50

The dashboard heat indicator—for automobiles, motor boats and airplanes.

ONE of the causes of the very rapidly increasing sales of Safe-T-Stat, the Preferred Motor Heat Indicator, is the backing of automobile dealers themselves.

They have discovered that it is not only an accurate, scientific device and makes them a desirable profit, but that because it is mounted on the dash, it solves the problem of the decorative radiator cap which the discriminating motorist is demanding on his car today.

Safe-T-Stat is used as standard equipment by Packard, Nash, Hupmobile, Chrysler and Lincoln dealers in New York, Chicago, Detroit and other cities. It is general equipment for Minerva and its any car

Ford, Chevrolet, Pontiac and Oakland dealers are finding ready sale for the Universal Model specially adapted for these cars at $4.50. If you are handling these lines you should get in touch with us at once. Dodge dealers, too, are pushing the Dodge special at $5 00.

Safe-T Stat warns instantly of approaching engine trouble —it saves money for the motorist. Scientifically accurate, electrically controlled by a thermostat attached directly to the engine, it takes its temperature from the motor not from radiator vapor.

In sight day and night, theft-proof and absolutely reliable, Safe-T-Stat indicates the proper temperature for efficient running at all times, and gives immediate notice as soon as motor trouble starts.

Safe-T-Stat offers so much to the motorist that the progressive automobile dealer can't afford to be without it—write for terms and full particulars today.

SAFE-T-STAT
Universal
$4.50

Especially adapted for Fords and Chevrolets. $4 50 Dodges Special, $5.00.

The instrument that shows a frozen radiator

SAFE-T-STAT, 79-85 Bridge Street, Brooklyn, New York
Easily installed on any car in a few minutes

SAFE-T-STAT
MOTOR HEAT INDICATOR

Hockey, both in the field and on the ice, is rapidly growing in popularity. Careful study of the requirements of the game has been responsible for the addition of hockey supplies to the Reach athletic line of up-to-the-minute, practical equipment.

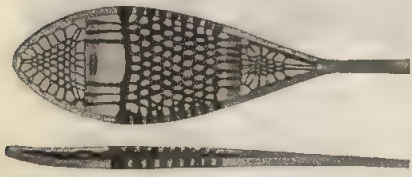
SNOW SHOES.

These goods are manufactured by Indians experienced in this particular class of work. They are built from the best models for practical use. The snow shoes are strung with the best Indian tanned caribou hide, strong and durable.

SOMETHING BETTER THAN REGULAR GOODS.



These snow shoes are made of the very best quality of white ash butts. This wood combines lightness, toughness of fibre and just the right spring to a remarkable degree. The filling is made of selected cowhide. It is strong and will not stretch or sag in soft snow or slush. Models are very graceful, 3-inch turn at toe, and give satisfaction under most trying conditions. Varnished finish

Weight per pair, 1 lb.

SERVICE TRUCK DERRICK.

SASGEN.

The boom swings a full circle and can be used in any direction and can be locked against revolution when towing. The boom can be raised and lowered to suit the work, either for raising or towing cars. The cable furnished with the machine is sufficiently long to reach a wrecked or tipped over car 50 feet from the service truck. It takes only one man to do the job where ordinarily it takes two or three men. The boom acts as a bar to keep the disabled car a sufficient distance away from the service truck so as not to interfere when turning corners.

A service truck equipped with a Sasgen derrick can be used to raise cars sufficiently in front or back to work underneath without lying down and can also be used for taking engines out of machines where otherwise it requires a special hoist for this purpose.

All equipped to fasten onto service truck and the machine will soon pay for itself over anything else on the market made for towing cars.

Each

***A-Sasgen Service Truck Derrick;** approximate weight each, 275 lbs. **$250.00**

*F. O. B. factory Chicago.

STEERING GEAR TOW LOCK.

MARQUETTE.

A necessity for towing wrecked cars backwards.

Now you can tow a disabled car backwards whenever necessary. The Marquette holds the front wheels in line and thus enables towing the car backwards as fast and as safely as forwards. It complies with all state laws regulating towing.

Attached or detached in 20 seconds, simply by turning the set screws. No nuts to lose; no keys to fall out. The Marquette consists of two crucible steel vises, heat treated and connected by a steel rod. Fits all cars. Packed one to a carton.

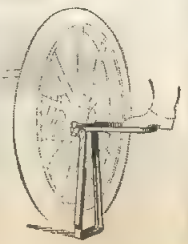
Each

No. A-5M—Marquette Steering Gear Tow Lock; weight each, 3½ lbs. **$9.5**

GARAGE JACKS.

TIRE SAVER.

A tire saving jack that is easiest to operate; adjustable to fit any make of car with wheels from 30 to 36 inches. Takes up but little space when not in use.



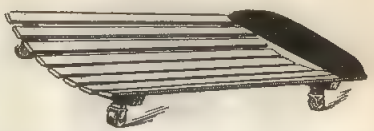
Per Set of Four

No. A-11—Oshkosh Tire Saver Jack; weight per set, 15 lbs. **$5.50**

No. A-1FS—Oshkosh Tire Saver Jack; same as No. A-11, except non-adjustable and made especially for use on Ford cars; weight per set, 12 lbs. **4.00**

AUTO CREEPER. 5385

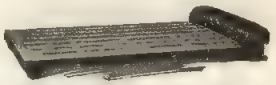
RIVERSIDE.



Especially adapted for automobile repair men; to be used under the car and keeps him off the ground or floor; tools are always where they can be found.

Each

No. A-1AT—Auto Creepers; made of hardwood, fitted with roller-bearing casters; length, 37 inches; width 22 inches; weight each, 10½ lbs. **$3.40**



A slight push changes your position. The large double wheel casters will not stick and bind in rough places in the floor. It is not necessary to lift yourself entirely off the creeper every time you change your position because that caster is broken again. The strips of metal conform to the shape of the body and the head rest is covered with oil-proof cloth.

Each

No. A-2—Steel Creeper; made of metal, securely riveted; size, 20x44 inches; fitted with double wheel casters; shipping weight each, 50 lbs. **$12.00**

REPAIR TAGS.

Actual size of Tag, 6⅛x3⅛ inches.

Tags for the repair shop printed, strung and numbered. Blank space left on tag and coupon where you can insert your firm name with rubber stamp.

Per Thousand

A-Repair Tags—In lots of 1 000. . . . . **$5.00**

Seneca Folding Cameras

No. 2 Seneca Folding Scout

No. 2 Seneca Folding Scout.

This camera was made especially for premium purposes and you'll find it a better camera at a better price than you can get anywhere on the market today.

Among its exclusive features are its ease of loading, the automatic five-speed shutter, collapsible reversible finder, lightness of weight due to body being made of aluminum, and its crystal enamel finish.

No. 99J20. No. 2 Folding Scout Camera. Pictures 2¼x3¼ inch with Achromatic Lens.

Each 4.70

No. 99J21. No. 2 Folding Scout Camera. Pictures 2¼x3¼ inches with rectilinear lens.

Each. . . . . .

No. 2 Seneca Sagamore Camera

This camera is only 6½ inches in length—its width is less than 3 inches—its thickness 1¼ inches, still it takes pictures 2¼x3¼ inches.

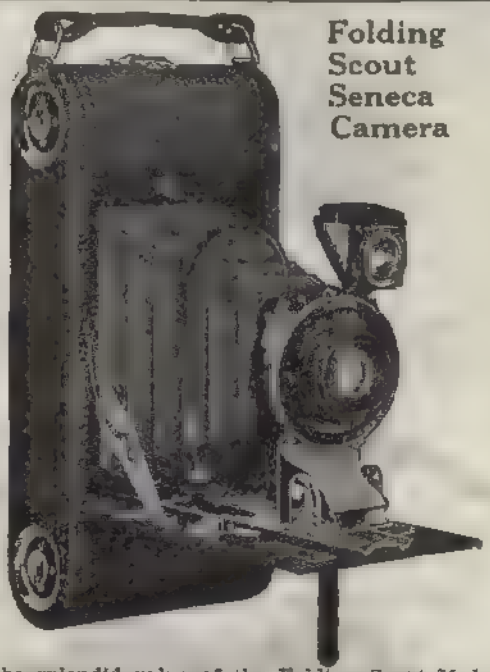
The No. 2 Seneca Sagamore is very substantially made. The body is entirely of special metal, selected for lightness and strength. A covering of seal grain leather assures long wear.

Either the Seneca Deltax or Marvel Shutter is standard equipment with the Single Achromatic and Rapid Rectilinear Lenses. Both have fractional exposures 1/25, 1/50 and 1/100 second, besides the usual Time and Bulb exposures.

No. 99J34. With Rapid Rectilinear Lens, Deltax or Marvel Shutter. Each..... 8.50

No. 99J35. With f:7.5 Anastigmat Lens Gamm x or Marvel Shutter. Each..... 11.50

Folding Scout Seneca Camera



The splendid value of the Folding Scout Models is unequalled at their price.

The Folding Scouts are furnished in either the Meniscus Achromatic (single) or the Rapid Rectilinear (double) lens equipment. We feature the two most popular sizes, the No. 2A for pictures 2½x4¼ and the No. 3A for pictures 3¼x5½ (postcard size.)

No. 99J17. Seneca Folding Scout No. 2A Camera. Pictures 2½x4¼ in. Each..... 8.25

Seneca DeLuxe Camera

The Seneca De Luxe Camera takes pictures 2½x4½ inches. Made of the best for the best, proves that when better cameras are made Seneca will still be in the lead.

The secret of the great ability of the De Luxe lies in its excellent lens equipment. Fitted with a genuine, full corrected f:7.5 Anastigmat, it has speed and power of rendering detail that is amazing. Enlargements from its negatives to any size is possible. And the shutters used on it are such as to take full advantage of the possibilities of the lens.

No. 99J30. Each..... 18.75

SHERMAN FOLDING DECOYS.

Open. Folded.

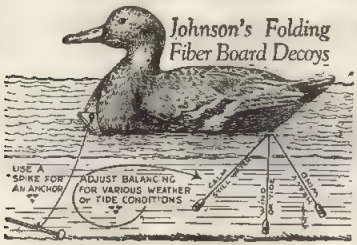
Not a profile decoy. Made of wood and vulcanized fiber, thoroughly water-proofed. Colored true to life. No counter weights. Rides in rough water. Can be used in shallow water or on shore. Head and tail fold to protect when carrying. Body folds flat on wood base. Easily and quickly set up.

Per Dozen

No. S-600M—Mallard..... $12.00
No. S-600BB—Blue bill..... 12.00
No. S-600CB—Canvas back..... 12.00

Assorted 8 males and 4 females to a dozen; weight per dozen, 8 lbs. Packed one dozen in a bag. We do not break bags

JOHNSON'S FOLDING.



The $\frac{1}{16}$-inch cedar float, also waterproofed, slides snugly inside the body to spread and float it. A balancing device attached to the float makes tipping impossible. Suggestions for different ways of using printed on the bottom of each decoy.

Each dozen fit compactly in two canvas bags.

Per Dozen

No. S-JFD—Johnson's Decoy Ducks; mallards and blue bills only..... $8.50

One dozen in a box; we do not break boxes

ILLINOIS RIVER, FOLDING.

Painted in natural colors on both sides to represent mallards. Three on a wooden float. The float is in three pieces, jointed at one end with a three-plate hinge and a bird floats at each extremity. A spring holds them open.

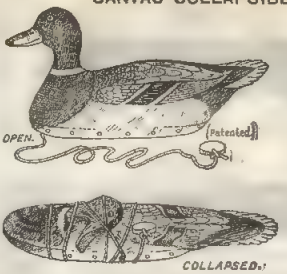
One dozen (four floats) in a carton, including cord and anchor for each float; two-thirds male, one-third female.

Per Dozen

No. S-RD—Illinois River Decoy Ducks; mallards only; weight per dozen, 8 lbs..... $14.00

One dozen in a box. We do not break boxes.

CANVAS COLLAPSIBLE.



With this decoy there is no adjustment, nothing necessary but the simple use of the anchor cord in the regular manner. It automatically expands by means of a spring when the anchor cord is unwound, such cord being wound around the device holds same in collapsed position.

Per Dozen

No. S-525—Automatic Mallard Decoy Ducks; made in five parts, a canvas body, wooden float and head block, one wire spring head support, one wire spring tail support; hand painted true to life; complete with anchors and cords; weight per dozen complete with anchors, 14 lbs. $18.00

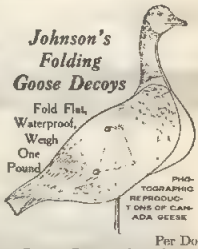
Packed one dozen in a carton (assorted, 8 males and 4 females to a dozen).

SOLD ONLY IN FULL CARTONS.

NOTE—Carried in Mallards only.

FOLDING.

Printed in natural colors on tough fibre board, thoroughly water proofed and reinforced. They have the exact appearance of live geese.

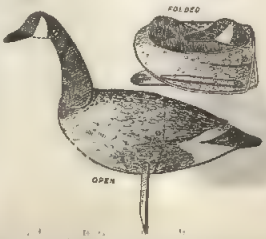


Per Dozen

No. S-800—Johnson's Folding Decoy Geese; size, about 20x11x12 inches; weight per dozen, 12 lbs..... $16.00

One dozen in a canvas bag.

SURE LURE.



Made entirely of wood, the body is made in two parts, also the head and neck. These parts are riveted together so that the decoy will fold up very compact and can be readily opened up to resemble a goose in various positions.

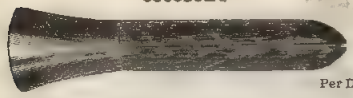
Per Dozen

No. S-SLG—Sure Lure Decoy Geese; size, about 9x10x12 inches; weight per dozen, about 12 lbs..... $19.00

One dozen in a carrying case.

DUCK.

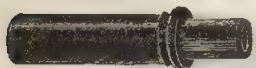
COCOBOLA.



Per Dozen

No. S-760—Duck Call; cocobola, with nickel plated tip... **$7.50**

OLT'S O. K.



Unequaled for naturalness. Constructed entirely of hard rubber, with a straight reed which makes this call stay in perfect tone in all kinds of weather.

Per Dozen

No. S-O. K.—Duck Call..... **$10.00**

BROAD BILL.

Will produce with perfect accuracy any call of our native ducks, from the short, choppy call of the Teal to the long, dignified call of the Mallard drake.

Made in two pieces, allowing the reed to be fastened securely to one side by the use of a metal clamp. Reed is made of selected mica and carefully treated rendering it practically indestructable.

SHERMAN FOLDING DECOYS.

Open. Folded.

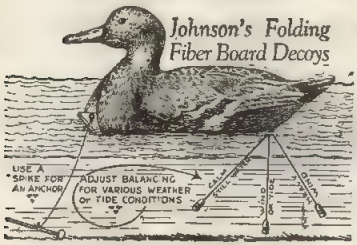
Not a profile decoy. Made of wood and vulcanized fiber, thoroughly water-proofed. Colored true to life. No counter weights. Rides in rough water. Can be used in shallow water or on shore. Head and tail fold to protect when carrying. Body folds flat on wood base. Easily and quickly set up.

Per Dozen

No. S-600M—Mallard..... $12.00
No. S-600BB—Blue bill..... 12.00
No. S-600CB—Canvas back..... 12.00

Assorted 8 males and 4 females to a dozen; weight per dozen, 8 lbs. Packed one dozen in a bag. We do not break bags

JOHNSON'S FOLDING.



The $\frac{1}{16}$-inch cedar float, also waterproofed, slides snugly inside the body to spread and float it. A balancing device attached to the float makes tipping impossible. Suggestions for different ways of using printed on the bottom of each decoy.

Each dozen fit compactly in two canvas bags.

Per Dozen

No. S-JFD—Johnson's Decoy Ducks; mallards and blue bills only..... $8.50

One dozen in a box; we do not break boxes

ILLINOIS RIVER, FOLDING.

Painted in natural colors on both sides to represent mallards. Three on a wooden float. The float is in three pieces, jointed at one end with a three-plate hinge and a bird floats at each extremity. A spring holds them open.

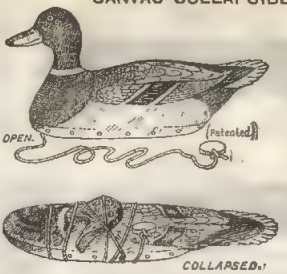
One dozen (four floats) in a carton, including cord and anchor for each float; two-thirds male, one-third female.

Per Dozen

No. S-RD—Illinois River Decoy Ducks; mallards only; weight per dozen, 8 lbs..... $14.00

One dozen in a box. We do not break boxes.

CANVAS COLLAPSIBLE.



With this decoy there is no adjustment, nothing necessary but the simple use of the anchor cord in the regular manner. It automatically expands by means of a spring when the anchor cord is unwound, such cord being wound around the device holds same in collapsed position.

Per Dozen

No. S-525—Automatic Mallard Decoy Ducks; made in five parts, a canvas body, wooden float and head block, one wire spring head support, one wire spring tail support; hand painted true to life; complete with anchors and cords; weight per dozen complete with anchors, 14 lbs. $18.00

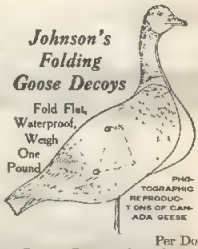
Packed one dozen in a carton (assorted, 8 males and 4 females to a dozen).

SOLD ONLY IN FULL CARTONS.

NOTE—Carried in Mallards only.

FOLDING.

Printed in natural colors on tough fibre board, thoroughly water proofed and reinforced. They have the exact appearance of live geese.



Per Dozen

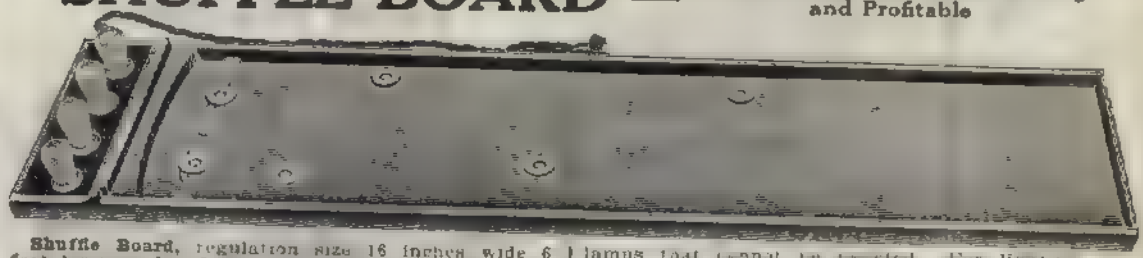
THE SHURE WINNER PRICE LIST

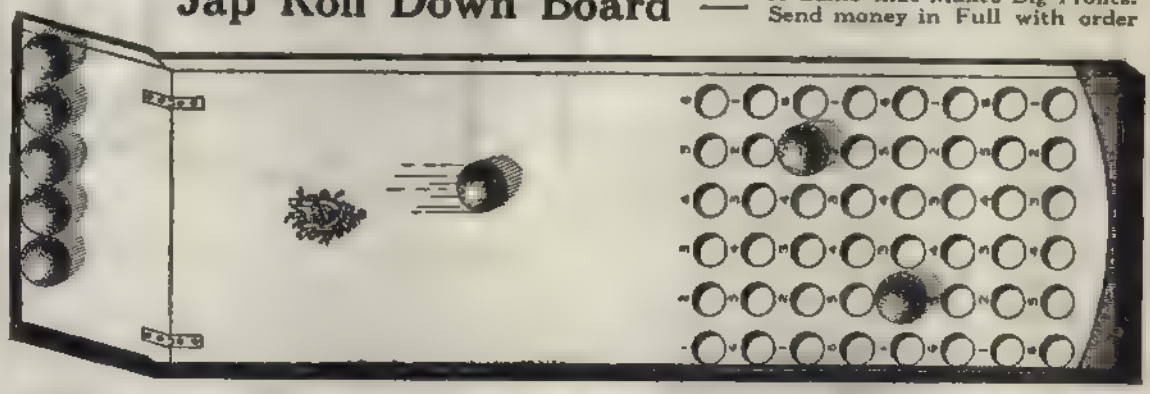
SHUFFLE BOARD — A New Game that is Fascinating and Profitable



Shuffle Board, regulation size 16 inches wide 6 feet long made of seasoned hard wood well made and finished with painted edges and trimmings. Wired for four electric lamps complete with cord and plug. Can be operated on any circuit. The player receives six metal discs and the object of the game is to slide these discs on the board and light the lamps. Lamps are wired in multiples there being seven connections on the board, and to light a lamp the metal disc must cover two of these connections. It is purely a game of skill. Two or three boards in a booth with prizes such as dolls, aluminum goods, silverware, blankets and candy is sure to be a big winner and will prove very profitable because there is a fascination in attempting to light all of the lamps that cannot be resisted. For lighting one light a very cheap prize should be used, such as slum jewelry, post cards, bowling game, etc. For lighting two lights a prize can be used costing from 50 to 75 cents, such as dolls, small aluminum articles, etc. For lighting three and four lights, a prize can be used, costing the operator as high as $2.00 which would cover the cost of the larger aluminum articles, dolls, electric lamps, silverware, blankets, etc. This game is selling now and the man who opens up with this game is sure to get the crowd and hold their interest.

No. H571. Price for board only, without lamps or prizes 17.50

Jap Roll Down Board — A Game that Makes Big Profits. Send money in Full with order



Jap Roll Down Board, regulation size board, 15½ inches wide and 5 ft. 6 inches long. Made of hardwood in cherry or mahogany finish. Well made, presenting a nice appearance. Has 48 holes and 8 wood balls. Each hole is numbered and the principle of the game is to roll the balls into the numbered pockets, rolling up the score. This game is popular and realizes handsome returns as the line of prizes that can be used in connection with this game are practically without limit. The game is fascinating yet very simple and is attractive to both women and children as anyone can play. Fitted with rubber cord to prevent balls from jumping over when they are returned to the player. One person can operate several of these tables. An attractive and popular game at all parks, carnivals, amusement parks, etc. Complete with board and balls.

No. H589. Each 6.00

Trade Certificate or Stage Script

Striking Machine

Send Full Amount of Money with Order

Delivery in 10 days from receipt of order

The upright of this machine is made in two 12-foot sections of best seasoned lumber and is well braced the entire length and cross braces every 18 inches. These braces keep the upright perfectly straight under any weather conditions. It is painted in red with yellow figures and is given a coat of good varnish. Sections are fastened securely with angle irons and are easily put together. The chaser travels up a finished steel guide way at the top of which is a 10-inch plated gong. The base is oak covered with boiler plate 14 inches wide and 44 in. long. The beam is of best hickory and is 6 inches wide, 42 inches long and 3 inches thick, with spring on chaser end. The spring not only protects the beam from being worn out by the chaser but is also an adjustment and machine can be made to work hard or easy by a few turns of the adjustment nuts. All castings used on this base are of highest grade steel and impossible to break. The rubber cushion is made of a special grade rubber and will stand very hard pounding, size of this rubber at the base is 5½ inches tapering up to 4 inches and is securely held to the beam by our split pronged ring which makes it impossible to jump out.

The most important feature of any striking machine is its base and we therefore ask you to compare this base with those made by others. With two mauls

Doll Racks

Baby Doll Rack. After a test of several seasons, during which we sold a great number of doll racks, we are pleased to state that from the point of construction and durability we think there is no other doll rack quoted at this low price that will give as high satisfaction. Besides being durable, it is also sightly, well constructed and readily put together. All standards and cross bars are made of select lumber, bolted together and well braced. The dolls are clad in colored dresses, three rows of six dolls in each row, eighteen dolls in all. The bodies are select wood hinged to the cross bars. Comical painted faces, genuine fur trimmed heads. The dolls are reset from counter by pulling cord. Size of rack is 7 by 7 feet, with canvas back stop 7 by 7 feet. We challenge any one to equal this doll rack in quality or construction or price.

No. H591. Each..... 30.00

"Chicago Special" Doll Rack. The construction of this is the result of considerable scientific figuring. The doll must be hit in one certain spot before it can be knocked over. The illustration showing back view also shows the spot which is above the light line and the head on the wood part of the doll. If hit at that point the doll will go over; if hit anywhere else it will not. The faces of the dolls are made of rubber, 7 in. diameter, nicely painted and stained. The dolls are clad in ludicrous gowns, each doll has a different face. The whole assemblage presents a very comical appearance. The hair is attached to the rubber and is in various colors. Each row is equipped with lifts which reset dolls when knocked down by pulling rope at counter. This outfit is especially substantial and made purposely for a man on the road traveling around. Can be readily and easily taken down or set up in half an hour. The sides are arranged so as to make a carrying case when traveling, holding the complete equipment. It is fully guaranteed and indestructible. Size 7 ft. high, 7 ft. wide

MINE AND INDUSTRIAL AUTOMATIC LOWERING

Designed especially for coal cutting equipment and mining machinery, and are equally valuable for track service, re-railing cars, hoisting motors and every necessity of mining.

A practical and efficient combination of a 2, 4 or 6 ton jack and has a surplus of power and a factor of safety for every emergency and yet weighs less than any type of 2-ton jack.

No. F85 is recommended for low vein service. Has 30 in. steel lever bar. No. F86 is recommended for thick vein service. Has 36 in. steel lever bar. The No. F85 fits all necessities and can be standardized for universal service. Has 36 in. steel lever bar. These Simplex Mine Jacks are built exclusively of high carbon steel drop forgings with malleable standards.

Nos.	F84	F85	F86
Cap., tons	5	5	5
Height, in.	14	17	20¼
Lift, in.	7¾	10¾	14
Wt. ea., lbs.	27	31	35
Each	$14.00★	15.00★	16.00★

No. F56 is an extraordinarily good tool, single acting, automatic in raising and lowering, particularly adapted for general industrial, mining and shop service. Has adjustable drop forged steel shoe which locks in four different notches giving a variable lifting range. Equipped with 5-foot steel lever bar.

The No. F22 is an automatic lowering jack of exceptional operative efficiency. Every detail in its construction represents the latest ideas in jack design. The operating mechanism is simple, safe and durable, and its strength and power are far in excess of the ordinary 10-ton jack. The F22 is equipped with a 5-foot high carbon steel lever bar, tapered and chisel pointed.

Nos.	F56	F22
Cap., tons	7½	10
Height, in.	17	20½
Lift, in.	9½	12½
Wt. each., lbs.	45	56
Each	$30.00★	25.00★

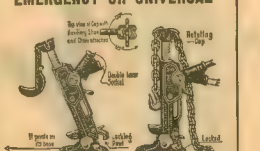
INTERIOR MECHANISM

Used in all Simplex Jacks shown on this page.

This reproduction of the interior of a Simplex Jack illustrates the simplicity and standardized mechanism of all automatic raising and lowering Simplex Jacks in which the operation, man power and safety are perfected.

There is not a machine screw used in the modern Simplex Jack.

EMERGENCY OR UNIVERSAL



Emergency or Universal Jack pivots on its base and can be operated at any angle or vertically. It is an extraordinarily good tool and capable of performing a wider range of service than any automatic jack made. The auxiliary steel claw and steel chain permit of grappling loads in awkward or restricted positions. For straightening, lifting, lowering or for shoring timbers, forms, structural steel into position, in moving or lifting coal cutters, for rerailing cars, and for general shop, repair and miscellaneous service, it is unsurpassed.

Furnished complete with 5-foot steel pinch bar, 5-foot steel chain and steel auxiliary shoe.

No. F310—Capacity 15 tons, height 21¼ in., lift 12¾ in., w't each 65 lbs., each★ $40.00

HEAVY DUTY INDUSTRIAL AUTOMATIC LOWERING

Is especially recommended for car repairing and for general mine, industrial and shop service. Its unusual power, strength and stability have set a new standard in heavy duty jacks. Equipped with the Simplex oval socket and 6-foot oval hickory pole, both exclusive Simplex features. The extra length and strength of this unbreakable pole insure maximum power with absolute safety. One man with the No. F29 replaces two men with the ordinary 15-ton jack.

No. F29—15 Ton, height 28½ in., lift 19 in., w't, each 100 lbs.
Each★ $42.00

The latest Simplex models of 25 and 35 tons capacity, respectively. The massive standard and base, together with the powerful but simple geared steel mechanism, insures the highest degree of durability and safety under heaviest load conditions. Equipped with the Simplex oval socket and 6-foot oval hickory pole.

SOUTH BEND BAITS

UNDERWATER MINNOWS

Standard type of underwater minnow, used for casting or trolling. Equipped with spinner at both front and rear. Treble hooks are attached with countersunk screw-eye, trebles easily removed by simply unscrewing and lifting out. This bait, while primarily designed for all species of fresh water fish, has also proven effective for salt water species such as Striped Bass, Rovallo, etc.

FIVE TREBLE

Length of body 3⅝ in., five treble hooks, w't 1⅛ ozs.

No. C384—W't per ass't 1 lbs., per assortment *$5.10*

ONE ASSORTMENT IN A BOX

PIKIE MINNOWS

The new Nature Lure so closely imitates the pike minow in shape, color and movement that the combativeness of the bass is aroused and they strike it to kill.

Gives best results when reeled slow but does not revolve if reeled fast. It's a near surface wiggler, or by turning up the screweye a few turns and reversing the mouthpiece you have a surface splatter.

Slim body 4½ in. long; weight ¾ oz.; rust-proof bronze hooks to blend with color of body; all hooks including the tail hooks set in sockets to hold same away from the body.

No. C700—Natural pikie scale finish, per dozen *$12.00*
No. C701—Natural perch scale finish, per dozen *$12.00*
No. C702—White, red head, per dozen *$12.00*
No. C704—Golden shiner doz. *12.00*
No. C708—Rainbow. per dozen *12.00*

BABY PIKE

Thoroughbred from the Famous Pikie Minnow.

This lure 3¾ in. long is a smaller bait than the now famous Pikie Minnow, which has been making the record catches of game fish in every part of the country. It has a wicked wiggle and all the good qualities of the larger lure. A light, strong killer.

No. C900—Scale finish, per dozen *$11.40*
No. C902—White, red head, per dozen *$11.40*

CRAWDAD NATURAL CRABS

Natural shaped body and tail, black bead eyes, rubber legs, bronze hooks, movement backwards, same as a crab. Wiggle mostly in tail. Rubber legs give more movement. ONLY BAIT WITHOUT NICKEL PLATE; fine for use on bright days, in clear water and along stony shores.

Floats until started. Tail guards hooks from snags and bottom. Length of body 2¾ in.; w't ¾ oz. Casts like a bullet.

No. C300—Shell finish,
per dozen *$11.40*

CHUB WIGGLERS

DE LUXE WAG TAIL

A bait which apparently swims with its tail. Looks like a live minnow, swims like one and is a Real Fish Getter. Has a nickel plated tail which swings back and forth as the bait travels through the water, and the flash of the nickel makes a more attractive lure. Body 2¾ in. long, w't ¾ ounce, double hooks so placed that the fish get hooked when striking and at the same time the bait is practically weedless.

No. C800—Natural Creek Chub, scale finish ..... per dozen *$12.00*

Always floats when at rest. Does not revolve. Practically weedless.

Per dozen.
No. C801—Natural chub..... *$12.00*
No. C802—White, red head... *$12.00*
No. C804—Golden shiner, scale finish *12.00*

ONE IN A BOX

PFLUEGER DEVON MINNOWS

BREAKLESS

The spring brass wire frame permits of quick attaching or detaching of the hooks which might have become broken or damaged and also changing of one size hook for another. With this device there is no fraying of the gut or gimp mounts as formerly used and is practically indestructible. Extra strong best quality treble hooks, bright nickel plated, brass barrel swivels and bronze wire leaders bright nickel plated.

VACUUM BAITS

Creates a vacuum, causing a spray which is mighty attractive to game fish.

Standard size, body length 2¾ in., by 2 in. wide at the head, w't approximately ⅞ oz.

No. C1—White, red stripes, per dozen *$12.00*

ONE IN A BOX

PIKE-ORENO

As its name implies, the Pike-Oreno is designed especially for Wall-eye Pike and large Pickerel. However, has proven effective for Bass and other game fish—even Muskie.

The Pike-Oreno travels deep, due to its particular construction. The grooved head is fitted with a nickel-plated metal head plate, peculiarly shaped and extending below or beyond the length of the groove, causing the bait to submerge from 4 to 8 feet, depending upon the speed with which it is reeled. Has the same diving, darting, wobbling action in motion as the famous Bass-Oreno.

Body length is 4¼ inches. Equipped with three treble hooks, extra strong.

No. C975RH—Red head and white body .....per dozen *$12.00*

No. C388—Half dozen assorted, per assortment *$6.00*

ONE ASSORTMENT IN A BOX

TARP-ORENO

The Tarp-Oreno is in design similar to the famous Bass-Oreno, only, of course, far heavier in construction and larger in size. It travels in a pronounced wobbling, diving motion.

Has proven highly succesful for salt-water species such as Tarpon, Sword-fish, Amber Jack, Barracuda, King-fish, Jack-fish, Grouper, Albacore, Channel Bass (Red-fish), Striped Bass, Bluefish, Weakfish (Sea Trout), Small Tuna, Bonita and even Sailfish. Has also proven suitable for Muskies and large Pike.

Body is red cedar, 8 inches long. Equipped with one tail and one belly, 9/0 extra strong, O'Shaughnessy hand-forged double hooks. Hooks are attached by a patented swivel socket, giving immense strength, also freedom without a direct leverage on the bait. A similar swivel socket for attaching line sets in the grooved head. All sockets are riveted.

No. C979RH—Red head and white body .....per dozen *$36.00*

No. C979RHA—Red head and aluminum color body, per dozen *$36.00*

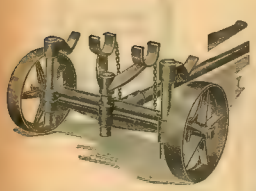
"STANDARD" TOWING TRUCK



Made in plain tread steel wheels. Wheels have ribbed spokes and are unbreakable. Each wheel carries a 3-in. roller bearing.

Front axle supports are adjustable for height with reversible offset, chains secure axle against side slip.

Rear axle supports are also adjustable for height. "V" blocks will carry any rear axle without interference with truss rods, no clamps necessary. All uprights are of best steel and will carry any load.

Entire front or rear end of a car can be supported and towed. Truck is so designed as to absolutely withstand all strains and blocks are so designed as to engage and properly support axle of any make of car.

Steel tongue is of tubular telescopic construction and may be removed from truck. This construction gives greater strength and adjustability. Axle is of best solid steel and passes through housing.

Axle shaft is made from cold rolled steel with long roller bearings and connected to wheels in such a manner that either wheels or axle may rotate to accommodate proper movements of truck.

Arrangement of blocks, wheels and tongue gives great leverage, thereby enabling anyone to quickly place truck and lift heaviest type of car. Off-center arrangement of blocks locks car in an elevated position to prevent accident or damage. Width over all 36 in., tongue closed 7½ ft., tongue extended 12 ft., w't 215 lbs.

No. F6174—70S—With steel tired wheels, 14x3 in.★ ..... each **$110.00**
No. F6174½—70R—With rubber tired wheels, 16x3½ in.★ each 161.10

BALLOON TIRE GARAGE JACK

For Autos

The "STANDARD EASY LIFT" Balloon Tire Garage Jack designed to meet the demand which exists for a jack that will handle cars with low hung axles and balloon tires. This model is low enough to pass under the axle of this type of car when the tires are flat. Jack wheels are 4 in. high, permitting them to pass under the lowest axles. The lifting range is marvelous. Takes axles as low as 4 in. from the ground and raise them to a point of 16 in. Load held firmly at all times, no chance of its dropping Short, smooth, even stroke of handle in raising or lowering load. No springs or chains to break or stretch. Front axle held at a one-point suspension. Arrangement, with points of contact of the two rear wheels, form a three-point suspension for load, which means that, pushing jack over an uneven floor does not affect the level at which the load is carried. The one-point suspension of the front axle overcomes the objection of small wheels which ordinarily would make the traction more difficult, with the three-point suspension of the frame the same easy traction is secured as though 8 in. wheels were used. Jack can be operated at the side of the car beneath the running board, especially adapted for use in congested spaces. Short, compact and powerful.

No. F6169-(67)—Length over all 63 in., width 17 in., length of handle 40 in., height down 4 in., height raised 16 in., w't 108 lbs.★ ..... each **$90.00**

STANDARD EASY LIFT GARAGE JACK

All steel and malleable iron, roller bearings equipped throughout, easily handled and operated, in a very narrow space, not exceeding the Jacks own width. Extension rack bar can be adjusted to all height axles, readily raised and lowered by a short up and down stroke of the handle. Jacks as listed come with steel wheels.

No. TC6167—65-Length over all 68 in.; Length of handle 60 in., Height, down 8 in. 12½ in., Height raised, 12½ in. 17 w't 80 lbs. ....ea. **$66.60**

No. F6168—66-For heavy trucks; Length over all 88 in; Length of handle 80 in; Height down 8 in. 12 in; Height raised 12½ in. 17 in; w't 110 lbs.★ ..... each **$93.30**

No. C6172 — Stand — No charge.

LOOSE. ONLY ONE TO A DEALER

We Will Send Direct from Factory Upon Request Free of Charge a Large 6-Color Window Card.

All malleable construction, recommended for light cars such as Fords and Chevrolets. Has a lifting step which takes care of different height axles. A strong, sturdy and well constructed jack. Suitable for cars weighing 3000 lbs.

Height, bar-down, 5⅞ in. to 9¾ in.; height, bar raised, 11 in. to 14¾ in.; capacity, 1500 lbs.

No. C6166—21—W't each, 4¾ lbs., each $2.20

LOOSE

(Long Handle) FOR ANY HEIGHT AXLE ON HEAVY CARS

A strong, easy operating jack. Long, telescoping handle has a very short stroke and can be used with unusual convenience where tank, tire carrier, trunk rack, or bumper prevents use of a regular short handle jack. It has an extra heavy cut steel rack-bar and is exceptionally well made and well reinforced throughout, resulting in great strength and durability, designed for large-sized cars.

Base is unusually large and well reinforced. Adjustable lifting step offers an additional advantage and makes this model an ideal seller to high-class patronage, and can be used with any height axle.

Height, bar down 11¾ in., raised 17¾ in., capacity 2000 lbs., telescoping handle, open 32 in., closed 22 in., suitable for cars weighing up to 5000 lbs.

No. C6161—6—W't each 11 lbs., each $6.30

ONE IN A BOX

FOR MEDIUM WEIGHT CARS

There is a demand for a low-priced, long-handle jack for light-weight cars. This jack has a long, folding handle and is very convenient to operate, enabling jack to be placed beneath car, operated and removed without crawling under tire carrier or bumper. Substantial base with its reinforcements makes jack very firm and rigid under load. One of advantages of a screw jack is, there are no springs to lose their tension or break.

Height, lowered 10 in., raised 16¾ in., capacity 1500 lbs., folding handle, length open 32 in., folded 16 in., suitable for cars weighing up to 3500 lbs.

No. C6165—11—W't each 4 lbs., each $3.50

LOOSE

FOR THE HEAVIEST AUTOS

This long-handle, ball-bearing screw jack has been designed to meet demand for a high-grade, convenient and easy operating jack at a very low price. It will lift heaviest cars with extreme ease where overhanging tank, tire carrier or bumpers prevent convenient use of ordinary jack. Gears are so set that greatest efficiency in lift is secured. A large machine cut steel screw is used. Frame is of best malleable iron. Long, folding handle is of high-grade steel and can be inserted in socket and is firmly held by a ball and groove so jack can easily be placed, operated and removed from beneath car by handle.

Height lowered 9¾ and 11¾ in., raised 15 and 17 in., capacity 2000 lbs., handle extended 32 in., closed 16 in., suitable for cars weighing 5000 lbs.

No. C6170—42—W't each 6 lbs., each $5.00

ONE IN A CARTON

No. D460E—**Model "9,"** 9 in. diam., 10½ in. to top of guard, 7¾ in. to top of motor, w't each 5 lbs., each $7.50

ONE IN A CARTON; SIX IN A CASE

Finish—The brass blades are highly polished and lacquered. Base and other parts baked on black enamel.

Construction—Cast enclosing shells and base, can be adjusted to any angle desired, either for a bracket or desk fan. The construction is simple and the field of service large. Large air velocity with minimum current consumption.

Speeds—Has four point switch for three speeds, namely, low, medium and high, ranging from 900 to 1500 revolutions per minute.

Equipment—8 ft. cord and attachmment plug included.

"PEERLESS," DESK AND BRACKET

OSCILLATING.

PEERLESS oscillating fans can be used either as a desk or bracket fan without the use of an adaptor.

They are designed to move from side to side through a desired angle, thus distributing the air over a larger area than with a stationary fan.

DIRECT CURRENT

110 Volt.

No. EH1212E—12 in. diam., 3 speeds, 960, 1460 and 1860, w't boxed 40 lbs., each $46.40

No. EH1216E—16 in. diam., 3 speeds 800, 1100 and 1400, w't boxed 60 lbs., each $54.40

ALTERNATING CURRENT

110 Volt, 60 Cycle.

No. EH4112E—12 in. diam., 3 speeds, 900, 1400 and 1600, w't boxed 40 lbs., each $46.40

No. EH3116E—16 in. diam., 3 speeds, 900, 1375 and 1550, w't boxed 50 lbs., each $54.40

UNIVERSAL CURRENT

Operates on A. C. or D. C. Current.

No. EH4110E—10 in. diam., 3 speeds 900, 1400 and 1600, w't boxed 40 lbs., each $36.00

"PEERLESS," DESK AND BRACKET

SWIVEL AND TRUNNION TYPE. NON-OSCILLATING

DIRECT CURRENT

110 Volt.

No. EH112E—12 in. diam., 3 speeds 900, 1400 and 1800, w't boxed 27 lbs., each $36.80

No. EH116E—16 in. diam., 3 speeds, 850, 1150 and 1500, w't boxed 35 lbs. ..... each $41.60

ALTERNATING CURRENT

110 Volts, 60 Cycle.

No. EH1112E—12 in. diam., 3 speeds, 900, 1200 and 1600, w't boxed 30 lbs., each $36.80

No. EH1116E—16 in. diam., 3 speeds, 900, 1400 and 1550, w't boxed 38 lbs., each $41.60

Prices furnished on application for 25 cycle fans.

Factory Shipments, 32 and 220 Volt Fans can be shipped from Warren, Ohio, factory. Prices on application. Voltage desired must be specified in ordering, and if for alternating current, the number of cycles.

STEEL CRAFT JUVENILE AUTOMOBILES.

A distinctly different line of Juvenile Automobiles that will be welcomed by every buyer. **Built entirely of Steel,** they are strictly all automobile in design, material and construction. **Bodies** of automobile sheet steel stock, riveted or spot welded. **Fenders** of heavy gauge steel. **Enamel** baked on, no paint or varnish used. **Front axle** of automobile type makes steering easy. Equipment

Cast steering wheel, steel front radiator, gas and spark control rod, seat steel pedals, meter meter bumper, nickel plated hub caps.

Each **7.10**

SAVAROMA COFFEE DISPENSER

Complete with Holder

Provides two greatest essentials for making of perfect coffee—uniform strength and accurate measurement.

(1) Ground coffee is poured from original package into SAVAROMA wide-neck glass jar. This is the only time coffee has to be handled in any way.

(2) When measuring device and cover has been turned down jar is placed in its holder where it remains until it needs refilling.

(3) Coffee is measured by tablespoonfuls directly into coffee pot. This is done simply and quickly, measuring as many spoonfuls as desired, by a mere turn of the wrist.

Cap. of jar 1½ lbs., w't per doz. 35 lbs.

No. EM1—Full one dozen cases, per dozen $21.60

No. D1—Less than case, per dozen $21.60

No. C11—Second growth ash, blade, 1¾ in. wide, a strong reliable stick, w't per doz. 12 lbs. ..... per dozen $7.50

NESTOR JOHNSON NORTH STAR SKATES

Scientific principles of construction make Nestor Johnson skates the peer among tubular skates. Not only does the patent rib, on each side of the runner housing tube, add a feature of strength, but adds to the rigidity of the skate as well. A very superior feature is the one-piece drawn steel heel cup, which is an exclusive feature of all our skates. Nestor Jonhson blades are to well known to need any added praise. Shoes for all outfits are made with correctly molded counters and only with inside counter pockets, same as all high grade shoes. All Nestor Johnson skates are made to place the foot in correct scientific position and cups are heel compensating. Reliability and long wear are built into every pair of our skates and shoes.

NORTH STAR RACER

Reinforced Corrugated Steel Rib

For Shoe Sizes 5, 6, 7, 8, 9, 10, 11 and 12.

No. C300—Men's aluminum finish,

per outfit ..... $.....

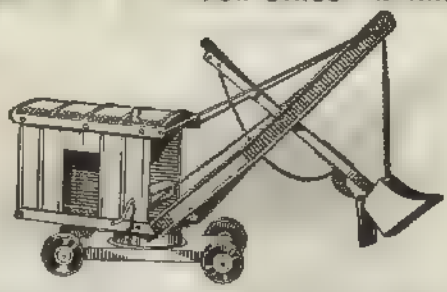
STRUCTO TOYS

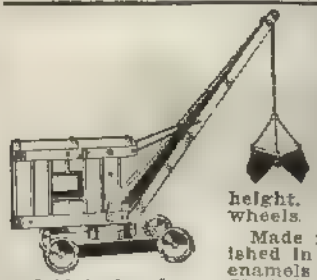
FOR GIRLS AND BOYS

Only comparisons will show why Structo Toys have stood the test of time. They are noted for their sturdiness, long service and wear. All Structo Toys are miniature reproductions of Road Building and Construction machinery—that duplicate all the actions of the "Real Thing."



Structo Giant Steam Shovel No. 110—The hoisting chains, controlled entirely by the crank, are operated by an ingenious drum mechanism, which automatically controls loading and dumping at the desired point. Finished in brilliant colors. Height 12⅞ inches. Length 21¼ inches. Width 6 inches. Each in box.

No. 39N132. Per dozen 17.64 | Each 1.65



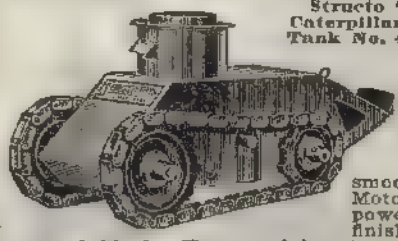
Structo Grab Bucket No. 52—The hoisting chains are operated by a drum mechanism that automatically closes the bucket when it reaches the loading point and dumps the bucket when it reaches the desired height. Mounted on disc wheels.

Made from steel highly finished in red, green and black enamels. Size 12 inches high and 13 inches long. Each in box.

No. 39N131. Per dozen 8.73

Structo Giant Grab Bucket No. 111—Automatic in action—all operations being controlled by crank lever—increasing ease of operation—drum mechanism dumps contents of bucket at desired point. All Structo Hoisting Toys are made of steel and finished in brilliant colors with auto enamels. Height 17 inches. Length 21¼ inches. Width 6 inches. Each in box.

No. 39N146. Per dozen . 17.64 Each . . . 1.65



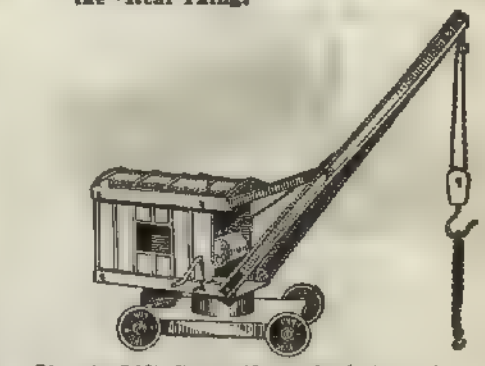
Structo "Ready Built" Caterpillar Whippet Tank No. 48—A faithful reproduction of its famous original. Realistic caterpillar action. The tank will operate over rough or smooth surfaces. Motor is very powerful. Tank finished in green, red and black. Has revolving turret. Length 12 inches over all. Each in box.

No. 39N148.

Per dozen ..... 23.52 | Each..... 2.25

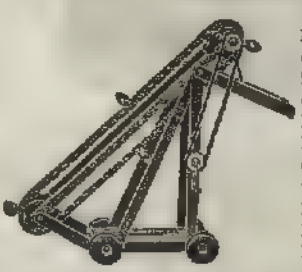
Structo "Ready Built" Tractor and Trailer No. 39—Finished in brilliant colors. Tractor is operated by a strong spring. Length over all 13 inches, width 4 inches. "Chuck" full of "PEP." Will run about 100 feet. Each in box.

No. 39N149. Per dozen. 8.73



Structo Lift Crane No. 114—Automatic control—reverses at will of operator. Positive lock stop at any point. Height 12 inches. Length 13 inches. Width 4⅝ inches. Finished in bright Auto Enamels. Each in box.

No. 39N145. Per dozen..... 8.73



Structo Sand Loader No. 51—A practical machine that lifts the sand in steel buckets and dumps it into trucks. Highly finished in Red, Blue and Black Enamels. Length 13 inches, width 5 inches, height 11 inches. Each in box.

No. 39N147.

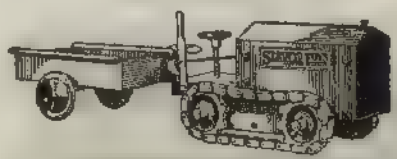
Per dozen..... 11.76

Each 1.10

Structo "Ready Built" Contractor's Truck No. 42—Twelve inches long, over all. Orange color; black trimming. Powerful spring motor; special body-raising attachment. Rear door can be opened and closed. Regular truck steering wheel and steering knuckles. Each in box.

No. 39N133.

Per dozen..... 10.80 Each..... 1.75



Structo "Ready Built" Caterpillar Tractor No. 44—An accurate model of a well known type tractor. The caterpillar traction is perfectly designed and like the real one in action. The trailer is included. Finished in green, red and black. Length over all 15 inches. Each in box.

No. 39N130.

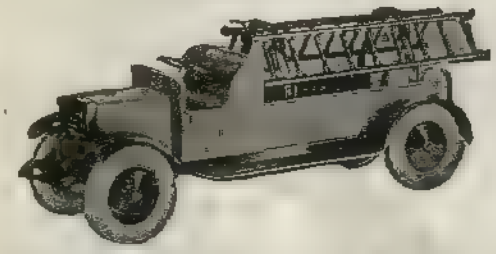
Per dozen.. . . 23.52 | Each..... 2.25

"Hercules" The Giant Size Toys That Cost Little Money

DUMP TRUCK

Substantially built of sheet metal. Black body, red wheels. Imitation balloon tires. Hoist that works just like a real truck. Length overall 18 inches. Each in a box.
No. 39N136. Per dozen..... 9.00 | Each..... .80

HOOK AND LADDER



Latest model of a modern hook and ladder truck is effectively reproduced in this sheet metal toy Equipped with two removable ladders and fire bell Black chassis, red body and wheels. Imitation balloon tires. Length 18 inches overall. Each in a box.
No. 39N140. Per dozen..... 9.00 | Each..... .80

ROADSTER

Rugged construction of sheet metal. Disappearing rumble seat and adjustable trunk rack. Large headlights. Red body. Black chassis and top. Red wheels. Imitation balloon tires. Length overall 18 inches. Each in a box.
No. 39N138. Per dozen..... 9.00 | Each..... .80

PULLMAN BUS

The new idea in present-day transportation is carried out in this giant sheet metal toy. Gray body, red wheels. Imitation balloon tires. Handsomely lettered on sides of body. Length 18 inches overall. Each in a box.
No. 39N139. Per dozen..... 9.00 | Each..... .80

WRECKING AUTO

Heavy duty, sheet metal construction. Ratchet lift operates the hoist in a most realistic manner. Black chassis, red body and wheels. Imitation balloon tires. Length overall 18 inches. Each in a box.
No. 39N137. Per dozen..... 9.00 | Each..... .80

FIRE ENGINE

A fitting companion to the hook and ladder is this sheet metal fire engine. Note the fire bell which operates by turning of crank. Black chassis, red body and wheels. Imitation balloon tires. Length 18 inches overall. Each in a box.
No. 39N141. Per dozen..... 9.00 | Each..... .80

A Big Feature

SAND CRANE WITH TURNTABLE BASE

Here is a real working toy that makes the flash of one that sells for more than twice the price. Made of sheet metal and is mechanically operated by new system of spiral gears, allowing one control wheel to operate both the raising and lowering of the beam and the opening and closing of the bucket at will. Red house, black roof, platform, beam and bucket. Note the great length overall—21 inches. Each in a box.
No. 39N135. Per dozen..... 9.00 | Each..... .80

BOTTLE CAPPERS

For putting up liquid or semi-liquid requiring an air-tight seal.

Caps any crown top bottle without the use of blocks or stands.

Cap holder prevents cap from slipping. Automatic grippers insures air-tight seal.

Light, compact, sanitary and attractive. Made of cold rolled steel, nickel plated.

No. 26 —C. B., w't per doz. 18 lbs. .....per dozen $42.00

ONE IN A PACKAGE

SURE SEAL BOTTLE CAPPER

IMPROVED MODEL

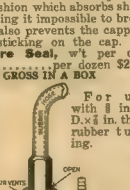
The Best Small Hand Capper made.

This capper is an improvement over the old Sure Seal Capper. The capping head has a solid back and is fastened to the hardwood handle with screws so that no amount of pounding can loosen the head from the handle. It also contains a patented rubber cushion which absorbs shock of blow, making it impossible to break bottles, and also prevents the capping head from sticking on the cap.

No. 24—Sure Seal, w't per doz. 2¼ lbs. .....per dozen $2.70

ONE GROSS IN A BOX

REVONOC SYPHON HOSE VALVES



For use with ⅜ in. I. D. x ⅛ in. thick rubber tubing.

Made of brass, nicely nickeled, it will not effect liquids and is not affected by them. After suction is once started it is not necessary to start it again as this valve keeps the liquid in the hose. Valve automatically shuts off liquid fluids when changing from one container to another.

Liquid flows down inside wall of bottle instead of splashing down center.

No. 30 —W't per doz. 1¼ lbs., per dozen $6.00

ONE DOZEN IN A CARTON

Hibbard BOTTLE CAPPERS

New Style, with spring that raises handle to proper position for capping.

All steel, nickel plated, instantaneous adjustment, caps any height bottle, practically indestructible, nothing to get out of order. Capping head has rubber cushion which automatically releases bottle after being capped. Hand grip handle.

No. 27 Hibbard —W't per doz. 45 lbs. .....per dozen $19.00

ONE DOZEN IN A CARTON

CRUSO BOTTLE CAPPERS

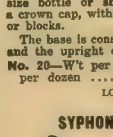
Quickly and easily adjusted to any size bottle or shaped bottle, using a crown cap, without the use of tools or blocks.

The base is constructed of cast iron and the upright of cold rolled steel.

No. 20—W't per doz. 48 lbs., per dozen $21.60

LOOSE

SYPHON SINKERS



No. 28—Double suction syphon sinkers, made of finest grey iron, retinned; the inlet is about ⅜ in. from bottom of container; this prevents dregs being drawn up, w't per doz. 8 lbs. .....per dozen $2.70

LOOSE

HOME USE CROWN CAPS

No. 40 — Lacquered both in and outside, composition cork lined, diam. inside 1 in., will fit any standard crown finished bottles, No. 1 size, per gross $0.45

No. 41—Lacquered inside, composition cork lined, diameter inside 1 in., will fit any No. 1 size, standard crown finished bottles, per gross $0.40

ALL OF THE ABOVE ARE FIRST QUALITY, NEWLY MADE CAPS. DO NOT CONFUSE WITH OLD OBSOLETE OR REJECT GOODS. W'T ABOUT 1 LB. TO A GROSS.

BOTTLE STOPPERS

No. 12. No. 13

IMPROVED LIGHTNING

All Wires Galvanized

For all home made beverages, catsup, grape juice, etc.

No. 11—Galvanized metal caps, black rubber corks. All wires galvanized and assembled, w't per gross 9 lbs., per gross $4.60

No. 13—Porcelain bottle stoppers with red rubber gaskets. All wires galvanized and assembled. W't per gross 9 lbs. .....per gross $5.20

EXTRA CORKS AND DISCS

No. 120—Black rubber corks for No. 12 Lightning Stoppers, per gross $1.80

No. 130—Red rubber discs for No. 13 Lightning Stoppers, per gross $1.00

Our Very Best is the Very Best.

Target Practice and Ball Gum Vender
A Money Making Machine

Machine No. A7934

Stand No. A7923

One Ball Gum Given for Every Cent in Slot

THIS Target Practice and Ball Gum Machine is the most attractive and efficient vender ever put on the market. The mechanism of this machine is very simple, as it slides into a groove which runs the full length of the cabinet. No screws are used and it takes only a few seconds to remove this mechanism.

To play the Target Machine Ball Gum Vender, simply insert a penny in the pistol, aim at the Bull's Eye, and pull the trigger. If Bull's Eye is scored, penny is returned thru cup on side of machine. Gum delivery mechanism is made of metal. By pushing lever at front of machine, ball of gum is delivered for each penny that drops into machine. When pennies drop into machine, no gum is delivered unless the lever is pushed. Gum is attractively displayed thru glass top and sides.

Pistol is made of aluminum with brushed velvet finish and shoots penny only.

The cabinet is substantially made from ¾ inch seasoned wood, finished in beautiful mahogany Size is 7 in. x 12⅜ in. x 17¼ in. Weight 14 lbs. Holds 700 balls of gum and has plenty of room for 700 pennies.

No. A7934. Each	23.50
In Lots of 5. Each	22.50
In Lots of 10. Each	21.50

Let the "movies" sell Ted Toys for you!

Ted Toys

have tied up with

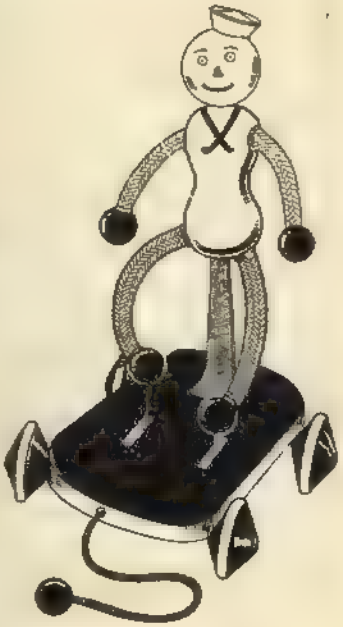
Billy Dooley COMEDIES

PRODUCED BY CHRISTIE

Let these rollicking, mirth-making movie comedies sell Ted Toys for you! Watch the action of one of Ted Toys Walking Sailors and then see its uncanny resemblance to Billy Dooley, the hero of a new series of comedies. (In all his pictures Dooley plays the part of a happy-go-lucky "gob.")

Through a special arrangement with Educational Film Exchanges, Inc., distributors of Billy Dooley Comedies, Ted Toy dealers may profit by this unique circumstance. You can make arrangements with a theatre in your community to place Ted Toys in its lobby with photographs from the picture while it is running. A card, announcing that you sell these toys, will direct purchasers to your store. The theatre will be glad to give you additional photos with which to make displays in your windows or in the store. There will also be available *free* mats of Billy Dooley and of the toy for use in your newspaper ads.

Make this unusual arrangement work for you . . . it can—and will—sell Ted Toys for you. Get in touch with your jobber now . . . *and write us immediately for name of theatre that is booking Billy Dooley Comedies.* You may make arrangements through us or deal direct with the theatre. Send this coupon today!



Ted Toys constitute the finest line of mechanical toys of their kind on the market. -If you don't know them write for catalog of complete line.

620 BROADWAY **NEW YORK**

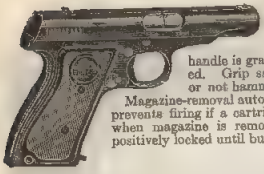
AUTOMATIC PISTOLS.

REMINGTON.

.32 AND .380 CALIBER.



Hammerless, with side ejection. Automatic grip safety prevents firing unless handle is grasped and trigger pulled. Grip safety showing whether or not hammer is cocked. Magazine-removal automatic safety sear block prevents firing if a cartridge is left in chamber when magazine is removed. Breech remains positively locked until bullet has left the muzzle.

Each

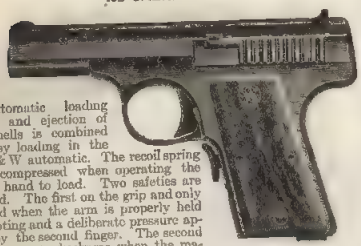
No. S-51—.32 caliber; dull black; 7 shot; length over all 6⅝ inches; weight, 19 ounces.....$25.20

No. S-51—.380 caliber; dull black; 7-shot; length over all, 6⅝ inches; weight, 21 ounces..... 25.20

No. S-51M—Extra magazines for .32 or .380..... 1.60

SMITH AND WESSON.

.32 CALIBER.



Automatic loading cocking and ejection of fired shells is combined with easy loading in the new S. & W automatic. The recoil spring is not compressed when operating the arm by hand to load. Two safeties are provided. The first on the grip and only operated when the arm is properly held for shooting and a deliberate pressure applied by the second finger. The second safety prevents discharge when the magazine is withdrawn.

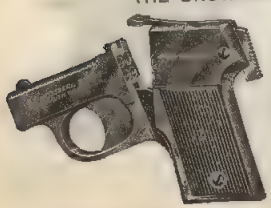
Rigid frame and barrel. Simple dismounting and assembling and the finest of workmanship and material throughout.

Each

No. S-SW32—.32 caliber; capacity of magazine, 7 shots; length of barrel, 3⅛ inches; length over all, 6⅛ inches; cartridge, .32 rimless smokeless, stock, Circassian walnut, sights, wide flat top; finish, blue black; weight, 25 ounces.....$53.60

DERRINGERS.

THE BROWNIE.



The four bores in the 2½-inch barrel are rifled and chambered to receive standard 22 caliber short, long and long rifle ammunition. The finish is blue, with black walnut stock.

Each

No. S-BR—.22 Caliber; four shots, 2½ inch barrel, total length, 4½ inches; weight each, 10 ounces.....$6.50

DERRINGERS.

REMINGTON.

Double Barrel, Blued.

Each

No. S-13B—Derringer, .41 caliber, short R. F.; 3-inch barrels; rubber stock; weight, 11 ounces.....$18.40

TARGET PISTOLS.

STEVENS.

OFF-HAND.

The hunters and trappers friend. Known the world over for its accuracy.

Round barrel, with octagon breech, blued; selected black walnut stock; sporting rear and bead front sights. Ammunition, 22 long rifle. (The 22 long rifle cartridge was originated by the J. Stevens Arms Co.)

Each

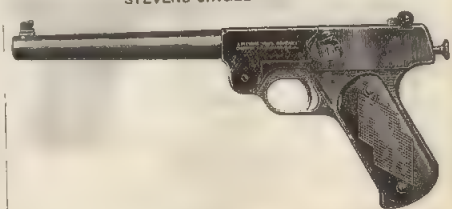
No. 35-6—6-inch barrel.....$18.60

No. 35-8—8-inch barrel..... 20.00

No. 35-8-410—410 gauge; 8-inch full choke blued barrel; walnut stock; takes 2 or 2½-inch shell . . . 20.00

No. 35-410—410 gauge; 12¼-inch; otherwise as above ... 20.00

STEVENS SINGLE SHOT.



Stevens single shot target pistol, takes any standard .22 caliber long rifle; rim fire cartridge.

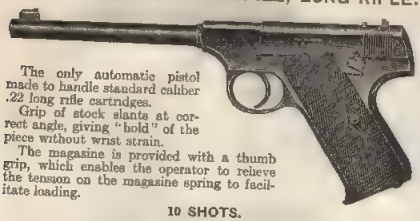
Each

No. 10—.22 caliber; single shot; length of barrel, 8 inches; weight each, 2¼ lbs.....$24.00

COLTS.

GUARANTEED FOR SMOKELESS POWDER.

TARGET MODEL, CALIBER .22, LONG RIFLE.



The only automatic pistol made to handle standard caliber .22 long rifle cartridges.

Grip of stock slants at correct angle, giving "hold" of the piece without wrist strain.

The magazine is provided with a thumb grip, which enables the operator to relieve the tension on the magazine spring to facilitate loading.

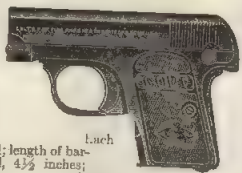
10 SHOTS.

Each

No. 22AT—.22 caliber; full blued; checked English walnut stock; barrel, 6½ inches; length over all, 10⅜ inches, weight, 28 ounces; bead front sight, adjustable for windage; distance between sights, 9 inches $52.20

Extra Magazines, for .22 caliber 3.20

POCKET MODEL CALIBER .25.



Being flat and compact (only 13 ounces in weight and 4½ inches long), this arm can be conveniently carried in a vest pocket.

Takes .25 caliber full metal patched cartridges.

6 SHOTS.

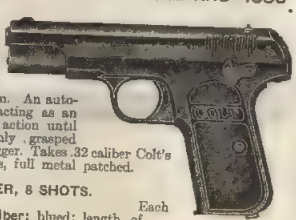
Each

No. 25AP—.25 caliber; blued; length of barrel, 2 inches; length over all, 4½ inches; weight, 13 ounces $27.20

No. 25AN—Same as No. 25AP, but nickel plated and with pearl handles $35.00

Extra Magazines, for .25 caliber 1.60

POCKET MODEL, CALIBERS .32 AND .380



Slide lock indicates when the arm is cocked and, when engaged in the slide cut, disconnects the trigger from the operating mechanism. An automatic safety, also acting as an indicator, locks the action until the handle is firmly grasped when pulling the trigger. Takes .32 caliber Colt's automatic cartridges, full metal patched.

.32 CALIBER, 8 SHOTS.

Each

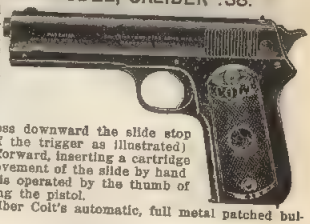
No. 32AP—.32 caliber; blued; length of barrel, 3¾ inches; length over all, 6¾ inches; weight, 23 ounces $32.70

.380 CALIBER, 7 SHOTS.

No. 380AP—.380 caliber; takes .380 Colts automatic cartridges; blued, with checked wood stocks; length of barrel, 3¾ inches; length over all, 6¾ inches; weight, 23 ounces; otherwise same as No. 32AP 32.70

Extra Magazines, for .32 and .380 calibers 1.60

POCKET MODEL, CALIBER .38.



In this model the slide remains open after firing the last cartridge. When reloading the arm in this position, insert the magazine, then press downward the slide stop (to the rear of the trigger as illustrated) The slide goes forward, inserting a cartridge without any movement of the slide by hand The slide stop is operated by the thumb of the hand holding the pistol.

Takes .38 caliber Colt's automatic, full metal patched bullet.

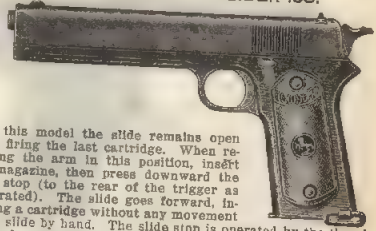
7 SHOTS.

Each.

No. 38AP—.38 caliber, blued; length of barrel 4½ inches; length over all, 7½ inches; weight, 32 ozs. $67.40

Extra Magazine, for .38 caliber 2.00

MILITARY MODEL CALIBER .38.



In this model the slide remains open after firing the last cartridge. When reloading the arm in this position, insert the magazine, then press downward the slide stop (to the rear of the trigger as illustrated). The slide goes forward, inserting a cartridge without any movement of the slide by hand. The slide stop is operated by the thumb of the hand holding the pistol.

Takes .38 caliber Colt's automatic cartridges, full metal patched bullet.

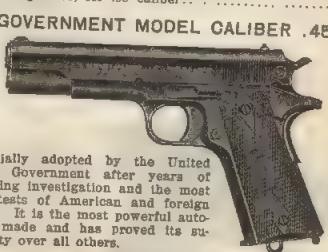
8 SHOTS.

Each.

No. 38AM—.38 caliber, blued; length of barrel, 6 inches; length over all, 9 inches; weight, 38 ozs. $69.60

Extra Magazines, for .38 caliber 2.00

GOVERNMENT MODEL CALIBER .45.



Officially adopted by the United States Government after years of searching investigation and the most rigid tests of American and foreign makes. It is the most powerful automatic made and has proved its superiority over all others.

Muzzle velocity of bullet, 900 feet per second. Penetration in ⅞-inch pine boards: At 225 feet, 7 boards; at 325 feet, 6¼ boards.

7 SHOTS.

Each

No. 45AS—.45 caliber; blued; checked walnut stocks; length of barrel, 5 ins.; length over all, 8⅛ ins.; weight, 39 oz. . $58.70

Extra Magazines, for .45 caliber 2.40

The Kar With the Perfect Rowing Motion

Has made instant friends of all who have seen it through the appeal of its sturdy construction and the physical development feature of the rowing motion.

What They Say About It

"The best constructed mechanical vehicle we have seen." "I want one for my boy so he can get that **rowing motion** development." A mother said, "Just think, son, it can be bought for less than twenty dollars." Another visitor—a father—"As soon as Spring comes I want one for my boy to give him that development."

The ELITE-SPECIAL Cleaner

PRICE
$39.50

SAVE YOUR RUGS AND CARPETS

By using THE ELITE SPECIAL a few minutes each day, you PRESERVE their LUSTER and make them last much longer. It keeps them fresh and clean by suspending the carpet from the floor with its strong suction, the air being drawn through the carpet from underneath.

THE ELITE SPECIAL

LIGHTEST weight, SIMPLEST, most EFFICIENT, AND LEAST EXPENSIVE Cleaner on the market. Is designed not only to excel all similar cleaners, but an extra margin for strength and durability is our watchword.
The advanced ideas embodied in the ELITE-SPECIAL are the result of practical experience.

SPECIFICATIONS

MOTOR—*Dumore*. Universal high speed type. Extra large and powerful. Cast aluminum mounted. Reservoir oil cups.
FAN—New Turbin Type, one piece aluminum, increased suction.
FLOOR NOZZLE—Highly polished aluminum. 12-inch sweep.
BRUSH—Soft bristles; adjustable drag, with spring tension.
BAG—Extra large, 36x12 inches. Easy to empty.
HANDLE—Aluminum pistol grip. Switch in handle.
WEIGHT—About 9 pounds.

BUILT TO ENDURE

FULLY GUARANTEED

against defective material and workmanship.

IMPORTANT

When ordering be sure to state voltage. If for alternating current, state also the number of cycles. Can be supplied for voltage from 32 to 250 volts.

STANDARD SET OF ATTACHMENTS for Cleaning Draperies, Upholstery, Radiators, etc..... $8.50

Just as the men folks in the office, store, factory or farm are surrounded by the best mechanical aids of all kinds, so women in the home should have these helpful labor saving devices.

Ordinary cleaning methods remove only a small portion of the surface dirt and raise clouds of germ laden dust to settle again The drudgery is never ending. The ELITE sucks up all the dust and puts it in a dust proof bag to be taken out doors and emptied.

DEALERS CASH IN BIG! GET YOUR SHARE OF PROFITS FROM ELITE CLEANERS. The biggest value ever offered for the money. Show and demonstrate the ELITE-SPECIAL to your trade. Each one sold sells more. Every home with electricity needs a Vacuum Cleaner. ORDER ONE NOW for your coming season.

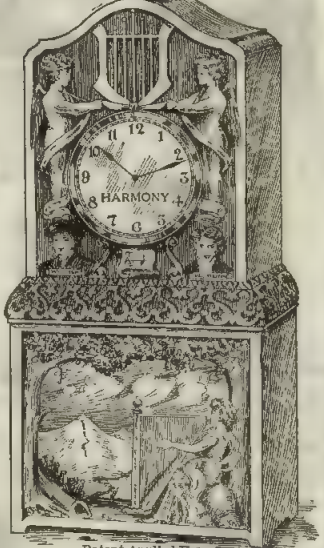
No. 60W279. Each.... 9.50

The Harmony Musical Clock

A NEW DEPARTURE IN CLOCKS

The most beautiful and artistic design ever originated. It is not only an accurate timekeeper but also affords a great deal of pleasure, as the musical part can be played as desired, independent of the clock which need not be disturbed. It is also an ornament and will add charm and grace to any room in the home.

A great deal of time, thought and study have been expended to make this a decidedly novel, useful, ornamental and desirable article. It is sure to become exceedingly popular.

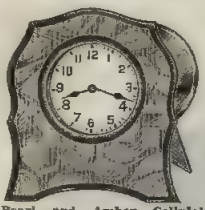


Patent Applied For

Harmony Musical Clock, solid metal case, gold finish, height 11 inches, width 5 inches. This clock was originated and designed by us and is a strictly high-class article. The workmanship is unexcelled and it is the only clock of its kind on the market. The two figures of cherubs in the upper panel are well proportioned in bas relief. The ribbon streamer is attached to a lyre occupying the upper center of case. Directly under the cherubs are life-like bust figures of Wagner and Beethoven, the great composers; between these is a sheet of music showing clef and notes. The oval border in center is neatly executed in a fancy scroll design. The lower half of case is an excellent design of trees and mountains, producing a beautiful scenic effect. The figure playing harp is in bas relief and perfect proportion. The movement is guaranteed American made, 32-hour time, 2½ inch dial easily read from a considerable distance.

Below the movement is fitted a well constructed music box which play two different tunes. This is independent of clock and can be wound and played whenever desired, which is a very desirable feature. The clock is certain to appeal strongly to all lovers of music, which means almost everybody. It is suitable for use in parlor, den, or living room, and is so artistic that it will harmonize with any color scheme or style of furniture.
No. 60W72 Each..... 4.25

Novelty Celluloid Clocks



Pearl and Amber Celluloid Clock. The front of same being a pearl gray finish and the top of amber color, height 4 in., width 30 in. Latest color to match ivory goods, fitted with an American movement, fully guaranteed.

TOKHEIM DISPENSERS

Are easy to operate and practically foolproof. They stay on the job year after year, in the face of changing crews of operators, because they are so designed that even the most "mentally-left-handed" find it hard to discover a *wrong* way of operating them.

Their simplicity, sturdiness and ease of operation is the result of 25 years' experience in building visible gasoline pumps.

Built in 5 and 10 gallon sizes, hand operated and motor driven.

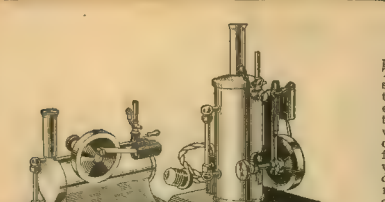
Hibbard Hardware for Hard-Wear



No. C3000. No. C3001

EMPIRE ELECTRIC TOY STEAM ENGINES

These engines have real power. They develop 1/12 horse power and run on either direct or alternating current. There is a safety valve—a real water gauge glass—a shrill little whistle, a fly wheel and a driving pulley—just the same as the big, practical working engines you see every day where building or road-making or other industry is moving along. The only difference is in heating the water to steam. The EMPIRE is heated by "juice" instead of a flame. There is no danger. No alcohol to spill—no flame—nothing to burn or scorch the table or floor. They will run a miniature shop of ten pieces. Hitch it to small dynamo and it will light miniature bulbs. Ingenious boys make small shafting jobs that utilize the 1/12 horse power energy developed by them. They are designed and built to PERFORM. They operate on any standard house lighting circuit.

Equipped with safety valve, whistle, water glass, driving pulley, fly wheel. Six-foot cord and separable plug with each engine.

Fittings: Brass and steel, highly nickeled and polished. Base: Cast steel, finished in bright red and nickel trimmings. Boiler: Brass, to prevent rust. Heating Element: Low heat, no danger of burn-out. Size: 9½×7×6 in.

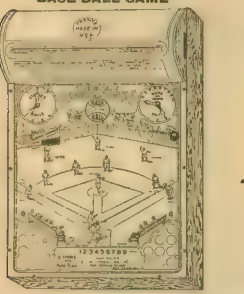
No. C3000—Horizontal Type, w't each 6 lbs., each *$12.00*

No. C3001—Vertical Type, w't each 6 lbs. each *$12.00*

ONE IN A BOX

HUSTLER GAMES

BASE BALL GAME



Every play known to the "National Pastime" instantly recorded on revolving drum. By pressing on the push button the wheel is started to spin revealing the plays opposite the space, which shows condition on bases.

The plays that can be made on this board have been compiled from the actual plays in the world series of a number of seasons.

Fans are enthusiastic about the game as it fills in the long gaps between regular games. It makes fans of the ladies and children who have never seen a game as it teaches them how the actual games are played. It is not only a fine thing for homes but for club rooms; news stands, recreation centers; Y. M. C. A'S, wherever a bunch of youths or men gather.

This is a product of quality and will last for years. It is not alone a holiday game but an all around seller. Finished in handsomely lithograph diamond in four colors.

No. C100—Size of board 9×13½ in.....per dozen *$24.00*

EACH GAME IS PACKED IN A SEPARATE CARTON. SHIPPING WEIGHT TWO POUNDS ONE DOZEN CARTONS IN A BOX

INTERCOLLEGIATE FOOTBALL GAME

"Intercollegiate Football" is mechanically the same as "The Great American Game" of baseball. A revolving drum, on which is printed all the possible plays known to football, is set in motion by the compression of a push button on the right side of the gridiron. When the button is released the drum automatically stops and reveals the play directing the movement of the teams.

The gridiron is handsomely lithographed in four colors on sheet steel. Each toy is packed in an elaborately printed paper carton with a "Silent salesman" display card enclosed.

No. C200—W't per doz. 32 lbs.....per dozen *$24.00*

No. 31N28. Per dozen..... 3.92

Here's Peter Rabbit's Brother

Teter-Rabbit

Read His Story to the Children

It was raining outside, and little Billy wandered aimlessly about the house. A healthy, "peppy" youngster was Billy, and he wanted *action!*

Mother finally telephoned down town to Daddy, "You go over to Santa Claus' shop (you know he makes all the *nicest* toys), and see if you can't find something for our restless Billy."

Billy's eyes opened wide when he saw what his father had under his arm when he came home that night. "Oh, Daddy," he cried, "did you bring that for me? Oh, you good Daddy! And it's just what I wanted, isn't it, Mother?"

"This," said Daddy, "is Teter-Rabbit, your old friend Peter Rabbit's brother. I told Santa that Billy needed something he could play with out-of-doors as well as in; something that would make use of that surplus energy of his and make his muscles strong and firm; something that would not break or get out of order and would last a long, long time. So he made this beautiful thing and named it Teter-Rabbit, Peter Rabbit's brother."

And that, children, is how Teter-Rabbit came into being—for just such little folk as you. And now you can find him in most stores that handle good toys. Have Daddy and Mother take you to see him—he will be a real playmate for you.

ALL THE ABOVE HALF DOZEN IN A BOX

GENUINE RUSSELL'S GREEN RIVER SHEATH OR FISH KNIVES

These knives are generally known throughout the trade as sheath knives, which dates back to the time of the square rigged ships, when all sailors carried a knife ready for use and it was necessary to carry it in a sheath on their belt. From that time on fishermen have always called for a sheath knife although a sheath never accompanied same.

Used by fishermen along the Gulf, Atlantic and Pacific Coast for general cleaning and trimming of fish, cutting bait, etc.; used in canneries for packing fish. Each knife fully warranted.

WITHOUT SHEATHS

No. C215—Length of blade 4¼ in., 4 in. cocobola handle is securely fastened with 2 large brass saw screw rivets; **do not come with sheaths**.....per dozen **$8.70**

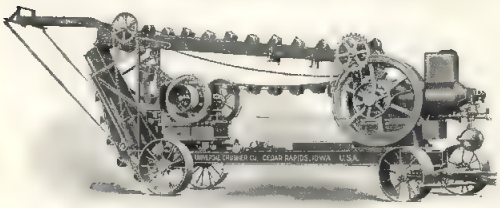
No. C-726—Cafenoira; plain glass bowl and funnel; silver plated frame; ebonized handles; capacity, 6 cups. **$9.34**

No. C-788 — Cafenoira; capacity 8 cups, otherwise as No. C-726. . . . . **10.70**

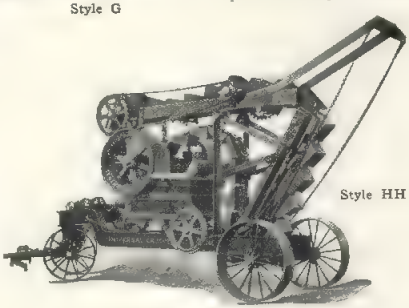
UNIVERSAL PORTABLE CRUSHERS



Style G

Style G shows method of mounting Crusher on Steel Truck with folding elevator and kerosene or gasoline engine. It is especially suitable for use with Crushers of 30, 50, 60 and 100 ton capacity, and is the favorite style of mounting for Contractors, Good Roads work and general farm club work where a self contained rig is wanted that is easily moved from place to place and is ready for work without any extra labor or expense to set up.

Style HH shows crusher mounted on steel truck with folding elevator without power. This style is used for all our medium and heavy weight crushers ranging in capacity from 50 to 450 tons per 10-hour day. Our cut-under truck is the most convenient and practical mounting on the market. Notice that the goosneck is a continuation of the I Beam in one piece, insuring great strength and rigidity to the truck frame.



Style HH

Style D

Style D shows our **Contractor's Outfit**, complete with bin, screen elevator and Crusher. This outfit is equipped especially for road and other contract work where a quantity of different sizes of rock is required. This style equipped with different sizes of Crushers and Portable Bin makes the most practical and up-to-date outfit on the market, due to its light weight and great capacity on all classes of work.

The bin can be lowered on its trucks and moved separately or attached to the Crusher outfit.

Specifications for modern concrete construction call for large quantities of fine crushed stone and gravel. It is here that Universal Crushers have always led the field. Our new 1924 model Gravel and Rejection Crusher illustrated by Fig GR is a perfect machine for this class of work.

The 810 machine may be sectionalized for mule-back transportation.

WHAT OUR GRAVEL AND REJECTION CRUSHERS WILL DO

Crush your oversize gravel, rejections and all other refractory materials to ¾-in. and finer if desired, in one operation

Eliminate elaborate and costly installations for the production of large quantities of fine materials

Enable crushed stone producers to meet highway specifications in any state in the Union.

Produce a finer and more uniform product than any jaw crusher on the market.

Give a wider range in the relation of the feed to the size of the finished product than any other crusher manufactured.

Produce any size material down to ¼-in. adjustment being made in a few minutes while the machine is in operation.

Eliminate heavy costly machinery in the mining field.

Meet every demand for a light unit for use in portable outfits.

Figure AX illustrates our large opening STEEL crushers for heavy duty general crushing. The **1500** and **1200** lines are the same except that the **1200** line is equipped with special heavy jaw changing the angle of grip so that they are particularly well suited for handling roundheads and all stone of the trap rock variety. These lines meet every demand for a large capacity machine that will stand the severest strains of the crushing operation and still be light enough for use in portable outfits Behind them are many years of manufacturing and designing skill representing the very best in jaw crusher manufacture. The frames are of steel, strong and rigid. The heart of the crusher —the bearings are extra large and of bronze. These with a positive system of lubrication reduce bearing trouble to a minimum. When desired, large size pitmans can be furnished with water jacket. Notice the massive, well reinforced frames, heavy pitman, corrugated jaws, large shaft and rigid appearance of the machine throughout

Contractors, Road Builders, Sand and Gravel Pit Operators, Quarry Men, Mine Operators and all interested in crushed stone production, whatever may be your requirements, large or small for hard or soft stone, there is a Universal that is fitted to your job. Notice the simplicity of design as shown on the first page, the toggle action, the lubricating system and the instant adjusting device for regulating the size of the crushed product.

STRONG, LIGHT, DURABLE and DEPENDABLE, UNIVERSAL CRUSHERS represent the biggest crusher value on the market today. We welcome any opportunity to establish this claim.

Owing to the wide variation in the friability of materials the capacities given in the tables are approximate and based on ordinary stone

REAL SOCKET WRENCHES—
every car-owner's Early Purchase!

Millions of motorists are first class prospects for REAL socket wrenches—like the Walden-Worcester sets shown above

Each Walden-Worcester Car Owner's Individual set is built to reach and fit definite bolts and nuts on a particular car Sockets slip firmly on nuts—There is a feel of power in the grip . . And always room for a turn without cramping

There are several sets to choose from. Definite-Purpose types and Interchangeable types. Some in Leatherette folds and others in heavy canvas pocket-rolls. Each a sale-on-sight item in the hands of any new car-owner *To display them is to sell them Dealers everywhere are proving this.*

Order an assortment from any of our jobbers—keep them on display—and watch results.

WALDEN—WORCESTER

The original and largest exclusive manufacturers of All Steel, Socket Wrenches,—In the World

475 SHREWSBURY ST., WORCESTER, MASS., U. S. A.

A display is just as necessary in an Accessory Window as in a Drug Window. Many dealers recognize this, and, to assist them, I am giving away ten thousand eight color window pieces. One display comes packed with ten Balloon Jacks — three styles shown on this page — just the jacks that car owners will want for the touring season. Put this display in your window and you will be amazed at the jacks it will sell to people who have had average tire changing experience on the road.

Willard Walker

President
Walker Manufacturing Co.
Racine, Wis.

The No. 520 telescoping screw jack, for the cars with balloon tires and low axles, and cars equipped with bumpers, spare tires, etc.

The No. 126 is a real man's jack—strong—sturdy—with adjustable foot for any height of lift, and long pumping type handle. There isn't a motor car lift you can't make with the 126.

The No. 620 steel foot lift jack is built to use on small cars equipped with balloon tires and any size cord or fabric tire.

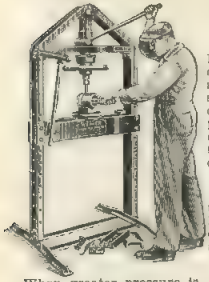
*WEAVER HI-SPEED PRESS

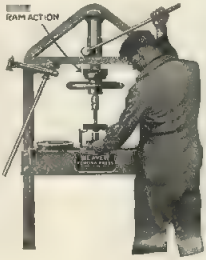


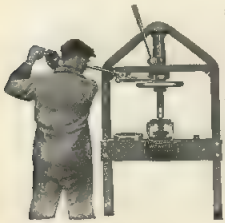
The Weaver Hi-Speed Press is an extremely efficient press for general garage work, combining the speed, sensitiveness and accuracy of a rack and pinion press with the great power of an arbor press—really two presses at the price of one.

For light or delicate work up to 2000 lbs. the Hi-Speed leverage is preferable on account of its superior speed, as shown in illustration.

When greater pressure is required the screw can be spun down in contact with work and ratchet lever engaged, as shown in illustration. In this way pressure from 1 pound to 28 tons can be exerted on the work without moving it, once it is properly placed in position under screw.

The great time and labor saving advantages of this feature are readily apparent. The adjustable bolster gives unobstructed space inside the frame, permitting very bulky work to be handled. The work can thus always be brought in direct contact with the screw, eliminating the need of any extension bars, etc.





The quick release construction of the hand wheel enables the operator to relieve pressure on the work instantly by one reverse stroke of the lever, making this an extremely quick acting press

Weight of wheel and screw are carried on heavy ball bearings, enabling screw to be spun up or down its entire length in a few seconds

Vertical movement of both levers makes it unnecessary to bolt press to floor and permits press to be moved about shop or turned over on its side and operated horizontally to handle long shafts, etc.

Frame constructed of 5 in. channel steel. Hand wheel 15 in. in diameter. 2 in. screw with approximately 10 in. range of movement. Width between frame uprights 32 in. Height over all 72 in. Recommended capacity 28 tons. Two pressure blocks, two vise blocks and two sections of 6 in. channel steel regularly furnished

		Each
No. WD12	—Shipping Weight 460 Lbs.	$110.00

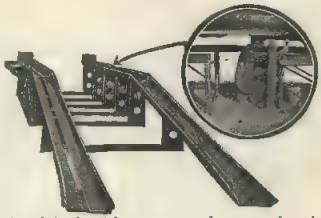
*SERVICE RACKS

WEAVER



Designed to furnish an easy, safe means for elevating cars to a convenient position for crank case service, lubrication and for inspection and adjustments on the under side of cars. It will enable you to render more prompt, efficient service that will attract new customers and increase sales of gas and oil.

Safe for the most inexperienced driver Lower ends of inclined sections are spread, allowing wheels to enter easily, and the sides of the treads are high and are curled over to prevent damage to tires. End bumpers are amply high and form part of tread.

An exclusive feature, the convenience of which every mechanic will appreciate, is the gate in the side of the rack This provides a quicker and unobstructed way for the workman to get under the car. Rack can be assembled so gate will be located on either right or left side.

Note that when open the end of gate forms stop that makes it impossible for car to leave rack until gate is closed.

When closed, gate locks automatically.

Space between runways is unobstructed entire length of rack, making any portion of under side of car immediately accessible

Running boards are located on each side for convenience of mechanics when filling crank case

Constructed of pressed steel, securely riveted to cross members and braced to insure rigidity. It is shipped knocked down and can easily be set up wherever desired.

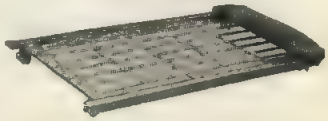
Length of horizontal treads 14 ft., length of inclined treads 12 ft., height 26 in.

Lumber for running boards not provided.

		Each
No. WL10	—Weight Each 900 Lbs., Complete	$127 00
No. WL11	—Extra Incline for Service Rack	37.50

CREEPERS

PAMCO STEEL



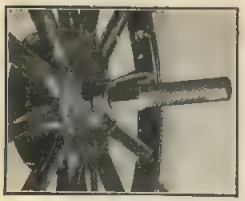
Steel Construction throughout, with slats of steel hand riveted to frame. Padded head rest bolted firmly to frame.

Built for heavy duty service, sets low to operate easily under cars equipped with balloon tires. Roller bearing casters.

		Each
Pamco	—20 in. Wide x 42 in. Long	$10 50

WHEEL PULLERS

NATIONAL No. M14



The "National" Wheel Puller is made of chrome nickel steel, properly machined and heat treated—the kind of steel the automobile manufacturers use in their axle shafts, which is tough and hard and will give real service. To operate the Wheel Puller it is screwed to the end of the axle shaft The two solid ends thus brought together entirely protect the threads of the shaft. An eighth of an inch will remain between the puller and the hub. Strike end of puller and the jar loosens the wheel.

The principle is by no means new, but it is a better and faster method of protecting the threads while you jar the wheel loose.

Especially recommended for removing wire wheels.

Each

Thread Size 1 in. 14—Will Fit the Following Cars Studebaker Heavy 6 and Special 6, Olds 4, 1921-1922, Oakland New Model 6-66, Auburn, Dixie Flyer, Elgin and Haynes $2.75

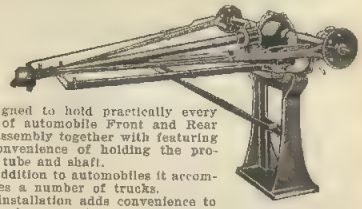
*AXLE STANDS

CANEDY-OTTO UNIVERSAL FRONT AND REAR



Designed to hold practically every make of automobile Front and Rear Axle assembly together with featuring the convenience of holding the propeller tube and shaft.

In addition to automobiles it accommodates a number of trucks.

Its installation adds convenience to the repair man and it is one of the greatest time saving tools that can be placed in any service station.

The stand features two vises, one tipping to the side so axle housing is accessible for removing the roller bearing sleeve, the other vise turns on a spindle to remove the differential and axle shaft. A substantial grease pan, which is removable, is furnished to catch grease and oil when disassembling differential

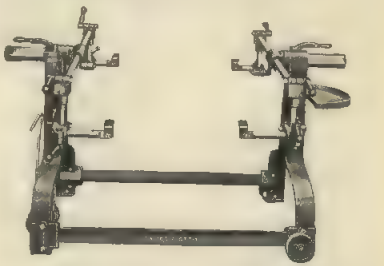
Tool Tray and Axle Support can be folded. Stability permits running of axle to determine smoothness of operation

Each

No. W014—Length Open 50 in., Width 20 in., Height 34 in., Weight 205 Lbs $49.00

*MOTOR STANDS

CANEDY-OTTO UNIVERSAL



Takes Any Motor, No Attachments

Designed to meet every requirement needed in the assembling and disassembling of all motors.

The round bars are accurately machined, which permits the fixture heads to be easily moved to any position and turned at any angle and instantly clamped. The up and down, in and out, and round and round movement permits the fixtures to reach any convenient place for bolting to any part of motor. Due to the universality of the sliding friction head the adjustable L Clamps will fasten to the motor either horizontally or vertically.

Motor can be completely rotated in stand and clamp to any desired position by means of a friction stop.

This stand is used in conjunction with the C-O Burning-In Machine, to accomplish the feature of running in all motors under their own power.

Each of the friction heads has a holding power of 2½ tons—several times the weight of any type motor.

Each

No. W0145—Height Over All 38 in., Floor Space (Fully Extended) 50x32 in., Complete with Handy Tool Tray, Weight Each Complete 420 Lbs. $75.00

A hundred thousand!

In another sixty days, White Cross dealers will have reached the hundred thousand mark in sales of White Cross Electric Stoves and Ranges. From the White Cross Electric Stove retailing at $3.80 to the Electric Cabinet Range at $29.00, White Cross quality is proving itself in rapidly mounting sales. Dealers have already sold more than 50,000 of the White Cross Two Burner Electric Stoves at $6.00—and indications point to the sale of 50,000 White Cross Electric Cabinet Ranges by White Cross dealers in the next six months!

No. 100

$6.00 Retail

WHITE CROSS

Page advertisements in both Liberty and Good Housekeeping have produced a steady demand of White Cross dealers everywhere. And new and forceful page ads in January, February and March will keep on impressing millions of homes with the outstanding White Cross values. Never before have buyers of Electric Stoves and Ranges been offered so much for so little money. And never before have hardware dealers who sell electric appliances been offered such an easy selling line.

No. 102

Retails at $14.00

The White Cross line of Electric Stoves and Ranges is complete. It embraces values that are breaking sales records for White Cross dealers everywhere.

9 times in 10 it's CRESCENT

Back of the hardware man's report that "nine times in ten when a wrench is wanted for automobile work the customer buys a Crescent" is the discovery by legions of car owners that a Crescent is the best tool for nine out of ten ordinary adjustments. It does work that would require a whole set of fixed-type wrenches. Naturally there is a steady demand for Crescent Wrenches as well as other Crescent Tools.

Our new booklet "Making the most of your motor car" tells car owners how to prevent squeaks and reduce upkeep expense by the systematic use of Crescent Tools. We'll be glad to mail a supply for your counter if you say so.

CRESCENT TOOL CO.
229 Harrison St., Jamestown, N.Y.
Originators of the Crescent Wrench

For car or radio

Crescent Long Nose Pliers have been designed to handle small pins, screws and nuts in narrow quarters. They are equally well fitted to meet the needs of radio fans in bending or cutting wire.

GOGGLES

FYBER-WELD

Made throughout of special vulcanized fibre. The cups are shaped to fit about the eyes perfectly and being made of fibre, which is a non-conductor of heat and electricity, renders this goggle exceptionally comfortable and serviceable.

Ventilation is given through a special slot in cup. Hinged nose bridge allows the operator to rest goggles on his forehead when not in use.

Lenses are easily interchangeable and head band can be adjusted to fit any head.

ROW-CYCLE EXERCIZER.

Power is applied to the Exercizer by both hands and feet. Action is the same as operating a railway velocipede or rowing a boat. It is steered by turning the hand lever. Moves forward or backward as desired and takes short curves. By reason of the double power applied, less effort is required to operate and the action brings into play the muscles of the legs, arms and back, thus furnishing the necessary development to the entire body.

It is nicely designed, thoroughly well made, has both bearings working on polished shafts and is equipped only with Hubbard silent wire wheels and Town and Country clincher rubber tires.

Each

No. S8-0—Junior Row-Cycle; length, 30 inches; weight, 17 lbs. **$10.50**

Frog Crickets, Rattlers and Bells

Metal Frog Cricket. Very loud, top is exact shape of a frog, mounted on clock spring steel. Is durable and produces a loud telegraph key click. 1⅞ inches long. One gross in box.

No. 13N52. Per gross. ... .75

Tea Bell, 2½ inches diameter, full nickel plated. Black enameled wood handle. 1 dozen in box.

No. 13N47.
Per dozen..... .68

Natural color Brass Bell. Make beautiful favors at banquet. Place cards may be tied in handle. Height 3 inches, diameter of bell 2 inches. One dozen in box.

No. 13N48.
Per gross. 7.75
Per dozen. .70

Carnival Ball Clapper, made of a hollow cylinder of wood, slotted with neat, turned handle. This gives it a xylophonic sound, a ball clapper attached on each side with spring produces a clatter very loud but pleasant. Two dozen in box.

No. 13N64.
Per gross. 3.50 | Per dozen. .30

IMPORTED BALL CLAPPER

Style same as No. 13N64, but with metal balls, and comic pictures on sides. Length 5⅛ in. ½ gross in box.

No. 13N77.
Per gross. 2.75 | Per dozen. .25

Ball Clapper, finished in bright contrasting colors. This is a very attractive item and makes a loud sound. Size 6 inches long.

No. 13N61.
Per gross 5.00
Per dozen ..... .45

Cathell. Copper finish height 1 inch. Fine bell metal. A great item for masquerades, carnivals, etc. Diameter bottom 1 inch; height 1⅛ inch; shows full size. Three dozen in box.

No. 13N87.
Per gross. 4.00 , Per dozen. .35

Sheep Bell, similar to above; height 1⅞ in., width 1¾ in. One dozen in box.

No. 13N42. Per dozen..... .65

Sheep Bell, height 2¼ inches. One dozen in box; weight, 2⅝ pounds.

No. 13N43. Per dozen..... 1.75

Copper Finished Cowbell, height 4 inches fine bell metal with heavy hammer. Produces a very loud, clear tone. For ball games, carnivals, etc. One dozen in box. Weight 9¾ lbs.

No. 13N44. Per dozen..... 3.75

Wood Horns with Bright Enameled Decorations

Wood Horn, striped red, white and blue. 5½ inches long. Very noisy brass reed. Six dozen in box.
No. 14N6.
Per gross. 4.00 | Per dozen.. .35

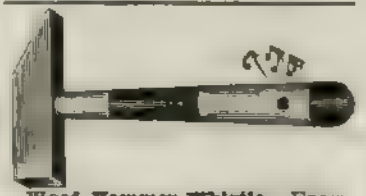
Wood Pipe Whistle. About 6¼ inches long. Hollow stem with loud squawker. Painted in colors. Three dozen in box.
No. 14N28.
Per gross. 4.50 Per dozen.. .40

Fancy Wood Pipe Whistle with face painted on bowl. Gilt trimmed, enameled. Assorted colors. About 4¾ inches long. Loud squawker in stem. Two dozen in box.
No. 14N27.
Per gross 4.50 Per dozen.. .40

Fancy, bright colored Wood Pipe Whistle, about 4¼ inches long. Wood bowl, carved and painted to resemble a man. Loud squawker stem. 3 dozen in box.
No. 14N37.
Per gross. 4.50 | Per dozen.. .40

Wood Barrel Whistle. Height about 2½ inches. Carved to resemble man's head protruding from barrel. Enameled in colors. Loud squawker. 3 dozen in box.
No. 14N34.
Gross 4.50
Dozen ..... .40

Wood Egg Horn with Voice. Red, white and blue enameled colors. A very pretty novelty. Horn size 2½ inches. Three dozen in a box.
No. 14N44.
Per Gross 4.00
Per dozen ..... .35



Wood Hammer Whistle. Enameled with red, white and blue colors. Head painted in a bright red color. The whistle is in the handle, and makes the noise of a squawker. Size 6¾ inches long. Three dozen in a box.
No 14N79.
Per Gross. 4.50 | Per dozen. .40

Wood Horn Whistle with loud squawker. White mouth piece and yellow, white and red body with blue end. Size about 4¼ inches long. Three dozen in a box.
No. 14N80.
Per gross. 4.50 | Per dozen. .40

Wood Horn with loud voice. Four inches long and very wide body. Mouth piece is white and body is red, white and blue enameled, with black end. Three dozen in a box.
No. 14N42.

Flint Announces New Chassis and Changes on Former Models

TO the present line of the Flint Motor Co. has been added a new model known as the Flint Junior—a light L-head six of 2¾ bore by 4¾ in. stroke. It is a two-wheel brake, balloon tire chassis of 110-in. wheelbase on which is mounted a single body style—a two-door coach offered either with standard or de luxe equipment. Prices are $1,085 and $1,185, respectively.

Bodies which will comprise the line will be as follows:

Junior Six	Coach
	De Luxe Coach
Flint "60"	Touring
	Sedan
	Roadster (new)
	Coupe-Roadster (new)
	Brougham
Flint "80"	Touring
	Sedan
	Sport touring
	7-pass. Sedan (new)

Specially built for the Junior Six by Continental Motors, the new engine is rated at 18.15 N. A. C. C. hp. and has a piston displacement of 169 cu. in. At 2,800 r. p. m. in excess of 40 brake hp. is delivered while the torque is rated at 105 ft. lb. at 800 r. p. m.

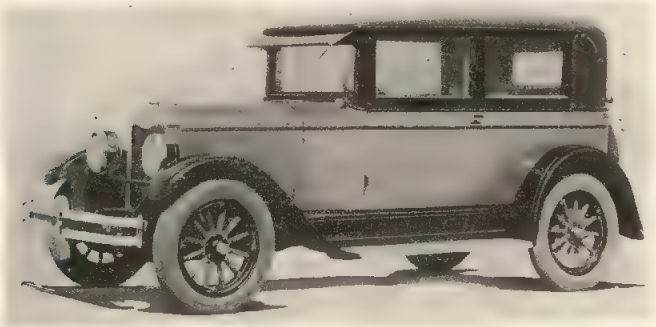
Contrary to general Durant practice the transmission and clutch are mounted in unit with the engine, the powerplant being supported at four points. Cylinder block of cast iron is cast integral with the crankcase with the head of course separate. The crankshaft is supported in four main bearings of 2⅛ in. dia. with the lengths as follows: Front, 1¼ in.; intermediates, 1 3/16 in.; rear, 1 9/16 in.

Through a Morse chain 1¼ in. wide the camshaft and generator-ignition unit are driven. The camshaft is carried in four bearings whose diameters range from 1⅞ in. to 1 9/16 in. Connecting rods of I-section having a center to center length of 9 in. are fitted with babbitt cast in lower bearings of 2 in. dia. by 1⅛ in. long. The 47/64 in. dia. piston pin is locked in the cast iron piston, the latter being provided with three 3/16 in. rings.

Lubrication is by full pressure to all crankshaft, connecting rod and camshaft bearings through a gear pump placed on the outside of the crankcase and driven off the camshaft by spiral gears. Other parts are oiled by mist. Capacity of crankcase is 5 qts.

The combined fan and water pump unit adopted on this engine is bolted to the front of the block. Drive is through a "vee" belt off the crankshaft. The pump is of the impellor type while the fan is 16 in. dia. and provided with four blades. The water passages are very liberal and the jackets of the cylinders extend below the bottom of the piston stroke. Capacity of the cooling system is 2¾ gallons.

Starting, lighting and ignition units are



The Flint Junior Six is built in one style only, a coach shown

of Auto-Lite manufacture with the battery a U. S. L. of 6-8 volts.

Fuel is delivered to the 1 in. vertical outlet Zenith carburetor from the 12-gal. tank at the rear by a Stewart vacuum tank. The intake and exhaust manifold are cast integral and provided with an effective hot-spot being located on the left side of the engine. Exhaust pipe diameter is 1¾ in.

Hoosier Drive

Enclosed in the flywheel, the single plate clutch has the throwout bearing lubricated through a quill from the transmission. A special feature of the clutch is the embodying of the Hoosier shock absorbing drive. On the clutch plate the shock absorbing member is in the form of involute coil springs which are under tension when the car is going in the forward direction. These springs have a flexible action and are claimed to make the general operation of the car much smoother. Four segments of friction material are employed on both sides of the driven member.

Three speeds forward and one reverse are provided in the Warner Corp. make of transmission. The main shaft is mounted on ball bearings with the gear cluster mounted on plain bearings. While the hand lever is mounted on the left side of the car, it operates on the propellor shaft brake, the latter being of the external type with a drum 7 in. in diameter by 2¼ in. wide. Two Spicer metal universal joints and a tubular propellor shaft transmit the drive to the rear axle. Under full load the drive is approximately in a straight line.

Of Adams make, the semi-floating spiral drive rear axle provides a gear ratio of 4.87 to 1. The integral pinion and shaft are carried on ball bearings as is the differential. Gilliam taper roller bearings are employed at the wheel ends of the 1¼ in. shafts. The housing is of two-piece construction.

The front axle, also of Adams make, is of the reverse Elliot type and employs an I-beam section. The knuckle bolts mounted in the vertical plane are of ⅝ in. dia. with the thrust taken on plain washers. Two Gilliam taper roller bearings are employed for each wheel.

Shock Insulators

The Warner make of steering gear is of the worm and gear type, being provided with ball thrust bearings and non-reversible. All bushings are fully adjustable to compensate for wear while the ratio of 9 to 1 make for easy steering with the balloon tires. Service brakes are of the external contracting type on the rear wheels. The dimensions of the brake drums are 12 in. in diameter by 2⅛ in. wide and the lining is 2 in. wide. The tires are 30 x 5.25.

Instead of the conventional method, the springs are carried in the frame by rubber shock insulating blocks which besides eliminating noise cut down chassis lubrication requirements. Springs both front and rear are semi-elliptic and 2 in. wide with the length on the front axle being 35 in. and the length on the rear 52 in. Chassis lubrication is by the Zerk system.

Applying to Flint

Mechanical changes are made on the two larger Flint cars. On the new "60" series, which replaces the former model 40, a new seven bearing Continental engine of 3¼ by 4⅝ in. is used which has a ⅛ in. larger bore than its predecessor. The brake hp. is 56½ at 2600 r. p. m. Changes to both chassis include heavier frames and the adoption of the conventional type of muffler.

Smoother lines have been given to the bodies by minor refinements in the radiator shell contour. In place of the abrupt corners and recesses, the edges of the shell now have a beveled edge of wide radius. To provide easier steering, the ratio of the steering gear has been increased while the make of the unit is now Ross. The dimming control and horn button now form a combination located in the center of the wheel. On the dash the instruments are grouped under a single panel of glass except the switch and the Sterling electric clock. A coincidental lock mounted on the transmission secures both the gearset and ignition, the switch for the latter being carried on the dash. Exhaust gases are now led from the engine to a conventional type of muffler securely attached to the frame. While slight modifications have been made in the frame design on both the 60 and the 80 which replaces the former model 55 cars, a heavy torsional member in the form of a 3½ in. welded steel tube is now placed between the side channels in line with the front support of the rear springs, forming an additional frame cross member.

Among several minor improvements which have been made on the clutches, both models are provided with a graphite impregnated throwout bearing thus eliminating the necessity of oiling this bearing.

Both cars have their engines protected against the entry of foreign matter by the adoption of a Purolator oil filter mounted on the cylinder block, a United air cleaner of the centrifugal type and a Gas-Co-Lator fuel strainer.

Except for minor changes on the engine in the Flint "80" the powerplant is identical

to that used in the former "55" series. Whereas only the front camshaft bearing was bushed on the earlier edition all bearings are now of this type instead of running in the plain cast iron. Bearing caps have been recessed in the crankcase forming a more rigid support for the seven bearing crankshaft. Channel side members of the frame have been increased in depth from 5½ in. to 7 in. with no changes in the flange width or stock thickness. To provide sufficient room for two new seven-passenger bodies a touring and sedan, the wheelbase has been lengthened 10 in. to 130 in. for these two models necessitating only such changes as longer frame running boards and propellor shaft.

Oakland Adds a Roadster

Oakland's addition to its present line is a smart sport roadster in an unusual color scheme and listing at $1,175. The car has low racy lines and an exceptionally complete array of equipment.

Access to the folding rumble seat in the rear deck is by aluminum steps on the rear spring hanger and fender. Both the front and rear seats are upholstered in gray Spanish leather. Exterior finish is in two-tone Duco with the body, hood and fenders in Mount Royal Blue and El Paso tan. Faerie red striping is used on the louvres and below the black moulding. Fenders have a center panel of red and blue employed on the outer portions.

The folding top which rests on bars in the folded position is made so as to be quickly detachable. The rear curtain may be removed to facilitate conversation with the passengers in the rear. On the right side of the body is a lock equipped door which allows the carrying of golf clubs or small articles. Wire or disk wheels are optional at slight extra cost.

In addition to the usual items the following equipment is included in the list price: Front and rear bumpers, windshield wings, nickeled head and cowl lamps, automatic windshield cleaner, nickel-plated windshield posts and step plates, and special design wing radiator cap.

Higher Prices, Chassis Oiler on Chandler

The Bowen "One Shot" automatic chassis oiler is now standard equipment on all Chandler models. Coincident with this announcement are increases in the list prices ranging from $50 to $100 on all models except on the brougham and Comrade roadster which remain unchanged.

Rickenbacker Has New Bodies

FOR 1926, the Rickenbacker line comprises a new array of bodies. In addition to a new design, the general appearance of the cars is improved by the adoption of full crowned type of fenders and a combined tool and battery box mounted on the runningboard adjacent to the right front fender.

All bodies will be finished in two-tone colors except the sedan models. Four body styles on both the six and the eight-cylinder chassis will be the mainstay of the line. On special order the sedans on both chassis can be converted into seven-passenger cars. Because of the limited demand, the coupe roadster and the phaeton will be built to special order. The two most important chassis changes are the adoption of four point engine suspension and a new improved Gemmer steering gear.

Additional equipment in the form of a heat indicator on the dash, dash fuel gage, gas filter, clock and Hartford shock absorbers will be included as standard equipment.

Studebaker Adds Roadsters

Announcement of the addition of two roadster models to the Big Six 120-inch wheelbase models has been made by the Studebaker Corp. of America.

The first, a Duplex roadster, seating three passengers, lists at $1,495, and is now the lowest priced Big Six model. It is finished in gray lacquer, with genuine leather upholstery and is supplied with snubbers, automatic windshield wiper, sun visor, cowl ventilator, rear-vision mirror, a permanent top, rear traffic signal, gasoline gage, cowl lights, clock, and ignition, steering gear and spare tire locks.

The second roadster model is a four-passenger sport job, listing at $1,645. This model is also finished in lacquer with genuine leather upholstery, and differs from the Duplex model in that it is not equipped with a permanent top, but, in addition to the equipment included in the Duplex roadster, is furnished with a spare tire, front and rear bumpers, windshield wings and engine heat indicator.

Changes in Cleveland

In both the Cleveland 31 and 43 models, the crankshafts have been made heavier at the journals. In addition, a front flywheel is now being fitted to the crankshaft.

Price increases ranging from $50 to $95 on four body models, two on the model 31 chassis and two on the 43, are announced.

Elcar Offers Enlarged Eight

ELCAR will exhibit for the first time at the national shows its new and improved eight-in-line models. Being one of the few companies building its own bodies, Elcar is able to turn out distinctive designs. The eight-in-line now is furnished in two wheelbase lengths of 127 in. and 132 in., a considerable increase over last year.

A new and larger Lycoming engine has increased the all-around performance of the car, and several important chassis changes have made for longer life and better accessibility.

By using 5/32 in. stock instead of ⅛ in. a heavier frame is obtained and the front cross member has been straightened, since the engine is now four-point suspended in the frame instead of at three points. The 132 in. wheelbase frame has an additional cross member. Incidentally it is worth noting that the depth of the side rails on this frame is 8 in.

The complete Swan system of carburetion and manifolding also has been adopted, as well as a Kingston oil aerator.

Other mechanical changes include the adoption of the Long clutch, relocating the battery from under the floor boards to a point below the front seat; Mechanics propellor shaft assembly, and a model R Ross steering gear in place of the model E.

The new Elcar eight also is featured with the Bowen system of chassis lubrication. A Gascolator is fitted in the fuel line and the light control switch has been placed on the steering wheel.

A change has been made in the location of the master cylinder for the hydraulic braking system. Whereas the cylinder formerly was placed on the left side rail of the frame, it now is placed on a plate fastened to the transmission. This makes a more rigid layout as the cylinder assembly is not affected by frame flexure.

Tires on the 132 in. chassis are 32 by 6.20, while on the 127 in. chassis they are 32 by 6.00.

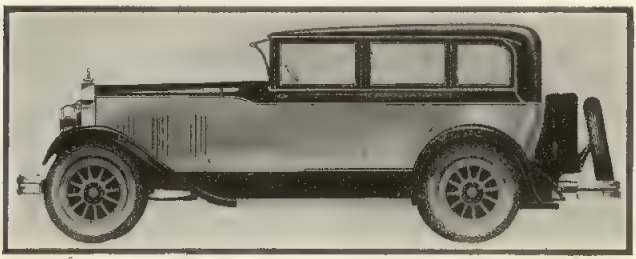
Several of the mechanical changes in the eight also are applied to the company's six-cylinder car. Thus the Swan manifolding and carburetion system, Kingston oil purifier and the light control on the steering wheel are found in the six. The ignition system on this model is now of Remy make.

All Elcar bodies are finished in Murcote lacquer. The shades included are dark or light blue, Thebes gray, Beige gray, Buckingham gray or Carribean green, with striping. Body belts are in different shades than bodies producing a harmonious two-tone effect. Artillery wheels are finished in natural wood, while steel wheels are finished to match the body.

Upholstery in the closed models is in Chase Velmo mohair and the hardware is in brushed silver finish. The open models are upholstered in hand buffed leather.

The body line for the 8-81 includes a seven-passenger touring; two and four-passenger roadster with open top and with two drum-type spotlights on the windshield; coupe roadster with three-passenger and four-passenger bodies and a five and seven-passenger sedan.

Equipment includes drum-type, twin-beam headlamps with dimmers, combination tail and stop light, two lights on instrument board, gasoline gauge on instrument board, bumpers, front and rear, shock absorbers, automatic windshield wiper, cowl ventilator, rear-view mirror, heater and vanity outfit in closed models.



Five-passenger Elcar 8-81 sedan

ATWATER KENT RADIO

"What kind of company makes it?"

EVERY DAY, as the public gets wiser, do you not hear fewer and fewer customers ask, "What's the price of that radio?" and more and more customers ask, "What kind of company makes it?"

If you are an Atwater Kent dealer, are you not firmer than ever in your conviction that the stability of your manufacturer is no mean asset?

* * * *

Atwater Kent dealers know:

1 THAT behind the company with the strongest financial resources of any independent radio manufacturer stands the personal responsibility of a man who for twenty-five years has jealously guarded the quality of every product that bears his name.

2 THAT we have built the largest radio factory in the world, and are putting on a large addition this winter, because we are thinking of tomorrow's market as well as today's.

3 THAT the merchant is backed by a policy that safeguards his profit, and is not tempted to throw his money away on job lots.

4 THAT he is handling the Radio which requires minimum service and is therefore insured against needless worry and expense.

5 THAT Atwater Kent owners are satisfied with their receiving sets and radio speakers and are always boosting them and making more sales.

6 THAT Atwater Kent is the make the greatest number of people intend to buy—or buy next, if they already have unsatisfactory sets. (Four surveys prove this.)

7 THAT the Atwater Kent sales campaign is supported by an unparalleled advertising campaign, reaching, in magazines and newspapers and on billboards, into every corner of the United States and Canada.

* * * *

Nineteen Twenty-five was a wonderful Atwater Kent year. We wish to thank all of you who helped to make it so.

And please keep in mind that more than ever they'll be asking "What kind of company makes it?" in 1926.

(Patents Pending)

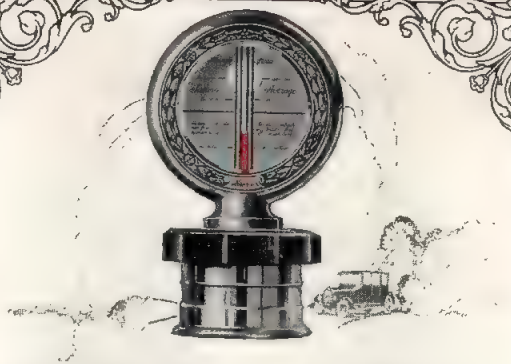
A PROFITABLE RESALE ITEM

This kit is ideal for the automobile owner, containing genuine Bonney *CV Chrome Vanadium Wrenches of the sizes most used, in an attractive tool roll, at a price that anyone can afford to pay.

*CV is a Bonney trademark registered in the U.S. Patent Office.

Chrome Vanadium registered August 11, 1925.

BONNEY "ONLY THE BEST"



Beauty and Utility Combined

UTILITY—that is unquestioned and already recognized by approximately 8,000,000 users of Boyce Moto-Meters.

BEAUTY—A distinctive factor that has added to the world-wide appeal of the Boyce Moto-Meter and has now been greatly enhanced by the change in design in the DeLuxe and Standard Models.

THERE will be no change in price on these new improved models which will mean that our dealers everywhere will have no difficulty in greatly increasing their volume of business on these *two more profitable sizes.*

THE Boyce Moto-Meter mounted on the radiator cap, is absolutely accurate—*easy to understand —always directly in the driver's line of vision* and functions equally well under any and all conditions.

Looks, guts and speed

This new masterpiece, Square Visible, challenges careful comparison on every point:

LOOKS: The simple lines and effective design of Square Visible certainly do stop the passing motorists.

GUTS: Square Visible has sturdy dependability, rugged strength, oversize bearings; it's *tough*, from base to dome!

SPEED: Square Visible has 22% more speed; it's the first visible that's as fast as Square Sentry, the well-liked piston-type pump.

Square Visible *stops* trade, *holds* trade, *builds* trade—it's fit companion to Square Sentry, and that's saying it all!

S. F. BOWSER & COMPANY, Inc.
Dependable Pumps and Tanks
FORT WAYNE, INDIANA, U.S.A.

Sales and Service Representatives All Over the World

This shows the new flow-indicator, an integral part of every "Square Visible." As an attention-attractor and trade-builder, it is absolutely the last word—for a visible pump, it's what the bell and sight-glass are to "Square Sentry"! As you can see, the arrow tells your customer that he is indeed getting the gas he has ordered—a confidence-builder that pleases the public, dealer and operator alike.

39 Reasons

Why This Board Sells Tools

COUNT them. Thirty-two tools fastened to a handsome board which sets them off so attractively that a man just naturally wants to handle one or another of them.

And handling a tool is the next thing to buying it, as you well know.

The "Velchek" Board, without exception, increases the sale of small tools in every store into which it goes. Often it has sold dozens of some tool for which previously the merchant seldom had a call.

Small tools must be *seen,* must be *accessible,* if you want to sell many. And the "Velchek" Board displays them most effectively.

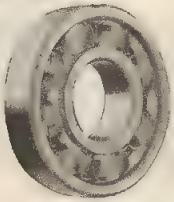
Strom BALL BEARINGS

Marlin-Rockwell Corp., Successor to
STROM BALL BEARING MFG. CO.
4550 Palmer Street, Chicago, Ill.



Super-Strom Ball Bearings have been selected as standard equipment in the New Stutz Eight.

As in other premier cars of America, they will contribute much to the car's smoothness, quietness and dependability of operation.

For they are bearings of exceptional accuracy and proved longer life—they greatly reduce vibration, they minimize friction, they wear indefinitely and require no adjustment.

Deep-grooved and without filling slots, Super-Strom Ball Bearings offer increased load-carrying capacity by the use of more or larger balls.

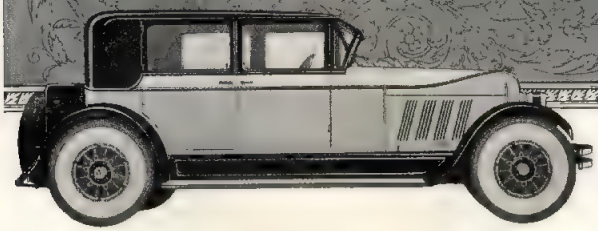
STRAIGHT EIGHT
$1795

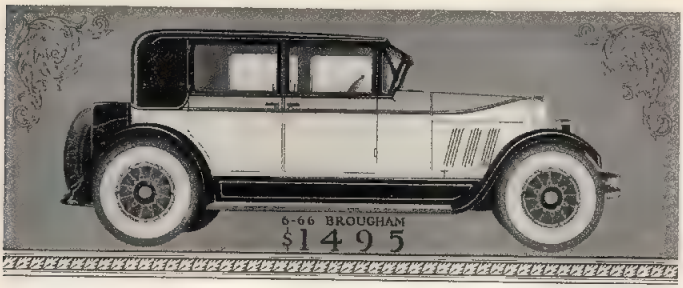


8-88 Brougham, $1705. Freight and tax extra. 129" wheelbase. 3⅛" x 4½" eight-cylinder motor. Finished in latest two-tone lacquer.

For 1926 Auburn again does the unexpected. We were told that in order "to compete" we should shorten our wheelbase, use a smaller engine, cut down here and there and produce a cheaper built car. We are doing exactly the opposite because we believe buyers want *even* better cars, better than *any factory has ever built before.* For 1926 Auburn INCREASES QUALITY—larger motors, heavier frames, better brakes, finer bodies, more expensive interiors and greater and larger value in every way. Again we emphatically state that prices must be revised because of Auburn's remarkable new value. Auburn again forces a new standard of comparison. *This* is leadership.

E. L. Cord

AUBURN 8 EIGHTY EIGHT



6-66 Brougham, $1495, freight and tax extra. 121" wheelbase. 3½" x 4½" six-cylinder motor

8-88 Sedan, $1695, freight and tax extra. 129" wheelbase 3½" x 4½" eight-cylinder motor Interior finish of finest quality

8-88 Roadster, $1695, freight and tax extra. 129" wheelbase 3½" x 4½" eight-cylinder motor Room for six and you don't climb over

8-88 Coupe, $1745, freight and tax extra. 129" wheelbase. 3½" x 4½" eight-cylinder motor The eight for business

Reasons Dealers Should Get in Touch With Auburn at Once

1. Auburn dealers are making money.
2. In every part of the country where responsible dealers got started selling Auburns early in 1925 their business shows a steady increase in relation to the total business in their communities.
3. For 1926 an *even better* Straight Eight at a sensational price that means record-breaking sales.
4. A Six and a Four of such overwhelming superiority in every way that assure volume sales.
5. The Auburn dealer does not have to spend a lot of money on service. He receives his cars from the factory thoroughly tested and ready for long service. Due to block testing of motors, careful assembly and adjustments and rigid inspections, all Auburn cars are uniformly good. There are no "lemons".
6. Auburn's phenomenal success in 1925 gives momentum for a much greater success in 1926.
7. Enlarged factory facilities to meet the increased demand.
8. A most aggressive national and newspaper advertising campaign.
9. A franchise that *makes* instead of breaks, dealers! It enables you to own your own business—make money—and keep it.
10. Auburn enjoys the fastest growing popularity of any car built today. Learn why—write at once.

AUBURN

4-44 Sedan, $1195, freight and tax extra. 120" wheelbase. 3⅝"x 5" four cylinder motor with 5-bearing crankshaft. A big, fine, durable car

THE EIGHT—not a "little eight" but a more powerful, more buoyant, more rugged, 129-inch wheelbase quality car. Nothing finer could be said of it than that it is an even better Eight than last year, with performance and riding qualities that can only be obtained with long wheelbase and large motor.

THE SIX—a *real* Six, not a "pocket edition six." More room, more comfort, more enduring quality. Low, smart and rugged, it is today's utmost in Six-cylinder value.

THE FOUR—ten years of comfortable, dependable, economical transportation! Riding qualities possible only with long wheelbase. Power and long life possible only with large motor of sufficient size to always have ample reserve power. Four wheel brakes and balloon tires. A body larger than the average high priced Six.

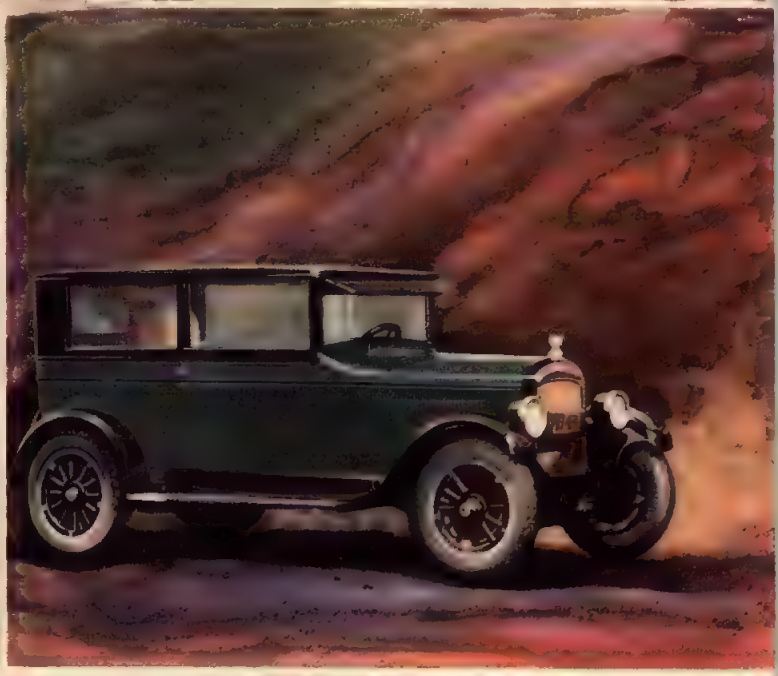
AUBURN AUTOMOBILE CO., AUBURN, IND.

6-66 Sedan $1095, freight and tax extra. 121" wheelbase. 3¼" x 4½" six-cylinder motor. Second only to Auburn 8-88 Sedan.

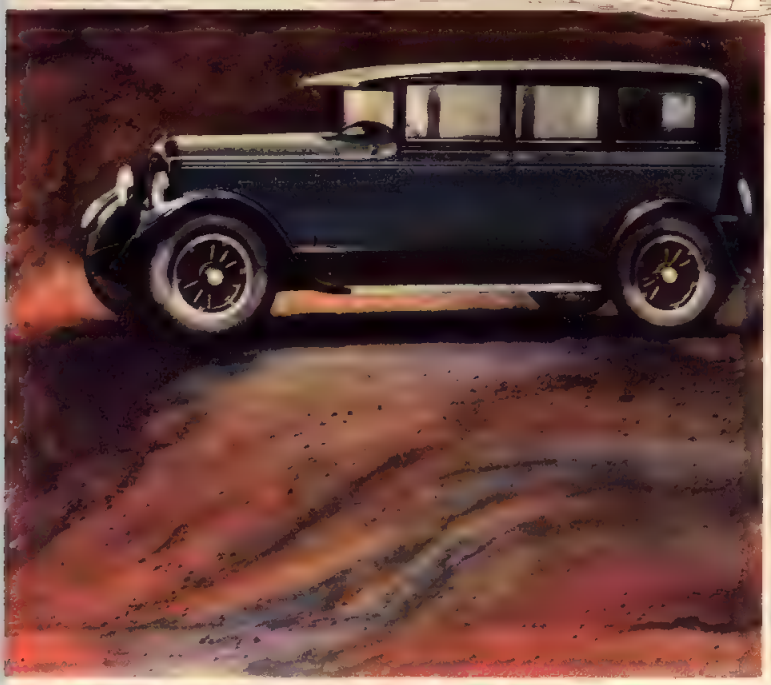
6-66 Roadster, $1395, freight and tax extra. 121" wheelbase 3¼" x 4½" six-cylinder motor Classy speedy powerful economical

6-66 Coupe, $1445, freight and tax extra. 121" wheelbase, 3¼" x 4½" six-cylinder motor The six for business

There's a New Jewett Six Sedan at $995
There's a New Paige Sedan at $1495



The new low price of this New-Day Jewett Sedan alone insures for Jewett dealers opportunities for volume business and volume profits such as they have never enjoyed before. But price is not the only appeal, nor the primary appeal, of this remarkable new car. For the New-Day Jewett Sedan is not only a new motor car, but an entirely *new type* of motor car. Built expressly to meet and master the trying and exacting demands of new-day traffic conditions this car will find an immediate and eager market among those who have long wanted and long awaited a truly superfine small car. It is the easiest car to drive, and the safest, on the market today. Paige-hydraulic 4-Wheel Brakes, unbelievably swift acceleration, power to spare, balloon-tired comfort, an almost complete elimination of the deadly "blind-spot" – these are but a few of the features that are certain to establish new sales records for those fortunate dealers everywhere who own, or are successful in obtaining, the Paige-Jewett franchise.



Following in the brilliant succession of fine motor cars that for 17 years have proudly borne the mark of Paige this Newest Paige is an even finer, smarter, more enduring car than its illustrious predecessors. Splendidly built and superbly equipped engineered and manufactured according to the highest standards of Paige manufacture—embellished with every desirable attribute for the comfort and convenience of its passengers and yet priced at the lowest figure ever placed upon the quality Paige car– this latest Paige offers opportunities for immediate profit and permanent business success not to be found in any other motor car franchise anywhere. Think of it! A Paige—of traditional Paige quality and Paige beauty for only $1495 nearly a thousand dollars lower than last year's Paige! Paige dealers have uniformly made money for 17 years– and this year there is simply no limit to the possibilities for profit in store for them.

One New Year

FOLLOWING 17 SUCCESSFUL AND HIGHLY PROFITABLE YEARS, BRINGS

Two New Cars

TO A LINE ENJOYING ONE OF THE FINEST REPUTATIONS IN THE INDUSTRY, AND—

Many New Opportunities

FOR PROGRESSIVE DEALERS OF THE RIGHT TYPE TO BUILD PERMANENT AND PROFITABLE BUSINESSES.

THE right kind of motor car dealer is interested in two things: his reputation, and his bank book. He wants to make all the money that he can—building, meanwhile, for permanent business success.

This kind of dealer will be keenly interested in the Paige-Jewett franchise. And this is the kind of dealer that Paige-Jewett wants to add to its large and successful dealer organization.

It is difficult to imagine a line of motor cars that could offer greater opportunities for immediate profit and permanent business success than the Paige-Jewett line for 1926.

The New Paige—embodying all of Paige's traditional beauty and quality and yet selling for nearly a thousand dollars less than last year's Paige—and the New-Day Jewett Sedan selling at $995, enable Paige-Jewett dealers to reach the widest and most profitable market in the entire industry.

Every motor car buyer who will spend from $750 to $4,500 for his next car, is going to investigate one of the Paige-Jewett cars before making his investment. And because in their separate fields, these two cars actually represent dollar-for-dollar values without equal elsewhere, Paige-Jewett dealers are going to be in better position—during 1926—to make money and establish sound and permanent businesses than ever before. And Paige-Jewett dealers have uniformly made money for 17 years!

Because of the greatly widened field to which the new Paige and Jewett cars will appeal, there will be room in the Paige-Jewett dealer organization for more dealers of the Paige Jewett type. Sign and mail the attached coupon and we will immediately send you information concerning your territory.

Paige Jewett list prices follow Jewett Standard Sedan, $995, De Luxe Sedan, $1095, De Luxe Touring, $1095. Paige Standard Sedan, $1495, De Luxe Sedan, $1670. De Luxe Seven Passenger Sedan, $1995. All Paige and Jewett prices are f. o. b. Detroit, war tax extra.

A NEW VALUE

hitherto been the chief inducement to ownership, the Pontiac Six introduces elements of size, beauty, comfort, stamina, roadability and completeness of equipment that are literally and truthfully without precedent. . . Notwithstanding these extraordinary qualities, the Pontiac Six will sell for a price so unexpectedly low as to compel a radical rearrangement of every existing idea of motor car value.

wearing friction lining. Outside diameter, 9 inches. Eight pressure springs; pedal adjustable to compensate wear

TRANSMISSION—Unit-power plant type, selective sliding, 3 speeds forward and reverse. Gears of heat-treated chrome-vanadium steel accurately cut and shaped. New Departure ball bearings for pinion shaft and main driving shaft. Bronze bushings for counter gears.

FRAME—Pressed steel channel section, 4½ inches deep, 1⅞ inches wide, 5/32 inch side members. Tapers from front to rear. Four cross members including rear engine support. Over-all length, 153⅞ inches.

STEERING GEAR—Semi-reversible worm and wheel type. 18-inch wheel, 8 to 1 ratio to provide easy steering. Horn button at top of steering wheel.

INSTRUMENT PANEL—Indirect illumination. Instrument group includes 75-mile speedometer, ammeter, oil pressure gauge, throttle and choke control, windshield cleaner regulator and ignition and lighting switch with lock.

FRONT AXLE—Own make, drop-forged I-beam section. Springs over axle. Steering knuckles of special alloy steel. New Departure bearings for wheel spindles.

REAR AXLE—Own make, semi-floating type, banjo housing with torque tube connected to front end of pinion housing. Chrome nickel steel pinion and ring gear. New Departure ball bearings used throughout.

WHEELS—Heavy artillery type equipped with 30 x 4 inches rims.

TIRES—Low pressure balloon cords, 29 x 4.75 inches, non-skid tread.

BRAKES—Service brakes on rear wheels. Drum diameter, 11 inches; width of brake, 2 inches. Adjusted and equalized. Parking brake on rear wheels, internal expanding, operated by hand lever.

SPRINGS—Semi-elliptic front and rear. Length of front spring 36 inches, width, 1¾ inches. Length of rear spring 54 inches, width, 1⅞ inches. Front spring special quality carbon steel. Rear spring, chrome vanadium steel. Hard rolled bronze bushings in spring eyes.

TURNING RADIUS—19 feet 4 inches.

WHEELBASE—110 inches.

ROAD CLEARANCE—8½ inches.

BODY—Built by Fisher

UPHOLSTERY—Coupe and Coach. Cushions in long wearing gray corduroy, balance interior in art weave upholstering cloth to match.

BODY EQUIPMENT—Coupe, sun visor, landau bars in rear quarter, double beading, plate glass windows, high speed window regulators, Fisher VV one piece windshield, rear vision mirror, automatic windshield cleaner, roller shade over rear window, safety lock on right door with inside snap lock on left door. Coach: Sun visor, double beading, plate glass windows, high speed window regulators on doors and quarter windows, Fisher VV one-piece windshield, rear vision mirror, foot rest, floor carpets, dome light, automatic windshield cleaner, roller shade over rear window, safety lock on front door with inside snap lock on left door.

WEIGHTS—Cars ready for road: Coupe, 2320 pounds; Coach, 2400 pounds.

TIAC

THE SIXES"

Announcement:

A new name appears on the scrolls of the automotive industry — a new car destined quickly to achieve a position of commanding leadership — a new Six whose specifications, alone, stamp it an outstanding achievement in quality car design and construction.

Never in the history of the industry has any manufacturer ever presented a car combining such qualities of brilliant performance and beautiful appearance at such an unexpectedly low price.

A NEW SIX— A NEW NAME

AFTER a long period of preparation, General Motors now presents the lowest priced high quality Six. This newest member of a famous family is an entirely new car, embodying the full scope of the corporation's resources in engineering, purchasing and production. It will be manufactured and distributed by the Oakland division as companion car to the new Oakland Six. . . Into this field, where low price has

GENERAL SPECIFICATIONS

ENGINE—Own design and make 6-cylinder, L-head type, water-cooled by pump circulation. Bore, 3¼ inches. Stroke, 3⅝ inches, displacement 180.50 cubic inches. Three point suspension, rubber insulated cylinder heads.

CYLINDERS—Cast en bloc of special cylinder iron, integral with crankcase. Lapped and enclosed. All cylinders have glass-like finish obtained by honing process. Cylinders and valves completely surrounded by circulating water.

CRANKSHAFT—Three bearing type, statically and dynamically balanced. Bearing sizes front, 1¾ inches diameter by 1⅝ inches, center, 2-inch diameter by 2 inches, rear, 2¼ inches by 2 inches. Patented, bronze-backed, babbitt-lined, interchangeable main bearings.

CAMSHAFT—Drop-forged steel integral cams, case-hardened and ground. Bearing sizes front, 1⅝-inch diameter by 1½ inches, center, 1⅝-inch diameter by 1⅞ inches, rear, 1⅝-inch diameter by 1⅝ inches. Lubrication by special oil pockets and splash system. Silent drive with 1¼-inch chain.

PISTONS—Light semi-steel 4 inches long with three ⅝-inch cast iron rings. Pin end 1⅞ inch diameter, locked in piston.

CONNECTING RODS—Drop forged, heat treated, I beam section 7⅛ inches long. Lower bearing 2 inch diameter by 1⅝ inches, upper bushing 1⅝ inch diameter by 1⅜ inches, bronze, lower bearing high grade babbitt, accurately broached to size.

VALVES—High tension heat resisting silicon chromium steel. Accessible for grinding by removing head. Diameter, 1⅜ inches. Tappets have chilled cast iron head with long-wearing steel sleeve. Self oiling, mushroom type valve lifters.

LUBRICATION SYSTEM—Of special design known as regulated constant flow type, pressure being taken care of by adjustable pressure release valve. Pressure feed from gear driven pump to all main bearings and connecting rods. Submerged gear type oil pump gear driven at center bearing. Valve compartment open to splash. Valve chamber provided with oil-tight coverings. Pressure gauge on instrument board. Oil filter located on left side of engine with oil level gauge rod to arrive. Oil capacity, 6½ quarts. Pressure oil lubrication and fittings for chassis.

GASOLINE—Vacuum tank system. 12-gallon tank in rear provided with gauge unit.

INTAKE MANIFOLD—Special design utilizing exhaust heat from 5 cylinders in maintaining correct temperature for carburetor inlet. Perfect volatilization and mechanical distribution.

CARBURETOR—Carter, 1-inch.

ELECTRICAL SYSTEM—Remy starting, lighting and ignition. Motor with Bendix drive. Generator, third brush current regulation. Automatic distributor. 6-volt, 80-ampere power storage battery. 21 candle power, diffusing lenses, head lamps. Side lamps for parking. Approved rear light. Combination light and ignition switch with lock for locking ignition.

COOLING SYSTEM—Water: impeller pump; cellular type, high turbulence radiator, with polished nickel shell. Two blade fan on pump shaft, 15 inches in diameter. Capacity 10½ quarts.

CLUTCH—Dry single disc type, ventilated and self adjusting. One driven and two driving discs. Driven disc faced with long

PON

"CHIEF OF

THE PONTIAC SIX WILL BE DISTRIBUTED AS COMPANION CAR TO THE PRESENT OAKLAND SIX

WINNING AND HOLDING GOOD WILL

OAKLAND SIX

Since the announcement of the new Oakland Six, Oakland sales have been reaching heights that dwarf all records of the past. Priced from $70 to $350 lower, embodying over 100 improvements, including air cleaner, oil filter, and the Harmonic Balancer, the new Oakland Six is bidding for leadership in state after state and city after city.

Now automobile dealers who seek sales precedence in their communities have available a *double franchise*—that of the new Oakland Six and its companion car, the new Pontiac Six.

The preceding pages indicate that the Pontiac Six is clearly entitled to a high place among cars of quality.

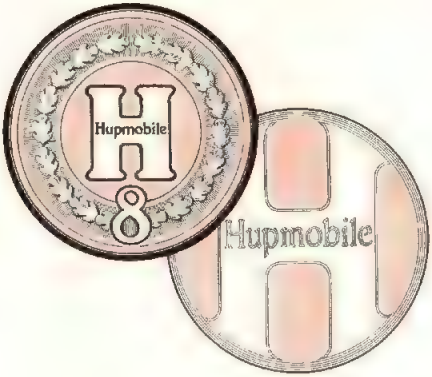
Yet its price, when announced, will be nothing short of a revelation. With this combination of the new Oakland Six and the lower priced Pontiac Six, dealers acquiring the double franchise will command the two most profitable automobile markets.

In the light of previous history and what the future holds, it may be safely predicted that the Oakland-Pontiac double franchise will prove to be one of the most desirable and profitable in the entire industry—

—a fact that should prompt every forward looking automobile dealer in America to make immediate inquiry, regardless of his present status and affiliations.

OAKLAND MOTOR CAR COMPANY

PONTIAC, MICHIGAN



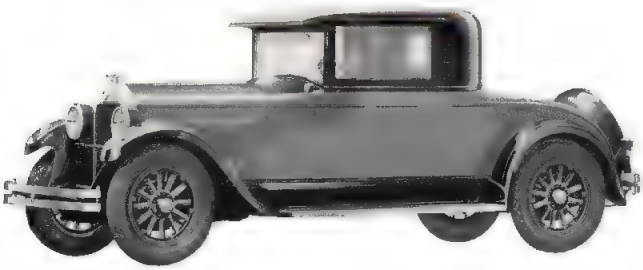
Two New Cars

A Six—built by Hupmobile—which in a few short weeks has swept the country from end to end in one big wave of enthusiasm.

A new Eight—even finer, longer, roomier, more luxurious than the model which from the very beginning—because of its unrivaled performance—became the largest-selling straight Eight in the world.

To be seen together for the first time at the New York Automobile Show

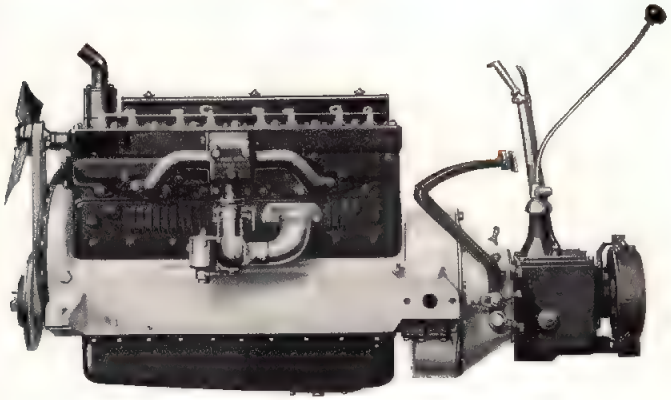
A larger, longer, roomier car —a car that takes full rank in beauty with anything on wheels, regardless of price. And under the hood the motor which made this car, from the beginning,



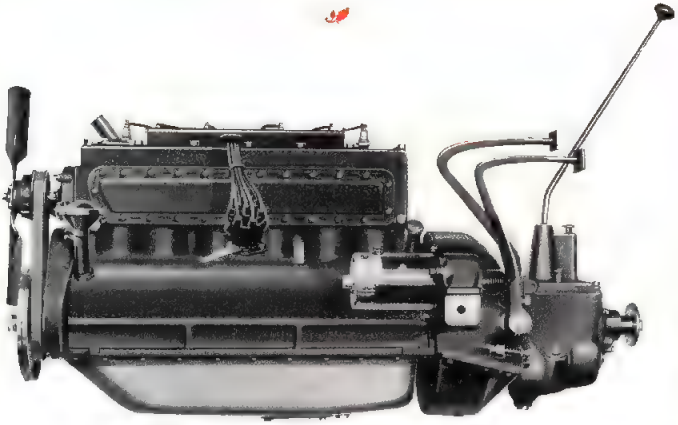
the largest selling straight Eight in the world. A car which stands pre-eminent today for excellence in every phase of performance. Hupmobile's greatest engineering triumph.

Why has this new Six crowded the Hupp factory to capacity, with thousands of orders behind? Because it has genuine Hupmobile stamina, combined with smoothness, acceleration and ease of handling wholly remarkable.

The Sedan is full five-passenger, four-door, roomy and comfortable. Balloon tires and four-wheel brakes. At last, superior Six performance and distinguished appearance have come down from the realms of much higher cost.



This mighty engine is, of course, the very heart of the unmatched success which has come to the Hupmobile Eight. The plain fact is that no engine is finer-built than this remarkable eight-cylinder creation. Of vibration, there is none. In mechanical details this engine is distinguished by engineering refinements, many of which are exclusive to it alone, such as value mechanism of new design, extra heavy crankshaft (99½ pounds), vibration damper, and positive pressure oiling to 35 points.



The Hupmobile Six, as splendidly developed today, is the outcome of six-cylinder study and testing which began in 1914. With this wonderful engine, the Hupmobile Six is a more-than-60-mile-an-hour car, without a hint of vibration throughout its entire speed range. Hupmobile knows only one way to manufacture, and that is for economy and long life as well as superfine performance, so this Six engine is a true Hupmobile product.

Two Brilliant Successes

Already the Six, as well as the Eight, Has Won Its Spurs

Hupmobile accomplishment during the past year is without parallel in the motor car industry.

First came the Eight, which from the beginning leaped into a triumphant position as the world's largest selling straight eight.

Last October came the new Hupmobile Six, which literally swept the country by storm and rolled up a flood of orders that is still far ahead of factory production capacity.

Now the new Hupmobile Eight makes its appearance, to carry still farther the brilliant success registered by the first series.

The new Eight is longer, more roomy and comfortable, even more beautiful. It has greater power and its performance is even more remarkable, if such a thing can be possible.

Into its new Six, Hupmobile has built the exalted six-cylinder performance and the beauty which in the past had always been accompanied by a much higher price.

Going still farther, Hupmobile presents, in its Six line, a five-passenger four-door sedan that is a momentous achievement in roominess and comfort

Small wonder, then, that the new Six comes to the automobile show season riding the crest of a wave of popular enthusiasm.

Both of these cars stand supreme in their fields, as buyers have already proved—supreme in performance and in value, with a name behind them that has always kept faith with the public.

What All This Means to Dealers

The Hupmobile dealer is today in a stronger position than ever before in its nearly eighteen years of manufacturing.

For Hupmobile, traveling even ahead of the times, has adopted the surest way to greater success—the policy of giving the sound, value-knowing public what that public wants.

The emphasis of the motor car demand today is all on the side of smoothness, pick-up, ease of handling, comfort.

Hupmobile has more than satisfied that demand—it has gone far beyond its field in giving performance which in its every phase delights and captivates.

So true is this, that it has become almost proverbial that any prospect who knows anything about performance, and who drives either the Hupmobile Six or the Hupmobile Eight for even as little as fifteen minutes, is almost certain to buy it sooner or later.

But unprecedented performance is not the entire Hupmobile story, for with this performance is joined all the old-time Hupmobile virtues of reliability, economy and long life.

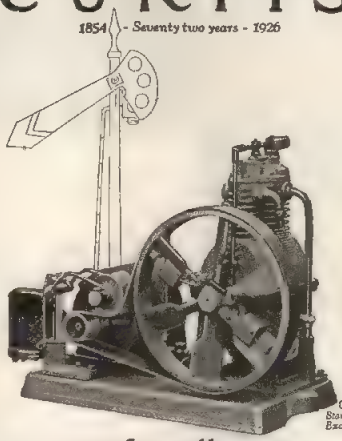
So Hupmobile today presents one of the greatest dealer opportunities ever opened to the trade—an opportunity to which dealers everywhere are becoming keenly and intensely alive.

A NEW YEAR'S TIP

For a prosperous New Year and permanent success in the automobile business, sell **OLDSMOBILE SIX**

CURTIS

1854 - Seventy two years - 1926



Curtis Standards of Excellence.

Is your outfit really automatic?

Protection in starting and stopping against starting strains in the Curtis compressor is accomplished by its Patented Centrifugal Unloader. If the motor slows down or stops for any reason the Curtis unfailingly unloads the Compressor so that when it starts again it will not start against tank pressure. This protects the motor, belt and compressor from any possible damage, due to starting strains.

Curtis Compressors, Single or Two Stage, in varied sizes for garages, filling stations and industrial uses.

Curtis Air Stand

There are two ways to determine the worth of any Compressor—by using it or seeing it made. Anyone who ever makes a trip through Curtis' 17½ acre plant will never question what Compressor to buy.

JACKS

SIMPLEX AUTOMOBILE

No. 45

A Jack built for handling the heaviest limousines, touring cars and trucks. Geared mechanism enables easy, safe, rapid lifting under maximum load. Made of the finest material—all operating parts drop forged steel. A distinctive, powerful, dependable tool for those wanting the "finest" in construction and service. Steel detachable shoe provides two additional lifting points. Provided with 18-inch steel lever pole.

Each

No. 45—Capacity 3 Tons, Height 10½ in., Height with Shoe 12⅞ in., Lift 6⅛ in., Weight 17½ Lbs. $13 00

No. 47

Designed for trucks of 5, 6, 7½ tons capacity and over. A tool of extraordinary merit and service. The drop forged steel gear mechanism, high grade material and careful construction insure unlimited strength, ease of operation, powerful action and remarkable wearing ability—24 inch steel lever bar included.

Each

No. 47—Capacity 7½ Tons, Height 11¾ in., Height with Shoe 16¼ in., Lift 7 in., Weight 29 Lbs. $18 00

RELIABLE AUTOMOBILE

Strongly reinforced and designed for the heaviest kinds of loads, such as heavy motor trucks, trolley cars, tractors, mine cars, etc

Remarkably easy to operate under their full rated load.

Used where durability, speed and simplicity are of paramount importance.

Standard equipment on more trucks than any other single jack on the market.

Each

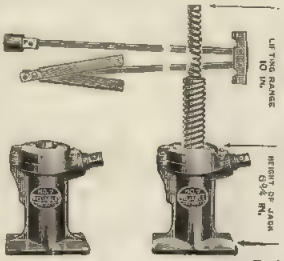
No. 23—Capacity 6 Tons, Height Lowered 13⅛ in., Height Raised 20 in., Diameter of Screw 1⅛ in., Weight 19½ Lbs. $8 70

No. 26R—Capacity 6 Tons, Height Lowered 11½ in., Height Raised 16½ in., Diameter of Screw 1½ in., Weight Each 17 Lbs $8 20

RELIABLE BALLOON TIRE

Entirely new principle in Jack construction. Balloon tires have necessitated a Jack with an extremely low starting height, but with an exceptional lift to provide sufficient clearance when changing a tire. To this end the Reliable has been designed and built

36 in. Folding Handle is included



Each

No. 7—Capacity 2 Tons, Height Jack 6¾–17 in., Outer Screw 1⅛ in Diameter, Inner Screw 1 in. Diameter, Weight 8 Lbs. $8 70

JACKS

E-Z AUTOMOBILE

Positive lock extension handle prevents all crawling under car, soiling clothes, etc.

Hardened steel head, diamond point non-slip type. Ball bearings reduce friction.

Handle of ⅞ in. high grade cold rolled steel, 3 feet long.

Copper Finish, Malleable Iron Extra Base

Each

No. E-Z—Capacity 2 Tons, 6x11 in. Reinforced Base, Minimum Height 10⅛ in., Extended Height 17½ in., One Piece Copper Finish Handle..... $8.00

MILLERS FALLS AUTOMOBILE

Slip the handle into place—slide the Jack under your car—turn the handle a few times and your car is raised—all in a few second's time. No crouching in the dirt, no awkward reaching under the car.

Each

No. 145—Capacity 4000 Lbs., Three Ranges of Height, Maximum Height 18 in., Saddle Shaped Cap, 36 in. Handle..... $5.70

Weight Each 10 Pounds.

NEW SAMSON

Raises and trips, or with the reverse movement can be lowered notch by notch automatically. Frame is designed especially to get the greatest possible strength from the desired weight cogs, hooks and ratchets are strong and the leverage simple but powerful. Lower bracket will catch 1½ in. from ground.

Each

No. 4—Cap. 2 Tons, Weight 16 Lbs. $8 00

No. 5—Cap. 6 Tons, Weight 25 Lbs. 10.00

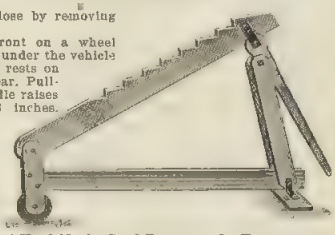
No. 6—With Short Standard, Weight 30 Lbs..... 14.00

MILLER WOOD CARRIAGE

Folds up close by removing one bolt.

Rests on front on a wheel and is pushed under the vehicle until the axle rests on the notched bar. Pulling down handle raises from 1 to 3 inches.

Locks by passing center.

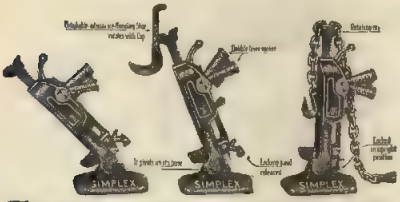


Made of Hard Maple, Steel Braces at the Foot

Nos.	1M	2M	3M
Thickness, Inches	1	1⅜	1¾
Capacity, Lbs.	2000	4000	6000
Each	$2.50	3.00	4.00

JACKS

SIMPLEX EMERGENCY



Single Action, Automatic in Raising or Lowering, operating on the Downward Stroke of the Lever.

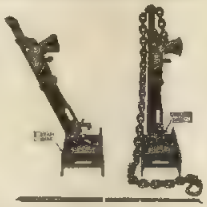
Pivots on base or can be locked in rigid vertical position Cap rotates, is recessed and holds securely any link of the chain. The cap also holds the auxiliary shoe.

Used by garage, contractors, teaming and transfering companies and general industries.

Each

No. 310—Capacity 15 Tons, Height 20¼ in., Lift 12½ in., Heavy Malleable Iron Standard and Base, Drop Forged Working Parts, Complete with 5 ft. Steel Chain, Auxiliary Detachable Steel Shoe and 5 ft Steel Pinch Bar, Weight Each 65 Lbs.....**$48 00**

SIMPLEX POLE PULLING AND POLE STRAIGHTENING



Single Action, Automatic in Raising and Lowering, will not trip. Designed especially for pulling and straightening telephone, telegraph, electric light and trolley poles, regardless of size or depth in the ground.

Equipped with 8 ft. steel chain, 5 ft steel pinch bar and steel I beam base

Each

No. 320 — Capacity 15 Tons, Height 39 in., Lift 23 in., Weight Each 95 Lbs.....**$70 00**

SIMPLEX BRIDGE

For Bridge Purposes, Bolted Crossings, Frogs, Banded Rails, Dredges or general industrial service. Simplicity and thoroughness of construction, minimize the necessity for repairs.

Operates on downward or effective stroke of lever.

Automatic on Raising and Lowering

Each

No. 24—Capacity 15 Tons, Height 23 in., Lift 13 in., Round Socket, 6 ft. Round Pole, Weight 87 Lbs.....**$38.00**

SIMPLEX AUTOMOBILE

No. 36

A Sturdy and Powerful Jack for light motor cars. Finest malleable construction. Working parts few all carefully machined. Steel spring case equipped with genuine piano wire. Pawls operate perpendicularly. Jack works easily, rapidly, positively. Furnished with 18 in. Flat Steel Lever Handle

Each

No. 36—Capacity ¾ Ton, Height 9⅝ in., Lift 6½ in., Weight Each 6 Lbs **$3 00**

JACKS

SIMPLEX AUTOMOBILE

No. 39—Balloon Type

A Practical and Efficient Jack for handling Balloon Tired cars. Adjustable Shoe permits a Lifting Range from 3½ to 11½ in. Malleable Iron construction, except Rack Bar which is Steel and Drop Forged Spring Case.

Equipped with a 36 in. Folding Steel Lever Bar.

Each

No. 39—Capacity 1 Ton, Height 11½ in., Lift 8 in., Lowest Point of Shoe 3½ in. Weight 10 Lbs...**$3 35**

No. 41

The popular size for medium and heavy pleasure cars. The strongest, safest, most dependable Jack of its capacity on the market Every working part is a Drop Steel Forging, carefully machined. Three points to lift, cap, lower foot and steel removable rotating shoe. Powerful, quick and easy action, 14 in Steel Lever Bar included.

Double Acting

Each

No. 41—Capacity 1½ Tons, Height 10 in., Lift 7 in. Weight 13 Lbs .**$5 80**

No. 42

Heavier Model, similar in design and construction to No. 41. Standard of Finest Malleable Iron. Every working part Drop Forged Steel. Machine Cut Pawls and Rack Bar insure smooth, positive action. A powerful, dependable Jack throughout. Used as standard equipment by many large motor truck makers. Operates on up and down stroke of 18 in. Steel Lever Bar

Each

No. 42 Capacity 2 Tons, Height 11½ in., Lift 8½ in , Weight 15 Lbs. **$7 25**

No. 43

Built for the heaviest pleasure cars and heavy trucks. Malleable Iron Frame and Drop Forged Steel Rack Bar, Pawls and Bearings enable this Jack to stand hard usage and long wear. Short Stroke, Long Lever Bar, Machine Cut Pawls and Track Bar insure easy, positive dependable action under heaviest load. Detachable Shoe gives additional and convenient lifting point. Supplied with 24 in Steel Lever Bar.

Double Acting

Each

No. 43—Capacity 3 Tons, Height 13 in., Lift 10 in., Weight Boxed 17 Lbs..**$9.35**

No. 44

A Sturdy, Powerful 4 Ton Truck Jack, embodying the standard high grade dependable, Simplex design and construction. Steel Pawls, Rack Bar and Bearings—Short Stroke, Long Steel Lever Bar, insure easy, Positive lifting under heavy load. Malleable Iron Standard—Strongly reinforced where needed. Rotating Cap enables Detachable Shoe to be used in any position.

Each

No. 44—Capacity 4 Tons, Height 13¼ in., Height with Shoe 17¾ in., Lift 9 in., Weight 23 Lbs.....**$11.00**

Hupmobile Eight Enlarged Throughout

ALONG with the six-cylinder model announced a few months ago, Hupmobile will introduce at the New York Show a larger, finer and heavier eight-cylinder model. Basically the new car is a reproduction of the popular eight-cylinder model which has been on the market for exactly one year, only made heavier to accommodate larger and more refined bodies. Prices will not be announced until later in the week but it is understood that they will be above those on the previous eight-cylinder edition.

The most important changes from a mechanical standpoint are the enlarging of the engine and an increase in the wheelbase length. By increasing the bore from 2⅞ in. to 3 in. the S. A. E. hp. rating is now 28.8 instead of 26.4, at the same time the hp. maximum has been increased to 67 from 60. While the diameter of the valves is the same, they have been given a 1/32 increase lift to provide more power for the engine. The spark plugs are now placed directly over the inlet valves. Another important change on the engine is the adoption of the latest type of Delco ignition unit which is of the double breaker type giving a hotter spark at high speeds. Improvements have also been made in the cooling system.

On account of the increased engine power the diameter of the clutch plate has been increased by 1 in. to 9¾ in. While the ratio of 4.9 to 1 remains the same the axle shafts, pinion and ring gears and bearings have been made heavier and larger. In addition the pinion mounting has been changed from the straddle to the overhung type.

There has been a 6¾ in. increase in wheelbase length so that the new wheelbase is 125 in. total. This has enabled the bodies to be made larger and the engine hood and cowl longer. In addition to increasing the capacity of the gasoline tank starting and lighting equipment has been changed to Auto-Lite system.

Five body styles will make up the line; these will be sedan, Berline sedan, two-passenger coupe with rumble seat, seven-passenger touring and five-passenger touring.

In addition to the usual line of equipment, an electric clock has been added. Standard equipment will consist besides of front and rear bumpers.

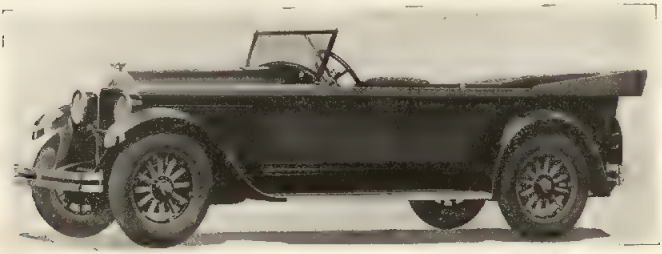
Wills Sainte Claire Show New Bodies

ON the present six-cylinder chassis, Wills Sainte Claire, Inc., are introducing at the New York Show a new line of improved and more rakish bodies. The designs of the former "Vogue" series will now be the standard of the line. Slight chassis changes including a water agitator mounted in right front engine leg and driven by a vee belt from crankshaft and the addition of a thermostat integral with top outlet on engine jackets and 6 blade fan are also incorporated.

In line with lengthening all bodies by 3 in., the radiator has been increased in height 3 in. and all corners have a larger radius. The general appearance of the bodies has been greatly enhanced by the adoption of one piece full crowned type of fenders and the addition of a considerably increased tone of angularity to the top of the hood and nickel-plated radiator.

Included in the list price will be special Biflex bumpers, spare tire equipment and the Wills radiator ornament. Under the hood of the engine an Imco autopulse magnetic fuel pump has been adopted.

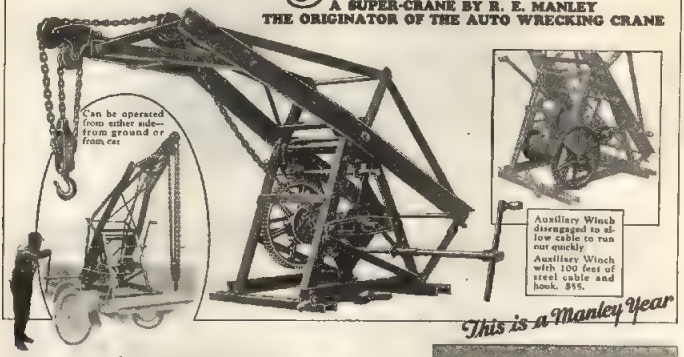
The eight cylinder model is continued without mechanical changes.



Hupmobile seven-passenger phaeton with lowerable top

New Manley 3½ Ton Wrecking Crane $135

A SUPER-CRANE BY R. E. MANLEY
THE ORIGINATOR OF THE AUTO WRECKING CRANE



Can be operated from either side—from ground or from car
Auxiliary Winch disengaged to allow cable to run out quickly
Auxiliary Winch with 100 feet of steel cable and hook. $55.

This is a Manley Year

MANLEY CRANE No. 107

All the points of superiority of the famous No. 101 2¾-Ton Manley Crane are retained in the New No. 107 Manley 3½-Ton Crane. Additional features have been added for greater efficiency of operation, increased speed, greater pulling capacity and heavier work.

1. Beam is double trussed *steel channels*
2. The top extension is trussed for strength
3. Beam pivoted in saddle on heavy king pin.
4. Has full swiveling nose
5. Tilting and balanced beam distributes load on *chassis*
6. Tilting beam adjustable for height and overhang.
7. Deep overhang allows a complete car to be swung under beam.
8. Gearing built in saddle
9. Single reduction gears with triple chain. Can be used with single, double or triple chain as desired.
10. Pawls on gears provided with positive lock
11. Hoisting drum may be disengaged to run free when pulling out chain to make hitch.
12. Hoisting drum may be used as winch.
13. Gear ratio greatly increased. Will lift more with less effort
14. Ground operated from either side
15. Platform operated from either side
16. Ground operating position low and ahead of fender.
17. Simple, Efficient, Compact, Easy to Install.

All the Manley Wrecking Cranes are Simple in design—Tremendously Strong—Efficient—Easy and Convenient to operate—Compact and Easy to Install.

Watch for them on the road. There are more Manley's than any other make.

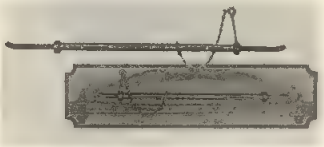
Bonney Wrench Kit

Bonney Forge and Tool Works
Allentown, Pa.

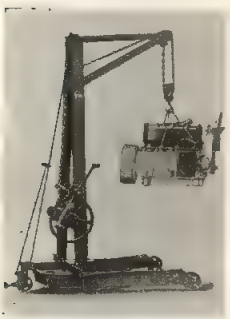
A WRENCH set consisting of three of the most popular double end wrenches, contained in a leatherette roll. This assortment is known as sample Kit No. 1 and the three wrenches it contains are made of chrome vanadium steel for use on the following S.A.E. bolts and nuts: 3/16, ¼, 5/16, ⅜, ½ and 9/16 in. These wrenches are guaranteed to strip the thread of any U.S.S. or S.A.E. nut or break the bolt before the jaws will spread. List price, $2.50.



Stevens Spring Spreader

Stevens & Co., New York City

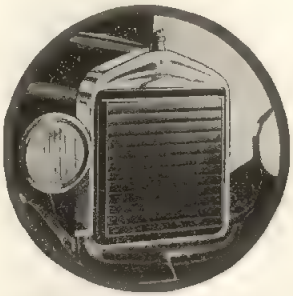
HERE is an effective tool that lengthens the springs to just the right point so that shackles and bolts slip easily in place. Screw capstans at either end afford positive and powerful action. Pins in the slots keep the ends from turning and the curved end gives the tool the proper grip. The capstan rod is fastened to the tool with a chain to prevent loss. Weight 5¼ lbs. Price, $3.50.



Manley Portable Floor Cranes

Manley Manufacturing Company
York, Pa.

THESE cranes have a super-structure of steel of cantilever bridge design. They are made in six models, having a capacity of from ½ to 2 tons and a lift from the floor of from 6 to 7½ ft. The minimum base width is 32 in. on the one-half ton crane and 40 in. on the two ton. Weight varies from 300 to 777 lbs. Price for the one-half ton, $75. For the one ton, $100. (Model 61). Two ton, Model 72, $140.



Vernay All-Year-Round Shutter

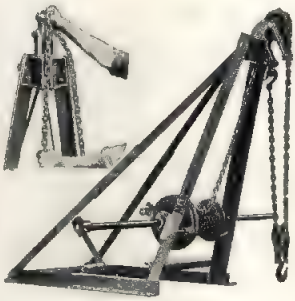
Laminated Shim Co., Inc.
Long Island City, N. Y.

THIS all metal radiator shutter is featured by the construction which it is claimed affords more radiation surface when the vanes are open than any other. Due to this fact, it is not necessary to remove the shutter at the coming of warm weather. The vanes are pressed steel enameled and carried on two bearing rods of one-piece construction, made of brass. The layout is such that dirt cannot enter and the entire actuating mechanism exposed to the elements, with exception of the vanes and casing, is made of brass. Installation of the control element is done without boring holes as the metal handle clamps to the dash. There are six self locking adjustment positions. Shipping weight is 5¼ lbs. List price for the Ford size, $6.50.

Speed Up Wreck Handling!

Use These Special Marquette Time Savers

HERE'S the crane that saves hundreds of dollars in time costs! Its exclusive epicyclic gearing gives the operator the tremendous leverage of 174 to 1—enables him to handle any wreck quickly and easily.



MARQUETTE
Reg. U. S. Pat. Office

Heavy Duty Crane

One man handles the wreck from the ground, on either side. *The safe crane*—12 teeth always in mesh instead of two.

Universal swivel head, pulls at any angle. Chain can be dropped through for a direct pull off the drum. *Get the crane with these necessary features!*

Order From Your Jobber

MARQUETTE Spacer Tow Bars

Makes two cars travel as a unit—no jerks or sideway. Provides absolute control. Allows towing wreck lower down. Has 27 inch arms consisting of steel pipes telescoped together, which can be extended to 37 inches. Bars fit in "T" slots—quickly put on or removed. *A necessity in wrecking equipment.*

MARQUETTE Steering Gear Tow Lock

For towing wrecked cars backwards. Holds front wheels in line. Put on or off in 20 seconds with set-screw; no keys or bolts. Made of crucible steel, heat treated. *Order from your jobber.*

MARQUETTE MFG. CO.

St. Paul, Minn.

Why swap troubles?

No repairman who appreciates the value of his customers' good will wants to yank one set of bad faults out of a car only to install another set equally bad.

Yet you may be doing just that when you replace a plain tube carburetor with an expanding type, or vice versa.

For both types have some bad qualities. The first is apt to give too lean a mixture for idling and at low speed, the second, too lean a mixture at high speed.

Only in the New Rayfield are combined the *desirable* features of both types. Only the Rayfield provides the correct mixture always — for starting, idling, pick-up, high speed and average speed.

When a car is brought to you with carburetor trouble, you can slap a Rayfield on the manifold—set the two adjustment screws—and send your customer on his way rejoicing.

If your jobber can't supply you write us for prices of individual outfits packed complete to the last cotter pin, ready to install. We will send you, free, a handsome wall chart showing sectional views in color of the New Rayfield at three throttle positions and describing fully how it functions. This chart will help you sell.

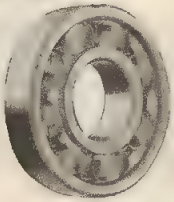
Strom BALL BEARINGS

Marlin-Rockwell Corp., Successor to
STROM BALL BEARING MFG. CO.
4550 Palmer Street, Chicago, Ill.



Super-Strom Ball Bearings have been selected as standard equipment in the New Stutz Eight.

As in other premier cars of America, they will contribute much to the car's smoothness, quietness and dependability of operation.

For they are bearings of exceptional accuracy and proved longer life—they greatly reduce vibration, they minimize friction, they wear indefinitely and require no adjustment.

Deep-grooved and without filling slots, Super-Strom Ball Bearings offer increased load-carrying capacity by the use of more or larger balls.

Write for catalog and further information.

Tone— makes this horn truly . . . *"The voice of the fine car"*

MUSICAL, yet positive in its warning—clear, vibrant, penetrating—the tone of the *Original* Bosch Horn is unlike that of any other warning signal.

The *Original* Bosch Horn is of the vibratory type. Its action is lastingly trouble-proof. No motor to wear out or give trouble. It is in every way up to the high standard of *Original* Bosch.

No wonder owners of fine motor cars are buying the *Original* Bosch Horn, not only to replace worn-out equipment but often to put on the new car in place of the horn they find there.

Our dealers everywhere are finding this horn a quick selling and profitable item. If you are not already carrying it, write us for details of selling plan. You have the opportunity to do a neat business if you act quickly. Address: Robert Bosch Magneto Company, Inc., 111c West 64th Street, New York. Chicago Branch: 1302 South Wabash Avenue.

NOTE

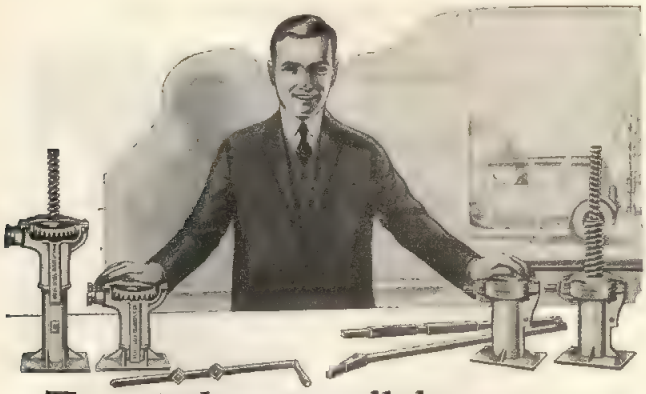
NO FINER tribute can be paid the *Original* Bosch Horn than the way it is being imitated. But remember the *Original* Bosch Horn owes its popularity to the high standard of materials and workmanship which character ze it and all *Original* Bosch products.

To give your customers this quality, you must give them genuine *Original* Bosch products. Look for the name Robert Bosch and the trademark on every *Original* Bosch product. They are your guaranty of *Original* Bosch quality as known the world over since 1887.

The Original Bosch

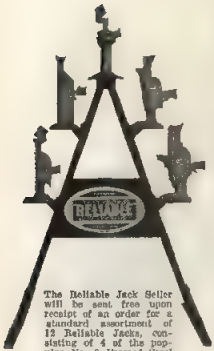
ROBERT · BOSCH · MAGNETO · COMPANY · INC.

NO CONNECTION WHATSOEVER WITH THE AMERICAN BOSCH MAGNETO CORPORATION



These jacks meet all the demand for Balloon Tire Jacks

For all passenger cars, sell the No. 7 or the No. 15.
For all heavy pneumatic tired trucks, sell the No. 12.
For all types of buses, sell the No. 18.



The Reliable Jack Seller will be sent free upon receipt of an order for a standard assortment of 12 Reliable Jacks, consisting of 4 of the popular No. 9 Pressed Steel Jacks, 2 each of the No. 5-A Ball Bearing Jack, the No. 10 Jack with flip cap, the No. 11 Jack with long handle, and the No. 96 Jack with adjustable foot.

Order One Now!

Now there are Reliable Balloon Tire Jacks for all kinds of passenger cars, trucks and buses. Any dealer stocking only these four Reliable Jacks can meet the demands of all of his customers.

The No. 7 and No. 15 Reliables have exclusive patented features: (1) double screws which work at the same time (twice as fast as ordinary jacks). (2) long folding handles with semi-universal joint and (3) a full 10-inch lift, starting at 6¾ inches.

This last feature makes these jacks just as satisfactory on regular tires as on balloon tires. That means you can sell these jacks to your customers who have regular tires as well as to those customers who have balloon tires.

The new No. 12 Reliable is designed for use on heavy trucks (up to 5 tons) equipped with pneumatic tires. A low starting height of eight inches and a 10-inch lift insure ample clearance for changing tires.

The No. 18 Reliable is designed to meet the requirements of all types of buses. The long handle avoids the low overhanging bus body and enables the operator to place the jack and operate it from behind the bus.

Stock up with a few of these four Reliables. Their exclusive features sell them on sight at a good profit. Your jobber will gladly fill your order.

"Dependable in Service"

New Engine, New Bodies on Nash

THE addition of three new body styles and a new engine mounted on the Advanced six chassis were announced by Nash at the New York Show. The Advanced six models also now carry an air cleaner, oil filter, and gasoline filter.

The new engine which is said to possess 25 per cent more power and which gives it is claimed a 23 per cent faster acceleration to the Advanced line is of the characteristic Nash overhead valve type having six cylinders with a bore and stroke of 3 7/16 in. by 5 in. The Purolator filter is installed integral with one of the engine pushrod covers, and the oil filler neck has been relocated.

The crankshaft which is drilled for pressure lubrication is supported by seven main bearings instead of the three formerly used. The connecting rod lower bearings have the same length and diameter as those in the old engine and although the main crankshaft journals are of different length than on the former three bearing shaft the diameter remains the same. Because it was developed fundamentally to impart greater performance for the closed type bodies, the new engine is called the "Enclosed Car Motor." No changes have been made on the Special six engine or other chassis units.

The new bodies include a four-door sedan and a four-passenger roadster on the Advanced chassis of 121 in. wheelbase and a coupe on the Special six chassis.

Prices of the new bodies are as follows:

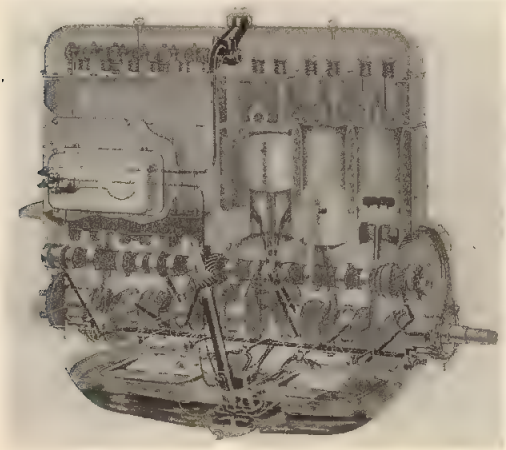
Advanced six roadster	$1475
Advanced 4-door sedan	1626
Special six coupe	1165

The new bodies are of Nash-Seaman design and construction of the composite wood and steel type.

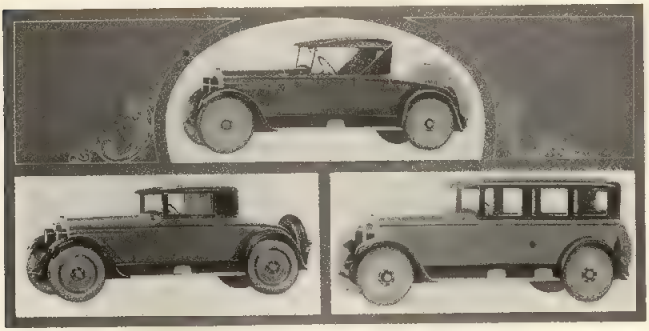
The four-door sedan has an exterior finish color scheme of lilac-grey with a contrasting gold stripe and black superstructure and running gear. The interior is upholstered in genuine mohair with metal trim silver finished in a colonial pattern.

The characteristic Nash double belt merging into a single moulding from the front of windshield to radiator is maintained.

The new roadster is finished in a grey-green with a single belt line moulding. Both the driver's compartment and rumble seat are upholstered in a duo-tone green leather. As on the four-door sedan the roadster carries a gold stripe with black top and running gear, and the general im-



New Nash Advanced Six engine which carries a seven bearing crankshaft. The oil filler spout is located at top of valve cover so as to be out of the road dust zone, and the oil filter is on the rear pushrod cover plate. The bore has been increased from 3¼ in. to 3 7/16 in.



New Nash Bodies. The four door sedan and roadster on Advanced Six and Coupe on Special Six chassis

pression of length is enhanced by angular mounting of the windshield.

The coupe on the Special six chassis has the body and wheels in a deep grey-green with black fenders and running gear. The belt line on this model accentuates the impression of length and lowness which is further carried out by the lines of the rear deck under which is provided a very roomy luggage compartment. The upholstery on the coupe is leather of the same type and shade as used in the roadster of the Advanced line.

All of the bodies carry spare tires at the rear and are equipped with four-wheel brakes and five disk wheels at no extra cost.

Davis Announces Two New Sixes

The George W. Davis Motor Car Co. has produced two new six cylinder models known as No. 92 and No. 93 which supersede the models No. 91 and No. 90 respectively. The former is a complete line of open and closed cars while the latter, a light six, is at present produced in one model, a four-door sedan at $1285, finished in polished Plymouth blue Duco. All the bodies on the No. 92 chassis are also finished in Duco. A choice of Brewster green or Algerian blue is provided. The prices are as follows:

Imperial sedan	$1795
Sedan	1595
Man O'War four-passenger roadster	1495
Four-passenger Legionnaire	1495
Five-passenger touring phaeton	1395

A Continental engine, type 8U, is used on the model 92. This is a 3¼ by 4½ in. six rated at 25.31 hp. and developing 56.5 hp. at 2600 r. p. m. as compared with the 3⅝ by 4½ in. engine used in the former model. A Lanchester dampener is fitted to the seven bearing crankshaft. An adjustable silent chain drives the generator and distributor while the fan belt drives the water pump. The lubrication is full pressure feed.

Stromberg carburetor and Delco electrical equipment are used as in the past. Ross, Borg and Beck and Warner continue to furnish the steering gear, clutch and transmission, while the axles have been changed to Columbia. The rear axle reduction is now 4.9 to 1, compared with 5.1 to 1 in the previous model.

The light six model No. 93 has a wheelbase of 109 in. or 6 in. shorter than the old model 90. The chassis is powered by a 4-bearing Continental engine 2¾ in. by 4¾ in., rated at 18.5 hp., S. A. E. developing 44 hp. at maximum speed. The engine has a ⅜ in. smaller bore and a ½ in. longer stroke than the previous model. The engine is so mounted as to make a straight line drive to the rear axle. The driving torque and propulsion are taken by the rear springs. A tubular cross member is used at the center of the frame for stiffening.

Warner transmission and Ross cam and lever steering gear are used as before while the electrical equipment and axles have been changed to Auto-Lite and Columbia respectively.

Lockheed hydraulic four-wheel brakes, Tuare disc wheels and full balloon tires are standard equipment.

Radiola 30, complete $575. For use on 50 to 60 cycle, 110 volt A.C. lighting circuit.

Week-end evenings at the Wainrights'

Indoors, they are dancing. Outdoors, heard through the open French windows, are the sounds of summer evening. Guests wander through the garden and back to dance, chatting gaily. Yet the music rings out clearly through the buzz of talk. With a Radiola 30 you have the full volume of a twenty piece orchestra, if you want it. It is the success of the week-end party!

Inside a fine cabinet, the unsurpassed eight tube Radiola super-heterodyne. The power speaker that can give you, undistorted, almost any volume of music you can want. And a power supply device that does away with all batteries.

Plug in on the house current. Call in the station you want with a single finger's tuning. And add to the attraction of your home the music of orchestras that in past years played only in the great hotels—the singing of artists who once sang only on the concert stage. A Radiola 30 transports them to you—*real!*

Radiola 28, with eight Radiotrons, $260.
RCA Loudspeaker 104, complete, $275
A.C. Package, for adapting Radiola ... for use without batteries. . . . . $35.

The Warren-Manleys give a barn dance

Radiola 28

BY DAY a barn—but tonight the scene of a social revel! A full city orchestra jazzes its swinging rhythms. And between dances, someone tunes in to a concert, or a whole vaudeville show of jokes and songs.

The music reaches to the farthest corner of the great barn. Yet it is clear and true. The songs reach the couples who sit outside in the shadows by the lake. And the voices are full and *real*. The Radiola gives a summer function new possibilities!

It is a Radiola 28—a super-heterodyne with single-finger control. And the power Loudspeaker 104—adapted to do away with all the batteries of the set.

This combination of Radiola and power speaker brings to music at home new meaning, new variety, new beauty. And it has a reserve of power to fill a large hall—to fill it with music that keeps its faithfulness to tone as you turn it up to great volume. With a Radiola 28, the gaieties of *every* season gain new joys!

It's a GIRL!

THE NEW MEDITERRANEAN CRUISE

From New York, February 26, 1927

A Voyage of Discovery

A voyage to places new to the de luxe cruise itinerary, but ages-old in historic interest and romantic beauty. Shrines and Capitals of "the Glory that was Greece"—Delos, birthplace of Apollo—Tiryns, mighty outpost of the Sea Kings—Crete of the Labyrinth and Minotaur—Olympia, of the Sacred Games—Delphi, home of the Oracle—these will be among the bright particular features of this fascinating 70-day cruise. Also the beautiful Dalmatian Riviera, and, besides these, all the "standard" cruise ports in Madeira, North Africa, Malta, Palestine, Egypt, Turkey, Greece, Italy, Sicily, Monaco, Gibraltar.

Ideal Time for the Cruise

Avoiding the dreary end of winter at home and visiting the Mediterranean at the time of maximum beauty and enjoyment —by the splendid cruising steamer ORCA. Rates, including shore excursions, from $875. Delightful optional tours.

Second Great African Cruise

From New York, January 15, 1927

A Voyage of Adventure

To South and East Africa, where civilization and the jungle meet. Also West Indies, South America, Egypt and Europe—101 days First great cruise by a motorship — the ASTURIAS, world's most luxurious liner. Rates, including excursions in various countries visited, from $1650.

A School *for* YOUNGER GIRLS

Rydal, Junior Department of the Ogontz School

A delightful home school where teachers with the mother-care instinct and a knowledge of child development are able to give your little daughter the right stimulus. If she has special talent, it is cultivated; if no talent has as yet manifested itself, we search for the child's greatest need. Parents going abroad find in Rydal the model, refined school home for little girls from 9-14.

Ours is a large country place in the beautiful Rydal hill country, 25 minutes from Philadelphia. New residence ready October 1st. The school building is attractive and modern, with bright, sunshiny classrooms.

School work is arranged according to the standards of the Philadelphia public schools. French is taught under native teachers, piano practice is supervised. Play and games under a physical training director. Horse-back riding, swimming, skating and coasting. Splendid health results. Catalog.

Look for this trademark on the back of the goods

Style illustrated is reproduction of No. R4142 (⅛ actual size)

The price you pay, or the time it lasts?

SANITAS MODERN WALL COVERING

Styles for every room in the house

Plain and Pastel Flat Finish
tints that can be hung as they come, or stenciled, frescoed, or Tiffany blended.

Decorative Flat Finish
conventional and foliage patterns, neutral toned designs of vague formations, stripes, mottled effects, and reproductions of tapestry, grass-cloth, leather and various fabrics.

Brocade and Metallic Finishes
in embossed effects for panel treatments and all-over wall treatments.

Enamel Finish
plain colors, tile effects and decorative patterns, for kitchens, bathrooms, etc.

HOW much you pay to decorate your walls, or the time and thought you give the subject, isn't half so important as how long it will be before you have to do it all over again. The cost of upkeep and the fuss and muss of redecorating are well worth thinking about.

But suppose you cover your walls beautifully now, so that there won't be any upkeep or redecorating to think about for many years, say a dozen or more? Better, isn't it?

And that is just what Sanitas covered walls mean.

Think of applying several coats of fine, durable oil paint all at once and having them dry immediately—no waiting between. That is what hanging Sanitas really does.

Imagine a wall covering so strong in itself that it not only doesn't crack, tear, peel, or blister, but also keeps the plaster from cracking or small cracks from spreading. That's the way the cloth back of Sanitas does protect the walls and preserve the wall covering.

Put Sanitas to the severest test—try it in the children's room. Dirt and finger marks cannot harm it. Can be kept clean and fresh for years, just by wiping occasionally with a damp cloth.

Sanitas is an investment, not an expense.

See the new Sanitas styles at your decorator's, now.
Write to us for samples and illustrated booklet.

Shaped in Steel — *Homes Can be Fireproof too!*

From roof to basement, Sheet Steel makes possible homes as fireproof as the most modern office building. And these homes combine fire safety with beauty. Walls can have an endless variety of color and texture. Roofs may be had in designs that conform with every type of architecture. Sparks on roofs and lightning, two of the greatest fire hazards, are eliminated by the use of a well-grounded steel roof. Metal lumber gives framing that cannot burn. Walls of plaster on expanded metal lath, or stucco mesh, will stop the hottest flame. All the way through the house, for doors, for windows, for closets, for kitchen equipment and household furniture, Sheet Steel may be used to make your home safe from fire. Even the hazard of stove-heating has been removed by heating systems of Sheet Steel that provide both the even heat and proper humidity for health and happiness.

For complete information and an interesting booklet, THE SERVICE OF SHEET STEEL TO THE PUBLIC, *address the* SHEET STEEL TRADE EXTENSION COMMITTEE, OLIVER BUILDING, PITTSBURGH, PENNSYLVANIA.

MASTER TEC BRAND

This trade-mark stenciled on galvanized Sheet Steel is definite insurance to the buyer that every sheet so branded is of prime quality—full weight for the gauge stamped on the sheet—never less than 28 gauge—and that the galvanizing is of full weight and quality established by the Sheet Steel Trade Extension Committee specification.

The NEW STUTZ
with SAFETY CHASSIS

The safest car now made even safer

WE now announce NEW STUTZ models, including seven-passenger cars, in which *every window*, as well as windshield, is of special *safety-glass*.

This eliminates the hazard of injury from flying shattered glass. These NEW STUTZ models are the first cars ever regularly equipped with safety-glass all around.

The world's safest automobile is now made still safer for its occupants.

No other car has this combination of safety features:

Safety-glass in windshield and all windows. Narrow, clear-vision front corner-posts.

Frame of unequalled strength and rigidity, with integral steel running-boards ("side-bumpers").

Perfect road balance; elimination of side-sway achieved by scientific frame and spring arrangement. Stabilators and long, low-rate flat springs co-ordinated for ideal action.

Unparalleled stability, gained by a radical lowering of the "center of mass." This lowering of the center of mass is achieved by The NEW STUTZ worm-gear drive, manufactured by Timken.

Hydrostatic four-wheel brakes by Timken; greatly increased effective braking surface, with perfect equalization of braking energy at all points on each wheel. Non-leaking, no adjusting; quick, even deceleration—no discomfort to passengers, no skidding, no swerving, no side-sway.

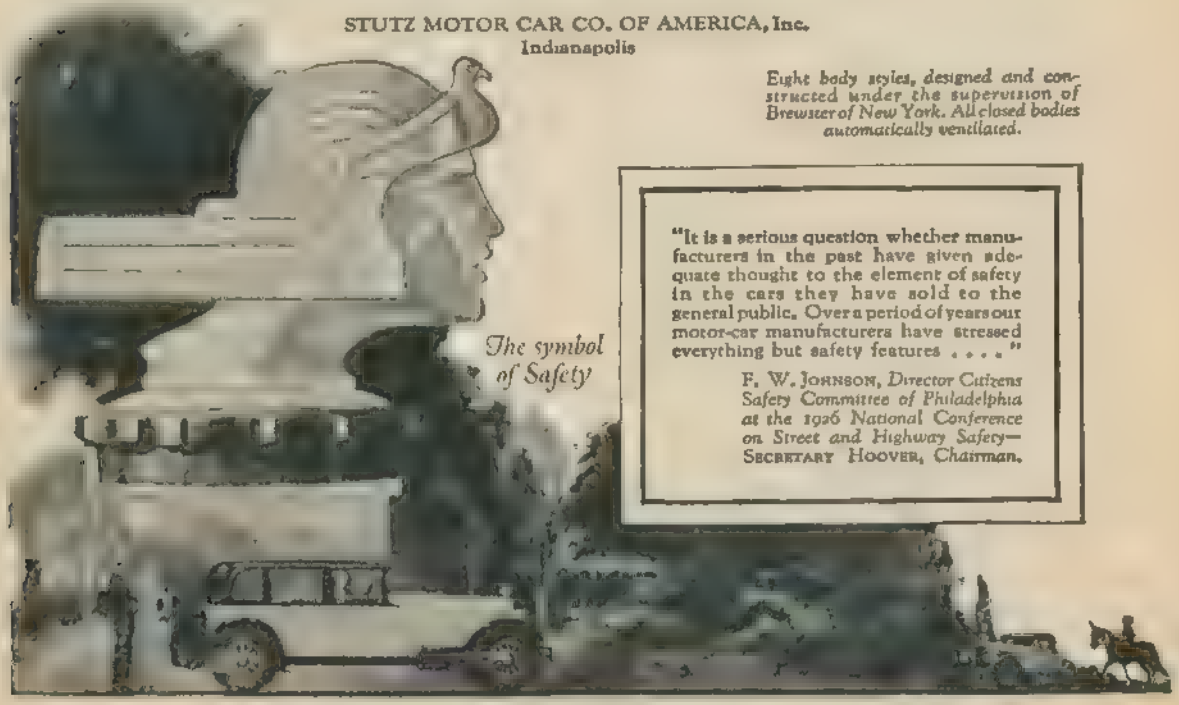
Instant acceleration from 10 to 50 miles per hour in less than 18 seconds; an alertness that quickly pulls the car out of tight places. And speed adequate for all occasions.

Underwriters' Class A rating on both fire and theft. Permanently protected, at no cost to the car owner, by The Fedco Number Plate System in co-operation with the William J. Burns International Detective Agency.

See The NEW STUTZ cars with safety-glass all around. In addition to their exclusive safety features, they have a custom-like smartness of body design and the utmost luxury of appointments.

STUTZ MOTOR CAR CO. OF AMERICA, Inc.
Indianapolis

Eight body styles, designed and constructed under the supervision of Brewster of New York. All closed bodies automatically ventilated.



"It is a serious question whether manufacturers in the past have given adequate thought to the element of safety in the cars they have sold to the general public. Over a period of years our motor-car manufacturers have stressed everything but safety features . . . . "

F. W. JOHNSON, *Director Citizens Safety Committee of Philadelphia at the 1926 National Conference on Street and Highway Safety*—SECRETARY HOOVER, *Chairman.*

Mention of Harper's Magazine is the best introduction to our advertisers

Traffic experts acclaim this adoption of Safety Glass

ALL traffic authorities agree that the general adoption of safety-glass all around as regular equipment in passenger automobiles, now pioneered by and exclusive to the New SAFETY STUTZ, will greatly reduce motoring injuries.

From the very beginning, every New STUTZ car has had a safety-glass windshield. Then the builders of this surpassingly safe automobile, noting the increasing frequency of newspaper reports chronicling damage from flying glass, decided that the New SAFETY STUTZ should have safety-glass *all around.*

And so, safety-glass has been put into every window, and window-ventilator, every windshield, and windshield-wing of all New SAFETY STUTZ models.

This voluntary adoption of safety-glass, at no additional expense to the car-owner, means that the ultimate step has been taken by the builders of the New SAFETY STUTZ to provide the safest private passenger automobile ever built. And this safety feature is obtainable in no car other than the New SAFETY STUTZ.

The safety-glass feature is naturally pioneered by the designers who were first to radically lower the center of mass weight and so produce an automobile of incomparable stability; who were first to adopt the improved hydrostatic four-wheel brakes developed by Timken; who made their frame the strongest and most rigid built, with integral steel running-boards or "side-bumpers"; who brought steel into the construction of their bodies to give maximum strength and narrow, clear-visioned front corner-posts.

And the builders of the New SAFETY STUTZ now announce the latest development in the Fedco System of Theft Prevention and Detection. Additional protection is now given each owner, all without cost to him, by indemnity against loss of use resulting from theft, at the rate of five dollars per day, up to thirty days.

New SAFETY STUTZ models with their exclusive features are now on display everywhere. See the New SAFETY STUTZ, ride in it, drive it.

(Telegraphed from Lake City, Florida)

Just arrived after driving fifteen hundred miles in my NEW STUTZ Vertical Eight Brougham, which I took off your showroom floor in Chicago one week ago today. The performance of this car over Kentucky and Tennessee Mountains on high without shifting gears and through mud and on speedways I consider marvelous. Have had absolutely no trouble whatever and car most satisfactory in every way

MRS. ELIZABETH FULLER

The Cruises Supreme

SEEING THE OLD WORLD
in a new way

THE Living World is, after all, the Greatest Show on Earth. Life's incessant Parade is a Moving Picture equalled by no other. The Human Drama is the first of human interests.

Color, history, romance and strange beauty fill the days and nights of nearly half a year on this supremely-significant voyage over the changing face of a world.

Intelligently directed travel is the greatest University. It informs the mind, cultivates the taste, stimulates all the senses and imparts to Life infinite interest and enchanting recollections.

A rare genius once said: *"It is through Memory we know ourselves; without Memory it might be said we have hardly lived at all . . ."* Enrich your Memory by travelling *Round the World* under the guidance of the Dean of World-Travel Leaders. *Cook's* knowledge of the World and service to its guests have been perfected by generations of study and experience.

The South Sea Islands, New Zealand, Tasmania, Australia, the East Indies, Ceylon, South and East Africa and South America—a major voyage of life-long interest.

The Famous Cunarder
"FRANCONIA"
has again been chartered and will sail

From New York January 12th and from Los Angeles January 28th, returning to New York June 2nd, 1927

One of the 35 Mikado type locomotives built by American Locomotive Company for The Missouri Pacific Railroad Company.

How The Missouri Pacific Guards Against Rod and Frame Failures

When The Missouri Pacific ordered thirty-five Mikado type locomotives from American Locomotive Company, Carbon-Vanadium Steel was specified for main rods and side rods, and Vanadium Cast Steel was chosen for the main engine frames.

Thus, failures in these rods and frames were guarded against, for Carbon-Vanadium Forgings have 50% greater effective strength than carbon steel forgings, while Vanadium Steel Castings are 35% higher in effective strength than ordinary steel castings.

If you would guard against forging and casting failures in your locomotives, specify Carbon-Vanadium Steel for forgings, and Vanadium Cast Steel for frames and other castings—for replacements and new power.

Complete data on Vanadium Locomotive Steels is always available to interested railroad officials.

- Mid. Main Rod Front Stub Bearing Blocks and Liner

A new development in locomotive wheel arrangement was effected when American Locomotive Company delivered the 4-10-2 type three-cylinder locomotive No. 8000 to the Union Pacific.

Known as the "Overland" type, this three cylinder locomotive has been operated for some time on the western end of the road, and its performance is also to be carefully observed on all other lines of the Union Pacific System.

No matter how severe the service, the forgings of this new locomotive development can be depended upon to meet the requirements, for all of the locomotive's important forgings are made of Carbon-Vanadium Steel.

With minimum elastic limit of 60,000 pounds, and tensile strength of 90,000 pounds, Carbon-Vanadium Forgings have 50% greater effective strength than carbon steel forgings. In addition, Carbon-Vanadium Forgings are higher in shock resisting qualities and fatigue resistance.

Write for data, on Carbon-Vanadium applications on other recent developments in locomotive design.
